		13-DEC-2020	RC CLAS UG FFYS	STDTS	0	18	

DESCRIPTION:

This seminar is designed to investigate how the concept of race has been represented in cinema historically, with a particular focus on representations of race when blackness is masqueraded. Its intent is to launch an investigative inquiry into how African Americans are represented on screen in various time periods, how we as spectators are manipulated by these cinematic constructions of race, and how race is marked or coded other than through visual representation. Students will view films that deal with 'passing' from the various historical periods and will utilize theoretical concepts introduced in class to read these visual representations. Films selected for viewing include the pre-World War II Era, the Civil Rights Era, and the 'Post-Racial' era. Students will be required to write three papers that reflect their ability to apply theoretical concepts to reading racialized representations on screen in these three historical periods to demonstrate their understanding of how racial masquerades have evolved over time and continue to persist in contemporary culture.

DESCRIPTION:

Boundary making, migration, and population displacement have been significant dimensions of the contemporary African experience. How has boundary making, broadly defined (inclusive of national borders, rural-urban distinctions, and ethnic and racial groupings, for example), shaped contemporary Africa? What types of and through what processes were boundaries created? How did the African people respond to these processes? What population displacements unfolded in the context of this boundary making? And how did the people of Africa make sense of and understand boundary making, migration, and displacement? These are some of the questions we will be examining in this interactive and discussion oriented class. We will build our examination of these issues around six novels written by African authors. These novels will provide insight into the ways by which boundaries, migration, and displacement impacted the everyday lives of the African people.

This is a 3 credit hour course.

Join us in AAAD 290 for a seminar where we examine the contemporary city as a terrain of contestation. Using a transnational perspective, we focus on selected US cities and cities in Africa and the African diaspora to understand how questions of race and socio-economic inequality affect contemporary urbanism. How is urban space politicized and foreclosed in the contemporary city and how do we understand urban spatial struggles relationally? As we grapple with entrenched inequalities and socio-spatial divisions that underwrite the current moment of urban unrest and are built into the politics of building and rebuilding, we also ask what it means to imagine a more just city. How might we inhabit and create more inclusive cities from the

This is a one credit hour course.

This course will focus on race, racism, and racial equity in the U.S. This course examines history, systems, and interracial interactions that have shaped modern-day American society as well as current systemic barriers. Students will learn vocabulary, examine race relations, examine systems, and reflect upon them in this course.

DESCRIPTION:

Together we will analyze American journeys and destinations, focusing on how resources, technology, transportation, and cultural influences have transformed the navigation and documentation of America in AMST 51. This seminar is also designed to teach students how to navigate new intellectual terrain and process unfamiliar information from a variety of disciplinary perspectives with an emphasis on discussion, field study, and documentation. Finally, we will also analyze UNC's terrain, academic structure, and co-curricular offerings. This will be done through synchronous remote instruction in Zoom with required attendance.

This semester we will focus on the Appalachian Trail, the National Park System, the national highway system, UNC's campus, and individual student journeys. The primary assignment for each student will be to research and plan, implement, and document a physical individual journey through a short presentation and webpage. The journey plan and documentation will be developed in stages and designed in collaboration with the instructor via individual Zoom appointments.

DESCRIPTION:

By AD 1200, most Southeastern Indians were farmers who lived in societies ruled by hereditary chiefs. After 1500, encounters between Indians and Europeans changed the lives of all concerned, but the changes took place in, and were shaped by, existing cultures. This seminar uses reading, discussion, and lecture to examine the lives of Southern Indians and to understand how encounters and interaction with European explorers and colonists changed the worlds in which the Indians lived. Students will learn how archaeologists and historians work, both separately and together, to study the past of Native societies. Students will study and analyze archaeological artifacts, Spanish accounts of Southeastern Indians, and other primary materials in class. These activities, along with various role-playing exercises, will directly involve the students in the study of Native people in the period between 1200 and 1800. Grades will be based on class participation, two short papers, participation in a group project, and a final paper related to the group project.

Students may also register for this course under ANTH 54-001.

TITLE: Food and the Media							
GEN EDS: LA, CI, NA							
DESCRIPTION: From Chrissy Teigen's Twitter feed to the Travis Scott meal at McDonald's to politicians on the campaign trail eating ice cream and barbecue, this course examines how food representations establish, question, reinforce, reproduce, and destroy cultural and social assumptions about individuals and communities. Students will examine and critically analyze advertising materials, TV shows, films, cookbooks, social media, magazines, blogs, and videos, among other media, to identify key elements and themes of how those representations are used and what they mean in American culture. We will consider Instagram 'gastroporn' in the context of M.F.K. Fisher essays, and the concept of the 'Other' in terms of both Edna Lewis and 'Ratatouille.' Ultimately, we will

This course traces the development of Cherokee philosophy and thought, beginning with an exploration of the Southeastern Ceremonial Complex and its stories. From the time of European contact, we progress through modern literary texts and lectures about how Cherokee people have conceived of the world. We will explore the bases of Cherokee thought and apply that understanding to analyzing texts by Cherokee authors. Students will gain a deeper understanding of Cherokee culture and society by exploring the stories and beliefs that have been important over time.

** This class will meet face to face **

DESCRIPTION:

By AD 1200, most Southeastern Indians were farmers who lived in societies ruled by hereditary chiefs. After 1500, encounters between Indians and Europeans changed the lives of all concerned, but the changes took place in, and were shaped by, existing cultures. This seminar uses reading, discussion, and lecture to examine the lives of Southern Indians and to understand how encounters and interaction with European explorers and colonists changed the worlds in which the Indians lived. Students will learn how archaeologists and historians work, both separately and together, to study the past of Native societies. Students will study and analyze archaeological artifacts, Spanish accounts of Southeastern Indians, and other primary materials in class. These activities, along with various role-playing exercises, will directly involve the students in the study of Native people in the period between 1200 and 1800. Grades will be based on class participation, two short papers, participation in a group project, and a final paper related to the group project.

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0	19	

DESCRIPTION:

Undocumented immigration receives considerable media attention in the United States today. But what does it actually mean to be undocumented? How does illegality shape the lived realities of migrants themselves? Through in-depth engagement with five new ethnographies on the topic, this course examines the social, political, and legal challenges faced by undocumented Latino immigrants and their families. Through the lens of legal anthropology, which seeks to understand the relationship between law/policy, social relations, and inequality, students will explore the hazards of unauthorized crossing at the U.S.-Mexico border, processes of and obstacles to legalization, economic and health effects of workplace exploitation, coming-of-age challenges of undocumented youth, and consequences of detention and deportation. The authors of each ethnography will be invited to join us via Skype for an informal Q&A conversation.

Design thinking is a popular buzz term in this age of Kickstarter, instant turnaround, and short time-to-market. But what is design thinking really all about? In many ways, it is a process that most of us were quite familiar with in our preschool years. Observe an opportunity. Take an action. Assess the results. Laugh at the failures. Repeat. Design is not just for artists and engineers - we are all designers!

But how do we get back to that pure form of design thought? In this class we will explore design through active making, discussion, presentation, and self-evaluation. Starting with the most basic of materials, we will exercise our latent creativity muscles and exorcise the constrained thinking and other obstacles engrained in us by "traditional" education. In this class, "failure" is an important concept that will be embraced and even celebrated. Science, entrepreneurship, and life itself is a process of try and try again. We must accept and learn from failure in order for "try" to become "do" and for "do" to

Attributes:	E4- Field Work									

Do you have an entrepreneurial idea and you would like to make a prototype to turn your idea into reality? Or do you want to experience the design and making process? In this class, you will go through this process for a semester-long project. The final outcome will be a prototype that meets an entrepreneurial need.

The pre-requisite is APPL110 or permission from the instructor for those who have significant experience in the BeAM Makerspace of something equivalent. Orientation in the BeAM Makerspace is required. Students from any major are welcome to take this class.

You do not need to have an entrepreneurial idea before taking this class. You will work in groups to identify entrepreneurial ideas, which could emerge from discussions with people in the UNC community, local community, or around the country. From these ideas, you will choose a topic for your semester project, and then start working with your group on different designs, getting feedback throughout the process. By the end of the semester, you will fabricate a

This course introduces the principles of nanophotonics - an emerging frontier at the nexus of nanotechnology and photonics that deals with light-matter interactions at the nanometer scale. The course will cover the theoretical foundations of nanoscale optical interactions, fabrication and characterization of optical nanomaterials, plasmonics, optical trapping and manipulation, electrodynamic simulations, and applications of nanophotonics.

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0		17

DESCRIPTION:

The ancient Druids (the intellectual class) have fascinated writers for centuries, though there is little reliable information about them, opening the door for fanciful theories and exposing the foibles of the so-called experts on Druids. This seminar will begin with what is known about Druids from primary textual sources such as Julius Caesar's De Bello Gallico. The focus will then shift to early modern and modern authors who created a vast array of Druids that provide insights into the development of British national identities and established `alternative' religions, visual culture and protest movements. The Druids are cast in roles as patriotic, wise and environmentally sensitive, and at other times they are cast as demonic and wicked. The seminar will examine how identities are created.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

ARTH 054H.001 | Art, War, and Revolution

TR, 12:30 pm - 1:45 pm. Instructor(s): Daniel Sherman. Enrollment = 24.

This course explores the complex relationship between art, war, and conflict. We will consider the tensions between glorifying war and violence and memorializing their victims, between political justification and moral outrage, between political programs (many of the works being commissioned to legitimate a particular view of war) and the malleability of meaning. In most weeks, we focus on single or small groups of works, mostly from Europe and the U.S., in a variety of media: painting, sculpture, architecture, photography, and graphic arts, taking the opportunity to study them in depth while also gaining exposure to a range of interpretive methods and the richness of the historical context. We also look at the ways works of art themselves become the trophies or stakes of conflict.

FIRST YEAR STUDENTS ONLY.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:

This seminar will investigate the idea of personal histories in visual art. As a seminar class in a studio environment, the course will be organized around several themes that drive artists to create and explore the methods by which they turn this research practice into art. As a catalyst to our own art making and to lending our voice to that of others, we will explore the idea of personal history and memory through readings, as well as looking at contemporary artists whose work functions in an autobiographical framework.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

ARTS 105H.001 | Basic Photography

TR, 11:00 am - 1:45pm. Instructor(s): Joy Drury Cox. Enrollment = 15.

In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium's rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

At the Radical Edge of Life, looks closely at some of the practices and art that draw attention to the ecologies of which we are a part. The texts and artwork for the course aim to grow our understanding of contemporary art that is rooted in the historical research and the political and theoretical perspective of ecologically informed theory and criticism (Ecocriticism). Part seminar and part studio, students will end the course utilizing their knowledge of the current discourse on art, ecology, and environmentalism, to conceptualize and make ecologically informed responses to their world.

This course will be organized around 1-2 art making/art building projects, culminating in a class presentation of a final public art installation. Students will research early ecology, sustainability, green movements and artists whose work is influenced by these tropes through course readings, group discussions and written responses. We will work with Artists, Botanical Garden Experts, Park Rangers, Horticulturalists, Geographers and Environmental Science Researchers both locally and abroad to compliment the topics that arise in class. Taking a global in addition to local concerns on climate change, we will see the common topography of the challenges we face, find common denominators on the effect on population and on our local flora and fauna in hopes of

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0		21

DESCRIPTION:

Examines how the East is constructed as the Orient in different historical periods: 19th-century European colonialism, 1950s to 1960s Hollywood films, contemporary Japanese animation, and the current global war on terrorism.

The primary mode of instruction for this course is remote synchronous. However, a mostly-asynchronous option may also be available with instructor permission.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

*First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0		9

DESCRIPTION:

This seminar is oriented toward students who are interested in learning about the culture and society of modern Israel. Specifically, we will examine the transformative power of the early Zionist discourse in the formation of the new State of Israel and the challenges to this discourse in years that followed. Consequently, the emphasis in this class will be on the cultural and social manifestation of the tensions between the creeds of ¿one nation¿ and ¿the melting pot¿ on the one hand, and the reiteration of ethnic, gender, and religious identities on the other. The first five sessions will provide contextual and background accounts for later discussions. Then, until the middle of the semester, the seminar will focus on various arenas of Israeli culture, past and present. The second part of the semester will be devoted to selected themes and case studies pertinent to culture and society in modern Israel.

Students may also register for this course under JWST 60-001.

TITLE: Imagining Palestine

GEN EDS: LA, BN

DESCRIPTION:

This course explores the idea of Palestine as it is presented in Palestinian writings, films, and other creative works. We will study what Palestine is for the Palestinians, none of whom have lived in a Palestinian state and many of whom have spent more time in exile than in the land that has been known historically as Palestine; how Palestinian relationships to and expectations of Palestine may have changed over time; and how Palestinian portrayals of their dreamed-of homeland have affected our own perceptions of the Palestinian-Israeli conflict and the Arab world generally. How have Palestinian art, film, and literature helped to shape Palestinian identities and aspirations in different ways over the course of modern Palestinian history? In what ways

ASIA 331H.001 | Cracking India: Partition and Its Legacy in South Asia
TR, 11:00 am - 12:15 pm. Instructor(s): Pamela Lothspeich. Enrollment = 12.
The Partition of India in 1947 was an incredibly tumultuous event, characterized by unprecedented mass migration, upheaval and violence. This event, precipitated by a hasty decision on the part of the deposed British, to carve Pakistan out of India, still has huge consequences in the region. Course materials will include works of fiction, first-person accounts, essays by nationalist leaders, and historical writings, as well as films and documentaries. Readings and films represent a range of experiences by people of different religious communities, regions, and language groups. Their stories illustrate not only the physical violence and economic toll of Partition, but also the psychological and emotional effects on the people who lived through it. To conclude, we will reflect upon how Partition still affects regional geopolitics and contributes to communal tensions today.

The course addresses the history and sociology of Asian immigration and experience in the United States, as well as the formation of diasporic identities among Asian Americans. We will center our investigations within the rich history of Asian American political organizing and cultural movements. As we trace the concerns and demands of these groups in a range of print and visual sources, we will delve into questions of how interconnected issues of race and labor; settler colonialism; immigration and migration; war and empire; gender and sexuality; law, policing, and incarceration; and transnational and diasporic circulations have shaped Asian American identity. This discussion-based class will be held primarily synchronous remote with an option for short, small group meetings in-person.

		25-NOV-2020	RC CLAS UGRD FIRST YR STDTs	1		22	

The primary mode of instruction for this course is remote synchronous. However, an asynchronous option may also be available with instructor permission.

<https://asianstudies.unc.edu/registration-faq/>

Recitation section 604 is for asynchronous students only. If you plan to attend the course synchronously, choose recitation 601, 602, or 603 when you enroll. If you wish to take the course asynchronously, go ahead and enroll if you can, then contact Dr. Dixon at dedixon@email.unc.edu to seek permission (include your PID in the email). If he approves your request, the department will switch you to recitation 604.

DESCRIPTION:

A good life depends on access to adequate food and medical care. Advances in biotechnology have made possible both agriculture and medicine, and further advances may allow us to feed and keep healthy a burgeoning population in both developed and undeveloped countries. This seminar will examine the science behind a number of striking recent advances in biology, including animal cloning, genetic engineering of crop plants, development of new therapeutic drugs, development of embryonic stem cells, and deciphering of the complete human genome sequence. Students will debate how specific technological advances force us to confront new social and ethical choices, such as whether you want your own genome to be sequenced. We will also consider how new technologies are actually implemented, especially in regard to recent public health challenges such as Zika and SARS-CoV-2 viruses. The seminar should bring together the humanistic and technical impulses in students, and is open to students planning careers in scientific or humanities fields.

TITLE: Good Genes

GEN EDS: PL

DESCRIPTION:

Reproduction, or passing on one's genes, is both the most ancient feature of life on earth and the continued focus of cutting-edge medical technology. This course examines our biological imperative and cultural quest to make babies. The syllabus leverages Biology's interdisciplinary scope, integrating bioethics, reproductive law and medicine, behavioral economics, genetic engineering, disability studies, and gender studies as we examine the biological particulars of creating life. A mixture of teaching methods will be employed, including traditional lectures, in-class discussions, group work, peer-to-peer teaching, and flipped-classroom online learning.

GR1							
Attributes: PL- Physical and Life Science, QI- Quantitative Intensive							
Class Equivalents: BIOL 201/201H							

If you are not able to register on your own (for whatever reason = no pre-reqs, etc), plan to attend the first lecture in the spring. Add your name to the class signup sheet for students not registered that will be available in class the first day. We enroll as many students as possible that day, giving priority to transfer students and students that are approaching graduation.

Dr Evans and Dr Willett

This course requires a recitation in the 600-699 range.

BIOL 202H.001 | Molecular Biology and Genetics
MW, 3:00 pm - 5:00 pm. Instructor(s): Steven Matson. Enrollment = 24.

The content of this course will be similar to that of a regular section of BIOL202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, genome organization, biotechnology and genetic engineering. There will be two class meetings per week with special emphasis on class discussion and an interactive classroom. You are expected to be actively engaged in this course through discussions, class activities and pre- as well as post-class assignments and readings. In addition to three mid-term exams and the final exam, there will be one significant writing/media assignment and at least one small group project during the semester. The required text for this course will be Essentials of Genetics (10th edition) by Klug et al. There will be additional assigned reading from the primary literature. Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course.

BIOL 202H.002 | Molecular Biology and Genetics
TR, 9:30 am - 10: 45 am. Instructor(s): Joe Kieber. Enrollment = 24.

The content of this course will be essentially the same as that of a regular section of Biology 202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, and genetic engineering. There will be four lecture/discussion hours per week with special emphasis on class discussion. In addition to two mid-term exams and the final exam, there will be one significant writing assignment and one small group project during the semester. The required text for this course will be Introduction to Genetic Analysis (11th edition) by Griffiths et al. There is likely to be additional assigned reading from the primary literature. Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course.

PREREQUISITE: BIOL 101 AND CHEM 101 OR 102 WITH A GRADE OF C OR BETTER.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

BIOL 224H.001 | The Mathematics of Life
TR, 9:30 am - 10:45 am. Instructor(s): Maria Servedio / Maria Servedio. Enrollment = 24.
This course is aimed at Honors Biology majors in their sophomore or junior year. It enriches the foundational material from BIOL 201, 202 and 205 by studying classic applications of math to many of the same topics. By revealing the mathematical underpinnings of much of the material in the majors' core, this course will introduce students to quantitative approaches and research directions across Biology.

