Hist 398: Kama Sutra: Love, Sex and Politics in Early India

In this course we will examine one of the most (in)famous Indian texts: The Kama Sutra. Although widely assumed in the West to be nothing more than a

catalogue of highly acrobatic sexual positions, this 4th Century text is actually a sophisticated guide for the courtly `man about town¿ to the intricacies of ancient Indian social relationships and the art of living well. Through a detailed study of this text and its key concerns - finding a partner, maintaining power in a marriage, committing adultery, living as or with a courtesan, using drugs¿and of course, the positions in sexual intercourse, this course will open a window onto the social, political and cultural history of early India, in which kama, or desire, was one of the four goals of human life. We will supplement our reading of this text discussing other primary sources from the period ¿ inscriptions, Sanskrit dramas, perfume recipes, legal and medical textbooks, art and architecture.

Hist 398: The Global 1970s

In many respects, the 1970s were the pivotal decade of the postwar era. Between the upheavals of 1968 and the resurgence of international tensions in 1979, the world underwent a series of dramatic changes, witnessing the rise and fall of superpower détente, two oil crises, the emergence of globalization, the rise of non-state actors, the explosion of concern about human rights and the environment, a political revolution in Iran, and an economic revolution in China. This undergraduate research seminar examines the hopes, fears, and turmoil of a period of fundamental transformation in global politics.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

Hist 398: Nazi Germany

This is a seminar on Nazi Germany, based on the documents and images available on the website of the German Historical Institute in Washington, DC. Topics covered are the Nazi seizure of power, the establishment of the dictatorship, Hitler's Blitzkrieg, the Holocaust and the ultimate German defeat. But there will also be time for discussion of social trends, economic patterns and cultural life. Students have to do one oral presentation of a key document and write a seminar paper, based on actual research as well as secondary literature.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

History 398: The Crusades

What were the crusades? Why did medieval Christians believe that violence could lead to salvation? What, if anything, is the legacy of the crusades for today? This Undergraduate Research Seminar will introduce students to the crusades in their medieval context, including the ¿numbered¿ crusades to the Holy Land, but also crusading in other regions of Europe, crusades against heretics, and antisemitism and the crusades. Generally speaking, the crusading movement will be considered within the wider framework of European spirituality, society, culture and political life. As a central component of this class, working in collaboration with the instructor and their peers, students will produce a work of original scholarship on a topic of their choosing relating to the crusades.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

History 398: My Hometown

My Hometown will complete historical research projects based on topics related to their hometowns. Hometown here is loosely defined, and can range from a choice of childhood home, ancestral or adopted hometown, or current residence. This course will use the theme of the Hometown to introduce students to historical research methodologies by encouraging them to deeply investigate a site with which they are already deeply familiar and presumably interested.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

History 398: Sin and Evil in Modern America

Are sin, evil, and Satan old-fashioned ideas--or are they alive and well? This seminar includes readings from history, theology, social commentary, literature, and more to examine American attitudes toward evil since the late 19th century. Students write an original research paper based on historical sources.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HNRS 325.001 | Dunlevie Honors Colloquium
W, 6:30-9:00pm. Instructor(s): Ritchie Kendall. Enrollment = 75.
This semester¿s colloquium will be a bit different from earlier incarnations. We will be organizing our eight lectures around our Morehead-Cain Alumni Visiting Distinguished Professor¿s month long visit to the Chapel Hill campus. Dr. John Lattanzio is an exobiologist from Monash University, Australia. He will be delivering four public talks on exobiology and the prospect of extraterrestrial life. We will use those talks as the core of the colloquium adding four lectures from our own faculty on topics such as extreme microorganisms on earth as a clue to what life on other planets might look like, laser wielding robots to search for extraterrestrial life, and how the search for life on other planets has been imagined in literature and on film.

