		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1			19

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The boundaries of Blackness are constantly in flux, and pinning down an accurate definition of Blackness in the U.S., to be specific, is becoming an increasing complicated task due to changing social norms, immigration, emigration, the increasing number of immigrants from Africa and the Caribbean, the growing number of multi-racial persons, and even increasing socioeconomic bifurcation among those traditionally categorized as Black. Who is included in the definition of Black is not only a matter of color and history but also of politics, culture, and self-identification. Over the course of the semester, we will engage in the debates around Blackness. We will examine scholarly texts and government documents as well as film, novels, and memoirs. Our goal is to attempt to define Blackness as well as to understand the mechanisms that influence the boundaries and definition of Blackness. ABOUT THE INSTRUCTOR: Professor Candis Watts Smith tends to ask research questions that blur disciplinary lines; many of the questions she poses can only be answered by considering bodies of literature, theoretical frameworks, and methodological strategies found in Sociology, Political Science,

ABOUT THE SEMINAR: This seminar is designed to introduce students to Africa's modern history and politics. Starting with a brief, recent history of the continent, we will focus on the variety of systems of government in Africa and the challenges facing them. Traditional institutions, juxtaposed with modern institutions, will be discussed with a special focus on the types of leadership involved in such institutions. A major part of the seminar will pose questions such as: ¿ What has been Africa's record in the march toward democracy? ¿ What are the obstacles to democratic transition and how have Africans tried to overcome such obstacles? ¿ What are the roles of the constitutional systems and the forms of government in advancing democracy? ¿ What is the role of leadership? ¿ What difference does the type of leadership (monarchy, republican, etc.) make in the march toward democracy? ABOUT THE INSTRUCTOR: Bereket Selassie is the William E. Leuchtenburg Professor of African Studies, and Professor of Law at UNC, Chapel Hill. After over 20 years of engagement in government, law and diplomacy, Professor Selassie chose university teaching as a career. He has always enjoyed teaching, even when in

ABOUT THE SEMINAR: This course will examine hip hop's emergence in the US, and the proliferation of its practices and precepts to the far corners of the world through processes of cultural globalization, while focusing particularly on its manifestations on the African continent. Using Ghana, Senegal, Tanzania, and South Africa as initial case examples, the course will highlight variations that reflect the unique postcolonial and neoliberal landscapes with which African countries currently contend. In that context, the course will focus on ways that hip hop serves as a major conduit connecting African youth to global flows of information and sensibility, influences and stimulates local, indigenous forms of musical expression, how, particularly for young Africans, hip hop functions as a medium for political discourse and activism, and how, in the wake of neo-liberal austerity, hip hop forms a vehicle of social agency for displaced, generally youthful groups. ABOUT THE INSTRUCTOR: Dr. Perry Hall was involved in the early development of African American Studies with the National Council for Black Studies, chairing the committee that produced the first report on Black Studies core curriculum. His scholarship

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This first year seminar is designed to better prepare students for future international travel, research, service, and work opportunities while understanding the implications of national identity and action in a global environment. Using group projects, collaborative field study, and individual proposal writing, we will explore a wide range of issues. Differences in geography, politics, religion, culture, gender roles, and more will be considered as students intensely develop individual plans for foreign travel, study, and work using readings, class exercises, documentary video and photography, and interviews. There will be a special focus on transportation systems and other forms of infrastructure that impact navigating places, people, and information. In addition, the class will have specialized access to professional resources to help identify funding sources for travel. Students will be individually guided through the fellowship application process of researching international travel opportunities and writing a competitive travel proposal and budget. ABOUT THE INSTRUCTOR: Rachel A. Willis is a Senior Fellow at the Global Research Institute and Associate Professor of American Studies

This course provides an overview of the interdisciplinary methods of American Studies and contemporary approaches to the study of American society and culture, with an emphasis on literary works. In addition to a variety of short stories and essays and one or two novels that cover the span of the twentieth century, our examination of American life will center on four historical moments. In past semesters, we have covered such diverse subjects as the Spanish-American War and the U.S. occupation of the Philippines; representations of marriage and consensual governance in Hollywood zombie movies of the 1930s and 40s; the cultural impact of the Beat Generation and the commodification of beatnik culture; the AIDS epidemic and gay and lesbian political activism in the 1980s; and representations of globalization and new religious movements in late 20th century science fiction.