One of the goals of this section is to make a mathematical approach to these topics as accessible as possible. To accomplish this, we will use a number of techniques to remove some of the anxiety that many students experience when dealing with mathematical problems. These include making the material accessible by approaching the mathematical formulations from intuitive biological principles, eliminating time constraints in problem solving as much as possible, working in groups, and encouraging lots of questions. No advanced mathematical knowledge beyond the first semester of calculus is required. The mathematical NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

BIOL 224L.401 | The Mathematics of Life Lab
R, 2:00 pm - 4:00 pm. Instructor(s): Maria Servedio / Maria Servedio. Enrollment = 24.
BIOL 224H and 224HL, which are aimed at Honors Biology majors in their sophomore or junior year, enrich the foundational material from BIOL 201, 202 and 205 by studying classic applications of math to many of the same topics. By revealing the mathematical underpinnings of much of the material in the majors; core, this course will introduce students to quantitative approaches and research directions across Biology. As is the case in the lecture portion of the class, the lab will use techniques to make the math and programming accessible and keep math anxiety to a minimum.

In the lab we will use the analytical and programming platforms Mathematica and Matlab to further explore the biological models and problems that are introduced in the BIOL 224H lecture. No prior knowledge of either programming language, or programming in general, is required -- we will teach you what you need to know as we go!

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

BIOL	395	001	2330	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).							
Here is the online form: https://forms.gle/qvdBoW26cbyfcQhGA							

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	395	079	4468	UNDERGRADUATE BIOLOGY RESEARCH	Lecture	1 - 3	A
							(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
BIOL	395H	001	2336	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (Remote Only - Synchronous)	1 - 3	A

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward fulfillment of major requirements; six credit hours may be counted as one lecture course with laboratory toward fulfillment of major requirements. BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

BIOL 426H.001 | Biology of Blood Diseases

TR, 11:00 am - 12:15 pm. Instructor(s): Frank Church. Enrollment = 18.

This course is based in human biology and focused on the molecular mechanisms associated with normal host defense processes and diseases of blood, bone marrow, and lymphoreticular tissue. We will discuss and involve ourselves in diseases such as cancer (e.g., leukemia and lymphoma), anemia (e.g., sickle cell disease and thalassemia), blood coagulation disorders (e.g., hemophilia and thrombosis), and the pathophysiology of HIV Disease/AIDS. Hopefully, during the semester you will learn something new about science, about life, about life in science, and about science in life.

Besides the traditional lecture format, engaged-learning will be used in a small-group format: ¿Flipped-lecture¿ videos; Basic-science Workshops; Clinical Case Studies; Role Play and H & P (History and Physical) Report; Medical Jeopardy; Ethical dilemmas; and Student-generated `thought-notecards¿. The course grade will be obtained by in-class exams, clinical exercises, thought-filled responses, contribution to a blog, and individual- and small group- grades will NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

BIOL	495	011	5485	UNDERGRAD BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

CHEM 102H.001 | Advanced General Descriptive Chemistry
TR, 9:30 am - 10:45 am. Instructor(s): Todd Austell. Enrollment = 36.
CHEM 102H is recommended by the Chemistry Department for STEM majors who have excelled in their Chem 101 coursework at UNC and seek to challenge themselves further in Chemistry 102H. The topics covered have been identified by the Department of Chemistry faculty as essential for success in and a good foundation for more advanced study in chemistry and other areas of the basic and applied sciences. The textbook, lectures and course work require a willingness to accept rigorous academic challenges and a solid high school background in algebra, coordinate geometry, and trigonometry. Differential and integral calculus will be used only where necessary in derivations and with explanation.

STUDENTS ELIGIBLE FOR ENROLLMENT IN CHEM 102H MUST HAVE PREVIOUSLY COMPLETED CHEM 101 AND PREFERABLY AT LEAST ONE MATH COURSE NUMBERED 130 OR ABOVE AT UNC-CH PRIOR TO CONSIDERATION FOR APPROVAL OF ENROLLMENT.

CHEM 241H.001 | Honors Modern Analytical Methods for Separation and Characterization
TR, 2:00 pm - 3:15 pm. Instructor(s): Gary Glish. Enrollment = 24.

Analytical separations, chromatographic methods, spectrophotometry, acid-base equilibria and titrations, fundamentals of electrochemistry.

PREREQUISITE: CHEM 102 OR 102H
DEPARTMENT OF CHEMISTRY CONSENT REQUIRED.

Professor Glish does research in the area of mass spectrometry. His research group designs and builds mass spectrometers and develops mass spectrometry methods for the analysis of biomolecules, aerosols, and explosives.

CHEM 261H.001 | Honors Organic Chemistry I

TR, 2:00 pm - 3:15 pm. Instructor(s): Todd Austell. Enrollment = 20.

Molecular structure of organic compounds, and the correlation between structure and reactivity including the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion, problem-solving, and the investigation of organic chemistry research at UNC.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.

PERMISSION OF INSTRUCTOR REQUIRED. EMAIL chemus@unc.edu.

NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

CHEM 262H.001 | Honors Organic Chemistry II

MWF, 9:05 am - 9:55 am. Instructor(s): Michael Crimmins. Enrollment = 30.

Continuation of CHEM 261H with particular emphasis on the chemical properties of organic molecules. This course will be similar to CHEM 262, but with a greater emphasis on class discussion and on discussion of contemporary research problems.

PREREQUISITE: CHEM 261 OR 261H.

INSTRUCTOR CONSENT REQUIRED.

Michael Crimmins received his B.A. degree from Hendrix College and his Ph.D. from Duke University. His research interests are in the development of new synthetic methods and their application to the total synthesis of biologically active compounds. He has served as Chair of the Department of Chemistry and

Class Equivalents: CHEM 460/460H

CHEM 460H.001 | Intermediate Organic Chemistry
TR, 9:30 am - 10:45 am. Instructor(s): Simon Meek. Enrollment = 5.
Concurrent to CHEM 460 with increased emphasis on primary literature.

PREREQUISITE: CHEM 262 OR 262H.

TO REGISTER FOR CHEM 460H, YOU MUST BE REGISTERED FOR CHEM 460 FIRST. ONCE YOU ARE REGISTERED FOR CHEM 460, PLEASE EMAIL chemus@unc.edu REGARDING YOUR INTEREST IN REGISTERING FOR CHEM 460H.

Simon Meek is Associate Professor of Chemistry. Researchers in Dr. Meek's group are involved with the discovery, design, and development of new chiral catalysts and catalytic methods for chemical synthesis. They focus on developing practical and effective catalysts that enable the use of simple and

CLAS 051H.001 | Greek Drama on Page & Stage
MWF, 9:05 am - 9:55 am. Instructor(s): Alexander Duncan. Enrollment = 24.
Taking a participatory approach to ancient Greek drama, this course pairs readings of three Athenian playwrights (Aeschylus, Euripides, and Aristophanes) with performance-oriented activities, readings, and writings. At its most traditional, this course surveys the historical and cultural context of the so-called 'classical' Athens of the fifth-century BCE, placing particular focus on the political, religious, and aesthetic forces that gave rise to humankind's first recorded theater.

More ambitiously, however, this course probes the dual nature of theater & its distinct but intertwined existences as script and performance & through sustained investigations of some of its earliest and most influential texts. In years past, this course has placed emphasis on collaborative performance, but of course live theater has been profoundly disrupted by the COVID-19 pandemic. New modes and models of performance are emerging, and this course will NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:
In this course, we will study the great tragic heroines of ancient Greek drama, focusing on Clytemnestra, Medea, Alcestis, Phaedra, the Trojan Women, Antigone. We will also read a contemporary novel, by Fay Weldon, that engages many of these mythic women. We will study the Greek tragedies intensively, along with their reception in later art, from paintings to poems, stage productions to sculptures, operas to ballets. Our questions will include: why does Greek tragedy focus so intensely on women? Are the playwrights misogynists or do they express some sympathy for women? What about these female characters grabbed the imaginations not only of ancient Greek playwrights but of later writers, painters, composers, not to mention readers? How are their stories relevant to the 21st century? Did the ancient Athenians know something we don't?

REGISTRATION PROCEDURES:
*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

DESCRIPTION:

Students in this seminar will attend and study the production process of multimedia, music, dance and theater performances on campus and on-line. The Process Series of the Performance Studies program in the Department of Communication Studies, Playmakers, Carolina Performing Arts, and others across campus and additional on-line performance. We will discuss how performance as it was experienced (pre-Covid) and as it currently experienced. We will examine performance through multiple lenses, from Aristotle's Poetics, Peter Brooks's Empty Space, up to current writing from Performance Studies scholars. We will explore the ways that performances engage us, communicating powerful ideas and emotions through their various media of expression. Students will research performance pieces, interview the performers, attend rehearsals and performances, and write essays that combine their own experiences of the performances with class readings. Students will also create their own performance pieces as they observe the relationship of preparation and practice to the spontaneity and surprise of performance.

		13-DEC-2020	RC CLAS UG FFYS	STDTs	0		20

DESCRIPTION:

The globalization of food systems is both a hotly contested subject and a central part of contemporary life. This course provides an applied introduction to key debates by adopting a critical organizational communication lens on our globalized food system. Drawing on readings, popular media texts, discussions, and experiential activities, we will explore food system labor practices, the role of multinational companies and global commodity chains, the status of hunger and food deserts, the role of food marketing and consumption practices, and the growth of local and sustainable movements devoted to food justice. Throughout, we investigate how our global food system is shaped by different types of organizations operating within particular locales, such as North Carolina, USA.

This is an APPLES-designated service-learning course that requires service hours. In addition to experiential field activities and visits, our course is organized around group-based engaged research projects. Your success will depend upon your ability to work independently and practice collective leadership.

TITLE: Environmental Communication and the Media

GEN EDS: SS, GL

DESCRIPTION:

This seminar introduces first year students to the ways in which climate science, ecology and environmental science and climate change intersect with and are represented in politics, cultural artifacts, and the media. From television news, newspapers, and radio to social media such as Facebook and Twitter, climate change is a political, social, and cultural phenomenon. Climate change and global warming are also potentially consequential natural phenomena that scientists study, write about, and theorize about.

COMM 120H.001 | Introduction to Interpersonal and Organizational Communication

MW, 1:25 pm - 2:40 pm. Instructor(s): Katie Striley. Enrollment = 15.

Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain,

and sometimes end.

CROSSLISTED WITH MNGT 120H

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

WRITING THE FULL LENGTH PLAY
 Course Topic: Writing the Full Length Play

This course expands upon the students basic knowledge of character, plot, dialogue, and structure. The importance of editing and revision are explored in great detail. Students will write a full length, polished script and receive instruction on submitting work to theaters. The prerequisites for this course are COMM 131, DRAM 231, or ENG 130 or 132. Students who do not have these requirements can contact the instructor for approval to take the course.

Howard Craft is creator of the first dramatic African American Super Hero Podcast and The Jade City Chronicles which is currently in development with a release date set for the spring of 2017. Craft is also the creator of audio drama, The Jade City Pharaoh and is the Department of Communication Piller Visiting Professor of Practice.

Course Topic: Screenwriting The Re-Write

This course is designed to take the completed feature screenplay written in COMM 537 and prepare the re-written final draft for production companies and agencies. It will begin with a complete structural review, character analysis, and dialog polish. A logline, synopsis and one sheet shall be developed. Critical analysis will be given, received, and addressed, resulting in a final screenplay package that is prepared to be submitted to professionals.

Detailed course description (at least 1-2 paragraphs, 1 page max):

A coverage sheet was provided to you for your final at the conclusion of COMM 537. You will make use these notes and prepare a substantive plan on how to address the notes and integrate them into your screenplay using re-writing techniques. At the beginning of the semester students will be required to write a logline and synopsis. Students will also be asked to create a one-sheet.

This course is about sound and the auditory dimension. In a society dominated by images, sound and sonic practices have been remarkably under-appreciated. And yet sound is at once cultural (what qualifies as signal or noise?), technological (how is sound recorded and reproduced?), and historical (how have we listened differently in different periods of time?). The course explores the social dynamics of sound and listening; the relationship between acoustics and environment, sound and emotion, the audible and politics; through the lens of longstanding and contemporary issues, such as systemic racism, protest, and our relationship to technology. Students can expect to finish the course with an understanding of the social, cultural, technological, and political dimensions of sound.

Detailed course description:

The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence.

We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance,

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 14:00 - 15:15
 INST 100 **Instructor:** Hondros,Kristin Marie
Class Enrl Cap: 14 **Class Enrl Tot:** 9 **Class Wait Cap:** 5 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: VP- Visual or Performing Arts GR1
Reserve Capacity: 04-NOV-2019 RC CMB UGRD COMM SR **Reserve Enrl Cap:** 14 **Reserve Enrl Tot:** 9

This course has prerequisite requirements.

Class meetings may also be held in the following alternative locations: Swain Hall 106A and Swain Hall 200A.

Detailed course description:

This course is designed to provide a structured environment, instructor and peer feedback, along with production & postproduction resources in which to complete an advanced near-to-graduation media project. The project can be in narrative, documentary, experimental, or interactive, with a running time for videos of no longer than 20 minutes. The course assumes the student has already taken a fair number of the post-COMM 230 production courses offered in the department.

Seniors only.

This course has classification (class year) restrictions.

Permission of instructor for nonmajors.

A capstone course for seniors who are on the COMM Media Production track, and who have completed significant preparatory coursework. COMM 230 and at least one 500-600 level production course are required. Interested students must apply in the Fall with a project to be considered for enrollment. Students in the course will complete an advanced media project in narrative, documentary, experimental, multi-media or audio.

This course is for Seniors only.

WILL MEET IN TEMPORAY MEDIA PRODUCTION SPACE ON FRANKLIN STREET

Careers In The Arts: Performance, Programming, Curation taught by Amanda Graham, Executive Director for the Arts
A career in the Arts. This phrase is intimidating for students and parents alike. Many considering working in this sector worry about fiscal stability and institutional sustainability. These concerns notwithstanding, the arts are an enriching and viable path with a variety of options for graduates . This course will introduce students through the stories of local and national arts leaders, performers, programmers and curators among others who make them tick. The class will feature guests (virtually) and show films.

Students will be able to check out equipment for duration of semester in order to film their projects.

Prerequisite Comm 130 or permission of instructor.
Please email jhaslett@unc.edu with any questions.

Description:
A workshop to study and create non-fiction films about the environment. The course examines aesthetic, narrative, and representational strategies with an eye to how students' films can contribute to critical conversations about human impact on the natural world.

This course focuses on the practice of the doing of scholarly criticism. Although it is labeled a rhetoric course, it should be valuable for anyone doing critical research and scholarship. Critical research and writing compose an extraordinarily complex academic genre that brings together three or more modes of research and writing. At the very least, criticism incorporates theory, socio-politico-historical contexts, and critical targets (e.g., discourses, objects, practices, events). The arguments that compose criticism are typically "thick" with evidence as well as with theoretical and historiographical warrants. The right balance of those elements is partly a matter of critical norms that change over time, but it is even more heavily dependent upon the particular project and the questions posed by it. In the course, you will analyze the constructions of critical arguments, work through your own critical target by bringing it into contact with various mid-range and larger-scale theoretical concepts, and bring a final critical project to fruition. The latter should be of a quality that would make at least a good conference submission,

rse Description:

CROSS-LISTED GEO 804 WITH DANIELLE PURIFOY

* This course is a core course for the Graduate Certificate in Participatory Research.

* This class seeks to explore the fundamental connection between critical social theory and qualitative research through readings, discussion, and workshop techniques. The class is divided into three sections:

COMM	856	001	13962	SEMINAR IN COMM TECH	Lecture (Remote Only - Synchronous)	3	A

Course topic: Buff and Polish

The objective of this seminar/practicum is to provide students with an orientation to the process of finding employment in an academic setting, and to provide students with opportunities to develop the materials necessary to assist in that effort. While the focus is primarily on entry-level academic positions, such as Assistant Professor, materials developed as part of the course are applicable to applying for post-doctoral fellowships, "ABD" positions, and work in other settings (eg. governmental) requiring a Ph.D.

<p>COMP 283H.001 Discrete Structures TR, 2:00 pm - 3:15 pm. Instructor(s): Jack Snoeyink. Enrollment = 24. Underlying the many applications of computers in our daily life are discrete structures like Boolean logics, relations, finite state machines, graphs, and networks that have mathematical specifications. You can tell your parents that the primary purpose of this class is to introduce these discrete structures and the formal proof techniques that support the production, verification, and maintenance of correct software. In fact, many of these are familiar from puzzles and games: already in 1990 Super Mario World expects kids to immediately understand a finite state machine diagram. This is a language class: you will learn vocabulary and idioms of a language that is more precise and less ambiguous than the languages that we usually speak or write. With any new language, you may at first struggle to make yourself understood, but by frequent immersion and fearless practice you can become comfortable thinking and expressing yourself creatively in the language. Students pick up languages at different rates, so work to teach each other. All can gain fluency with effort and a willingness to make mistakes. And fluency will help all your computer science endeavors; precise and unambiguous NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. COMP 380H.001 | Introduction to Digital Culture

TR, 2:00 pm - 3:15 pm. Instructor(s): Tessa Joseph-Nicholas. Enrollment = 20.

This course examines the nature, function, and effects of the Internet and Internet use in the context of an extended study of its history, considering key technologies, concepts, ideas, innovators, and historical and sociocultural influences. Significant reading, writing, research, and beginner-friendly, code-light web development and data science components. No previous programming or technical experience is required. This course is suitable for both CS majors and nonmajors.

Tessa Joseph-Nicholas, MFA/PhD, is a Teaching Associate Professor in the Department of Computer Science. Her teaching and research explore the intersection of computing technologies and human culture with a blend of approaches and methods from the computational to the creative. Specific interests include Internet histories, cultures, and communities; digital literatures, arts, and poetics; inclusive, accessible web design and development; net neutrality and NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. COMP 585H.001 | Serious Games

, . Instructor(s): Diane Pozefsky. Enrollment = 15.

Serious Games are training, learning, or propoganda games used in schools, medicine, the military, companies, and the public service sector. The premise behind studying serious games is three-fold:

First, games are a legitimate artistic media and just as we teach and preach through other forms of art, we can do so through games as well. Because people learn through doing, it is a way for players to absorb concepts in an efficient and memorable manner.