This course approaches the impossibly seductive, permanently restless objects, stories, and ideas that comprise the effervescent landscape of East Asian youth culture. Because the ¿youth¿ euphemistically signals ¿popular¿ and vice versa, this course also examines the influence of young people on national societies and the rise of consumption and entertainment practices linked to the emergence of a distinct ¿youth culture¿ in the postwar period across the region. With this twin focus, the course first maps the terrain of popular culture and locates it within socio-historical contexts. Then we take on the task of understanding how popular culture permeates daily life, enlivens social discourse, shapes consumer desires, counters official or dominant narratives, and presents alternative spaces of imagination and play. As the global visibility of Asia¿s youth culture and its (media) products increases it is necessary that we also consider the intersection of pop culture with capitalism and transnational markets.
The course is organized around cultural events, commodities, and spaces¿films, technology, styles¿that also lead us into the labyrinth passages where history, gender, sexuality, government, war, nostalgia, capitalism, and youth all circulate¿bumping into each other, possessing and being possessed and all animating the (in)famous figures and figurations that travel across the landscape inhabited and created by youth. In our semester-long journey in this cute

Islam has been practiced in the Indian sub-continent since the 7th Century, and today, the nation states that comprise the geographical region of South Asia (India, Bangladesh, Pakistan, Maldives, Nepal and Sri Lanka) are home to the largest Muslim population in the world. And of course, India is also home to the major religious tradition of Hinduism. Contemporary India has been witness to a number of violent riots, which have been attributed to historical tensions between these two religious communities. This course traces the fascinating history of material, cultural and theological exchanges and conflicts between these two major religious groups. We will also constantly keep in mind the way in which modern commentators have selectively used the past to inform their understandings of the present. Taking a thematic approach, we will examine topics from the establishment of the first Islamic communities in South Asia until the 18th Century. No previous knowledge of South Asia or Islam is required.

3.0 CREDIT HOUR COURSE; FULFILLS HS-HISTORICAL ANALYSIS AND BN-BEYOND THE NORTH ATLANTIC REQUIREMENTS.

Whether your memories are comforting or exotic¿tasting dumplings while held in your grandmother¿s lap, or trying egg drop soup for the first time in your neighborhood restaurant¿it can be difficult to think about Chinese food as anything other than an experience to be savored. A historical approach, however, allows us to get a sense of how human relationships to food in China have changed dramatically over time, even as certain ideas about food continue to resonate. People the world over encounter Chinese culture for the first time through its food, but what exactly is it? How do we define its parameters, or explain its cultural, historical and social significance? In this course we will interrogate different ways in which to imagine, understand and define Chinese food. What ingredients or cooking methods constitute Chinese food? Which regions or geographical areas must be, should be, or could be included? What has been the role of food in traditional Chinese medicine? What are the agricultural roots of Chinese food; how has it been cultivated, grown and cooked? How have people celebrated food and drink, through poetry or nostalgic imagination? What about its excess and its lack, at imperial banquets or during periods of famine? How has food followed Chinese migrants around the world and how has it been adapted to local contexts? What would we consider to be the state of Chinese food today, in China and in transnational Chinese diasporas?

HNRS 353.003 | Introduction To Historical Geographic Information Systems
TR, 05:00-06:15. Instructor(s): Ryan Horne. Enrollment = 24.
This course examines geographic information systems from a historical / humanities perspective. Commonly abbreviated as HGIS, historical geographic information systems are increasingly used to collect, analyze, and display historical data that is related in some way to geography. HGIS is by its very nature highly collaborative and interdisciplinary, and requires the interested humanist to develop skills in specialized software, vocabulary, and new methodology. This course will introduce GIS for humanists, and will foster the skills and confidence needed to construct individual GIS projects.

3.0 CREDIT HOUR COURSE; FULFILLS HS-HISTORICAL ANALYSIS REQUIREMENT.

Dr. Horne received his PhD from the History Department at Chapel Hill in 2015. He earned his MA from University of California, Santa Barbara and a BA in
Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 16.

**Attributes:** PH- Philosophical and Moral Reasoning

This course deals with the theme of the transition from ancient to modern understanding of the essence of politics and will concentrate on selected plays of Shakespeare that profoundly dramatize that transformation (among them, Henry IV-Part I, Julius Caesar, King Lear, The Tempest). As the primary representatives of ancient thought, we shall read large portions of Aristotle¿s Nicomachean Ethics and Poetics. As the signal work in initiating modern thought, we shall read Machiavelli¿s Prince. This seminar will be conducted solely through conversation. Several essays, of varying length, will be required. There will also be an oral final examination. Students at all levels are welcome, and there are no prerequisites other than a willingness to read carefully and diligently.

INSTRUCTOR CONSENT REQUIRED. EMAIL DR. GOLDBERG AT lagoldbe@email.unc.edu).

