### Comparative Politics of the Middle East
This course examines how courts in various countries around the world interpret their respective constitutions. It involves comparing constitutional decisions by both national and transnational courts on a number of issues related to governmental power and individual rights.

### Comparative Constitutional Law
This course is designed as an introduction to contemporary Middle Eastern politics for advanced undergraduates. To explore this topic, the course combines systematic analytical approaches to big questions with concrete knowledge of events and developments in specific countries. In so doing, it aims to give students a critical understanding of politics while simultaneously building empirical knowledge about the Middle East/North Africa region. No prerequisites are required and the course is suitable for students with all levels of knowledge on the region.

### FALL 2019 Section Book For 2019 Spring

Applying Data Analysis to Trans-Atlantic Studies

This course aims to get students to think critically about the presentation of statistical data in professional settings and the media. The goal is to give participants the confidence to ask questions and evaluate whether the presentation of data is professionally sound. The course also seeks to expand skills in multivariate analysis. It builds on an introductory course in statistics and data analysis to offer students further practical experience in using statistics and data analysis. Applications include reading professional literature, evaluating use of data in popular media, working with complex data sets, and developing a semester project to further develop data handling and analysis techniques. The course will be run in a workshop environment with maximum student participation.

### Methods of Detection

**Title:** Methods of Detection

*Gen Eds:* SS, EE-field work

**Description:**
Not only do paperbacks like Gone Girl and television mega-franchises like Law & Order invite their audiences to perform extraordinary feats of detection, they also communicate information about the cognitive processes that make mystery solving possible. Both literary theorists and behavioral neuroscientists have developed models that explain the ways detection—the accumulation and logical assembly of clues and evidence to solve mysteries—takes place. Our course

### Talking about Numbers: Communicating Research Results to Others

**Title:** Talking about Numbers: Communicating Research Results to Others

*Gen Eds:* PL, QI

**Prerequisites:**
First-year students only.
Critical thinking is the ability (and willingness) to assess claims and make objective judgments on the basis of well-supported reasons. It is the ability to look for flaws in arguments and resist claims that have weak supporting evidence (or none at all). Critical thinking is not simply negative thinking; it fosters the ability to be creative and constructive, generate solutions, think of implications, and apply knowledge to a broad range of social and personal problems. Critical thinking skills are essential to success as a student, in your career, as a consumer of goods and services, and in many other areas of your life.

This course focuses on the development of critical thinking skills, especially as they relate to psychological science. The field of mental health is loaded with theories and interventions; some of them scientifically and logically valid, and others not. Critical thinking is a must if one is to successfully learn...

PSYC 225H.001 | Sensation and Perception  
TR, 9:30 am - 10:45 am. Instructor(s): Peter Gordon. Enrollment = 24.  
Topics in vision, audition, and the lower senses. Receptor mechanisms, psychophysical methods, and selected perceptual phenomena will be discussed.

**PREREQUISITE:** PSYC 101.

I am a cognitive scientist who takes an interdisciplinary approach to studying how people take in and use information from the world. A major focus of my work is the interface between perception and language comprehension, a topic that I have pursued by examining the role of higher-level auditory processing in the recognition of spoken language and the manner in which visual and oculomotor factors shape reading comprehension.

What is clinical psychology? How does it differ from other health service provider professions and how does one become a clinical psychologist? What services do clinical psychologists offer? What is involved in clinical psychological assessment, and what do different intervention approaches look like? This class will discuss the scientific basis of clinical psychology. An emphasis of the course will be on clinical child and adolescent psychology. Work with children involves unique considerations and skills. This course will be especially useful for students who are interested in careers in clinical child and adolescent psychology, or related mental health fields. We will conduct this class using a group discussion format as much as possible. In-class exercises will be used to help make the material more tangible, and to help you become more immersed in the practice of clinical child and adolescent psychology. You will have the opportunity to learn about the field from both the perspective of a parent of a troubled child, and from the perspective of a psychologist offering services.