AMST 203 introduces students to the fundamentals of American Indian and Indigenous Studies, from theoretical orientations and source materials to research methodologies and means of reporting. The course begins with an exploration of the field's origins and evolution. Then, throughout the semester, we will learn about the approaches adopted by archaeologists, historians, anthropologists, literary scholars, and specialists in law. You will gain a critical introduction to the questions asked by individuals working in these fields and to the raw materials of their various ways of knowing, including ethnographic interviews, oral histories, archival materials, artifacts, maps, language, place, forms of expressive culture, and material objects. Still more exciting, you will be learning directly from the outstanding American Indian and Indigenous Studies faculty at the University of North Carolina and a few special guests. Rather than merely listening to others talk, however, you will also apply the insights and techniques about which you are learning in the context of a research project.

AMST	211	001	5158	SOUTHERN STUDIES LITCULT	Lecture	3		A

(Face to Face Instruction)

In the past, to discuss the South, we would first define the borders of the region, and theorize about what makes the South distinctive. The "old" map of the South traditionally referred to the eleven states of the former Confederacy, but today, these rigid borders are more fluid. The South "is found wherever southern culture is found," existing "as a state of mind both within and beyond its geographical boundaries." Beyond the question of what constitutes the South's borders, a new vision of Southern Studies challenges conventional tropes of southern identity. The "new Southern Studies" considers landmarks of southern identity other than the Civil War, Reconstruction, and barbecue. Rather than the old white and black South, the "new Southern Studies" recognizes the diverse cultures and ethnicities of the South, whose global influences have shaped the region in powerful ways for centuries. In this gateway course to the study of the American South, students will examine southern cultural identity, recognizing the contributions of all its people, including men and women of American Indian, African, Latino, Asian, and European descent. Students will consider the region in all its complexity through a multi-disciplinary conversation about the American South that considers art, archaeology, architecture, cultural tourism, ecology, folklife, foodways, geography, history, language, literature, material culture, myth and manners, music, politics, religion, values, and more. Throughout the semester,

What is it about animals that so intrigue us? What are our ethical responsibilities to other animal species on this planet? What do we truly know about dogs, horses or cats? Why should we care? This course is an introduction to the discipline of "Animal Studies" in American Studies work. This course defines the ¿literary¿ very broadly and will also include readings in philosophy (morals/ethics), history and critical theory. We will read work from dog and horse trainers, get an inside look at the workings of North Carolina barn culture and explore the history of the American racetrack. We will read works by Temple Grandin (animal science), Donna Haraway (feminist theory), Arthur Bradford (short story), Bill Barich (sports writer), Kathy Rudy (gender studies), Katherine Mooney (historian), Cary Wolfe (posthumanism) and Peter Singer (animal advocacy), among others.

AMST/HIST 233 explores the lifeways and historical experiences of the many and diverse peoples indigenous to North America's trans-Mississippi West. My goal is to make unfamiliar the familiar story of declension and defeat. We will begin by investigating the peopling of this space through stories of creation, migration, evolution, and change. We will then focus on the multifaceted encounters between Natives and newcomers from the sixteenth through the late nineteenth centuries. While not shying away from colonialism's punishing consequences, we will attend closely to stories of innovation, resistance, adaption, and survival. Readings this semester include Josh Reid's The Sea is My Country, Jennifer Denetdale's Reclaiming Dine History, Pekka Hamalainen's The Comanche Empire, and Colin Calloway's. "Our Hearts Fell to the Ground" Through the accumulation of new knowledge about Native people, students will gain an appreciation for the diversity and durability of indigenous lifeways and come to realize that the past is not past. Whether we realize it or not, we live it everyday.

We live in a time and place that is saturated with images. We cannot walk down the street, turn on a television, log onto the internet, open a book, order a meal, text a friend without an unrelenting barrage of images. There are so many images that we encounter in every waking moment of every day that we tend not to think of them, letting the visual world wash over us without reflection or criticism. Of course, if we tried to account for every visual moment and every visual element, we'd all be crazy. Thus, not only do we live in a visual world, we constantly edit it through a process of selective awareness and cultivated blindness. Visual Culture investigates the ways in which we express and grasp meaning through images. We cross boundaries looking at objects ranging from the fine arts to advertising to film to comics to websites and much more. This course provides the critical tools to scrutinize, navigate, and understand the visual worlds we inhabit.