W, 5:05-7:05pm. Instructor(s): Eunice Sahle. Enrollment = 15.
Student Instructors: Rebekah Cockram & Hannah Sloan

Course Description: Everyone has human rights...right? But how do we get them and who gives them to us? Our class will center on this question of mobilizing human rights: if we grant that human rights are important, who should enforce their protection and how?

In this course we will trace the historical context in which human rights emerged and evolved to frame conversation about the contested universality and content of human rights. We¿ll explore major approaches and debates in human rights discourse, eventually narrowing our focus on one specific debate: who is an agent of human rights? While we¿ll discuss global institutions, we will concentrate on bringing theory closer to ¿home¿; we¿ll pair the concept of

SPCL 400.303 | Healthcare Innovation and Leadership
Student Instructor: Jordyn Druga
Faculty Mentor: Stephen Eckel
R, 4:30-6:30pm

In response to the shift to value-based healthcare, disruptive innovation is necessary to dramatically improve health outcomes and reduce costs. Healthcare innovation can be described as the potential to drive change and redefine healthcare¿s economic and/or social potential. This course will provide students with the knowledge and skills to identify and solve complex healthcare problems. The goal of this course is to bridge the divide between future entrepreneurs, business executives, and technology innovators, with future clinicians who will work on the front lines of patient care.

MW, 4:00-5:00pm. Instructor(s): Yi Zhou. Enrollment = 15.
Student Instructors: Jiacheng "Coco" Liu

Course Description: Cantonese is one of the most important Chinese dialects widely used in Guangdong Province, Hong Kong, Macau, and overseas Chinese communities. The objective of this course is to enable students to communicate in Cantonese about daily life activities with the emphasis of proper pronunciation and the development of conversational proficiency. In addition, students will be introduced to a diverse set of language-related culture phenomena, such as Cantonese cuisine (dim sum), movies, drama, and music. This course is designed for students who have no or little prior knowledge of Cantonese language and are interested to learn another dialect in addition to Mandarin Chinese. Students are encouraged to take this class along with other Chinese language classes.

SPCL 400.308 | From Armenia to Rwanda: A Comparative Study of Genocide in the Twentieth Century
T, 3:30-5:30pm. Instructor(s): Karen Auerbach. Enrollment = 15.
Student Instructors: Sophie Rupp

Course Description: This discussion-based course will provide an introduction to the field of genocide studies, traversing the globe in an effort to understand one of the world's most horrific phenomena. As a class, we'll discuss the genocides of the 20th-century, address their similarities and differences, and analyze their relationships to their respective societies. We'll also learn about the cultures and political circumstances of the many nations where genocide has occurred, as well as about the actors who participated in or were the victims of genocide. Subjects addressed over the course of the semester will include: racism, religious conflict, starvation, rape, the role of government, international intervention, and colonialism as genocide. Finally, we'll consider broader questions concerning the concept of genocide itself, and the political implications of genocide in the contemporary world.

METHODS IN TEXTUAL DATA ANALYSIS: Linguists and other social scientists rely heavily on textual data, such as large collections of texts (corpora), databases, crowd-sourced surveys, experiments, etc. This course introduces students to the basic principles and techniques in data analysis using the software R. No prerequisites. Course is targeted toward students with little or no prior programming experience.

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
One focus of this seminar is to address the science of motion of vehicles and living organisms, in fluids such as air and water, using simple physical explanations supported with the relevant mathematical descriptions. Experimental demonstrations will be used to illustrate the concepts encountered in

ABOUT THE SEMINAR:
Repeating symmetry patterns and tilings are present all around us, from the brickwork on campus, to designs on tapestries and wallpaper, to paintings like those of M.C. Escher, to crystals including snowflakes and quartz. In this class, students will explore symmetry patterns, learn to identify and classify

*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
This seminar is designed to engage students in an exploration of the relevance of mathematical ideas to fields typically perceived as "non-mathematical" (e.g., art, music, film, literature). Equally important will be an exploration of how these "non-mathematical" fields influence mathematical thought. Course

We are facing unprecedented challenges in the environment of Earth. The climate is changing and we need to understand how and when the impending changes will occur. Calculus is about rates of change and can give us insight into the rates at which we can expect these changes to occur. We will look at real data with the help of Excel.