Second, games are a natural way for "digital natives" to interact with concepts. If we want to engage this population, we should do so in a media that interests them.

Finally, if people are going to play games, perhaps we can give them some games with additional value beyond entertainment

This course is intended as a broad introduction to the field of serious games. We will look at a number of examples of existing serious games in order to

<p>DRAM 087H.001 Style: A Mode of Expression MW, 11:15 am - 12:45 pm. Instructor(s): McKay Coble. Enrollment = 24. This seminar studies the elements of design in their pure form and in context, surveys a history of period styles and theatre, and identifies their causes. Consider Oscar Wilde's statement from The Decay of Living 1889: "Life imitates Art far more than Art imitates Life. This results not merely from Life's imitative instincts, but from the fact that the self-conscious aim of Life is to find expression, and that Art offers it certain beautiful forms through which it may realize that energy." Do you agree or disagree? Art and design have frequently shown the inner life of humankind throughout history better than political, intellectual or social history. While a period's style is seldom defined by the everyday choices of everyday people and is most often recorded in the works of artists, writers and intellectuals we must recognize the "times" as a major motivator for all stylistic choices. Even minor arts reflect major events. NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu</p>

GR1

In this Voice and Acting Class, the students will take a journey on getting to know, enjoy, and relish in their authentic voice. Through awareness and practice of the continuous breath, the student will development new habits of experiencing their breath, voice, body and how they live in this world. After the ground work has been laid, the students will integrate their voice into acting. The class will consist of work on poetry, contemporary acting scenes, Shakespeare monologues and Shakespeare scenes.

We will explore how theatre-makers can adapt to, interrogate and overcome the limitations caused by the COVID19 pandemic. We will explore theatrical performances from Galway, Belfast and North Carolina, hearing from professional artists who are making work in new ways, and thinking creatively about how theatre can recover and thrive in a post-pandemic world. We will also discuss relevant case studies from theatre history, showing how creative artists have responded in the past when faced with similar environmental and/or public health-related crises. And we will work together collaboratively to create new performances, using online tools to do so. One of the course's key features is its emphasis on international learning: we will seek to share our different experiences, to learn from each other, and to form exciting new links that will point ways forward for us & allowing us to think together about a post-pandemic theatre industry that is resilient, inclusive, and sustainable.

Please contact Adam Versényi at anversen@email.unc.edu for details.

DRAM 475H.001 | Costume History: Africa, Asia, and Arabia

TR / R, 12:30 pm - 1:45 pm / 4:00 pm - 5:00 pm. Instructor(s): Bobbi Owen. Enrollment = 7.

The course considers traditional garments worn in Africa, Asia, and on the Arabian Peninsula. Specific peoples considered vary from semester to semester. Class format for 12:30-01:45 is mainly lecture accompanied by numerous illustrations; there are also demonstrations and lots of real objects to view (and handle). Students who participate in the Honors section will also meet on Thursday afternoon from 4-5 pm and consider the ways in which ethnicity in dress is re-interpreted and/or mis-interpreted by Hollywood. The film, Black Panther (Ryan Coogler, 2018), depicts characters very effectively -- even though they are wearing elements of traditional dress from several different peoples in Africa. We will examine the costumes in that film and a few others (chosen by the class) which might include The Queen of Katwe (Mira Nair, 2016) and English Vinglish (Gauri Shinde, 2012).

TITLE: Curiosity and the Birth of the Imagination

GEN EDS: LA, WB

DESCRIPTION:

Today we tend to see curiosity and imagination as two peas in a very positive pod. Yet, although they have often been linked together, neither curiosity nor the imagination has always been viewed in such a favorable light. Pandora's curiosity supposedly unleashed all ills and calamities upon the world. In the sixteenth century, Michel de Montaigne famously called the imagination a runaway horse and asserted that the imagination brings fevers and death to those who give it a free hand and encourage it. How did we get from Pandora's calamitous curiosity and Montaigne's death-dealing imagination to Epcot Center's gleeful celebration of curiosity and the imagination? In this course, we will seek answers to this question by looking back in time to the thought

CMPL 220H.001 | Global Authors: Jane Austen
MWF, 10:10 am - 11:00 am. Instructor(s): Inger Brodey. Enrollment = 24.
This course will focus on the fiction of Jane Austen, who wrote her letters and novels in the English countryside at the turn of the nineteenth century. This author, who never traveled outside England and had the opportunity for little formal schooling, has nonetheless wielded enormous literary and cultural influence across the globe. While her novels have been criticized as being devoid of reference to her historical and political context, more recent scholarship shows the reverse. With the aid of a new webinar series hosted by Jane Austen and Co. on ¿Race in the Regency¿ premiering in Spring, 2020, this

course will locate Austen's novels in her complex historical moment and also in the world of twenty-first-century adaptations.

In addition to reading all six of Austen's major novels, we will read the anonymous 1808 novel, *The Woman of Colour*, and some contemporary adaptations, including *Pride* by Ibi Zoboi, *Unmarriageable* by Sonia Kamal, and *Ayesha at Last* by Uzma Jallaluddin. Taking advantage of Zoom capabilities, we will
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:

The seminar's purpose is to explore the African American slave narrative tradition from its 19th-century origins in autobiography to its present manifestations in prize-winning fiction and film.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum of two FYS across their first two semesters at Carolina. Enrollment in a third FYS can only occur with an approved petition from the Associate Dean of First Year Curricula

DESCRIPTION:

This first year seminar will use literature, film, and popular culture to explore different expressions of masculinity and femininity in the African American and Black diasporic context. Students will evaluate how artists use gender and sexuality for social critique and artistic innovation.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum of two FYS across their first two semesters at Carolina. Enrollment in a third FYS can only occur with an approved petition from the Associate Dean of First Year Curricula

ENGL 071H.001 | Healers and Patients

MWF, 11:15 am - 12:05 pm. Instructor(s): Kym Weed. Enrollment = 24.

When medical anthropologist Arthur Kleinman writes that illness has meaning, he reminds us that the human experience of being sick involves more than bodily symptoms. Moreover, the effects of illness and disability are rarely confined to one person. In this course, we will analyze a diverse collection of writers who have taken as their topic the human struggle to make sense of suffering and debility through a range of genres including fiction, non-fiction, graphic memoir, podcasts, and oral histories.

Divided into five units, the course will allow us to explore not just the medical, but also the personal, ethical, cultural, and political facets of illness from the perspectives of patients, healers, and families. Central texts will include /Ask Me About My Uterus/ by Abby Norman, /Black Man in a White Coat/ by Damon Tweedy, /Mom's Cancer/ by Brian Fies and /The Farewell/ directed by Lulu Wang. Additionally, students will utilize the growing archive of oral histories from the Stories to Save Lives project to learn more about the experiences of patients, healers, and families from across North Carolina.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

TITLE: American Poetry in Motion

DESCRIPTION:

This course focuses on the creative processes involved in writing poetry. We will look at poets' revisions of their work, their statements about poetry, their letters to and from other writers, and the publication and reception of their poems in their own time. We will concentrate on specific case studies: the manuscripts and letter-poems of the reclusive writer Emily Dickinson; the notebooks, letters, and poems of Walt Whitman that he wrote while tending the wounded in the Civil War hospitals; the poems, manuscripts, and letters of George Moses Horton, who taught himself to read and write and published two books of poetry while enslaved in North Carolina; and the drafts, revisions, and animal drawings of twentieth-century modernist Marianne Moore. The course seeks to develop close reading skills that are crucial for interpreting poetry; to explore how social and cultural conditions both limit and enable poetic expression, and how poets analyze and criticize those conditions; to strengthen writing and oral communication skills; and to develop research skills.

ENGL 089H.001 | Beauty Like a Tightened Bow: Modernist Philosophies of Art
 , . Instructor(s): David Ross. Enrollment = 24.
 "Modernism" was the dominant international tendency in the arts from the 1880s to the 1930s. We will sample the major modernist authors while considering modernism's representation of the artist and implicit philosophies of art. We will look at much visual art and familiarize ourselves with the Arts and Crafts Movement, Art Deco, Art Nouveau, the Bauhaus, the Bloomsbury Group, Cubism, Dada, Futurism, jazz, Surrealism, and Vorticism.

FIRST YEAR STUDENTS ONLY.

David A. Ross is a graduate of Yale and Oxford. He has been a member of the Department of English & Comparative Literature at UNC-Chapel Hill since 2002. He is the author of A Critical Companion to William Butler Yeats (2009) and the co-editor/co-translator of The Search for the Avant-Garde, 1946-1969 (2012), NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

ENGL 121H.001 | British Literature, 19th and Early 20th Century
 TR, 2:00 pm - 3:15 pm. Instructor(s): Beverly Taylor. Enrollment = 24.
 English 121 is a survey of 19th and early 20th-c British literature, covering the Romantic, Victorian, and early Modern periods. We'll read outstanding poetry by Wordsworth, Coleridge, Shelley, Keats, Elizabeth Barrett Browning, Tennyson, Robert Browning, Yeats and T. S. Eliot. We'll also read prose selections that explore important contexts, such as writings on the abilities and cultural roles of women, the era's political debates, and tensions between contemporary science and religion. In the 20th-century segment, we'll also read short stories and essays by Joyce, Lawrence, and Virginia Woolf.

The course will most likely be offered remotely by Zoom, but we'll strive to achieve a classroom ambience, with lively discussions in synchronous meetings. I hope the conversations will have the feel of an avid book club, where everyone feels welcome to share their observations and to ask their questions. One innovative assignment will allow you to work in groups to annotate a poem by Robert Browning. Writing assignments will include two brief papers (5 -7 pages each), an exam on the Romantic period, and a final exam.

ENGL 123H.001 | Introduction to Fiction

TR, 9:30 am - 10:45 am. Instructor(s): Cindy Current. Enrollment = 24.

Oppositional Realism: Genre Development and Historicity. English 123H. This course explores how literature takes up the continuity of lived experience through alternate accounts of history and time. Genres include dystopic literature, science fiction and afrofuturism, horror, magical realism, and weird fiction. Novels/short stories by authors such as Jeff Vandermeer, Jennifer Egan, James Tiptree, Jr., Samuel Delaney, Ted Chiang, and Octavia Butler. Films such as Ex Machina, Get Out, Black Panther.

ENGL 129H.001 | Native Americans in Literature / Native American Literature
 MWF, 1:25 pm - 2:15 pm. Instructor(s): Margaret O'Shaughnessey. Enrollment = 24.
 This course is largely a study of perceptions and perspectives. It will examine first the well-documented European views of Native Americans presented in historical accounts and on artists' canvases, views which tell us as much about Europeans as they do about Natives. Then it will sample the explosion of perspectives presented by Native American novelists, poets, short story writers, and film makers whose voices, having been ignored for centuries, eloquently provide alternative views of themselves and of America. Because art is not produced in a vacuum, the course will also explore political, social, and cultural issues which have influenced each group's perception of the other.

ENGL 132H.001 | Honors: Intro to Fiction Writing
 TR, 11:00 am - 12:15 pm. Instructor(s): Bland Simpson. Enrollment = 15.
 This course is a collective, collaborative exploration of the processes and techniques of fiction, through close observation and discussion of classic short stories (Seagull Reader), and the writing of short exercises dealing with the elements of fiction (setting, characterization, dialogue, point of view, etc.) and, later in the term, one short story (2,000-5,000 words). There is a midterm examination. The class is a seminar, a workshop with both written and oral critiques of student works required, and students can expect an atmosphere that is lively and encouraging as we investigate and practice the imaginative craft of fiction writing.

FIRST YEAR HONORS CAROLINA STUDENTS ONLY.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

ENGL 133H.001 | Honors: Intro to Poetry Writing

TR, 2:00 pm - 3:15 pm. Instructor(s): Ross White. Enrollment = 15.

This course will explore the many pleasures and challenges of writing good poetry. Our focus will be the regular writing and revising of your original poems, and the in-class workshoping of some of these poems, but we will also spend much time reading and discussing exemplary poems from the past and present, mastering poetic terms and forms and techniques, listening to poems read aloud, and whatever else will help you become a better poet. Among the course requirements: several textbooks, to be read and discussed and mastered; a midterm exam and a final portfolio; other written exercises; a memorization and recitation assignment; and (most important of all) your writing of original poems, and your ongoing revisions of those poems. This is a fun and informative class that will help you think and write more clearly, more exactly, and more imaginatively.

INTENDED FOR FIRST-YEAR HONORS CAROLINA STUDENTS, BUT OPEN TO OTHERS, BY PERMISSION OF THE INSTRUCTOR.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

In this course, we will consider a range of war texts, including All Quiet On the Western Front and The Things They Carried as well as several classic war movies. Two 4-6 page essays will be required in addition to a final exam. The course will feature at least two veteran guest speakers and a student veteran serving as an undergraduate teaching assistant will help lead several of our discussions. Interaction among veterans, military affiliated students and civilians is a crucial element of this course and one means by which it creates a bridge across the so-called civilian-military divide.

While civilians and all members of the armed forces have valuable insights to offer about war, this course will focus mainly on the writings and experiences of land-based combat veterans in World War I, Vietnam and the wars in Iraq and Afghanistan.

Themes we'll address will include:
- the role of story-telling in making sense of human experience

ENGL 220H.001 | American Literature, Before 1900

MW, 4:40 pm - 5:55 pm. Instructor(s): Jane Thrailkill. Enrollment = 24.

This course focuses on literature written between the Civil War and World War I, a volatile period in U.S. history. We will look at a range of literary genres, from novels and short stories to poetry and essays. Cultural topics will include the influence of new technologies (factories, trains, mass media, electric lights) on daily life, the rise of the city, changing gender and domestic roles, the increasingly unequal distribution of wealth, and the quest for racial justice in the face of white supremacist violence. Charles Chesnut's novel *The Marrow of Tradition*, which depicts the 1898 Wilmington, N.C. coup d'état from the perspective of a Black writer, will be a key text for us. In addition, we will occasionally screen films to gain analytical leverage on the literary works, e.g. Edith Wharton's and Martin Scorsese's *The Age of Innocence*. In addition to familiarizing students with literature of the period, students will hone skills in critical reading, analytical discussion, oral presentation, and argumentative writing.

ENGL 221H.001 | The Night Optics of 20th & 21st Century U.S. Novels
MWF, 2:30 pm - 3:20 pm. Instructor(s): María DeGuzmán. Enrollment = 24.
This course examines major U.S. novels and their night optics. These novels of the night perform a deep questioning of the ¿American Dream¿ and the novelistic task of giving form to chaos and refiguring the social order. This course examines the intertwining legacies of the dark side of the Enlightenment, Gothicism, Romanticism, noir, existentialism, Gnosticism, and socio-political and aesthetic dissent. Required reading: F. Scott Fitzgerald¿s Tender is the Night (1934); Djuna Barnes¿s Nightwood (1936); William Styron¿s Lie Down in Darkness (1951), Ralph Ellison¿s Invisible Man (1952), John Rechy¿s City of Night (1963), Toni Morrison¿s Jazz (1992), Paul Auster¿s Oracle Night (2003), and Manuel Muñoz¿s What You See in the Dark (2011) in combination with ongoing reading of sections of Dr. DeGuzmán¿s Buenas Noches, American Culture: Latina/o Aesthetics of Night and her Understanding John Rechy.

ENGL 283H.001 | Life Writing

MW, 5:45 pm - 7:00 pm. Instructor(s): Michael Gutierrez. Enrollment = 20.

In this course, we will begin by studying the genres and characteristics of life writing and its sibling creative nonfiction such as travel, nature, and ekphrastic writing. We will then narrow our focus to the basic components of nonfiction essays and memoirs before you begin researching for your auto-ethnographic essay. In the last unit, we will evaluate one piece by each student for your portfolio. Your essays should aim to entertain through

emotional and intellectual engagement. You can also be funny, if you like.

Michael Keenan Gutierrez is the author of The Trench Angel (Leapfrog) and earned degrees from UCLA, the University of Massachusetts, and the University of New Hampshire. His work has been published in The Guardian, The Delmarva Review, The Collagist, Scarab, The Pisgah Review, Untoward, The Boiler, Pacifica, and Crossborder. His screenplay, The Granite State, was a finalist at the Austin Film Festival and he has received fellowships from The University of

.We'll start with a review of our literary ancestors, from Montaigne in the 16th century to Baldwin and Didion in the 20th. Next we'll examine some of the most exciting essayists composing today: Solnit, Rankine, Urrea, Jamison, and Gay. Then we will funnel our energies into our own creative works, from internal excavations to external investigations that take risk both in content and in form. In this class, you will learn how to feed yourself as an artist, not just figuratively but literally. Not only will we be paying homage to our muses and motivations, we will also strategize on sustainable ways of funding our practice. Along the way, we will strive to build a community of life-long readers with whom we can continue sharing our work long after our Carolina departure.

ENGL 695: Health and Humanities: Intensive Research Practice

Course Overview

In this project-centered course, you will learn about health humanities as an interdisciplinary field and try out different qualitative research techniques. Our class theme is Aging: what the writer Robin Morgan described as ¿a place of merciless poetry,¿ ¿fierce discipline,¿ and ¿quiet beauty.¿ Accordingly, course texts will include literary, artistic, and expressive works that address such topics as longevity, frailty, resilience, disability, community, solitude, mortality, and spirituality. We will also read more medically oriented materials drawn from anthropology, occupational therapy, geriatrics and the health sciences. Because this is a skills-based course, the reading assignments for ENGL 695 are relatively short (roughly 50 pp per week). Over the

ECON 101H.001 | Introduction to Economics
MWF, 2:30 pm - 3:20 pm. Instructor(s): Elijah Locicero. Enrollment = 24.

The objectives of the course are to introduce you to:

- 1) The way economists think about the world;
- 2) Some basic economic models to use to investigate the world;
- 3) How economists analyze whether policy will have its intended ζ or an unintended ζ outcome in the context of our basic models.

As an Honors class, we'll have the benefit of a smaller class size, so we'll do more discussion over the semester, and we'll be able to modify our schedule to include special topics as we go. Additionally, we'll think more deeply about many of these topics, and in particular, I'll ask you to not just learn the NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

ECON 400H.001 | Elementary Statistics
TR, 12:30 pm - 1:45 pm. Instructor(s): Kevin Allen. Enrollment = 24.
Comprehensive introduction to statistics, including descriptive statistics and statistical graphics, probability theory, distributions, parameter estimation, hypothesis testing, simple and multiple regression, and use of powerful statistical estimation software.