This course provides an introduction to the study of maladaptive or abnormal behavior of adults. The emphasis will be on the description of various symptom patterns of maladjustment, theory and research on the causes of such behavior, and the prevention and treatment of maladaptive behavior patterns. The course provides you with an opportunity to observe videotapes of individuals who experience these disorders, and the chance to develop your own conceptualization of how a given individual developed a specific disorder, along with creating a treatment plan for this person. My hope is that you will not only learn specific information about the various disorders, but in addition you will learn to think about adaptive and maladaptive behaviors in a thoughtful, realistic manner from a psychological perspective.

Prerequisites: PSYC 101
How does the brain process social information, and how do our social experiences influence the brain? In this seminar we’ll examine how the brain responds to social pains and pleasures, the brain systems supporting our ability to understand other peoples’ thoughts and feelings, the neural bases of prejudice and discrimination, and other current topics in the exciting new field of social neuroscience.

Seat restriction periods: November 5th-November 19th and January 2nd, 2019-January 10th, 2019. Majority of seats restricted to PSYC majors, NSCI majors, Cognitive Science minors, and Neuroscience minors only during the noted times.

As opposed to hypothesis-driven data analysis, machine learning takes an exploratory and predictive approach to data analysis. This course introduces machine learning approaches in psychology to identify important variables for prediction and uncover complex patterns in datasets, such as nonlinearity, interactions, or clusters. Classes include theoretical lectures and hands-on examples.

**Seat restriction periods:** November 5th-November 19th and January 2nd, 2019-January 10th, 2019. Majority of seats restricted to PSYC majors, NSCI majors, Cognitive Science minors, and Neuroscience minors only during the noted times.

This new course (Genetics of Brain Diseases) will explore the manifestations and causes of important neurological and psychiatric diseases. A major focus will be the impact of advances in genetics and genomics on our understanding of brain disorders. Diseases having a major impact on society including autism, schizophrenia and Alzheimer's Disease will be studied in detail. The course will provide excellent preparation for further study of brain disorders in the setting of psychology, medicine, public health, or public policy. Course credits count towards a major in Psychology and a minor or major in Neuroscience.

This course provides a detailed study of the mechanisms of drug action at the molecular level by examining primary literature in depth. The focus will be on ligand-receptor interactions and modulation of receptor number, structure, and function by drugs. Detailed examples will examine the molecular details of both ligand-gated ion channels and G-protein coupled receptors. The course will use primary literature to delve into research where central themes will include developing critical thinking and communication skills.

unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist between November 19 and January 2.

Goals of the course: Evaluating hypotheses through the statistical analysis of empirical data is one of the cornerstones of modern science. In this course, we examine how the General Linear Model (GLM), including the multiple regression model, is used in psychological science. Goals of the course are for you to:
- Gain an understanding of how to specify GLMs that are both appropriate for your data and that provide direct tests of theoretically motivated hypotheses.
- Become competent in fitting GLMs within commonly used statistical software, such as SPSS.
- Become a thoughtful and critical consumer of psychological research using the GLM

If you have previously taken PSYC 068: Psychology of Emotion, it is strongly advised that you do not enroll in PSYC 568: Emotion, as some course content is similar.

Seat restriction periods: November 5th-November 19th and January 2nd, 2019-January 10th, 2019. Majority of seats restricted to PSYC majors, NSCI majors, Cognitive Science minors, and Neuroscience minors only during the noted times.

Description: The goal of this course is to understand the neural systems that support development from childhood to adulthood by drawing on theories and methods from developmental and social psychology as well as cognitive neuroscience. The transition from childhood to adolescence and from adolescence to adulthood is accompanied by a host of changes across social, cognitive, and biological domains. In this course, we will examine the role the brain plays during these important developmental transitions. As a vehicle to understand the developmental and biological bases of behavior, we will draw upon research examining the brain bases underlying the development of various social behaviors including social relationships, social stress, prosocial and antisocial behavior, self-perception, and social influence. We will discuss typical social development, ending the course with brief examples on atypical development, such as mood disorders and autism. While there are many neuroimaging techniques, we will rely on literature using functional magnetic resonance imaging (fMRI). Research on childhood, adolescence, and adulthood will be discussed.