Calculus 1 (Math 231) is minimally a co-requisite. Come to the first class to sort out any registration questions! This is a 1-credit hour course that is very interactive. Most work will be done during class time!

We are recruiting ULAs (Undergraduate Learning Assistants) for a variety of classes, including Math 110, 130, 231, 232, 233, and possibly 547. You will be able to take it as one-credit course or as a volunteer. It will involve helping out in the classroom as students work problems in groups and outside class mentoring or review sessions. If you take it for credit, there will be a reflective essay at the end required. In either case, there will be some training at the beginning of the semester and midway through (just a few hours). If interested, please reach out to Linda Green, greenl@email.unc.edu.

The objectives of this course are to: Gain an understanding of the genomic data types being collected on human tumors; Learn about the basics of RNA and DNA NGS sequence analysis; Learn about pattern discovery tools including hierarchical clustering and biclustering; Understand the challenges of integrating heterogeneous data types; and learn real world examples of complex data integration for class discovery.
Class meets in Marsico 5004.

"Worldwide, heart valve repair or replacement procedures are performed at a rate of 300,000/year, and this rate is projected to increase to 850,000/year by 2050. The objectives of this course are to gain an understanding of the fundamental clinical concepts in heart valve repair and replacement, the mathematical and computational concepts in modeling artificial heart valves, and the experimental techniques for validating device performance. The course will also address medical image processing for constructing patient-specific computational models and regulatory issues related to using computer models in submissions to the FDA."

Class meets in PH 365.

The objectives of this course are to: Develop mathematical models of an entire eukaryotic genome in a living cell; Extract quantitative data from the models and experimental systems to tune model parameters; Discuss the power of mathematical modeling in guiding intuition at the nano to micron scales; Discuss future avenues such as network analysis and fluid dynamics to explore pathways of information flow in a living cell

Class meets in Phillips 365.

Course will be held at SAMSI. Overview of variable cosmic phenomena and characteristics of astronomical time series. Classical time series analysis in the time and frequency domain for evenly spaced data will be reviewed. Includes Gaussian and Poisson processes, smoothing and interpolation, autocorrelation and autoregressive modeling, Fourier analysis, and wavelet analysis. Treatments of unevenly spaced time series commonly found in astronomical datasets. Guest lectures by experts developing advanced techniques for unevenly spaced data. R-based methods.

Course Description
We have been taught that there are three states of matter: solid, gas, and liquid. However, in our daily lives we routinely encounter materials that challenge this simple description. Think of pastes, gels, foams, soap, rubber, and cement. These are collectively referred to as Complex Fluids. They are ubiquitous in natural and synthetic settings, occurring at widely separated length and time scales. Some examples in living systems include DNA and proteins, the cytoskeleton, the whole cell, tissues and organs. A few synthetic examples include suspensions, emulsions, foams, liquid

crystals and polymeric liquids. Unlike simple liquids, the underlying structure of a complex fluid can be altered by external forces and stresses leading to variations in macroscopic behavior; being able to walk on a pool filled with cornstarch is a good example of this.

COURSE DESCRIPTION
The course introduces the optical and electronic processes in organic molecules and polymers that govern the behavior of practical organic optoelectronic devices. The course begins with an overview of fundamental science of electronic materials and devices, including basics of quantum mechanics, electronic states in metal, semiconductor and insulators, p-n junctions, metal-semiconductor contacts, dielectric materials, electric and optical properties. We then discuss their optoelectronic properties, including topics from photophysics (absorption, emission, photogeneration, and recombination), charge transport and injection (doping, hopping, disorder). Emphasis will be equally placed on the use of both inorganic and organic electronic materials in organic electronic devices including LEDs, solar cells, photodetectors, transistors, chemical sensors, and memory cells, antistatic film and so on. The material preparing process and device fabrication techniques will also be introduced.

GR3

How does one process ultrahigh molecular weight polyethylene (UHMWPE) into ultra-strong fibers (Dyneema) or how would you design a polymer shape-memory actuator? Polymer chemistry is important but equally important is the way how polymers are processed. In this course we will discuss the relationship between polymer chemistry, processing and the final, after processing, properties. We will discuss different processing methods that are currently in use (e.g. solution and melt processing) and which parameters play a role in controlling the final properties. Examples include processing commodity polymers (e.g. PE, PP, Nylon) via `standard¿ melt processing methods (injection molding, extrusion) and solution processing of high-performance polymers such as all-aromatic polyamides (Kevlar) and poly(etherimide)s. Special attention will be devoted to new upcoming technologies, e.g. polymers for 3D printing, polymers for opto-electronic applications and polymers for sensor/actuator applications. The course will include in-class lectures, student projects and laboratory demonstrations.