This course examines American Indian art and material culture through interdisciplinary perspectives. Throughout the course students will gain a greater understanding of the role that the arts play in the social, cultural, and political life of American Indian peoples. This course will also explore a number of questions: What is the relationship between art and American Indian identities? How have Native artists negotiated various markets and audiences for their works? Over the course of the term students will read, discuss, and write about a number of objects and texts. In addition to articles and book chapters we will read: ı Arthur Amiotte, Transformation and Continuity in Lakota Culture: The Collages of Arthur Amiotte, 1988-2014 (Pierre: South Dakota State Historical Society Press, 2014). ı Janet Berlo and Ruth B. Phillips, Native North American Art, Second Edition (Oxford: Oxford University Press 2015). ı Louise Erdrich, The Painted Drum (New York: Harper Collins, 2005). ı Theda Perdue and Michael D. Green, North American Indians: A Very

Short Introduction (New York: Oxford University Press, 2010). & Brian Bibby, Precious Cargo: California Indian Cradle Baskets and Childbirth Traditions (Berkley: Heyday Books, 2004).

This course has several interlocking goals: (1) to develop a deeper understanding of the history of everyday life in North Carolina, and, by extension, in the American South over the last 125 years; (2) to develop a deeper understanding of the evolution of urban space in N.C., and, by extension in the U.S., especially in the years between 1880 and 1930; (3) to develop skills in the use of archival materials in the above; (4) to explore the use of digital technologies for identifying, collecting, organizing, interpreting, representing, and sharing the history of everyday life; (5) to apply the principles of project-based learning to digital history. We will focus on the kind of places that defined towns and cities in North Carolina in the early 20th century: &downtown& and the residential neighborhoods that surrounded them. Although the downtowns of most towns and cities in North Carolina took on their current forms between 1880 and 1920, the character of that built environment is now only partially &visible.& Buildings that were once landmarks have been torn down or significantly altered, original architectural details have been replaced or obscured, building functions might have changed dozens of times over the past century. The economic and social vitality of downtown at the turn of the century are now but a distant memory in many communities. In an important sense, we will be conducting urban archeology this semester: attempting to &reconstruct& the social, economic, cultural, and physical landscapes. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course provides an introduction to the phenomenon of language shift, endangerment, and revitalization, predominantly in the United States. Throughout the 19th and 20th centuries, the rich tapestry of minority languages spoken in this country began to change, tending toward a shift to English. This has led many indigenous languages to the brink of extinction, and to the loss of the heritage languages of many immigrant communities as well. This course examines

the social and historical motivations for this trend, and explores critical thinking skills for analyzing the phenomenon of language shift.

Enrollment is by instructor permission only; students interested in enrolling should contact Dr. Aaron Shackelford (ashackel@unc.edu). This seminar investigates the history of the arts as instruments of social change in America. Over the course of the semester we will explore how the arts provide a medium to process, respond, and draw attention to injustices and suffering. A large portion of this class will be student engagement in an arts-based service-learning project. Students will also attend a number of arts performances around campus and work with visiting artists as part of Carolina Performing Arts. This course can serve as a gateway class for the Arts in Public Service Fellows program, part of the Buckley Public Service Scholars.

How do we construct research in southern studies today? What methods do we adopt, modify, and innovate to write about the experiences of living in the past, present, or future of the US South? How can recent scholarship help us organize and analyze our own research projects? Whether we study the imagined souths of media and culture, global US souths of social and economic capital, ecological souths of field and city, or queer-raced-gendered souths in liminal spaces, we as writers about and students of this place must make decisions about how to proceed. Reading and discussion in this seminar explore strategies for today's southern studies. Then, from diverse disciplinary and interdisciplinary locations, we will choose methods for our own scholarship as we apply what we have learned to data gathered by the parallel Carolina Cooks/Carolina Eats course. The final project in the class will model southern studies'

methodologies to write about North Carolina, the state's foodways, and complementary projects developed by course participants.