**DESCRIPTION:**
In this course, we will explore the various ways that wars and conflicts, particularly Iran-Iraq, U.S.-Iraq, and U.S.-Afghanistan wars, have been portrayed in literature, film, and photography. We will attempt to deepen and enrich our understanding of war experienced by both veterans and civilians of each country. We will examine the impact of war on the human psyche in regards with violence. We will read books by American war veterans and Middle East authors contemplating the wars and their consequences. We will look at each writer’s perspective on war and their interpretation of it comparatively. In order to enhance our understanding of the phenomenon of war, we will also read supplementary articles on criticism of war and a few on psychology of war. There will be film screening on these wars which will give students the opportunity to examine these wars in a different medium than just literature. We will also look at war photography and analyze the perspectives of each photographer and the impact war has not only on people who are involved but on outside observers as well. All readings will be in English. The class will be conducted in the form of a combination of lectures, discussion, and experiments.

DESCRIPTION:
Few technological innovations have more profoundly shaped the course of human civilization than the invention of writing. This course explores the role of writing in the development of ancient religious traditions, covering the wide chronological period from the beginnings of writing in Mesopotamia and Egypt (approximately 3200 BCE) to the advent of Islam. We will begin by considering the nature of writing both as a technology and as a symbolic system, giving attention to insights coming out of modern linguistic research. Then we will examine a series of case studies of the relationship between religion and writing drawn from the ancient world (especially the ancient Near East), in order to illustrate the diversity and complexity of these interactions between technology and society. Specific topics to be addressed include: religion and the early alphabet, magical and mystical uses of writing, religion and literacy, scribal culture, and the development of scriptural texts such as the Bible and the Qur’an.

This course examines the attempted sacrifice by Abraham of his beloved son through a comparative approach. The incident in Genesis is remarkably succinct for its controversial subject matter; Abraham is called upon by God to sacrifice his son, and responds dutifully by raising his knife against him, only to be stopped at the last moment by an angelic voice. What challenges does this pose to moral and ethical social norms? We will begin by situating philosophical and ethical questions. We will then consider sacrifice in the Hebrew Bible, the Christian Scriptures, and the Qur’anic tradition, in which the son sacrificed is not Isaac but Ishmael. How does this crucial shift alter the interpretation of the event? We will reflect on philosophical responses by thinkers who question the privileging of obedience over ethics in light of events of the twentieth century. We will consider the notion of sacrifice as gift, the horizon of gender and ethics, and echoes of the event in visual art, music, and popular culture.

**TITLE:** Forging Alliances: Religion, War and Cultural Transference on the Camino de Santiago

**GEN EDS:**  
HS, WB

**DESCRIPTION:**  
This course explores the role the Camino de Santiago (the Way of St. James) played in the construction of a distinctive Spanish identity in the medieval period of Europe. We will approach this issue from a variety of perspectives. From the religious point of view, we will discuss the transformation of the man into a legend and eventually a myth, as well as the growth of the pilgrimage to Santiago. From the political and economic perspectives, we will examine the role of the Camino in the strengthening of the first Christian Kingdoms in the North of Spain, the creation of the first Spanish knight orders and their...

**TITLE:**  
La Mode: Fashion in French Culture

**GEN EDS:**  
VP, NA

**DESCRIPTION:**  
French culture and fashion have been synonymous since the age of Louis XIV. This is not only because Paris traditionally occupied the center of the global fashion industry. It is also because fashion has a respected place in French culture. This seminar investigates what fashion has meant to French-speaking writers, artists, and philosophers through the centuries. We will explore key episodes in the history of French fashion from the emergence of the idea of...

- 19-NOV-2018 RC PLAN UGRD HONORS Reserve Enrl Cap: 0 Reserve Enrl Tot: 0

**NOTE:** Honors Carolina students register online when their registration appointment begins. Non-honors students should register for Section 002. If you are unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist between November 19 and January 2.

Spanish 255 Honors is a fifth-semester Spanish Conversation that will take students of Intermediate Spanish to a higher level of communicative competence in the language through the use of authentic input and the study of linguistic features necessary to understand and make oneself understood in a wide variety of real-life situations. The class works with a Course Correspondent abroad, one of our students in the UNC Seville program, who will be bringing highlights of that experience into our class in Chapel Hill. Spanish 255 Honors is designed to prepare non-native students for advanced study in Spanish, and is particularly recommend for those planning to study abroad.