ABOUT THE SEMINAR:
Turn of the twentieth century Vienna was a crucible for much of modern life as we know it today. We will explore a wide gamut of music, art, architecture, literature, philosophy and political texts from this fascinating social period, including the eroticism pervading paintings of Klimt, Freud¿s writings on

MUSC 286 001 3551 MUSIC AS CULTURE Lecture (Face to Face Instruction) 3 A

**Bldg:** Kenan Music Building **Room:** 3029 **Days:** TuTh **Time:** 11:00 - 12:15 Aesthetics of Rap Mu INST 100 **Instructor:** Harcus,Aaron Andrew

**Class Enrl Cap:** 35 **Class Enrl Tot:** 36 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR1

**Attributes:** VP- Visual or Performing Arts

This course explores rap music and the ways critics and fans have talked about both the music and the surrounding Hip-Hop culture over the past four decades. We will examine competing definitions of art, different ways that rap is valued in the hip-hop community, and how the discourses surrounding the music have affected those values. In addition to exploring the changing social and political conditions within which rap music is made, a significant portion of the course will be dedicated to exploring the rhythmic and poetic aspects of flow and the aesthetics of hip-hop production. No prior training in music is required.

GR1

**Attributes:** VP- Visual or Performing Arts

An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1860. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class will involve a performance component.

Our aim is to study Mozart¿s three operas written to librettos by Lorenzo da Ponte: Le nozze di Figaro (1786), Don Giovanni (1787), and Così fan tutte (1790). We will focus not just on the works themselves, but also on their literary and operatic forbears, on questions of genre, on the apparent interaction of composer and librettist, on Mozart¿s compositional processes, on the links between Mozart¿s comic operas and his version of the Classical style, on the subsequent stage history of the operas after their first performances, and on some of the particular performance and production problems they pose. Thus the course will raise historical, aesthetic and performance-based issues both specific to Mozart and his period and more generally concerning opera as a musico-dramatic genre.
This course has prerequisite requirements.

Some seats reserved for freshmen and sophomores (per your academic level stated in your ConnectCarolina Student Center) until 11/17/2017.

If you believe you are a freshman or sophomore and are getting an error message when trying to register, check your ConnectCarolina Student Center to see if you are being projected as a junior/senior for next term (60+ credit hours earned).

Please continue to check ConnectCarolina to see if an unrestricted seat opens, or check back once the reserve capacities are removed at the above mentioned date. The seat reservations are only in place for a short while, so there will still be plenty of opportunity to try to get a seat in the class.

Some seats reserved for PPE minors until 11/17/2017. Some seats reserved for freshmen and sophomores (per your academic level stated in your ConnectCarolina Student Center) until 11/17/2017.

If you believe you are a freshman or sophomore and are getting an error message when trying to register, check your ConnectCarolina Student Center to see if you are being projected as a junior/senior for next term (60+ credit hours earned). If the class is appearing as open, and you are receiving an error message stating you do not meet the "requirements", that means one of the seat reservations is full, and you do not meet the other reservation's

requirements. The seat reservations are separate, and do not communicate (so if the reserved seats for FR/SO are full and you are not a declared PPE minor, you will not be able to register at this time and vice versa).

Please continue to check ConnectCarolina to see if an unrestricted seat opens, or check back once the reserve capacities are removed at the above mentioned

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
The nanoworld is a strange and captivating place. It is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and

ABOUT THE SEMINAR:
Ending poverty is the underlying goal of almost all social policy initiatives, yet poverty remains a serious problem world-wide. In the United States alone about one-fifth of all children live in poverty, and in poorer developing nations over half the population typically live in poverty. Why is ending poverty

PLCY 210H.001 | Policy Innovation and Analysis

TR, 11:00-12:15. Instructor(s): Christine Durrance. Enrollment = 24.
This course will introduce students to public policy as a discipline and the policy analysis process. We will review the core steps, theories, and tools of the policy process, provide practice applying these tools, and encourage the evaluation of effectiveness of different policy alternatives. The process begins with defining a public problem and understanding stakeholders and their priorities; collecting data and describing public problems with quantitative data; understanding market failures and other rationales for government involvement; selecting criteria relevant for decision-making; constructing policy alternatives; evaluating the different alternatives against the stated policy criteria; and making a recommendation. This is a research-based and communication-intensive and course, which requires the creation and completion of a policy brief in several, iterative steps.