PREREQUISITE: ECON 101, STOR 155, and one of MATH 152, 231, STOR 112 or 113.

Kevin Allen is an Assistant Teaching Professor and University Advisor in Economics. He received his PhD in Economics from the University of Kentucky, with a research focus on international trade and the impact of economic sanctions as a foreign policy tool.
NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

Prerequisite: ECON 400 and 410

This course introduces space into economic models to study the location of economic activity and the implications location has on business and individuals. We examine the major contemporary issues confronting urban areas, exploring possible economic solutions to the problems of housing, transportation, education, employment, poverty, and crime. Also considered will be theories of why cities exist, city location, city size, the causes of growth and decline.

ECON 490 is a 3.0 credit course. During enrollment, you will be given the option to select 1.0 credits or 3.0 credits. If you accidentally enroll at 1.0 credits. Please email Jonathan Cook

GR1

Prerequisite: ECON 400 and 410

A crucial way in which governments affect economic activity is through the operation of the legal system. This course applies economic analysis to traditional areas of legal study: property, contracts, torts, and family law. The framework of this course is essentially microeconomic, using models of rational choice to analyze the effects, genesis, and desirability of laws

This is a variable credit course, it will be offered at 3.0 credits.

Big Data and Machine Learning in Econometrics:

Prerequisites

Econ 400, 410, and 470 with a grade of C or higher

Course description

Students will learn how to explore, visualize, and analyze high-dimensional datasets, build predictive models, and estimate causal effects. The course introduces key concepts and tools demanded in the business environment.

This is a variable credit course. When registering for this course, please sign up for 3.0 credits, the default setting is 1.0. If you have issues with this

The Economics of Health Care Markets and Policy:

Prerequisites: ECON 400, 410, and at least one of 445 and 450, with a grade of C or better

Course synopsis: The market for health care is perhaps the single most important sector of the US economy. In this course we will examine how the strategic choices of supply-side actors in this market (e.g. insurance companies, health care providers, pharmaceutical firms) affects the welfare of patients, and discuss the role government regulation can play in shaping market outcomes.

This is a variable credit course. When registering for this course, please sign up for 3.0 credits, the default setting is 1.0. If you have issues with this please contact Jonathan Cook.

MWF, 10:10 am - 11:00 am. Instructor(s): Greg Gangi. Enrollment = 24.

This course will explore changing human-environmental relations from a variety of social, geographical, and historical settings. While some lectures do include material from the natural sciences this is a social science class. The class cuts across a large number of disciplines in a manner that is integrative rather than segregating lessons from different academic disciplines into separate lectures. The focus of this course is in the first half of the class to give students familiarity with how humans and human organizations deal with issues of sustainability. The second half of the semester will explore some critical issues like population, food security, climate change, urban planning and transitioning to a low carbon economy. This part of the course will not only give student information important background information about the problems but also highlight possible solutions.

In addition, to weekly class lectures, students will attend a one-hour recitation session to enjoy small-group discussion and to explore related topics of NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

ENEC 325H.001 | Water Resource Management and Human Rights
MWF, 11:15 am - 12:05 pm. Instructor(s): Amy Cooke. Enrollment = 24.

Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured, even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth's population?

This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water
NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

EURO 270H.001 | Religion in Western Europe
 TR, 11:00 am - 12:15 pm. Instructor(s): Evyatar Marienberg. Enrollment = 4.
 In this honors course, we will explore various topics related to the past and present status of religion in general, and of certain religions in particular, in Western Europe, with, at times, an emphasis on three countries: the United Kingdom (UK), France (FR), and Germany (Deutschland, DE). After investigating key historical moments in the history of religion in Western Europe (and in the areas where these three countries in particular are today), we will explore the present situation. Some parts of the course will be devoted to one country, while others will compare a certain topic in a larger area. By the end of this course, students will have a good grasp of religion's place in, and impact on, Western Europe, in the past and the present. Being an honors course, students will be responsible for significant part of research and presentation of various topics.

CROSSLISTED W RELI 270H.
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

TITLE: Sport Engineering and Human Performance: Where is the limit?

DESCRIPTION:

This first year seminar designed to discuss the limits of human performance and equipment that is engineered to enhance performance. How fast is it possible to run or swim? Will Olympic records continue to be broken? When do we reach our full athletic potential? This course is designed to challenge your thinking about performance using the science that governs biomechanics and human physiology as well as exploring the data that drives equipment development.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0	18	

DESCRIPTION:

This seminar focuses on understanding the physical geography of mountain environments and the processes that have created them, shaped them, and sustained them. There are several reasons for studying the environments of mountains: (a) they reveal integrative earth systems processes that can be readily observed and understood; (b) the processes are not oversimplified, but have spatial complexity at scales that can be methodically analyzed; and (c) mountains often reveal the intricate dynamics of coupled human-natural systems. We will explore mountain environments by concentrating on processes that shape the landscape, patterns that are apparent because of those active processes, and how the concept of scale (both through space and time) define the patterns that we observe when go on a hike or when we drive across the country. We will draw examples from different environments, including the Appalachian Mountains, the Rocky Mountains, and the Andes.

GEOG 050H.001 | Mountain Geography

MWF, 2:30 pm - 3:20 pm. Instructor(s): Diego Riveros-Iregui. Enrollment = 24.

This honors seminar focuses on understanding the physical geography of mountain environments and the processes that have created them, shaped them, and sustained them. There are several reasons for studying the environments of mountains: (a) they reveal integrative earth systems processes that can be readily observed and understood; (b) the processes are not oversimplified, but have spatial complexity at scales that can be readily comprehended; and (c) they also reveal human interactions with and impacts on their environment. We will explore mountain environments by concentrating on processes that shape the landscape, patterns that are apparent because of those active processes, and how the concept of scale (both through space and time) define the patterns that we see that are shaped by sets of scale-dependent processes. Although we will talk about mountain environments in general, when possible we will draw examples from specific environments, including the Rocky Mountains and the Andes Mountains.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

13-DEC-2020 RC CLAS UG FFYS STDTS 0 22

DESCRIPTION:

This course examines the ecology of infectious diseases including environmental and anthropogenic drivers of those diseases. During the semester we will focus on several case studies of diseases including COVID-19, malaria, cholera, and HIV/AIDS. The biophysical and evolutionary drivers of diseases will be examined as well as the political, economic, social, and environmental systems that shape health and disease across spatial and temporal scales. A political ecological framework is used to examine such topics as how political forces and economic interests helped shape the HIV/AIDS and malaria pandemics in Africa and beyond. We will also examine how emerging infectious diseases such as COVID-19 diffuse through populations and how public health efforts and geographical and epidemiological modelling and analyses can be used to predict and limit their spread.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

GEOG 52 002 14662 POLITICAL ECOLOGY OF HEALTH Lecture 3 A
(In Person On Campus Learners)
Bldg: Phillips **Room:** 0335 **Days:** TuTh **Time:** 14:00 - 15:15
INST 100 **Instructor:** EMCH, MICHAEL EDWARD
Class Enrl Cap: 24 **Class Enrl Tot:** 24 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
GR1
Attributes: SS- Social and Behavioral Science, CI- Communication Intensive, GL- Global Issues
Class Equivalents: GEOG 52/52H

GEOG 58 001 14684 FYS: MYTH-LEADING MEMOR Lecture 3 A
(In Person On Campus Learners)
Bldg: Genome Sciences Bui **Room:** G010 **Days:** MWF **Time:** 14:30 - 15:20
INST 100 **Instructor:** Lepofsky, Jonathan David
Class Enrl Cap: 24 **Class Enrl Tot:** 15 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
GR1
Attributes: SS- Social and Behavioral Science

GEOG 110 001 4827 THE BLUE PLANET: EARTH SYSTEMS Lecture 3 A
(Remote Only - Synchronous)
Bldg: TBA **Room:** TBA **Days:** MWF **Time:** 09:05 - 09:55
TA 10 **Instructor:** MOODY, AARON
TA 10 **Instructor:** Whitmore, Keridwen M.
Class Enrl Cap: 116 **Class Enrl Tot:** 32 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR1

Attributes: PL- Physical and Life Science
Class Equivalents: GEOG 110/110H

GEOG	111	001	12255	WEATHER AND CLIMATE	Lecture (Remote Only - Synchronous)	3		A
Bldg:	TBA	Room:	TBA	Days:	TuTh	Time:	09:30 - 10:45	
						INST	100	Instructor: KONRAD, CHARLES E
						INST	100	Instructor: Hernandez Jr, Manuel

GLBL 450H.001 | Social Change in Times of Crisis: Knowledge, Action, and Ontology
W, 12:20 pm - 3:20 pm. Instructor(s): Michal Osterweil. Enrollment = 24.

There is no doubt that we are living through a period of unprecedented crises; economic, environmental, social, and political. Even before Covid-19, some described this moment as one of impasse in which none of the political and theoretical frameworks with which we are accustomed to thinking and acting are sufficient. As a result, traditional paradigms of change, based around movements, revolutions, resistance, etc. are themselves no longer adequate. At the same time, around the world people, movements and projects, ranging from prison abolitionists, to indigenous communities and ecological initiatives, to less articulate change projects, are developing and experimenting with alternative visions of change. Many of these require fundamental shifts in levels we don't often think about when it comes to social change, namely epistemology and ontology, or the forms of knowing, being and doing that inform the forms and frameworks of action and future making.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

GLBL 483H.001 | Comparative Health Systems
 MW, 11:15 am - 12:30 pm. Instructor(s): Erica Johnson. Enrollment = 24.
 National healthcare systems evolve in the context of specific political, economic, and cultural histories and, as a result, the ways countries finance, organize, and deliver care vary greatly. Yet the healthcare challenges that many countries face are remarkably similar. This course provides students with an understanding of the origins and comparative performance of a range of international healthcare systems. The course will cover the recurring debates among health policy experts concerned with health sector reforms in low, middle, and high income countries. In addition, the course will examine some of the history of the field of global health and will highlight the competing global and local influences at play in specific health systems. The course will explore public and private cooperation in health care provision and the role of international institutions in shaping health systems. Comparing models of health care delivery will improve students' understanding of health outcomes around the world and at home. By the end of the course, students will have the knowledge and tools to critically analyze the origins, designs and outcomes of health system reforms. The course will incorporate knowledge and views from

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

GLBL	692H	001	6010	HONORS IN GLOBL	Lecture	3			A
					(Remote Only - Synchronous)				
Bldg:	TBA		Room:	TBA	Days:	W	Time:	15:30 - 18:00

DESCRIPTION:

Introduces students to study of humanities by examining how the idea of Rome evolved through poetry, history, philosophy, opera, even forgery into a concept that has long outlasted the Romans. Previously offered as GERM 55.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum of two FYS across their first two semesters at Carolina. Enrollment in a third FYS can only occur with an approved petition from the Associate Dean of First Year Curricula

DESCRIPTION:

This seminar offers first-year students an introduction to the German-Jewish experience and the history of anti-semitism in Germany, from early modernity to the present day. Students in this seminar will learn to analyze a variety of texts (both literary and philosophical), musical works, and films in relation to the history of Jews in German-speaking countries, and will be able to apply their knowledge to their analysis of present-day manifestations of antisemitism and xenophobia in Germany. The course has no prerequisites and presumes no prior knowledge of the subject matter.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

DESCRIPTION:

The Bible is the single most influential book in all of Western civilization. It is the top bestseller of all time and the most translated work in history. No other text has been read, discussed and interpreted as often and no other book had a comparable impact on the arts. Knowing the Bible is therefore the condition that helps us understand substantial aspects of what is at stake in literary, visual and musical traditions. In this class we will familiarize ourselves with the stories, poems, letters, historical documents, songs, witness accounts and philosophical treatises that the Bible contains, and we will examine how works of art have preserved or transformed this biblical material. While our focus will lie on literature, we will also visit the museum, go to a music performance and watch movies. In written assignments and oral presentations, you will have the chance to interpret and work creatively with and through the biblical and literary texts.

DESCRIPTION:

This seminar explores the question of the animal in the works of major Russian writers (Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov) and introduces students to the main theoretical texts on the animal/human relationship (Nietzsche, Levinas, Derrida, Irigaray). Among the topics to be discussed are the animal as the other, animal and human natures, dominance and submission, ethics of the human/animal relations, and the theme of talking animals.

The course's main goals are:

- ¿ To follow the representation of the animal in Russian literature of the nineteenth and twentieth centuries;
- ¿ To examine the worlds of major Russian writers;
- ¿ To learn the methods of analyzing literature;
- ¿ To learn the methods of critical writing.

TITLE: Manifestos, Revolutions, and the Avant-Gardes

GEN EDS: LA, CI, GL

DESCRIPTION:

Marxist Surrealism, Fascist Futurism, Anarchist Situationism: what do these different ¿isms¿ have in common? They are some of the most influential modern literary movements to publish manifestos. Through the lens of the manifesto, this course examines these radical groups of thinkers and the relationships between art and politics that they propose. Paying attention to the tradition of manifesto writing in avant-garde movements will help focus a set of broad questions, including: What is the avant-garde? What is a manifesto, its typical form and content, method and goal? How, more generally, have literary artists dedicated their work to political change? By the end of the course, students will have examined a number of literary movements and engaged with a

GSLL 254H.001 | The Division of Germany, Reunification, and Conflict with Russia
TR, 2:00 pm - 3:15 pm. Instructor(s): David Pike. Enrollment = 24.

-Why was occupied Germany divided into two states after World War II?

-Were the Cold War and division inevitable?

We will explore these questions in two chronological contexts: 1945-1949 and 1989-present, with emphasis on the reemergence of Western conflict with Putin's Russia.

DESCRIPTION:

This seminar examines two key themes in modern cultural and intellectual history: the importance of travel in the lives and cultural identities of American writers and the important role of European cities in the evolution of modern American cultural identities. We shall focus on a historical era in which American writers were especially drawn to Europe as an alternative to the social and cultural life in the United States; and we'll discuss how the encounter with Europe influenced these writers as they defined their national identities as well as their views of politics, social relations, gender identities, literature, art and European cultural traditions. The seminar explores how travel has become one of the most influential personal experiences in modern times; and we'll conclude the course with discussions of how travel remained important for American writers after 1930. Our overall goal is to analyze the connection between travel, writing and personal identities. This is a class for people who like to read about personal experiences and are intrigued by foreign travel. The assigned texts include works by women and men such as Margaret Fuller, David Dor, Mark Twain, Henry James, Gertrude Stein, Ernest Hemingway, James Baldwin, Elizabeth Spencer, and David Sedaris; and we'll focus on how writers described cities such as Paris, London, Rome, and Athens. In

TITLE: Watching TV to Understand History

GEN EDS: HS, NA

DESCRIPTION:

The television series is a media on which Americans and Europeans are increasingly dependent for their entertainment and education. Since 1945 and particularly since the early 1970s, the French have fought in the academy and in a diversity of sites in the public sphere over how to tell the history of the occupation and liberation of France during World War II. Can a television series present the complexities of this history? To address this question, students will learn about scriptwriting and filming and will analyze A French Village, a series with ambitious aesthetic goals; it was the first television series in France written following models derived from successful American series; as well as in the presentation of history.

HIST 174H.001 | Honors Seminar in African, Asian, and Middle Eastern History
MW, 3:35 pm - 4:50 pm. Instructor(s): Cemil Aydin. Enrollment = 24.
This course will focus on Pan-National movements in Asia and Africa from the 1870s to the present to explore the content of their critique of the international order and their visions for a post-imperial new world. Why were there very influential Pan-national political and intellectual currents in a period associated with empires, imperialism and nationalism? What are the legacies of Pan-African, Pan-Asian and Pan-Islamic thought and ideas in contemporary politics of the world? While focusing on Pan-Nationalism, this course will revisit the debate on Orientalism and racial thinking from the perspective of international history. How did ideas and ideologies about difference and hierarchies among races, religious groups and continents shape the evolution of the modern world order? What is the relationship between notions of human equality and representations of human difference in international affairs in the eras of colonialism, decolonization struggles, the Cold War and the contemporary period? Topics will include the history of international law, origins of internationalism in general and multiple internationalisms of Pan-Islamic, Pan-Asian and Pan-African varieties, challenges and critiques of NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

HIST 177H.001 | The Black Death
MW, 9:05 am - 10:20 am. Instructor(s): Brett Whalen. Enrollment = 24.
This Honors seminar will explore the Black Death, the famous plague that struck Europe and other parts of the world in the fourteenth century. The class will investigate the history of medieval science and the bubonic plague ca. 1446-1451 along with the broader question of how pandemics can shape historical developments. Students will engage with primary source materials for the era of the Black Death and consider scholarly debates about the plague. The class will involve some informal lecture, common readings, and discussion, but will also be project-based, requiring students to develop their own comparative approaches to the Black Death and the twenty-first century coronavirus outbreak.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

<p>HIST 335H.001 Cracking India: Partition and Its Legacy in South Asia TR, 11:00 am - 12:15 pm. Instructor(s): Pamela Lothspeich. Enrollment = 6. The Partition of India in 1947 was an incredibly tumultuous event, characterized by unprecedented mass migration, upheaval and violence. This event, precipitated by a hasty decision on the part of the deposed British, to carve Pakistan out of India, still has huge consequences in the region. Course materials will include works of fiction, first-person accounts, essays by nationalist leaders, and historical writings, as well as films and documentaries. Readings and films represent a range of experiences by people of different religious communities, regions, and language groups. Their stories illustrate not only the physical violence and economic toll of Partition, but also the psychological and emotional effects on the people who lived through it. To conclude, we will reflect upon how Partition still affects regional geopolitics and contributes to communal tensions today.</p>							
<p>CROSSLISTED W ASIA 331H & PWAD 331H. NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu</p>

This class is about the memory of the Holocaust. Using primary sources, specifically memoirs by Holocaust survivors, we will examine what it means for a text about the Holocaust to be both a historical document and a personal narrative. We will consider questions of evidence and truth; the relationship between experience, historical fact, and memory.

The class will be taught in a collaborative setting, which means that students will be focused on participation and engagement in classroom discussions. No writing assignments or exams.