**REGISTRATION LIMITED TO MEMBERS OF HONORS CAROLINA; OUTSTANDING PERFORMANCE IN SPAN 204 OR EQUIVALENT IS REQUIRED.**

**Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.**

MNGT 325H.001 | Introduction to Organizational Communication  
TR, 11:00AM - 12:15PM. Instructor(s): Dennis Mumby. Enrollment = 4.  
This course will involve a critical examination of the field of organizational communication. We will begin by studying the various theories of organizational behavior that have been developed in the past 100 years, looking at both the elements of each theory and the ways that they have shaped organizational life. The course will examine organizations as complex social structures that exist in equally complex social and political environments. We will explore the nature of work and how it has evolved in recent decades, with particular emphasis on the world of work that students are likely to encounter after graduation.

We will also focus on the communication-organization relationship, examining organizations as communication phenomena. Through this communication approach, we will study various contemporary organizational phenomena, such as the new workplace, branding and consumption, leadership, gender and difference, and the

Happiness remains a fundamental goal in most societies, despite being elusive for many people. In recent years, social scientists have become increasingly interested in the subject of happiness and its causes and consequences. Sociologists, economists, political scientists, geographers and psychologists have joined with philosophers in studying the nature of happiness and subjective well-being and its relationship to social life.

This course will examine the interplay between individual and social happiness by considering the nature and meaning of happiness in the contemporary United States as well as in other countries. We will seek to answer questions such as: What is happiness? Can we measure happiness, and if so, how? What is the relationship between biology and happiness? Between psychology and happiness? Does money buy happiness? Does happiness vary among diverse groups (racial, ethnic, religious, gender, age, and social class groups)? How does happiness differ among cultures and nations? What is (and should be) the role of happiness in formulating public policies? We will address these and other questions by: reading books and articles; class discussions and debates; viewing

### Workshops Description

The UNC Race Workshop provides a forum for graduate students, post doctoral fellows and faculty to engage with one another at the cutting edge of social science research on race and ethnicity. Although the workshop is housed in the Department of Sociology at UNC, it is interdisciplinary in nature and is open to colleagues not affiliated with UNC. The workshop has two principle goals: improve the quality of social science research on race and ethnicity that is currently underway and to remain informed on the most recent, state-of-the-art social science research on race and ethnicity. In order to accomplish these goals, the workshop meets twice a month to provide feedback on a manuscript that is currently in progress and to discuss one recent article published in a leading social science journal (e.g., American Sociological Review, American Economic Review, American Political Science Review, Psychological Science, Journal of Human Evolution, et cetera). Each meeting will have two principle discussants; one charged with providing rigorous in-depth feedback on a developing manuscript, the other with reviewing a recent journal article. After the discussants provide their questions and insights, the meeting will open

Course meets at SAMSI. This course will provide a comprehensive introduction to methodology for data-based development and evaluation of dynamic treatment regimes. A dynamic treatment regime is a set of sequential decision rules, each corresponding to a key point in a disease or disorder process at which a decision on the next treatment action must be made. Each rule takes patient information to that point as input and returns the treatment s/he should receive from among the available options, thus tailoring treatment decisions to a patient’s individual characteristics. Methods will be motivated and developed through a formal time-dependent causal inference framework. Examples will be drawn from cancer and other chronic disease research and research in the behavioral, educational, and other sciences.

**WGST 275H.001 | Philosophical Issues in Gender and Society**

TR, 3:30 pm - 4:45 pm. Instructor(s): Susan Wolf. Enrollment = 10.

This course will examine some basic concepts central to feminist theory, such as oppression, sexism, gender, and equality, and explore the ways in which a feminist perspective casts a variety of philosophical and ethical issues in a different light. Questions that will be discussed include: To what extent do men and women have different natures, and what implications does this have for the idea of equal treatment? Should differences between men and women be celebrated or minimized? Can an act or a practice be objectionably sexist if it is totally voluntary? What counts as rape? Is pornography harmful to women? CROSSLISTED WITH PHIL 275H.