Christine Piette Durrance is an Associate Professor of Public Policy at University of North Carolina at Chapel Hill. She earned her BA from Emory University
WAIT LISTING FOR SPRING 2018 HONORS COURSES HAS BEEN SUSPENDED. WAIT LISTS WILL BE PURGED ON FRIDAY, JANUARY 5. BEGINNING MONDAY, JANUARY 8, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A HARD-COPY OF THE PERMISSION NOTE TO THE HONORS CAROLINA OFFICE IN 225 GRAHAM MEMORIAL.

Program: Honors Semester in London
Course: Social Ventures

This course examines students¿ knowledge and understanding of social entrepreneurship as an innovative approach to addressing complex social needs. It affords students the opportunity to engage in a business planning exercise designed to assist them in establishing and launching a social purpose entrepreneurial venture.

Program: Honors Seminar on Public Policy and Global Affairs, Washington DC
Title: Research in Public Policy and Global Affairs

Two (2) additional credits will be awarded for satisfactory completion of the weekly research skills development section to provide students with the mentoring and practice to enhance their research, analytical, writing and presentation skills.

Dr. Jennifer Hazen¿s career has straddled the academic-policy nexus. She received her BA in political science from the University of Michigan, and her MA and PhD in international relations from Georgetown University.
She possesses more than a decade of post-doctoral experience conducting policy-relevant studies that inform top decision makers. Her approach is based on the belief that good research is at the core of good policy, and that an understanding of real world dynamics is essential to developing effective strategic

*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
The face of the American worker is changing and the challenges American workers face are ever evolving. In the wake of recent events like the Occupy Wall Street protests, the public in general is becoming more aware of issues like income inequality, living wages, and the role of unions in the workplace. This

Cross-listed with PWAD; POLI 150.001 requires that you sign up for one of the recitation sections: 600-611.

Students, please be advised that because of a system glitch if you have POLI 150 in your shopping cart not all the recitations will appear. If the lecture is already in your shopping cart, please remove and re-add it by selecting an open recitation. This will automatically pull in the lecture as well. You can otherwise view all sections of POLI 150 in the Class Search feature.

Comparative Politics in the Middle East

This introductory course explores the politics of the contemporary Middle East and North Africa (MENA). It aims to provide students with a general overview of the key debates and issues in regional politics and society, using concepts and theories from political science and Middle Eastern studies. Sessions are organised thematically - from the institutional legacies of colonialism in the MENA region to the dynamics of street politics and revolutionary mobilization during the 2011 Arab Spring. The emphasis is on familiarizing students with a wide range of social and political phenomena from the MENA in preparation for further study.

Students, please be advised that because of a system glitch if you have POLI 203 in your shopping cart not all the recitations will appear. If the lecture

is already in your shopping cart, please remove and re-add it by selecting an open recitation. This will automatically pull in the lecture as well. You can otherwise view all sections of POLI 203 in the Class Search feature.

This course requires a recitation, sign up for one of the sections 600-606.

Students, please be advised that because of a system glitch if you have POLI 271 in your shopping cart not all the recitations will appear. If the lecture is already in your shopping cart, please remove and re-add it by selecting an open recitation. This will automatically pull in the lecture as well. You can otherwise view all sections of POLI 271 in the Class Search feature.

Protest and Revolution in the Middle East and North Africa

When do ordinary people take to the streets, in defiance of powerful actors and authorities? How do protestors choose their tactics? When does their collective action fail and when does it succeed? What methods and sources can political scientists draw on to study contentious collective action and its protagonists? Drawing on themes and concepts from social movement studies and contentious politics, this course takes up these and other questions by studying episodes of popular protest, mass mobilization, collective violence and revolution in the Middle East and North Africa (MENA). Cases are engaged with thematically - from state repression in Jordan to labour activism in Egypt. The emphasis is on familiarising students with the dynamics of social movements and collective protest, and how these relate to the MENA region.