History 398-001: Leisure and the Making of Modern America, 1880-1945

Today Americans are deeply invested in leisure. Yet it has not always enjoyed such widespread consensus. In this course we will turn our attention to a moment when rancor about leisure permeated American life. This is a research seminar that uses leisure to explore American life between 1880 and 1945. It was precisely in this moment that working Americans began to enjoy increasing amounts of spare time. Leisure itself changed, too, in this period. Commercial forces overhauled the kinds of leisure activities that were available. By the early twentieth century new kinds of amusements such as movie theaters and dance halls enjoyed increasing appeal in towns and cities throughout the country. These spaces nurtured a set of outlooks, identities and modes of social interaction we have come to associate with modern life. We will use the array of activities and entertainments Americans pursued beyond the workplace to explore the social, cultural and economic dimensions of leisure. With this focus, we will consider how leisure-time fostered modern outlooks and habits. Our engagement will grow out of historical research and analysis that you will hone with guidance from me. Each of you will write a 20-25-page

HIST 398-002: The American Icon

The theme of this course is the modern American Icon, broadly defined. Students will choose an American Icon and complete an in-depth study of how that figure, organization, or product has influenced some aspect(s) of the social, political, cultural, and/or economic history of the United States. Throughout this process, this course will offer numerous discussions, exercises, and readings that will help cultivate students' ability to conceptualize, research, and produce a major research paper. Students will not only gain extensive knowledge of their respective topics, but will also leave this course with a better understanding of the study of history and the ability to complete future research projects.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-003: Global Cities and Boom Towns

"Global Cities and Boom Towns" is the capstone course for History majors, but it is open to other students, space permitting. The first part of the course entails a number of readings in modern urban history as well as methodological approaches to assessing primary sources. The remaining portion of the course is dedicated to guiding students toward the completion of a 20-25 page paper, of their own design, based on primary sources. At the end of the class, students will have the option of publishing their work on the class's website.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

History 398-004: Nazi Germany: A View from the Sources

This 398 will deal with Nazi Germany on the basis of primary documents and images, provided by the German Historical Institute in Washington, DC. This approach will give students a chance to get beyond the popular myths about the Third Reich by examining primary information on the Nazi movement, the racial dictatorship, the Holocaust and the Second World War. The participants of the seminar will be able to pick a topic according to their own interests and present their findings orally as well as in written form.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-005: South Africa's Freedom Struggle

Apartheid's end stands out as one of the most stunning events of the twentieth century. This class investigates the history of activism in South Africa and around the globe to understand how it happened. Potential research topics might include (but are not limited to) the experiences of South African liberation leaders in exile, the role of institutions such as the United Nations, the significance of international sports boycotts against South Africa, and the activism of US university students pushing for divestment from companies working in apartheid South Africa. A remarkable set of digital archives will make this research possible

HIST 398 sections are restricted to History majors until two weeks into the enrollment period. At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-006: Shaping the World: the Emergence of New Global Orders in the 20th and 21st Centuries

This course deals with three transitions from old established but increasingly contested order systems to new global orders. The course will explore: 1. the transition to a new order that followed the end of World War I and the Versailles Peace Treaty; 2. the transition from the end of World War II to the Cold War (c. 1944-1949) and, 3. the gradual emergence of a new global order that our own times have been grappling with since the end of the Cold War and the early 21st century.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period. At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-007: Martin Luther and the German Reformation

The central figure of the German Reformation, Martin Luther (1483-1546) contributed profoundly to the forces that transformed the medieval Western world into the modern. Thus more than five centuries after his birth, Luther's remarkable religious insights, his exceptionally complex personality, and the tumultuous political and social developments during his lifetime continue to fascinate historians, theologians, and men and women outside the academy. Through the close reading and discussion of several of Luther's major writings and a variety of documents concerning the German Reformation, the seminar will give students a rich understanding of the man and his age. In addition to the principal theological issues, Luther's thought on women, family, sexuality, rebellion, and political authority will receive particular attention.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

HIST 398-008: Life and Times of Che Guevara

The purpose of this seminar is to explore turbulent period and region in which Ernesto 'Che' Guevara came of age. In examining mid-twentieth century Latin American politics through the lens of the most recognizable revolutionary in modern history, this seminar will examine how the course of Latin American history shaped Guevara, and how, in turn, Guevara shaped the course of Latin American history.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

HIST 510H.001 | Human Rights in the Modern World
 MW, 3:35 pm - 4:50 pm. Instructor(s): Michael Morgan. Enrollment = 24.
 Today, the language of human rights is almost universal. It is fundamental to the way that we understand justice both at home and, especially, abroad. But this was not always the case. Ideas of human rights changed over time, gaining power as a result of political, intellectual, and social developments worldwide. This course looks at the international history of human rights from the Enlightenment to the present and considers how human rights ideas first emerged, how they evolved, and how they became so influential.

NO FIRST YEAR STUDENTS. IT IS RECOMMENDED FOR STUDENTS TO HAVE TAKEN AT LEAST ONE PRIOR HISTORY COURSE.

Michael Morgan specializes in modern international and global history. His first book, *The Final Act: The Helsinki Accords and the Transformation of the*
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

Attributes: HS- Historical Analysis, BN- Beyond the North Atlantic							

History 529 focuses on Mexico and several countries of the Caribbean and South America as examples of the major debates that have arisen in the past and in our own time over citizenship and the nation-state in the multi-ethnic and culturally complex societies of the Americas. It explores history and memory around the issues of human rights, gender, indigenous peoples and cultural identities, religion and secular society, and the concepts of territory and the nation-state. Class time will combine short lectures with discussions that weave together past and present, including student movements that punctuated the

twentieth century, relating to the tumultuous social movements that we have witnessed this year. Readings and class discussions will center on primary sources in different media, including novels, art, film, and music.

TEXTBOOK: John Tutino, ed., *New Countries: capitalism, revolutions, and nations in the Americas* (Duke University Press, 2016).

HNRS 089.001 | Medicine and Narrative: Writing COVID / Writing Us
M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 24.

A workshop in autobiographical and creative short story, focusing on the complex connections between story-telling, interpretive skill, and the practice of medicine. Students will write and distribute autobiographical and and creative short stories about illness and medical care; the seminar will meet weekly to discuss these stories, attempting to identify and articulate the key issues each story expresses about what it means to be sick, what it might mean to take care of others in their illness. The writing and (especially) interpretive skills acquired in this workshop are directly valuable to anyone contemplating a career in medicine, but are equally valuable to anyone who might at some point encounter (in themselves or in someone they care for) the trauma of illness. In addition to the weekly workshop, participants will have one-on-one conferences with the instructor (himself an MD with an international reputation as a writer). The capstone project will be a public reading (via webinar, allowing participants to invite an audience from anywhere on the globe) of participants' work, which may (at student option) be in the form of a film composed under guidance of experts at the University's Media Resources Center

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

HNRS 352.001 | The Carolina Global Food Program Seminar in Food and Culture
 TR, 3:30 pm - 6:00 pm. Instructor(s): James Ferguson / Samantha Buckner Terhune. Enrollment = 15.

¿Take a cooking class in college and get credit? Sign me up!¿ Thus often begins a 5 minute- to 2 hour conversation on Honors 352-001, When we first offered the class in 1997, it was a slightly naïve and timid enquiry into food and culture. Since 9/11/2001, the economic meltdown in 2008 and recovery since, and the recent Farm Bill, developing and sustaining a vital interest in the sourcing, preparation, consumption, sharing, and preservation of our daily bread has become an urgent concern for us. If one cannot eat sustainably there is no point in worrying about finance. Malthus will be proven correct.

For fall 2020 we continue our recent trajectory of an introduction to scientific method and health affairs through a sweep through nutrition, eating disorders, epidemiology, biochemistry, and evolutionary biology. We examine such topics as the ethics of eating a diverse and sustainable diet, slow vs. industrial food, organic, and local food sourcing as well as the grim reapers of climate driven crop and water shortages and rampant obesity with its NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

HNRS 354.001 | The Elements of Politics II
 MW, 3:35 pm - 4:50 pm. Instructor(s): Larry Goldberg. Enrollment = 24.

This course deals with the theme of the transition from ancient to modern understanding of the essence of politics and will concentrate on selected plays of Shakespeare that profoundly dramatize that transformation (Henry IV-Part I, Julius Caesar, King Lear, Macbeth and The Tempest). As the primary representatives of ancient thought, we shall read large portions of Aristotle's Nicomachean Ethics and Poetics. As the signal work in initiating modern thought, we shall read Machiavelli's Prince. This seminar will be conducted solely through conversation. Several essays, of varying length, will be required. There will also be an oral final examination. Students at all levels are welcome, and there are no prerequisites other than a willingness to read carefully and diligently.

INSTRUCTOR CONSENT REQUIRED. EMAIL DR. GOLDBERG AT lagoldbe@email.unc.edu).

NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

Course Description: Technological innovation, from robots to machine learning advancements, is accelerating the changing nature of work in America. Labor economists and demographers have warned for years that automation in the workplace is fissuring prosperity, not only within the office, but across the country. Certain skills that employers once valued, from small appliance manufacturing to private loan management, are becoming increasingly replaced or fundamentally changed by advanced technological programming. In addition, bureaucratic policies in many industries have hindered union power and worker voice, making employees especially vulnerable. Occurring simultaneously with global disruptors like climate change and pandemic outbreaks, these industrial transitions are causing a skills gap in our employment system, and present a very different future for America's workers. As wages remain extremely low in certain parts of the country, vulnerable workers lack the financial stability to pursue reskilling options. The unprecedented number of furloughed and laid off workers in the wake of COVID-19 is a

Course Description: Why did a banana duct-taped to a wall sell for \$120,000? Or why would anyone spend that much money on a work of art in the first place? It is questions like these that puzzle art market nay-sayers. In this course, we will explore the various systems at play in one of the most secretive commercial sectors: the art world. Approaching this topic from both a humanities and business perspective, we will begin by discussing how the art market, with little to no monetary regulation, operates dually as a director of cultural production and a playground for the wealthy. From galleries to dealers to auction houses, students will learn about the roles of the major players in the art world as well as their economic infrastructures. The learning experience will culminate with a project in which students will take on the role of an art dealer as they incorporate a variety of subjective factors with auction data to present a fair value analysis of an artwork for potential investors.

Course Description: Regardless of our chosen field, all of our lives remain entrenched in psychological influence. Each day, we rely on our past experiences to guide us socially, emotionally, and cognitively. However, the empirical study of psychology can contradict our preexisting beliefs, posing a threat to our sense of judgement. As a result, many often discredit the entire field, equating any factual evidence to rampant falsehoods in the face of very real, relevant, and intriguing findings.

This course aims to build an understanding of the validity of psychology and improve general scientific literacy. To accomplish this, students will read and discuss publications most applicable to the average undergraduate, with readings primarily rooted in Social and Cognitive Psychology. Some topics will include:

Course Description: Have you ever wondered why some drugs are exponentially more expensive in the United States than in Canada? Or, what factors led to the rampant opioid epidemic in rural America?

The ramifications of health policy are both complex and interconnected, requiring an in depth understanding of how its technical and human elements work together. Statistical analysis and stories provide perspectives that enlighten how policy can be crafted and how it can be effective. This course aims to use narratives and data to explore the social, economic, and political forces that inform health policy. We will look at societal struggles and wrangle with visualizations to create an informative and holistic picture of health care in the United States.

Course Description: Whether it be human's earliest civilization of Mesopotamia or NYC's finest Michelin star restaurant, food has served as one of the strongest unifying factors of a community. In this course, we will investigate the anthropology of food, exploring the social manifestations of cuisine, both as a unifier and segregator. Our exploration of the bridge between food and community will help contextualize why some people eat to live, while others live to eat.

This course will explore the power of food in four areas of the world: India, Central America, Scotland and East Africa. In order to better empathize with the eating habits of each region, we will begin by contextualizing ourselves in its history, culture, and climate. With this background, we will explore how food acts as means for social stratification. We will compare the cuisine of the rich and poor of each region, while also exploring how its people interact

Course Description:How do we, as change makers, use data to move innovation forward? With the combined power of effective storytelling and data visualization, students will leave this course with an appetite for change and a toolkit for action. To become true innovators, we must study the process of understanding others, which is both quantitative and qualitative. Oral storytelling has been around for thousands of years to preserve parables, traditions, and history. With the onset of data analytics, oral storytelling has transformed our abilities to communicate a more profound, empirical understanding of diverse individuals and communities. The Importance of Storytelling: Behavioral Data for Social Innovation is designed to provide students with a working knowledge of behavioral data, social innovation, and storytelling. We will combine the ancient practice of oral narration and data interpretation to drive holistic, revolutionary change.

Course Description: Have you ever wondered what was here before the sidewalk? This course takes an interdisciplinary approach to reading the landscapes that are connected to our urban spaces. With each new house built, each new road paved or forest torn down, we make it that much harder to see the textured, complex ecological histories that are embedded in our landscapes.

In the midst of a climate crisis, what does this disconnect mean for our increasingly urban world?

This class will provide tools and ideas for you to take this question into your everyday life. It'll do so in two parts. First, we'll learn from designers, historians, writers, and scientists to be more attuned to the ecological world around us and to share those insights with others. Inspired by what we learn

Course Description: The first vaccine, a cowpox-derived immunization against smallpox, was discovered by the English physician Edward Jenner in 1796. Despite the medical establishment's initial resistance, Jenner's vaccine spread quickly throughout much of Europe and into the United States. Today, vaccination has become an essential part of modern medicine and a primary focus of infectious disease research. Even so, vaccination remains surrounded by unscientific folklore & fraught with disinformation and full of misconceptions.

This course will take a nuanced and multi-disciplinary approach to understanding the role vaccines play in the health of our society today. By co-mingling the fields of biology, anthropology, history, psychology, and statistics, the course will explore the contexts, research, and psycho-social dynamics of global vaccination. The questions we will seek to answer include:

Course Description: The ways in which we think of and experience the world are heavily influenced by the media that we consume. The aim of this course is to analyze the depiction of mental illness in film and literature, beginning chronologically with the 'mad woman in the attic' in Jane Eyre and ending with a modern-day example in Silver Lining's Playbook. Over the course of this class, we will endeavor to answer questions like 'How has thinking about mental illness changed over time?', 'How do these depictions relate to other important social issues (i.e. gender equality, racial discrimination)?', and 'How do depictions of mental illness in media compare to criteria in the DSM-5?' This course is interdisciplinary, spanning 3 films and 4 novels while also taking into account the DSM-5's characterization of certain disorders.

THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL.

Course Description: Why do three out of five African Americans live in communities with uncontrolled toxic waste sites? Why are the overwhelming majority of people without access to an improved water source located in the global south?

This course will examine how socioeconomic factors such as race, gender, and class impact the differential quality of the environments that people live in. In addition, it will introduce students to two influential theoretical frameworks within which environmental issues can be analyzed, Marxism, and world-systems theory. Students will be encouraged to think about environmental issues not only as products of poor regulation and shady corporate behavior, but as inevitable consequences of a functioning capitalist world system. The course will provide students with a good balance of theory and information, and students will be able to use the theories they learn about in the first part of the course to interpret the information presented in the second part.

Experience and document North Carolina's Mexican and Latin American history. This course combines field research, oral history, and service learning to understand the immigration and settlement of North Carolinians with Mexican and Latin American heritage. The course will address the ethical and practical aspects of the ethnographic method including the preparation, transaction and transcription of oral history interviews. Students will participate in the New Roots Nuevas Raíces initiative and spend spring break (March 8-13, 2020) in Ocracoke, North Carolina, where they will collaborate with a local school to facilitate family heritage workshops. Students will also complete an independent research project and public presentation. The course is open to advanced undergraduates and graduate students. Required: 3 semesters of Spanish or ability to demonstrate Spanish language proficiency. Recommended: previous courses in Latin American or Latina/o/x studies, qualitative methods, or migration studies.

DESCRIPTION:

Students will examine evidence that human activity has caused global warming, investigate scientists' ability to predict climate change, and discuss the political and social dimensions of global climate change.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum of two FYS across their first two semesters at Carolina. Enrollment in a third FYS can only occur with an approved petition from the Associate Dean of First Year Curricula

DESCRIPTION:

What explains the 'pull of the Poles'? What motivated early explorers to undergo great hardships to investigate the Arctic and Antarctic, and what did they discover about these regions? What have we discovered in the intervening decades, and what do we still not understand about polar regions? Why do the Arctic and Antarctic play such a critical role in global climate? This seminar will combine scientific and historical perspectives to investigate the 'ends of the earth', the Arctic and Antarctica. We will begin by surveying the geography and oceanography of these regions, and then step back into the past and follow in the footsteps of some of the early polar explorers through their own accounts of their explorations. Modern accounts will help us compare and contrast these early explorations. The seminar will also include readings and discussions about current questions and problems of the polar regions, in particular human impacts and potential effects of global warming. A 'Makerspace' component is an important feature of the class; students will be supplied with materials to work on a design/build challenge, testing, revising, discussing, and consulting with one another to improve their efforts through the course of the semester. This 'making' experience is highly relevant to the experiences of early polar explorers as well as modern oceanographers, who often have to

DESCRIPTION:

In this first year seminar, students will explore ideas from topology and geometry and their application to symmetry patterns. We will start by building intuition for properties of surfaces with games and visualization exercises. We will develop tools to distinguish surfaces and prove impossibility theorems. Next, we will study the curvature of surfaces and discover connections with our previous work in topology.

The focus of the course will then shift to symmetry and the identification of repeating patterns in the world around us, from snowflakes, to frieze patterns on campus buildings, to designs on tapestries and wallpaper, to paintings like those of M.C. Escher. We will relate symmetry patterns to their folded-up counterparts, called orbifolds, and use tools from geometry and topology to determine which patterns are possible and which can never be achieved. We will extend our analysis to spherical and hyperbolic patterns, uncovering some of the shocking differences between Euclidean and non-Euclidean geometry.

MATH 233H.001 | Calculus of Functions of Several Variables
MWF, 10:10 am - 11:00 am. Instructor(s): Emily Burkhead. Enrollment = 35.
Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.
NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

MATH 381H.001 | Discrete Math
 TR, 11:00 am - 12:15 pm. Instructor(s): Shrawan Kumar. Enrollment = 35.
 Logic and proofs, Sets and Functions, Number theory, Induction, Counting, Discrete probability, and Relations (Chapters 1,2,4,5,6,7 and 9 from Rosen's Discrete Mathematics text).
 This is the honors section of math 381. The usual course topics will be treated in a deeper and more demanding manner than in the regular sections. In particular, we will go through strategies for proofs very carefully (Sections 1.7 and 1.8, plus other material from the instructor).
 PREREQUISITE: MATH 232 OR 283.