This course will tentatively consider the filmmaker as public intellectual, an individual whose skillful orchestration of narrative techniques and formal elements generate compelling critiques of American society. We will examine works by a range of contemporary filmmakers that may include Spike Lee, Wayne Wang, Todd Haynes, Robert Rodriguez, Lars von Trier, Sarah Polley and others. No previous experience in film studies is required, but you will be expected to develop or expand your knowledge of film techniques, grammar, history and theory, and to draw on the terminology of film studies in your written work and short exams. In addition to reading a very limited selection of essays and interviews, and students are expected to watch two films outside of class most weeks during the semester. If you are curious or passionate about cinema, I invite you to take this course!

In this graduate seminar, we will map the methodological landscape of American Studies as it is practiced today. We will take up the approaches that inform the work of our diverse American Studies faculty, among them: textual analysis (of written, visual, and aural texts), ethnography, critical theory, folklore, historical analysis, media and film studies, legal and policy studies. And we will consider how these and other approaches are brought to bear upon complex cultural phenomena, among them: race, gender, indigeneity, place, performance, and material culture. We will also explore approaches and perspectives on American Studies that extend its reach beyond the academy: oral history, digital humanities, and public humanities, among them. Our work will be organized around weekly reading and discussion of exemplary journal articles and book chapters and conversations with American Studies scholars. Participants will undertake a project that demonstrates how a particular method/approach can be applied to a cultural phenomenon of particular interest/relevance. This course welcomes the participation of graduate students from all disciplinary orientations at UNC and area universities, independent scholars, and UNC staff.

This course focuses on the application of interdisciplinary digital humanities approaches within site-based, community-oriented, public history projects. We'll explore how to incorporate a physical and emotional sense of place into digital spaces. We'll also consider how to use digital technologies to interpret historic sites in ways that engage broad publics and foster local community. Students will analyze/discuss readings on digital humanities and public history theory, review case studies, and critique examples of digital public projects. They also will analyze ongoing work in the Digital Innovation Lab (DIL), including the Loray Mill project. Students also will gain hands-on, practical experience in applying digital tools & methods to a public history project. They will contribute work to one or more DIL projects in ways that could be translated into individual portfolios. No prior DH training is necessary, but a willingness to experiment and make small contributions to a long-term, collaborative effort is essential.

Combined Section ID: 0346(engl202/folk202/anth202) - ENGL 202(#9594), ANTH 202(#10100)								
Folklorists seek to understand how people interpret and make sense of the world. The study of folklore asks how, in a world flooded with commercial and highly refined cultural products, people use those particular materials that they themselves create and re-shape in order to express who they are, where they belong, and what they value. In this course we will look at diverse forms (or genres) of folklore, including song, architecture, legend, and food. We will consider how vernacular expressive culture is learned, what it does for people, and why these processes and products persist through time and space. Students will be introduced to the discipline of Folklore's central research methodology, ethnography, and have an opportunity to practice that approach through individual and group research projects. This course is cross-listed with ENGL/ANTH 202. Note: Students enrolling in FOLK 202-001 are also required to enroll in one recitation section numbered FOLK 202-601 through FOLK 202-604.

This course is cross-listed with ENGL 487. To be human is to tell stories and to feel the pull of the stories others tell. These days we have almost limitless access to stories offered in the highly produced, dramatized versions of TV and movies, yet other, personal and/or traditional narrative forms continue to fascinate. In daily informal communication we craft stories to recount and make sense of our own experience. Traditional fairytales allow us to revel in the fanciful while exploring our fondest dreams or deepest fears. Legends and rumors straddle the divide between the known and the uncertain, engaging us in a debate over what to believe and what is believable. Some stories encapsulate what is unique about a particular time, place, person, or culture. Others, found with variations in widely separated places and times, challenge us to consider the source of such ubiquitous appeal. Through telling and listening to stories we share knowledge, figure out who we are and what we might become, debate what really happened, stretch our imaginations, and internalize some cultural norms while challenging others. We encounter these stories in daily face-to-face encounters, in their iteration and transformation in TV and film, and, increasingly, shared through new social media. In this course we ask: What is the appeal of these three classic kinds of stories:

personal narratives, legends, and folktales? What makes a "good" story? What is ¿traditional¿ about stories transformed so many times in so many contexts?