How Do You Run a City? - Local Government Around the World

Could you run Paris? What if you were in charge of New York City? Is it the same as running Raleigh? How would you like to be in charge of a multi-billion dollar organization with politics and citizens and social problems thrown in? Or is it easier to run a small, laid-back, rural local community like Brookings, SD?

This course offers insights into normative values and the basis of local governments. It explores how communities around the world work out who, how and what can be 'governed' and how local leaders manage our cities, counties, roads, rivers and, ultimately, your backyard.

Introduction to Bayesian Modeling for Political & Social Research

The course focuses on basic Bayesian and MCMC theory, as well as applications in the context of common regression and measurement models, including multilevel (generalized) linear models, mixture models, item-response theory models and models for text classification. Basic knowledge of mathematical statistics is desirable, and working knowledge of both the R programming language and the maximum likelihood estimation framework is required.

Advanced Topics in Public Opinion

The theme of this seminar is the macro and dynamic aspect of public opinion, a focus on electorates, not individual citizens (the typical focal point of POLI 712). We will see that the act of aggregation considerably alters the sophistication and sensitivity of opinion movements from what would have been expected from the micro literature. This will be a research seminar with strong emphasis on original student investigations. Although an offering of the American politics field, this topic also has a comparative dimension in which good work is now common. My assumption is that many students who enroll in this seminar will also take 712, which is not a prerequisite, and so I will endeavor to limit overlap.

PSYC 245H.001 | Abnormal Psychology
TR, 12:30-01:45. Instructor(s): Donald Baucom. Enrollment = 24.
This course provides an introduction to the study of maladaptive or abnormal behavior of adults. The emphasis will be on the description of various symptom patterns of maladjustment, theory and research on the causes of such behavior, and the prevention and treatment of maladaptive behavior patterns. The course provides you with an opportunity to observe videotapes of individuals who experience these disorders, and the chance to develop your own conceptualization of how a given individual developed a specific disorder, along with creating a treatment plan for this person. My hope is that you will not only learn specific information about the various disorders, but in addition you will learn to think about adaptive and maladaptive behaviors in a thoughtful,

realistic manner from a psychological perspective.

PREREQUISITE: PSYC 101

PSYC 490: Understanding Brain Circuits

Enrollment and Prerequisites: Enrollment is limited to 35 students. Prerequisites: an introductory neuroscience course: Psyc 220 or Psyc 315; or an upper level biology course: Biol 202, 205, or 450

Course description: PSYC 490 is designed for upper level undergraduates who are interested in understanding how brain circuits control behavior. A major focus will be the new technique of optogenetics that is revolutionizing our approach to systems neuroscience. Circuits that control movement, sensation, sleep, memory, and fear will be explored in detail. Correlations will be drawn between circuits in rodents and corresponding circuits in humans. Finally, diseases affecting specific neural circuits such as ALS, Parkinson¿s Disease, and Alzheimer¿s Disease will be studied.

PSYC 493 001 4625 INTERNSHIP IN PSYCHOLOGY Lecture (Face to Face Instruction) 3 A

**Reserve Capacity:** 31-OCT-2017 RC CLAS UG FFYS STDTS **Reserve Enrl Cap:** 10 **Reserve Enrl Tot:** 4
20-NOV-2017 RC CLAS UG FFYS STDTS 1 4

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
In this course, we will explore the various ways that wars and conflicts, particularly Iran-Iraq, U.S.-Iraq, and U.S.-Afghanistan wars, have been portrayed in literature, film, and photography. We will attempt to deepen and enrich our understanding of war experienced by both veterans and civilians of each

20-NOV-2017 RC CLAS UG FFYS STDTS 1 3

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
This seminar will examine how historians have reconstructed the life, teachings and death of the historical Jesus. We will look at the Gospels of the New Testament, as well as references to Jesus in other writings (Roman and Jewish sources, as well as Gospels that did not make it into the New Testament). In

RELI 542H.001 | Religion and the Counterculture
TR, 02:00-03:15. Instructor(s): Yaakov Ariel. Enrollment = 24.
The course explores the countercultural scene of the 1960s-1970s and the changes it introduced in American life, art and faith. It will look at the mutual influences of the counterculture and the American religious scene and will examine the interaction between countercultural values and ways and religious groups, ideas and practices, as well as the changing relationship between American spirituality and society.