My main interests lie in Representation Theory of finite dimensional semisimple groups
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

This topics course will focus on convex and non-convex optimization, motivated by applied problems in machine learning, data analysis and image processing. The first part of the course will provide an introduction to convex optimization, including convex sets and functions, modeling, conic problems, optimality conditions and algorithms. Then, we will consider non-convex problems, focusing on contemporary optimization challenges in machine learning and practical approaches for large-scale optimization. Our discussions will balance between theoretical aspects, numerical methods and practical implementation (via simple coding examples and assignments).

Applications we will discuss include: using convexity for establishing direct visibility in point-clouds; optimal mass transportation via linear programming; support vector machines with quadratic programming; conic optimization for sparse recovery and total variation image denoising; the Iterative Shrinkage Thresholding algorithm for linear inverse problems; multidimensional scaling via majorization; the Expectation-Maximization algorithm for maximum-likelihood estimation; and efficient optimization strategies for deep learning.

The objectives of this course are to:

- Gain an understanding of the genomic data types being collected on human tumors
- Learn about the basics of RNA and DNA NGS sequence analysis
- Learn about pattern discovery tools including hierarchical clustering and biclustering
- Understand the challenges of integrating heterogeneous data types
- Learn real world examples of complex data integration for class discovery

Course expectations:

- Group project with hands-on analysis of genomics data

This BD2K module is an introduction to Topological Data Analysis (TDA), with a focus on practical applications. As a tool, TDA has proven to be effective at quantifying topological and geometric structure in data, and has been used as a supplement to traditional clustering techniques. Moreover, advances in both computational power and algorithms for computing topological information make TDA more applicable than ever before. Again, the focus of this module will be on using TDA in practice and interpreting barcodes as describing intrinsic topological features of data sets. Programming experience is not necessary.

Class meets on zoom.

Course overview: The immersed boundary (IB) method is a mathematical formulation and a numerical method for modeling fluid-structure interaction (FSI). Typical IB formulations describe the fluid in Eulerian form and the structure in Lagrangian form, and use integral equations to link the Eulerian and Lagrangian variables. This course will provide an introduction to the IB approach to FSI, including mathematical formulations of the equations of motion for fluid-structure systems and fundamental numerical methods for the equations of fluid dynamics and structural dynamics, along with approaches to coupling Eulerian and Lagrangian variables using both regularized and sharp-interface formulations. The course will also discuss modern extensions of the IB framework, including to complex (polymeric) fluid models and incompressible solid mechanics models, and implementation issues, including effective solvers and approaches to parallelization to enable large-scale simulations.

Course requirements: Homework sets and a final project. Some assignments may use the IBAMR software (<https://ibamr.github.io/>).

The Seminar in Materials Science and Engineering is a required 1-credit course for all Materials Science students in fall and spring semesters of years 2-5 of their doctoral program. The course tracks attendance at the required APS departmental seminars. Attending departmental seminars is an important component of training for MTSC doctoral students. Engaging in the seminars will help students gain a working knowledge of a variety of research areas important to their doctoral research and to their future career.

TITLE: Music in the Movies

GEN EDS: VP, CI

DESCRIPTION:

This course will examine the concepts and techniques of film music, covering many influential film scores dating from the 1930s to the current day. We will analyze and discuss the various conceptual issues relating to film music, such as theme, narrative, character development, synchronization, etc., and compare the different approaches that film composers have taken with respect to these issues. Students will research and analyze film scores from a variety of perspectives (sonic/musical, dramatic, historical, etc.) in the form of class presentations and research papers. In addition, students will learn to use digital sound technology to incorporate concepts explored in the class in the creation of original sound design elements for pre-existing film footage. No

TITLE: When Moors Ruled in Europe: Music of Al-Andalus

GEN EDS: HS, WB

DESCRIPTION:

This course focuses is on the Iberian Peninsula, Occitania, and the Basque region during the time of the Crusades & roughly 700 to 1492 & when Moors ruled in Western Europe. History of the Crusades has received a lot of scholarly and artistic attention recently, with a particular focus on including the history of Arabic and African cultures in Western Europe and on opening up a diversity of scholarly perspectives. The goals for this course are to empower students to interrogate sources of information and to write reparative histories of the music and culture that recognize this ethnic diversity. Students will learn how to create ArcGIS StoryMaps for their reparative history projects.

This lecture course introduces ways to think about bodies and sound with a thematic focus on gender. We will study a range of musical, performance practices, and sound compositions that address the intersection of identity and creative expression.

As humans, our experiences of the world are shaped by our bodies: the capacities of our ears, the mobility of our limbs, the work of our voices, faces, and hands to express our ideas to others. This is our gender, this is how we make sound.

How do we hear gender? How can gender sound? How and why has music become such a powerful creative practice for articulating gender? What kinds of gendered discrimination happens within musical communities?

Topics include: drag, feminist punk, karaoke, trans rights protest, hip hop and masculinity, the speaking voice, lip-synching, and more.

An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1860. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class will involve a performance component.

Music, Technology, and Culture

From the earliest instruments to the latest electronic means of manipulating and disseminating sound, the tools and systems of human creation have had a profound influence on the development of music. Much of the discourse on music, however, tends to treat technologies as invisible, mere mediators through which music passes from creator to listener. Yet technology not only mediates, but also shapes music and influences music makers. This course will range across, time, culture, genre, and media to investigate the impact of technology on the musical life of the world. The following questions will guide discussion: What is the nature of the relationship between musical agents (listeners, performers, composers, etc.) and technology? What cultural priorities and value systems are revealed in the way musical agents interact with technology? How have new forms of making and experiencing music arisen out of this interaction and how have existing musical practices changed? The course will meet synchronously and online and will include lectures, small and large group discussions, and conversations with guest musicians, scholars, and technologists. This course has prerequisite requirements.

MUSC 390H.001 | Music and Politics

TR, 3:30 pm - 4:45 pm. Instructor(s): Stefan Litwin. Enrollment = 24.

The principle of "l'art pour l'art" (art for art's sake) has dominated much of the way we hear and understand music. Since its emancipation from the church and courts, western music has been viewed mostly as an aesthetic island immune to the influences of political reality. This seminar will examine the interrelatedness between music and society, focusing mainly though not exclusively on composers who sought to address political issues through their music. Some of Ludwig van Beethoven's most popular works, for example, among them the 5th symphony, were inspired by the French Revolution; Franz Liszt championed an early form of Christian socialism; and composers throughout the 20th century reacted to political turmoil, war and revolution by inventing a variety of new musical styles and compositional methods. During the course of the semester, through readings and research projects, we will trace these developments and examine how politics helped define music. No prior musical knowledge or abilities are required.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:

Novels, memoirs, and aisles of self-help books attest to our desire to transform ourselves. Yet, the idea of self-transformation is puzzling. If a person decides to embark on a new adventure in the hopes of transforming herself, can she really become a new self or is she merely exhibiting her preexisting adventurousness? What about the aspiring college student who is hoping that college will change him? How can we make sense of his aspiration? In this class, we will critically examine the idea of aspiration and transformation. Readings for this course will be drawn from philosophical, literary, and popular literature.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

DESCRIPTION:

What is evil? Who is responsible for it? Are there evil people? If so, how different are evil people from the rest of us? How should we respond to them? The seminar will explore the nature of evil, engaging with both real and fictional examples, using films, stories, and readings in philosophy, psychology, and more.

The course will involve short weekly writing assignments, as well as lots of discussion. In addition, students will select an independent project, present their findings to the class and lead a discussion on it.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

TITLE: Ethics and History of Human and Animal Experimentation

GEN EDS: PH

DESCRIPTION:

There are many historical examples of unethical uses of both human and nonhuman animals in science including the 40 year-long Tuskegee syphilis study and isolation experiments on infant monkeys in the 1950s. Yet whether or not a study is ethically sound is often much more complicated a matter than in these studies, and even for these studies, scientists at the time thought they were morally acceptable. This is a course about the ethics and history of animal and human subject experimentation. Issues to be addressed include: the history of the animal model in science; contentions in sorting the balance of harms and benefits of research; changing conceptions of role obligations, virtues, and identity of the 'good scientist'; the development of the vulnerable

PHIL 140H.001 | Knowledge and Society
 TR , 9:30 am - 10:45 am. Instructor(s): Alex Worsnip. Enrollment = 24.
 Epistemology is the branch of philosophy that deals with questions about knowledge, rational belief, evidence, and the like. Philosophical introductions to epistemology are often quite abstract, beginning with very general questions like `what is knowledge?` or `what is rationality?` and only turning to applied questions much later. This course inverts that trend by beginning with some of the areas of social human life in which questions about knowledge, rationality and evidence matter to us: areas like democratic politics, the law, science, and religion. It investigates particular knowledge problems that we, as 21st century citizens, face. For example: when there is so much contradictory information out there, how can we know who to trust? Should we be worried about the ways that our upbringings and social characteristics (e.g. gender, race, class, etc) shape and bias our beliefs, and if so what should we do about it? Should we even have beliefs about complex policy questions about which we are not experts? Should the existence of widespread disagreement about politics, morality and religion make us less confident in our own views? Is it ever really beyond reasonable doubt that someone is guilty of a crime?
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

PHIL 143H.001 | AI and the Future of Humanity: Philosophical Issues about Technology and Human Survival
 TR, 5:00 pm - 6:15 pm. Instructor(s): Francesco Nappo. Enrollment = 24.
 This course focuses on philosophical questions tied to advances in technology, in particular artificial intelligence (AI) and virtual reality (VR), and how they affect, positively or negatively, the long-term future of human beings. We will discuss whether such technology is an extinction threat for humanity or a new horizon for a novel way of survival. We will discuss the moral challenges faced by the rise of advanced forms of AI: what do we owe them, how will they relate to us, and how could we influence that things will go well? And we will discuss more metaphysical problems related to virtual reality and artificial intelligence: is a virtual reality an illusion or just a different kind of reality? Can minds and consciousness be realized by machines or computers?

Francesco Nappo is Visiting Teaching Assistant Professor at UNC Philosophy. Born and raised near Mount Vesuvius and Naples, Italy, he completed a bachelor's degree in Philosophy at the University of Naples. He is currently pursuing his PhD in Philosophy at the University of North Carolina at Chapel Hill.
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

PHIL 155H.001 | Truth and Proof: Introduction to Mathematical Logic
 MW, 3:35 pm - 4:50 pm. Instructor(s): Sarah Stroud. Enrollment = 24.
 Deductive logic, our subject, is the study of one species of good argument. We will use formal tools to more precisely characterize and investigate that species, in which the conclusion of an argument follows from certain premises simply in virtue of the form of the various statements involved. We will progressively uncover and study several distinct aspects of form that are relevant to such patterns, starting with what is called truth-functional logic and moving on to quantificational logic. One concern throughout will be whether and how we can rigorously prove that a conclusion follows or doesn't follow from a group of premises.

Assessment will be via frequent problem sets, which we will prepare for by using significant class time to work together on sample problems. The required textbook is Warren Goldfarb, *Deductive Logic* (Hackett).

PHIL 160H.001 | Introduction to Ethics
 TR, 3:30 pm - 4:45 pm. Instructor(s): Fabian Wendt. Enrollment = 24.

In this introduction to ethical theory, we will discuss classical and contemporary texts on the most fundamental topics in ethics: We will cover the nature of the good life, the criteria for right action, and the relation between religion and morality. We will also address skeptical challenges to morality and the question why one should be moral at all. Prominent sources from the history of ethics will include Aristotle (virtue ethics), Hobbes (contractarianism), Kant (deontology), and Mill (utilitarianism).

PHIL 163H.001 | Practical Ethics: Moral Reasoning and How We Live
 TR, 2:00 pm - 3:15 pm. Instructor(s): Tom Dougherty. Enrollment = 24.

This course draws on contemporary moral philosophy to shed light on some of the most pressing ethical questions of our time. We will look at arguments that help us answer practical questions like: Can sexual desires be politically criticized? Should abortion be allowed? Is it ok to eat meat? Are college athletics exploitative? Are we obligated to make donations to relieve people from poverty? Is military conscription the most fair way of organizing the armed forces? By the end of the course, you should have a good understanding of these practical ethical issues, and, more crucially, be equipped with the conceptual resources to think through new ethical questions and dilemmas as they arise in personal and professional life

PHIL 220H.001 | 17th and 18th Century Western Philosophy

TR, 11:00 am - 12:15 pm. Instructor(s): Markus Kohl. Enrollment = 24.

This course is an introduction to major themes and figures in early modern philosophy. We will study the doctrines of six philosophers whose thought has had a great impact on subsequent philosophy and on subsequent intellectual developments more generally: Descartes, Spinoza, Locke, Berkeley, Hume, and Kant. We will focus our attention mostly on the answers that these philosophers gave to classical epistemological and metaphysical questions, such as the following: Can we prove that there is a real world outside the mind, or could we always be dreaming (or be living in the Matrix) for all that we can tell? Is the mind identical to the brain, or are mind and body two different substances? Can we prove that God exists? How can we know mathematical truths about numbers or triangles? Are apples really green, or is greenness nothing but a subjective sensation in our mind? Are we rationally justified in thinking that the sun will rise tomorrow, or that a stone must fall to the ground if dropped? Does the existence or the character of objects depend on our minds? We will consider the answers that modern philosophers gave to these questions, both in light of the scientific developments of the 17th and 18th centuries and in their own

GR1

Attributes: Public Service Flag - APPLES, E6- Mentored Research, Research Intensive

Please note that for the spring 2021 semester, this course's working title is "Field Work in Philosophy (Intergenerational Philosophy)".

PHIL 292's General Education (EE - Mentored Research) and APPLES service-learning designations remain the same.

In this experiential education course students will have the unique opportunity to teach and learn philosophy alongside older adults in the Triangle area. Students will grapple with foundational works of historical and contemporary philosophy, participate in regular discussions with our partners, learn how to communicate complex ideas to a non-specialist audience, and administer a capstone event for our community partners. The experiential dimension of the course will provide an occasion for us to reflect on the nature and aims of education, including the prospect and value of lifelong learning beyond schooling and the social and civic ends of education. By creating spaces for intergenerational dialogue, we hope to draw on the wisdom and experience of older adults in the community, and to facilitate understanding across generations.

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
PHYS	53	001	3186	FYS NANOWORLD	Lecture (Remote Only - Synchronous)	3	A
Bldg: TBA		Room: TBA		Days: TuTh	Time: 09:30 - 10:45	INST 100	Instructor: Falvo,Michael R.
Class Enrl Cap: 24		Class Enrl Tot: 22		Class Wait Cap: 0	Class Wait Tot: 0	Class Min Enrl: 0	
Attributes: PL- Physical and Life Science							GR1
Reserve Capacity:		18-NOV-2020	RC CLAS UG FFYS	STDTS	Reserve Enrl Cap: 24	Reserve Enrl Tot: 16	
		13-DEC-2020	RC CLAS UG FFYS	STDTS	0	16	

DESCRIPTION:

The nanoworld is a strange and captivating place. It is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and behaviors, some of which are amazing and unexpected. We are still uncovering these rules, and are only beginning to apply this new knowledge to technology. Can we build molecular machines that cure disease or clean up the environment? Can we make computers using single molecule transistors? How do viruses and other bio systems assemble themselves? In this seminar, we dive into the basic physics, chemistry and biology that describe the nanometer scale world. We will also try to distinguish the true promise of nanoscience from the hype. Students will engage in class discussions informed by their weekly reading of selected scientific literature. They will also participate in small group projects building physical models of nanoscale objects and phenomena, and perform calculations to gain a quantitative understanding of the physics underlying the nanoworld. No prerequisite is required for this course, but a spirit of adventure is.

GR3

Spring 2021 topic: String theory provides a unification of the four fundamental interactions in elementary particle physics of electromagnetism, gravity, and the weak and strong forces. String theory is also the most ambitious theory to date for quantizing gravity. The course will introduce the classical motion of strings, their covariant quantization, the particle content spectrum of bosonic and superstrings, and their vertices and scattering amplitudes. The overlap with gauge field theories, quantum field theory and recent contour integral constructions of Feynman graphs will also be described.

DESCRIPTION:

Walk down Franklin Street or into any Wal-Mart store and you will enter into the international economy of the 21st century. These days it is hard to go far without encountering someone or something that is part of a global network of production, trade, and consumption. This seminar examines how globalization impacts economic, political, social and spatial structures of regional and local landscapes. This year we will examine the most vivid symbol of globalization, the Covid-19 pandemic that has swept around the globe and turned life on its head, virtually halting the world as we knew it, in its tracks. Through contemporary writing, news, film, documentaries, readings and popular accounts (blogs) we will examine how the pandemic has impacted cities across a number of dimensions: food security, health, transportation, the economy, housing (especially for the poor and the homeless), inequity, vulnerability and human dignity. Together, through blogs, cases and projects we will examine what pathways to resilient post-pandemic recoveries look like, for cities and our communities.

PLCY 071H.001 | Justice and Inequality

MWF, 12:20 pm - 1:10 pm. Instructor(s): Douglas MacKay. Enrollment = 24.

The value of equality is a foundational principle of the United States of America. The Declaration of Independence proclaims that all men are created equal and possess unalienable rights to Life, Liberty and the pursuit of Happiness. The Constitution of the United States requires that no State deny to any person within its jurisdiction the equal protection of the laws. Additionally, equality has been the goal of a number of influential political movements, including the Civil Rights movement, the Feminist movement, Occupy Wall Street, the LGBTQ movement, and the Black Lives Matter movement. Yet despite this prominence of the value of equality, the U.S. is becoming a more unequal society in a number of domains, particularly, with respect to the distribution of income, health, political influence, and social mobility. This course investigates the value of equality, and asks which forms of inequality are unjust and ought to be remedied. We will focus on a variety of different spheres of U.S. social, political, and economic life, including the distribution of income and opportunities, education, health, criminal justice, voting and political influence, and employment. We will also ask whether

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:

It has been over 150 years since the emancipation of black Americans and nearly 60 years since the passage of civil rights legislation, yet they still lag far behind white Americans in virtually every socioeconomic indicator. This course critically examines the causes, consequences of economic inequality and social policies to address these disparities, with a focus on racial disparities. We will examine the merits and limitation of various assumptions aimed at explaining these persistent disparities, explore how economic inequality is affected by race, systemic racism, and socioeconomic factors (education, labor market) and identify evidence-based policy options and proposal for reducing inequality. We will critically examine questions such as why do we need race-based policies in addition to economic based policies to address inequality within our society? Can policies promote wealth-building and also contribute to greater wealth equity? The course content will focus on the U.S. and be heavily weighted towards analyzing contemporary social and economic activity (2000-present).