How can we understand the relationship between distinctive features of urban environments and the folk traditions and expressive forms found in those settings? Through the lens of urban folklore and the work of academic and public sector folklorists working in American cities, this course explores the impact of the urban setting on folk traditions: the creation of communities around ethnicity, sexuality, and specialized interests; the ways in which space in the city is contested and negotiated; the atmospheres in which traditions and customs juxtapose and blend; the customizing of mass culture; and the processes through which cultural and religious geographies are mapped onto the city¿s landscape. Students will explore what anthropologists have termed cultural performances (Clifford Geertz) and social dramas (Victor Turner) through case studies and community fieldwork. While cultural performances often take the form of regularly recurring celebrations, commemorations, definitional ceremonies, or playful symbolic inversions, social dramas arise around flash points or crises¿racial violence, natural disasters, political upheavals¿that concern the life of urban communities. We will use our local cities as laboratories in which to examine how stories, children's games, community festivals, public art, music, dance and other expressive forms enable city residents to interact with natural and built environments and transform spaces into places that hold meaning. Students will conduct field research into an

Class will meet at: Center for the Study of the American South University of North Carolina at Chapel Hill 410 East Franklin Street, CB # 9127 Chapel Hill, NC 27599-9127 Graduate students enrolling in this course will also meet 9:30-10:30 on Tuesdays. This course focuses on Southern writers and explores how they use oral traditions in their work. We will discuss the nature of oral tradition and how its study can provide a methodology for understanding Southern literature. We will consider how specific folklore genres such as folktales, sermons, and music are used by Southern writers, and we will discuss how such genres provide structure for literary forms such as the novel and the short story. The seminar begins by exploring the nature of folklore and how its study has been applied to both oral and written literature. We will then consider examples of oral history and how they capture the southern voice. We will discuss how nineteenth century slave narratives by Harriet Ann Jacobs and Frederick Douglass and works by Tennessee Williams and Mark Twain deal with local color and black and white southern voices. After these readings, we will consider a rich selection of twentieth century Southern writers and discuss how they use folklore in their work.

To many, the combination of the terms "art"--with its implications of creativity and aesthetic engagement--and "ethnography"--the practice of engaged community study, with the end of deeper cultural understanding--might seem a bit odd. But this layering speaks rather pointedly to the ways we'll approach ethnography in this graduate seminar, treating it as more than mere process and skill, and as more than just research and writing. Ethnography--as a process based in conversation and the search for shared understanding--is inherently creative. It's always a "making," an enacting that begins with conversations in the "field," moves into domains of intimate sharing and mutual realization, and eventually finds voice in various forms of artful representation. All these realms of enactment involve a host of choices that ethnographers and their consultants creatively make throughout the course of their engagement. In the field, these choices encompass such matters as with whom to speak; how to present oneself in that speaking; how and with whom to craft bonds of collaboration; how to offer oneself as student, friend, and colleague; how to enact an ethic of caring and equity; and how to measure one's emergent understanding. In crafting the representation, choices involve what to include and what to leave out; when to give voice to consultants and when to speak for self; how to frame and how to order and how to story. In these arenas of dialogue and subjective choice lies the art in ethnography. This

The goal of this FYS is to encourage students to adopt a long view of human societies and to examine responses to crises engendered by political, economic, and environmental factors over the longue durée. Perspectives on societal change;both apocalyptic and transformational;are critically examined in this seminar in light of a suite of case studies that reach back to Mesopotamia (3rd millennium B.C.), Classic Maya and U.S. Pueblo dwellers of the first millennium A.D. and also include contemporary situations such as the Rwandan genocide, nations such as Haiti that are alleged to be ¿failed¿ states, and the current global crisis of environmental sustainability. Students gain familiarity with evaluating archaeological, historical, and environmental information that is pertinent to social change. The aim of the seminar is to foster critical thinking and the ability to evaluate narratives (in both scholarly and popular media) about societal crises and human resilience. Seminar research materials include books, journal articles, films, and student-run interviews. Class meetings generally consist of a short, introductory lecture followed by discussion headed by student discussion leaders who develop and circulate ¿talking points¿ before each class meeting based upon reading material for that day¿s seminar. Additionally, each student selects a topic or a case study to research in depth, develops a short class presentation (about 10 minutes), and writes a final research paper. FIRST YEAR STUDENTS ONLY. Patricia A. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

