Spend the summer writing your own stories in Life Writing. In this class, we'll look at several genres of life writing including memoir, travel writing, and auto-ethnography. We'll read writers like Amy Tan, David Foster Wallace, and Cheryl Strayed, examining at how they write their own true stories, so that you

can write nonfiction tales of your life. You'll write several short to medium creative essays, while also engaging in class wide discussions of your work and the work of published authors.

The program will focus on building skills necessary for designing and implementing sustainable financing and governance systems for water and other environmental projects. Program will include a mix of classroom sessions, field visits, guest lectures, and service learning project work. This course looks at the difficult 'how to pay' questions related to water resources management and other environmental services by examining the strategies, systems, and tools that societies, governments, and communities use to pay for environmental programs and services.

This course, traditionally taught at UNC, is open to graduate students, recent graduates, and select advanced undergraduates. Past course participants have included students from the Department of Environmental Sciences & Engineering, Public Administration, and the Department of City and Regional Planning. Program and course fees are currently being finalized, and are somewhat flexible. Program cost will depend on the number of course credits selected and service projects. Anticipated cost for UNC students with NC residency, excluding airfare: \$4,000 to \$6,000. There are substantial grants and funding options available through the Institute for the Study of the Americas, the Carolina Center for Public Service, and the School of Public Health.