	13-DEC-2020	RC	CLAS	UG	FFYS	STDTS	0	18

DESCRIPTION:

The impact of COVID-19 has exacerbated stark inequalities and exposed inadequacies in our society. Conventional economic strategies often focus on stopgap measures aimed at the most conspicuous problems and have failed to create sustainable paths for widespread prosperity. The course develops students' entrepreneurial mindset to search for new solutions. The class will cover the evolution of economic and political systems in prosperous societies and develop applied projects that empower students to impact their local communities and/or communities within North Carolina. The class focuses on critically connecting the historical context in order to envision resilient systems and solutions to contemporary challenges.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

*First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

TITLE: America's Labor Market

GEN EDS: SS

DESCRIPTION:

The course will familiarize students with the major public policies and movements affecting the American labor market. Students will learn how each of the following impacts the labor market: education, the minimum wage, Social Security, pensions, unions, unemployment insurance, welfare (Temporary Assistance for Needy Families, TANF), income taxes (including the Earned Income Tax Credit, EITC), self-employment, immigration, automation, and the gig economy. The course uses news articles, policy summaries, podcasts, and academic journal articles to help students learn the many theoretical and political viewpoints associated with each topic.

PLCY 110H.001 | Global Policy Issues

MW, 2:30 pm - 3:45 pm. Instructor(s): Tricia Sullivan. Enrollment = 24.

Global issues are challenging to address because their sources, impacts, and solutions extend beyond the borders of any one country and often require multilateral and collaborative responses. This course will introduce students to a number of current pressing global issues including migration and refugees, humanitarian intervention, globalization, poverty and climate change. Students will learn about these issues through lectures, assigned readings, individual research, class discussions, and in-class exercises. Emphasis will be placed on developing students' ability to understand and critically evaluate the causes and consequences of global policy problems, and to assess potential policy responses and the prospects for their success.

Tricia Sullivan is an associate professor in the Department of Public Policy and the Curriculum in Peace, War, and Defense. She received her Ph.D. in

PLCY 326H.001 | Social Entrepreneurship
R, 2:30 pm - 5:00 pm. Instructor(s): Abhi Moulick. Enrollment = 10.

This is the honors version of PLCY 326 Social Entrepreneurship. Social entrepreneurship entails addressing grand societal challenges (e.g., poverty, inequality, and climate change) using innovative tools from the for-profit and nonprofit sectors. Students will be exposed to both theory and application of social entrepreneurship. Students will conduct secondary and primary research and document findings.

Dr. Abhisekh Ghosh Moulick is an Assistant Professor of Public Policy and Entrepreneurship. He studies strategic tradeoffs in entrepreneurial contexts, with a focus on social impact.

PLCY 340H.001 | Justice in Public Policy

TR, 3:30 pm - 4:45 pm. Instructor(s): Benjamin Meier. Enrollment = 24.

To paraphrase the American political philosopher John Rawls, justice is the first virtue of public policy. No matter how efficient or well arranged, laws and institutions must be abolished if they are unjust. Accordingly, some of the most basic questions of public policy are questions of justice: what goals should the government aim to realize? What means may it adopt to realize those goals? In this course, we examine the most prominent theoretical approaches to these questions: utilitarianism, contractualism, and rights-based views. We shall aim to determine whether governments should maximize individual welfare, or whether the proper role of government is to respect and protect the rights of its citizens. We shall also employ these theoretical frameworks to think through pressing contemporary policy problems, which may include economic justice and the design of welfare policy, the ethics of climate change, justice in immigration, the moral limits of markets, the role of religion in politics, and the ethics of whistle-blowing.

PLCY 390.002: Ethics and Food Policy

If you eat, you are impacted by federal, state, and local food policies. These policies are, in turn, shaped by values. Over the course of the semester, we will examine the ethical perspectives that underpin different approaches to food policy, including agrarian, free market, and social justice perspectives. We will also examine competing approaches to agricultural subsidies, nutrition labels and nutrition assistant programs.

PLCY 581H.001 | Research Design for Public Policy

TR, 9:30 am - 10:45 am. Instructor(s): Steven Hemelt. Enrollment = 24.

All evidence is not created equal. The best evidence comes from good research. Research in the social sciences, especially public policy, informs debates that affect our day-to-day lives. However, these debates are often awash in normative or ideological shouting matches. We as policy researchers have the opportunity to inject such debates with reliable evidence based on well-crafted, carefully executed, defensible research. In this course, we will examine the attributes that separate strong from weak research in public policy. We will learn the nuts and bolts of applying the scientific method to questions of policy significance and focus on the critical use of analytic tools to uncover causal relationships.

Policy research is broadly concerned with effectiveness (i.e., did the policy/program have the intended outcome(s)?), efficiency (i.e., was the outcome achieved at an acceptable benefit-cost ratio?), or equity (i.e., were the benefits and costs of the policy/program justly distributed across individuals?).

TITLE: What Does It Mean to Be a Good Citizen?

GEN EDS: PH

DESCRIPTION:

What, if any, responsibilities accompany democratic citizenship? Voting? Active participation in political meetings? Obeying laws? Volunteering in one's community? Preserving natural resources for future generations? Adhering to certain values? Protesting unjust laws? This course offers an overview of the different ways in which Americans have answered these questions.

TITLE: Immigrants and Refugee in World Politics

GEN EDS: SS, GL

DESCRIPTION:

The movement of people across international borders is one of the most politically controversial issues in the world today. This class, which is discussion-based, focuses on two different types of global migrants, immigrants and refugees, and explores why these two groups move out of their countries and how they are treated by receiving countries. Immigrants and refugees have traditionally been thought of as politically, legally and ethically different from each other and this class explores these differences, but it also explores the many ways that they are similar. This class has two goals: 1) to give you a solid understanding of the key concepts around global migration so that you can contribute thoughtfully to discussions about immigrants and refugees

POLI 130H.001 | Introduction to Comparative Political Behavior
 MW, 3:35 pm - 4:50 pm. Instructor(s): Ashley Anderson. Enrollment = 24.

This course offers an introduction to the social-scientific study of comparative politics. It will introduce students to both the central empirical findings of comparative politics and the distinctive method of comparative analysis ; cross national comparison.

To achieve both objectives, the course will examine several questions crucial to the study of comparative politics through the lens of four competing approaches: structuralism, culturalism, institutionalism, and voluntarism. To begin, we will explore the emergence of modern nation-states and ask why some societies develop strong, economically advanced states while others do not? Second, we consider the origins of different types of regimes and examine what institutional and social arrangements condition regime type (i.e. ¿What sets of institutional arrangements better at holding politicians accountable to voters?) Third, we investigate the negative consequences of politics by looking at why and when some countries descend into political violence and

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

POLI 238H.001 | Contemporary Latin American Politics

TR, 3:30 pm - 4:45 pm. Instructor(s): Evelyne Huber. Enrollment = 24.

This course provides an overview of major topics in the study of Latin American politics. It is aimed at students with a desire to understand how Latin American societies and governments are organized, what the major problems are that these societies are facing, and what accounts for different outcomes from the point of view of the welfare of citizens. We shall examine both common traits in the region's history, culture, and economic, political, and social structures, and important differences between countries in these dimensions. We shall gain an understanding of the diversity of national experiences and a somewhat deeper knowledge of a few select cases: Argentina, Brazil, Chile, Uruguay, and Costa Rica.

Evelyne Huber, Morehead Alumni Distinguished Professor in Political Science, works on problems of development, democratization, and welfare states in Latin America and Europe. Her most recent books, co-authored with John D. Stephens and published by the University of Chicago Press, are entitled Development and NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. POLI 255H.001 | International Migration

W, 12:20 pm - 3:10 pm. Instructor(s): Niklaus Steiner. Enrollment = 21.

While the global movement of products, services, ideas, and information is increasingly free, the movement of people across borders remains tightly controlled by governments. This control over international migration is a highly contested issue, and it is complicated by the fact that never before have so many people had the ability to move from one country to another while at the same time governments have never had so much power to control this movement. This class explores the moral, economic, political, and cultural dimensions of this movement across international borders. The class is based on discussions (as opposed to lectures) and tackles thorny questions like: do we have an obligation to let poor people into our rich country? what constitutes persecution? how do foreigners affect national identity? how should citizenship be allocated? We will pay particular attention to the distinction between migrants who move voluntarily (immigrants) and those who are forced to flee (refugees) - is this an important distinction to make, and does one group deserve admission more than the other? No prior knowledge or experience is needed; instead, students need to be ready to dig deep into all sides of migration issues through

POLI 433H.001 | Politics of the European Union
 TR, 5:00 pm - 6:15 pm. Instructor(s): Liesbet Hooghe. Enrollment = 24.
 This course engages the European Union and the political causes and consequences of Brexit, nationalism, political polarization, and Trumpism. What kind of polity is emerging at the European level? How is European integration contested? Is European integration the beginning of the end of the national state in western Europe, or will states harness the process within their current institutional structures? In this class, students will have an opportunity to analyze the character and dynamics of European integration and the current economic crisis by reading speeches of contemporaries, evaluating alternative theories of European integration, and by using additional resources.
 This course has a double purpose: to think critically about one of the world's most important experiments in governance--the European Union and to probe the future shape of politics in the West and the wider world.
 The course will critically assess the emergence of the Europe Union, Brexit, the future of the EU, the rise of nationalism, political polarization, and the
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

This course has prerequisite requirements. The last day to add to a wait list for the spring semester is December 11, 2020. Course is restricted to NSCI majors only. This course provides students interested in the neuroscience field an opportunity to gain valuable networking, job application and interviewing skills. Over the course of the semester students will meet with neuroscience professionals and create application packages. Students will learn from individuals in neuroscience related jobs about the diverse careers options available and strategies for navigating the job market successfully. In addition, students will explore advances in neuroscience research and how they relate to industry, research, medicine and society. Our target audience are juniors ready to develop a career plan and to explore how neuroscience is applied in the working world

The nervous and immune systems interact with each other in complex ways to influence behavior, health and wellbeing. In this course, we will examine the mechanisms by which these two systems interact. Further, we will cover how the nervous and immune systems function together to serve homeostasis, behavior and disease. This course incorporates research-related activities such as a 3-minute thesis presentation to describe a student-generated research question, a viewpoint article to critically evaluate a neuroimmunology-related concept, and more

DESCRIPTION:

In this First Year Seminar we will consider family as a context for children's development. Contemporary families are highly diverse, and topics covered in class reflect this diversity. We will examine characteristics of traditional, divorced and step families, single parents, gay and lesbian parents, and immigrant families. In addition to taking two examinations, students will interview a family member and write a five-page paper based on that interview. Each student will also give a class presentation on a family-related topic.

REGISTRATION PROCEDURES:

- *First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.
- *First-year students who enrolled in a fall 2020 FYS will be able to enroll in a spring 2021 FYS beginning Monday, December 14th (12:01am).

PSYC 089H.001 | Critical Thinking in Psychology and Beyond: How to use Your Brain

TR, 3:30 pm - 4:45 pm. Instructor(s): Jonathan Abramowitz. Enrollment = 24.

Critical thinking is the ability (and willingness) to assess claims and make objective judgments on the basis of well-supported reasons. It is the ability to look for flaws in arguments and resist claims that have weak supporting evidence (or none at all). Critical thinking is not simply negative thinking; it fosters the ability to be creative and constructive, generate solutions, think of implications, and apply knowledge to a broad range of social and personal problems. Critical thinking skills are essential to success as a student, in your career, as a consumer of goods and services, and in many other areas of your life.

This course focuses on the development of critical thinking skills, especially as they relate to psychological science. The field of mental health is loaded with theories and interventions; some of them scientifically and logically valid, and others not. Critical thinking is a must if one is to successfully learn

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

PSYC 245H.001 | Abnormal Psychology
 TR, 2:00 pm - 3:15 pm. Instructor(s): Donald Baucom. Enrollment = 24.
 This course provides an introduction to the study of maladaptive or abnormal behavior of adults. The emphasis will be on the description of various symptom patterns of maladjustment, theory and research on the causes of such behavior, and the prevention and treatment of maladaptive behavior patterns. The course provides you with an opportunity to observe videotapes of individuals who experience these disorders, and the chance to develop your own conceptualization of how a given individual developed a specific disorder, along with creating a treatment plan for this person. My hope is that you will not only learn specific information about the various disorders, but in addition you will learn to think about adaptive and maladaptive behaviors in a thoughtful, realistic manner from a psychological perspective.

PREREQUISITE: PSYC 101
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

PSYC 260H.001 | Social Psychology

MWF, 10:10 am - 11:00 am. Instructor(s): Steven Buzinski. Enrollment = 24.

This course provides an introductory survey of experimental social psychology. Paying close attention to theory and research methods, we will examine a wide range of topics, from attitudes and emotions to interpersonal relationships and group processes.

PREREQUISITE: PSYC 101

Dr. Steven Buzinski is a Teaching Associate Professor and the Associate Director of Undergraduate Studies in the Department of Psychology & Neuroscience. He received his B.S. in Psychology from Lebanon Valley College of Pennsylvania, and his M.S. and Ph.D. in Social Psychology under Dr. Harold Sigall at the
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

PWAD 331H.001 | Cracking India: Partition and Its Legacy in South Asia
 TR, 11:00 am - 12:15 pm. Instructor(s): Pamela Lothspeich. Enrollment = 6.
 The Partition of India in 1947 was an incredibly tumultuous event, characterized by unprecedented mass migration, upheaval and violence. This event, precipitated by a hasty decision on the part of the deposed British, to carve Pakistan out of India, still has huge consequences in the region. Course materials will include works of fiction, first-person accounts, essays by nationalist leaders, and historical writings, as well as films and documentaries. Readings and films represent a range of experiences by people of different religious communities, regions, and language groups. Their stories illustrate not only the physical violence and economic toll of Partition, but also the psychological and emotional effects on the people who lived through it. To conclude, we will reflect upon how Partition still affects regional geopolitics and contributes to communal tensions today.

CROSSLISTED W ASIA 331H & HIST 335H.
 NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

DESCRIPTION:

This seminar is oriented toward students who are interested in learning about the culture and society of modern Israel. Specifically, we will examine the transformative power of the early Zionist discourse in the formation of the new State of Israel and the challenges to this discourse in years that followed. Consequently, the emphasis in this class will be on the cultural and social manifestation of the tensions between the creeds of ¿one nation¿ and ¿the melting pot¿ on the one hand, and the reiteration of ethnic, gender, and religious identities on the other. The first five sessions will provide contextual and background accounts for later discussions. Then, until the middle of the semester, the seminar will focus on various arenas of Israeli culture, past and present. The second part of the semester will be devoted to selected themes and case studies pertinent to culture and society in modern Israel.

Students may also register for this course under ASIA 60-001.

COURSE TITLE: Confronting Antisemitism

CAROLINA AWAY PROGRAM

JWST 390-001 is connected with the Carolina Away program.

COURSE DESCRIPTION

This course takes a broad look at antisemitism in history, our contemporary world, and at UNC. Class sessions will feature guest speakers and discussions on different aspects of this persistent form of hatred. The class offers a unique opportunity to explore the humanities and social sciences, meeting with faculty from English, History, Religious Studies, Psychology, German Studies and other fields. Students will hear firsthand testimony about individual experiences with antisemitism in Europe and the American South. Learning about the interconnections among Antisemitism and other forms of intolerance,

		13-DEC-2020	RC CLAS UG FFYS	STDTS	0		9

DESCRIPTION:

This seminar will examine how historians have reconstructed the life, teachings and death of the historical Jesus. We will look at the Gospels of the New Testament, as well as references to Jesus in other writings (Roman and Jewish sources, as well as Gospels that did not make it into the New Testament). In addition, we will explore how Jesus has been portrayed in modern film, including such Biblical epics as The Greatest Story Ever Told, such period pieces as Jesus Christ Superstar, such brilliant retellings as Jesus of Montreal and such controversial films as The Last Temptation of Christ and The Passion of the Christ. The ultimate goals of the seminar are to see what we can say about the historical man Jesus himself and how Jesus came to be portrayed in both ancient sources and modern imagination.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

RELI 217H.001 | Gnosticism
 TR, 11:00 am - 12:15 pm. Instructor(s): Zlatko Pleše. Enrollment = 24.
 This multidisciplinary course offers a comprehensive survey of ancient Christian `Gnosticism`, one of the earliest and most long-lived branches of early Christianity, notorious for its promise of personal salvation through a firsthand knowledge (gnosis) of the divine. Principal readings are drawn from the famous `Nag Hammadi Library`, a manuscript hoard buried at the time of official suppression of `heretical` sects around 350 CE and discovered in 1945 by two Egyptian locals. In this course, students are expected to develop expertise, in textual analysis and broad interpretation, of ancient Gnostic myth and to acquaint themselves with various denominations within Gnostic Christianity, their doctrines, and their ritual practices. We will situate the ancient Gnostics in a complex network of early Christian groups and their conflicting ideas about orthodoxy, authority, and canon, as well as identify religious, philosophical, and literary traditions that helped to inform the basic tenets of ancient Gnosis. The course concludes by focusing on modern uses and misuses of the term `gnosticism`; a broad category including the poetry of William Blake, the fiction of Kafka and Melville, psychoanalysis, the New Age movement, NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are

unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist between November 18 and January 2.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

RELI 270H.001 | Religion in Western Europe
 TR, 11:00 am - 12:15 pm. Instructor(s): Evyatar Marienberg. Enrollment = 20.
 In this honors course, we will explore various topics related to the past and present status of religion in general, and of certain religions in particular, in Western Europe, with, at times, an emphasis on three countries: the United Kingdom (UK), France (FR), and Germany (Deutschland, DE). After investigating key historical moments in the history of religion in Western Europe (and in the areas where these three countries in particular are today), we will explore the present situation. Some parts of the course will be devoted to one country, while others will compare a certain topic in a larger area. By the end of this course, students will have a good grasp of religion's place in, and impact on, Western Europe, in the past and the present. Being an honors course, students will be responsible for significant part of research and presentation of various topics.