What happens when people try to ¿do good¿, especially at a global scale? In this seminar we will explore international aid, with an emphasis on its medical end and the set of organizations and institutions that exist to offer assistance to people suffering from disaster, endemic poverty and health disparities. The current aid complex includes a wide variety of forms and activities, from large bureaucracies to tiny NGOs, massive health campaigns to lonely clinics. We will approach this phenomenon from the critical and comparative perspective of anthropology, focusing on actual human practice. Which forms of suffering receive international attention, and which do not? How do money and services flow and stop relative to inequality? What range of outcomes do different aid projects produce? Over the semester we will engage in two collective endeavors. First, to better situate current problems, we will review the background history of humanitarianism and development, including colonial missions as well as state oriented projects of social welfare. Thus equipped, we will then examine a number of case studies. During this section of the course students will engage in research projects, exploring specific examples in greater depth. FIRST YEAR STUDENTS ONLY. Peter Redfield is Professor of Anthropology. He received his undergraduate degree from Harvard University and his doctorate from U.C. Berkeley. His specialty concerns relations between science, technology and society, particularly in post-colonial settings. He also

ABOUT THE SEMINAR: Blackness and Racialization is an introduction to the history, social construction, cultural production, and lived experience of race. The course focuses on Blackness in the United States and Jamaica (for comparison), though it necessarily addresses other race formations such as Whiteness and Brownness. The course approaches racialization from three angles: historical; social; and personal. It utilizes historical, theoretical, ethnographic, and popular culture productions to explain the effects, uses, durability, and pliability of racial formations. Some questions that the course will address include: ¿What does the social construction of race mean in practice? How is race socially constructed? ¿How do racial categories and identities develop, persist, and change? ¿How does race work at various ¿levels,¿ such as the level of the individual, collectivity, and history? ¿What are the origins of various racial stereotypes? ¿Why do people have very different understandings of race, some embracing race, some rejecting race, and some claiming to not understand race at all? ABOUT THE INSTRUCTOR: Charles Price is an Associate Professor in the Department of Anthropology at

This course examines the role of skilled handwork in the creation of contemporary culture and society. Ethnographies about culturally varied artisan industries and apprenticeship will guide our investigation. We begin by exploring how the fundamentally human, sensual act of producing things with one's hands structures distinct ways of knowing and acting in the world. Next we turn to the archaeological record and consider the curious ways that skilled craftwork made chiefs, kings, and the concentration of political power possible. Taking up the industrial revolution, we will explore the customs and the causes that common folk defended as the alternative to a mechanized, capitalist order. Finally we devote the last third of the course to the parameters of modern artisan production, including the organization of work, the use of materials and technologies, and the differences between artists, artisans, trades people and laborers. Moving beyond the classroom and library, the course will have a major fieldwork component. Class participants will work throughout the semester with an artisan (defined broadly and inclusively) in order to make connections among readings, class discussions, and the practical concerns of craftspeople. Dr. Lorraine Aragon is a sociocultural anthropologist who has conducted lengthy field research with regional artists and artisans in Indonesia. She is an Adjunct Associate Professor in the Departments of Anthropology and Asian Studies at UNC.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is designed to provide an introduction to the science of soft materials. So, what are soft materials? On the one hand substances we interact with many times per day, such as food, soap, cream, glass, car tires and rubber boots; on the other hand essentially all of biology generates soft materials, such as our skin, hair, nails, blood, cells, and tissue. Soft materials can be challenging to describe mathematically but their complexity results in some unique properties. In this course we will cover the basics but also look at the latest research on soft matter such as self-assembly, DNA-origami and active matter.