A graduate of the University of Chicago, Ariel major research interests include: Protestant Christianity and its relation to Judaism, Jews and Israel, as well as Jewish forms and expressions in the late modern era. Ariel's book on Christian missions to the Jews won the Albert C. Outler Prize of the American Society of Church History.

MNGT 325H.001 | Introduction to Organizational Communication
MWF, 09:05-09:55. Instructor(s): Dennis Mumby. Enrollment = 4.
This course will involve a critical examination of the field of organizational communication. We will begin by studying the various theories of organizational behavior that have been developed in the past 100 years, looking at both the elements of each theory and the ways that they have shaped organizational life. The course will examine organizations as complex social structures that exist in equally complex social and political environments. We will explore the nature of work and how it has evolved in recent decades, with particular emphasis on the world of work that students are likely to encounter after graduation.

We will also focus on the communication-organization relationship, examining organizations as communication phenomena. Through this communication approach, we will study various contemporary organizational phenomena, such as the new workplace, branding and consumption, leadership, gender and difference, and the Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 16.

If you are unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist beginning November 16.

WORKSHOP DESCRIPTION

The UNC Race Workshop provides a forum for graduate students, post doctoral fellows and faculty to engage with one another at the cutting edge of social science research on race and ethnicity. Although the workshop is housed in the Department of Sociology at UNC, it is interdisciplinary in nature and is open to colleagues not affiliated with UNC. The workshop has two principle goals: improve the quality of social science research on race and ethnicity that is currently underway and to remain informed on the most recent, state-of-the-art social science research on race and ethnicity. In order to accomplish these goals, the workshop meets twice a month to provide feedback on a manuscript that is currently in progress and to discuss one recent article published in a leading social science journal (e.g., American Sociological Review, American Economic Review, American Political Science Review, Psychological Science, Journal of Human Evolution, et cetera). Each meeting will have two principle discussants; one charged with providing rigorous in-depth feedback on a developing manuscript, the other with reviewing a recent journal article. After the discussants provide their questions and insights, the meeting will open

Reading Classics: Topics in Foundations of Statistics. In this course we will read and discuss a number of influential statistical papers covering controversies, paradoxes, fallacies, and other philosophical issues in the foundations of probability and statistics. In particular, we will explore topics such as Bayesian vs. frequentist vs. fiducial; objective vs. subjective; design based vs. model-based; low assumption vs. high assumption; robustness vs. relevance; population inference vs. individualized prediction.

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
Have you ever had historical déjà vu? Were you ever struck by historical images in contemporary places? If not, you might be surprised to know how much of the past is hidden in plain sight. This seminar offers analytical strategies for understanding different ways that plantation culture was represented

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban

PREREQUISITES:
*First-year students only.

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2017 FYS will register online when their registration appointment begins.
*First-year students who enrolled in a fall 2017 FYS will be able to enroll in a spring 2018 FYS beginning Monday, November 20th (12:01am).

ABOUT THE SEMINAR:
What does it mean to be an educated person? What function do schools serve? This seminar builds on the experiences of schooling that students bring to the university. It invites them to re-consider and de-construct what they know about education and schools as a result of those experiences. The seminar

CLASS DESCRIPTION:
Public Pedagogy refers to the teaching and learning that takes place beyond the traditional institutions of education (schools, colleges, and universities). This course explores the permeation of public pedagogy throughout our society, focusing mainly on the role that media play in the public pedagogical process.

This class can count as one of the three required EDUC courses for Education Minors. HDFS majors can also use this class as a substitute for an EDUC elective.

CLASS DESCRIPTION:
This semester, we'll learn the research behind new learning technologies. We'll learn about the software designers and education experts that design and build them. We'll learn how to design activities so that children learn while they play and create with these new technologies, and we'll learn how teachers and parents can use them effectively. You will learn by designing with new technologies; and by engaging with learning sciences research on how and why these activities contribute to learning.

Design of Emerging Technologies for Education

This is a project-based course. You will explore emerging technologies, such as augmented reality, virtual reality, games, and physical computing tools. You will also learn about the design thinking process and apply it to the design of emerging technologies to improve education based on your own interests. No programming skills are required.

***This class does NOT count towards either the HDFS major or Education minor requirements.***