CROSSLISTED W EURO 270H.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

RELI 315H.001 | Religious Frauds: Lies, Forgeries, and Fake News
TR, 9:30 am - 10:45 am. Instructor(s): Hugo Enrique Mendez. Enrollment = 24.
This course explores the problem of religious fraud-and more specifically, "pious fraud"-drawing case studies from Christian history. Although Christianity espouses a high moral code, some Christians have used deception to advance their beliefs and agendas: forging documents, inventing stories, and fabricating artifacts. Others have been suspected of these same activities. Throughout the semester, students wade through the thorny moral/ethical issues presented by the practice of pious fraud and debate possible cases.

DESCRIPTION:

This course explores the role the Camino de Santiago (the Way of St. James) played in the construction of a distinctive Spanish identity in the medieval period of Europe. We will approach this issue from a variety of perspectives. From the religious point of view, we will discuss the transformation of the man into a legend and eventually a myth, as well as the growth of the pilgrimage to Santiago. From the political and economic perspectives, we will examine the role of the Camino in the strengthening of the first Christian Kingdoms in the North of Spain, the creation of the first Spanish knight orders and their fight against Islam. We will also discuss the cultural transference that took place along the Camino by analyzing the art, architecture, music and literature that developed in the cities and villages along the pilgrimage routes.

REGISTRATION PROCEDURES:

*First-year students who are not enrolled in a fall 2020 FYS will register online when their registration appointment begins.

TITLE: Contagion and Culture: Lessons from Italy

GEN EDS: LA, WB

DESCRIPTION:

Set in plague-stricken Florence of 1348, Boccaccio's Decameron begins with a portrait of social unravelling and civic collapse that is uncannily familiar in our jarring new pandemic reality. What can medieval literature and philosophy tell us about how to live when our knowledge, institutions, and laws falter? Who is at fault when catastrophe strikes? What is the role of art in responding to trauma, in rebuilding society? How does communal suffering compare to private suffering? How are power and privilege revealed, increased, or challenged in a pandemic? How do the narratives we tell about different maladies shape our lives and communities? This course explores Italian responses over the course of seven centuries to these questions, and reflects on how the

Description:

This course provides an accelerated introduction to Romanian by teaching basic skills of speaking, reading, and writing it applied to a variety of real-life contexts. It covers levels one and two of the basic Romanian language sequence in one semester and is designed for motivated undergraduate language learners, especially those familiar with other Romance languages. It is the equivalent of SPAN 414 and counts toward the requirements of the Hispanic Linguistics major.

SPAN 301H.001 | Introduction to Literary and Cultural Analysis
 MWF, 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 11.
 This course is designed for students in the Honors Program, who have been recommended by their SPAN 261 instructor, or who have received the approval of the SPAN 301 course coordinator. The course prepares students to analyze texts in at least three different genres (theater, poetry, essay, narrative, or film), within a cultural context. In this process, students will improve their language proficiency in Spanish as they are exposed to different world views through the study of literature and culture. SPAN 301H differs from SPAN 301 in several ways; writing assignments are more challenging in terms of length and research expectations, and students use a Spanish conversation digital platform to further practice their Spanish skills speaking with native speakers. In addition, students also work on a creative, non-traditional, final project (a musical composition, an original short story, a graphic text, or any other cultural project based on their academic interests and inspired by our readings and discussions). The course also integrates cultural events outside of the classroom such as movies, guest lectures, art exhibits, or performances as part of class participation.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

SPAN 301H.002 | Introduction to Literary and Cultural Analysis
MWF, 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 9.
Dr. Cristina Carrasco is a native of Valencia, Spain, and has an M.A in Comparative Literature from the University of Iowa and a PhD. in Hispanic Literature from the University of Texas at Austin. Her research focuses on contemporary Spanish and Transatlantic studies. Building on her doctoral work on the autobiographical metafiction of Miguel de Unamuno, Rosa Montero, Enrique Vila-Matas, and Juan José Millás, she examines the ways in which contemporary hybrid genres continue to reconfigure Spanish and Latin American literature in an age of globalization and new cultural mestizajes. She is also interested in Transatlantic cinema and literature, particularly in texts that address recent immigration to Spain, exotic representations of marginalized groups, and transnational identities in the Iberian Peninsula. Her current research project explores Spanish and neocolonial representations of Latin America in contemporary Spanish women's narratives.

<p>MNGT 120H.001 Introduction to Interpersonal and Organizational Communication MW, 1:25 pm - 2:40 pm. Instructor(s): Katie Striley. Enrollment = 5. Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.</p>

SOCI 057H.001 | Rationalization and the Changing Nature of Social Life in 21st-Century America
 TR, 3:30 pm - 4:45 pm. Instructor(s): Howard Aldrich. Enrollment = 24.
 Today, fast food restaurants have become a model for everyday life. Some scholars have even talked about the "McDonaldization" of the nation and the world. By that, scholars mean a drive toward greater efficiency, predictability, calculability, and control by non-human technologies in modern organizations. This drive has shaped many features of American life, including health care, law, and education. Such forces have even affected personal relationships. Sociologists have a term for this process: "rationalization." The COVID19 pandemic has changed the way I teach this course, as it will now be online rather than in-person. Nevertheless, insofar as possible, we will still explore {rationalization} through a process called "active learning" in which you will have opportunities to explore online resources, engage in peer-to-peer discussions, and work with me to develop a research project in which you explore the impact of rationalization on an occupation that might be a destination for you. You will be assessed based on your contributions to blog posts, class discussion, short (two page) papers, and a research project culminating in a term paper (15-20 pages). We will have no traditional examinations or quizzes. NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

Prerequisite: STOR 614 or permission of instructor. The goal of the course is to cover two models in modern optimization: semidefinite programming (SDP) and integer programming (IP). The emphasis is on SDP.							

Both models generalize linear programming. In semidefinite programming (SDP) we have matrix variables constrained to be positive semidefinite (psd). In integer programs (IPs) we have integer constrained variables. Both IP and SDP are far reaching generalizations of linear programs. SDP in particular, is one of the most versatile, pervasive, useful, and exciting optimization problems to emerge in the last 30 years, and it has been called "linear programming for the 2000s". SDPs and applications in combinatorial optimization, polynomial optimization, control theory, to name just a few areas.

GR3

This course will cover Markov processes and related topics in continuous time. In particular we will cover basic elements of stochastic calculus with respect to continuous local martingales. The mathematical tools developed here are useful in many different areas such as mathematical finance, systems biology, engineering, physical sciences etc. The course should be accessible to anyone with background in measure theoretic probability.

GR3

The purpose of this course is to provide a strong foundation in the computational skills needed for graduate coursework and research in Statistics. Topics covered in this course include: 1. Introductions to statistically-oriented programming, such as R (some popular programming languages, such as MATLAB and Python will also be briefly introduced). Students will learn the core ideas of programming - data structures, functions, iteration, input and output, debugging, logical design, and abstraction. Students will learn how to write maintainable code, debug, and test code for correctness. They will learn how to write, comment, and organize code, how to set up and run simulations, how to fit simple statistical models to data, how to deal with large datasets and how to run parallel jobs in a high-performance computing environment. Also, version control with git, relational databases, and brief introduction to advanced data science packages such as tidyverse will be included. 2. Utilizing network data (mainly brain networks) to practice statistical computing skills, such as use of the Longleaf cluster for extracting brain networks from raw brain imaging data, and linear and non-linear dimensionality reduction of networks.

DESCRIPTION:

Have you ever had historical déjà vu? Were you ever struck by historical images in contemporary places? If not, you might be surprised to know how much of the past is hidden in plain sight. This seminar offers analytical strategies for understanding different ways that plantation culture was represented metaphorically in the 19th and 20th centuries with a view to understanding how it continues to manifest itself today with a particular emphasis on women's experiences. We will explore the idea of the plantation as a physical place, an often-nostalgic idea, and a lasting economic system. We will journey through poetry, film, literature, and music to see how these echoes appear in various women's texts from the US and the Caribbean. We will consider how our own identities inform our reactions to these texts and our broader environment. The final project for the seminar asks students to create their own plantation narratives;an engaging assignment that brings together history, storytelling, and analytic ability.

WGST 101H.001 | Introduction to Women's and Gender Studies
 MW, 3:35 pm - 4:45 pm. Instructor(s): Karen Booth. Enrollment = 24.
 In this survey course, we will explore some of the questions and topics at the heart of the study of and the struggle to end gender-based oppression (sexism or patriarchy). We will consider how it is that social or cultural constructions such as ¿masculinity,¿ ¿femininity,¿ ¿heterosexuality,¿ and ¿homosexuality¿

come to seem natural, biological, or innate and how and why feminists have challenged and continue to challenge these constructs.

Some of the main themes or ideas we will emphasize through lectures, readings, discussions, films, assignments, and the inevitable final exam are:

1. gender is a collective, institutionalized social construction or ideology, not a biological fact or an individual free choice;

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

GR1

DO NOT contact Faculty or staff about over enrollment. Capacity for this class was already increased. Keep checking Connect Carolina for potential available seats.

This course is the pre-req for the Business School (it substitute BUSI 101 and BUSI 107).

Runs half of the semester: Mod 3 (Jan-Mar).

WC/W are not options for any Mod courses.

BUSI	102	003	8016	INTRO FINANCIAL ACCOUNTING	Lecture (Remote Only - Synchronous)	1.5	A
Bldg: TBA		Room: TBA		Days: MW	Time: 08:00 - 09:15	INST	Instructor: SKENDER,CHARLES J
Class Enrl Cap: 185		Class Enrl Tot: 183		Class Wait Cap: 10	Class Wait Tot: 0	Class Min Enrl: 0	

GR1

DO NOT contact Faculty or staff about over enrollment. Capacity for this class was already increased. Keep checking Connect Carolina for potential available seats.

This course is the pre-req for the Business School (it substitute BUSI 101 and BUSI 107).

Runs half of the semester: Mod 4 (Mar-May).

WC/W are not options for any Mod courses.

Last day to add: Jan 25 via Connect Carolina, after that March 26 via drop/add form, student needs to see an advisor at Steele Building.

BUSI	102	004	8017	INTRO FINANCIAL ACCOUNTING	Lecture	1.5			A	
					(Remote Only - Synchronous)					
Bldg:	TBA	Room:	TBA	Days:	MW	Time:	09:30 - 10:45	INST	100	Instructor: SKENDER, CHARLES J
Class Enrl Cap:	185	Class Enrl Tot:	185	Class Wait Cap:	10	Class Wait Tot:	0	Class Min Enrl:	0	

GR1

DO NOT contact Faculty or staff about over enrollment. Capacity for this class was already increased. Keep checking Connect Carolina for potential available seats.

This course is the pre-req for the Business School (it substitute BUSI 101 and BUSI 107).

Runs half of the semester: Mod 4 (Mar-May).

WC/W are not options for any Mod courses.

Last day to add: Jan 25 via Connect Carolina, after that March 26 via drop/add form, student needs to see an advisor at Steele Building.

Students will develop skills to evaluate interactions between business and today's social, environmental and economic challenges using the triple bottom line (people, planet, profit). This course examines strategies that reduce negative impacts in order to mitigate risk and identify opportunity. It focuses on innovative entrepreneurial and corporate business models that create positive social and environmental impact, while driving profitability. Students will also explore how business can facilitate the United Nations Sustainable Development Goals (SDGs) and how the SDGs influence business strategy through an estimated \$12 trillion of new market opportunities.

Two weekends, Friday through Sunday. January 10 - 12, 2020 (3 days from 9:30 am to 5:00 pm); January 31- February 1, 2020 (2 days from 9:30 am to 5:00 pm) and February 2, 2020 (1 day from 9:30 am to 2:00 pm).

NOTE: Students must attend every class in order to obtain credit. If a student cannot attend all of the class sessions (even for unforeseen circumstances beyond the student's control) the student will not be eligible to receive credit and may be required to withdraw from the course. NOTE: If during one of the weekends, there is an emergency that closes the school (e.g., snow event, etc.) or the instructor is otherwise unable to teach the course, then the instructor has reserved February 14 - 16, 2020 as a backup weekend (and you would need to be available then as well).

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

TITLE: Smart Cities

DESCRIPTION:

A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban networks, smart city urban planning, energy as a catalyst of sustainable development, smart city infrastructure, sustainable transportation, flow of information and communications, smart grids, digital infrastructure and the role of data and information technology. We will discuss criteria for measuring the smartness of a city, including quality of life, citizen governance, and discuss issues that go towards the making of a future smart city. Several case studies will be presented with guest lecturers invited to present on critical thinking and practices in smart city development. Students will be involved in group projects to assess smartness of cities.

INLS	151	001	8630	RETRIEV/ANALYZ INFO	Lecture (Remote Only - Synchronous)	3	A
Bldg: TBA		Room: TBA		Days: MW	Time: 15:35 - 16:50	INST	100 Instructor: Roscoe,Emily Elizabeth
Class Enrl Cap: 15		Class Enrl Tot: 12		Class Wait Cap: 10		Class Wait Tot: 0	
Attributes: SS- Social and Behavioral Science							
Reserve Capacity:		30-OCT-2020	RC CLAS UGRD SO SOPH	STANDING	Reserve Enrl Cap: 5	Reserve Enrl Tot: 5	
		30-OCT-2020	RC CLAS UGRD	FIRST YR	STDTS	5	4
		30-OCT-2020	RC CLAS UGRD	JR JUNIOR	STNDING	5	3

Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met; error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

<p>Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met; error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.</p> <p>*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.</p> <p>**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.</p>

PRE-REQ: 161 or successful completion of the technology competency test.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

Combined Section ID: 1008(envr/bioc/toxc442.001) - TOXC 442(#10149)							

Class notes: This course targets Graduate Masters and Doctoral Students in Environmental Sciences, Toxicology, Public Health, Chemistry, Medicine, Pharmacy, etc. Advanced undergrads will be admitted with permission. Contact Dr. Ilona Jaspers ilona_jaspers@med.unc.edu or Dr. Rebecca Fry rfry@unc.edu for permissions or questions.

Prerequisite, CHEM 430; permission of the instructor for students lacking the prerequisites. Required preparation, one course in biochemistry. Biochemical actions of toxicants and assessment of cellular damage by biochemical measurements. Three lecture hours per week.

Combined Section ID: 0089(math769/envr764/masc784) - MATH 769(#2803), MASC 784(#3934)

Prerequisites, MATH 661, 662, 668, and 669. Current models in science and technology: topics ranging from material science applications (e.g., flow of polymers and LCPs); geophysical applications (e.g., ocean circulation, quasi-geostrophic models, atmospheric vortices).

ENVR	765	001	11345	SPACE TIME EXPOSURE MAPPING	Lecture (Remote Only - Synchronous)	3	A
Bldg: TBA		Room: TBA		Days: TuTh	Time: 12:30 - 13:45	INST 100	Instructor: Serre,Marc L.
Class Enrl Cap: 25		Class Enrl Tot: 11		Class Wait Cap: 5	Class Wait Tot: 0	Class Min Enrl: 0	

GR3

Prerequisite:

Multivariate Calculus (MATH 233 or equivalent)

A grasp of linear algebra (for example through MATH 547- Linear Algebra, or equivalent)

A grasp of statistics (for example through a prior course in statistics)

Experience with, or willingness to learn, the MATLAB computer language

ENVR	775	001	11814	GLOBAL CLIMATE CHANGE INTERDIS	Lecture (Remote Only - Synchronous)	1	A
Bldg: TBA		Room: TBA		Days: Tu	Time: 15:30 - 16:45	INST 100	Instructor: WEST,JAMES JASON
Class Enrl Cap: 80		Class Enrl Tot: 28		Class Wait Cap: 0	Class Wait Tot: 0	Class Min Enrl: 0	

GR3

Open to all undergraduate, graduate, and professional students. 1 Credit hour.Undergraduates register for ENVR 475 and take the class Pass/Fail. Graduate & Professional students register for ENVR 775 and take the class for a grade.

Class Enrl Cap: 20 Class Enrl Tot: 16 Class Wait Cap: 5 Class Wait Tot: 0 Class Min Enrl: 0

GR3

This special topics course is "Energy Modeling for Environment and Public Health" and provides a more advanced focus on modeling energy systems beyond back-of-the-envelope. It combines quantitative methods in power systems engineering and introduces prominent energy models relevant to national and international energy planning. The course would compare and contrast 1) optimization, 2) simulation, 3) forecasting and outlook, 4) economic dispatch, and 5) mixed-method scenario development.

*Please select 3 credits for this course when enrolling.

This intermediate-level course is the equivalent of the third semester of college Spanish. Students will hone their listening and speaking skills in class primarily through role-playing activities and class discussion. Activities center on an original film set in a health clinic in rural North Carolina.

While normally offered as a spring break inter-professional service learning trip to rural Tyrrell County, North Carolina to work in partnership with community agencies, this year's course will focus on public health-related recovery and mitigation issues of the COVID-19 pandemic.
 Description: Students will hear from practitioners in the field as well as complete a semester-long group service-inspired project focused on a COVID-19 recovery/mitigation topic. Topics to be explored include:
 Recovery issues related to responder mental health, food insecurity, COVID long-haulers, Mitigation issues related to public health infrastructure and funding, pandemic preparedness, addressing systemic racism and equity issues highlighted by COVID-19.
 The dates of class will be Jan 21 and 28, Feb 4, 11, 25, March 4, 18, 25, and April 1 and 8.
 Textbook: None

SPHG 428H.001 | Public Health Entrepreneurship

M, 4:40 pm - 7:40 pm. Instructor(s): Alice Ammerman / Laura Fieselman. Enrollment = 15.

The innovative and sustainable nature of entrepreneurial pursuit can benefit public health initiatives, especially when entrepreneurship identifies economically self-sustaining solutions to public health challenges. This three-credit course will introduce students to basic concepts and case studies of commercial and social entrepreneurship as applied to the pursuit of public health through both for-profit and non-profit entities. This course features many guest speakers with successful experience in public health entrepreneurship in diverse arenas.

At the core of this course is a real-world project where students will work in groups to design their own start-ups, refining both their idea throughout the semester and pitching it to experienced entrepreneurs for feedback.

NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu