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This class, which is taught from the perspective of art history, looks at fashion design as fine art, using dress innovations to explore aesthetics and culture in two different world regions: Europe and Africa. Fashion is generally associated with the West, centered in Paris, the iconic fashion city. We will use scholarly and popular writing about fashion, as well as images and video, to investigate how European and African cultures have imagined each other over the course of several centuries, including the colonial period. Our focus will be on the present, however, as we investigate how fashion design can reveal a great deal about the interactions, and the misunderstandings, between cultures. ABOUT THE INSTRUCTOR: Victoria L. Rovine is Associate Professor of Art History at the University of North Carolina at Chapel Hill. Her research focuses on clothing and textiles in Africa, with particular attention to innovations in forms and meanings across cultures. Her first book, *Bogolan: Shaping Culture through Cloth in Contemporary Mali* (Smithsonian Press, 2001 and Indiana University Press, 2008), examined the recent transformations of a richly symbolic textile.

<p>The purpose of this course is to gain a bird's-eye-view of some of the major traditions of art-making throughout the world, from Prehistory to the present and to develop a critically informed working definition of key concepts, such as "art," "craft," "culture," "heritage," "image," "ornament," and "beauty"--but also, "world," "space," "place." Using as a starting point the UNESCO list of World Heritage Sites, we will focus selectively on periods and regions, in order to acquire an introductory understanding of the many contexts (physical, political, symbolic, economic) for world art's extraordinary diversity and eloquence. We will read and discuss anthropological and philosophical texts, as well as more conventional art historical and critical sources. In this research-intensive Honors course, student teams will lead--on a weekly basis--"close-up" discussions of representative artworks from all the continents, spanning the more than 75000 years of human art-making. Our classes will be centered on a series of weekly or bi-weekly student-led discussions of assigned readings posted on our Sakai site. We will have weekly or bi-weekly quizzes on the assigned readings, and a mid-term examination designed as a set of short research exercises. Each class member will undertake a semester-long individual research project. Associate Professor Mary Par</p> <p>earned her MA at Bryn Mawr College, and her PhD at the University of Pittsburgh, concentrating on Art Criticism and Theory of the Italian Renaissance. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.</p>

PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: ¿You are what you eat,¿ but equally important is how you eat it. The rich tradition of Chinese food and the even richer tradition of writing about food offer a great food for thought. This course uses latest food writings to explore the major themes and topics related to food and food culture of China as well as Chinese food in North America. ABOUT THE INSTRUCTOR: Dr. Gang Yue teaches a variety courses on modern China and Tibetan

The content of this course will be essentially the same as that of a regular section of Biology 202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, and genetic engineering. There will be four lecture/discussion hours per week with special emphasis on class discussion. In addition to two mid-term exams and the final exam, there will be one significant writing assignment and one small group project during the semester. The required text for this course will be Introduction to Genetic Analysis (9th edition) by Griffiths et al. There is likely to be additional assigned reading from the primary literature. Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course. PREREQUISITE: BIOL 101 AND CHEM 101 OR 102 WITH A GRADE OF C OR BETTER.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Many of the topics in Evolution and Ecology have a mathematical underpinning. In this class, we will use mathematics to better understand some of the most fundamental processes in these fields. The goal of this class is to make a mathematical approach to these topics as accessible as possible. To accomplish that goal, we will use a number of techniques to remove some of the anxiety that many students experience when dealing with mathematical problems. This will include approaching problems using an intuitive approach, eliminating time constraints as much as possible, and encouraging lots of questions. The course is has a large research component in the form of two group projects. The mathematical techniques we use will predominantly consist of algebra, but will also include some calculus and elementary probability. There will be plenty of opportunities for refreshers in class if you have forgotten some of these approaches! PREREQUISITES: BIOL 101 OR EQUIVALENT; MATH 231 OR EQUIVALENT. Dr. Servedio's research centers on determining the evolutionary mechanisms that produce and maintain biodiversity. She is currently concentrating on the evolution of species-specific mate choice in animals, on the evolutionary effects of learning, and on the evolution of male mate choice. Dr. Servedio addresses these questions through the development of mathematical models of evolution.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature. FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED; APPLICATION AVAILABLE IN 213 COKER HALL. BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward fulfillment of major requirements; six credit hours may be counted as one lecture course with laboratory toward fulfillment of major requirements. Additional hours of research course credit will be counted as elective hours toward graduation. Gidi Shemer is a lecturer and an advisor for undergraduate students in the Biology department at UNC-Chapel Hill. He received his MSc. and Ph.D. from the Technion, Israel and continued his research here at Carolina. Dr. Shemer's research has focused on the physical interactions between