Susan Wolf's research interests range broadly over topics in ethics and other issues about values and valuing. She teaches courses in moral philosophy and

WGST 561H.001 | Performance of Women of Color
TR, 12:30PM - 1:45PM. Instructor(s): Renee Alexander Craft. Enrollment = 5.
Understanding that the hard work of solidarity- and coalition-building cannot be accomplished without a commitment to engaging with and respecting difference, this course focuses on the nuanced stories that women of African, Latin, Asian, Middle-Eastern and Native American descent tell about living, working, loving, and building community within various US cultural contexts. With an analytical toolbox drawn from theories of feminism, race, ethnicity, decolonization, and performance, we will examine the cultural narratives and critical perspectives these diverse women offer through their poetry, short stories, and drama.

Course participants will create performances (live, mediated, art-object), reflection papers and a research paper as critical tools in analyzing course materials. **Performance** will serve as a process-oriented, participatory, and experiential way of critically engaging our theme. We will do important, hard work together (and, we will have fun doing it).

### Advertising Media

From handbills and lithographs to television commercials and Internet clickbait, advertising has shaped our experience of print, audiovisual, and digital media. In this class, we will explore how film and media has been used, transformed, and coopted by companies interested in its advertising potential. While advertising's role as a sponsor of magazines, radio shows, television stations, and websites is well known, in this class we will consider how advertisers helped create and sustain these media in the first place. Through case studies of pivotal advertising campaigns from the 19th century to the present, and close readings of advertising films, television commercials, and Internet campaigns, we will learn how advertisers use and expand the possibilities of media to communicate with a mass audience, with implications that carry over to artistic and noncommercial uses of media. Furthermore, we will explore current-day advertising media, and contemplate its future in a world where advertising messages are both diverse and personalized. Assignments include short response papers, a take-home midterm, and a final exam. (Johnson S19)

DESCRIPTION: 
A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban networks, smart city urban planning, energy as a catalyst of sustainable development, smart city infrastructure, sustainable transportation, flow of information and communications, smart grids, digital infrastructure and the role of data and information technology. We will discuss criteria for measuring the smartness of a city, including quality of life, citizen governance, and discuss issues that go towards the making of a future smart city. Several case studies will be presented with guest lecturers invited to present on critical thinking and practices in smart city development.

REGISTRATION PROCEDURES: 
*First-year students who are not enrolled in a fall 2018 FYS will register online when their registration appointment begins.

**DESCRIPTION:**

What does it mean to be an educated person? What function do schools serve? This seminar builds on the experiences of schooling that students bring to the university. In an innovative update to the pedagogy of this popular First Year Seminar, it will now feature design thinking and use of "makerspaces" as a way for students to "actualize" their ideas and learning about how schooling can be updated and revised to better meet the aims of "real" education in the Twenty-first Century and beyond. The seminar includes readings, speakers and experiences as stimuli for them to engineer new paradigms, approaches, structures and tools for education of the future. Students are challenged to re-consider and de-construct what they know about education and schools as a result of those experiences and then re-conceptualize, redesign and create their new vision for schooling as educative in new ways. The seminar considers traditional schooling along with non-traditional and international approaches to educating youngsters. There are no pre-requisites for this class. Students' first-hand knowledge and experiences combined with a critical perspective will encourage innovative thinking about ways and places of learning with the aim of generating proposals for new or reformed schools and new forms of public education for the future through collaboration, making and design thinking.

This class is not for first year students.

This course is reserved for Sophomores and Juniors only.

The course is designed primarily to help students identify and access meaningful High Impact Practices (Undergraduate Research, Global Learning
Opportunities, Service Learning, and Internships) aligned with their individual values, needs, and goals. Students will be guided to ask critical and reflexive questions that will help them describe and link their unique purpose at the university with their potential contributions to the world. The course includes substantive content on student belonging and student engagement with clear linkages to how these concepts relate to engagement in High Impact Practices and student thriving. This course introduces students to the breadth of HIPs offered at Carolina as well as HIPs that may be accessed through Carolina’s extensive network of partners and alumni.

<tr>
<td>Public Pedagogy refers to the teaching and learning that takes place beyond the traditional institutions of education (schools, colleges, and universities). This course explores the permeation of public pedagogy throughout our society, focusing mainly on the role that media play in the public pedagogical process.</td>

### Design of Emerging Technologies for Education

This is a project-based course. You will explore emerging technologies, such as augmented reality, virtual reality, games, and physical computing tools. You will also learn about the design thinking process and apply it to the design of emerging technologies to improve education based on your own interests. No programming skills are required.