Our objective in the Honors Section of Biology 565 (Conservation Biology) is to take the course material from the Biology 565 lectures and find new, interactive, and collaborative ways to explore and learn about course topics from lectures and readings. In the past, we've examined and dissected the biological science embedded, unseen, in contemporary events and news stories. We've applied course topics to North Carolina environmental problems. We've devised original games that are based on course material, including predicting the future of endangered species populations and community decision making about conservation issues. We've invited in practitioners in the field for guest lectures with particular reference to what their day-to-day jobs are like, how they found their way to particular careers, and how students can approach the job market and careers in conservation science. But we will design our objectives, methods, and schedule together as a class early in the semester. PREREQUISITE: BIOL 201. Peter White is a plant ecologist and conservation biologist with research interests in biodiversity, forest and ecosystem dynamics, and the effects of natural disturbances like fire, wind, and flood, and human ones like habitat loss and fragmentation, invasive species, and climate change. His research often focuses on conservation problems and he has a long history of research in Great Smoky Mountains National Park, including the All Tax Biodiversity Inventory project that has been underway there. Peter also The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

16-NOV-2015 RC CLAS UGRD FIRST YR STDTS 1 12

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: Science as presented in the mass media is often shallow and misleading. Critical evaluation of news reports and claims by politicians, although daunting for the non-scientist, is not difficult if a few basic principles are applied. The underlying theme of this seminar is the development of the basic tools for critically examining information from, or flaws in, news reports and popular science writing. Additional readings by and about scientists are designed to present scientists and science in a more intimate context. The assigned books may include: Cantor's dilemma by Carl Djerassi; ¿Surely you're joking, Mr. Feynman¿: Adventures of a Curious Character by Richard P. Feynman; and Zen and the Art of Motorcycle Maintenance: an Inquiry into Values by Robert Pirsig. ABOUT THE INSTRUCTOR: Professor Glish is an analytical chemist. He cherishes that title because most people do not know what analytical chemistry is so he can do all kinds of different research and call it analytical chemistry. His general field of research is in mass spectrometry, a technique that also spans many different disciplines. His lab is involved in areas from development of new instrumentation to

This course will deal with the basics and some contemporary examples of four aspects of analytical chemistry measurements: methods for the separations of chemicals, the uses of absorption or emission of light by molecules for chemical analysis, the principles and study of chemical equilibria, and the

potentials of electrochemical cells. This course will include additional topics from the current analytical chemistry research literature, and discussions of the sociology and economics of academic science and the world of research publishing. The reading material will be a standard beginning analytical chemistry text (probably Harris' Quantitative Chemical Analysis) and reprints of current literature. The course should appeal to students considering chemistry as a professional career and/or those who seek an appreciation of what analytical chemists do in current research. PREREQUISITE: CHEM 102 OR 102. DEPARTMENT OF CHEMISTRY CONSENT REQUIRED. Mark Schoenfisch is a Professor of Chemistry with research interests that span in vivo sensors, biomaterials, implant-associated infection, and surface analysis. He enjoys teaching First Year Seminar, Analytical Chemistry, and Bioanalytical Chemistry. His research group is focused on developing more biocompatible (and thus useful) analytical devices for clinical use. Outside of the university, he enjoys running, photography and traveling with his family.

In the honors analytical methods lab students will use chromatographic, spectroscopic, and electrochemical methods to carry out a real world analysis. Students will work with real world samples throughout the semester and the lab course will emphasize group work. A portion of the lab will involve a group research project. Groups will be given a problem to solve and the time to design their own experiments, run their experiments, collect data, and give a poster presentation on their group research project. What is great about the group research is that each group decides on their own direction, what techniques they wish to use, and need to use, to solve a particular analysis problem. PREREQUISITE: CHEM 101/101L AND 102/102L. PRE/COREQUISITE: CHEM 241H. DEPARTMENT OF CHEMISTRY CONSENT REQUIRED.

Continuation of CHEM 261H with particular emphasis on the chemical properties of organic molecules. This course will be similar to CHEM 262, but with a greater emphasis on class discussion and on discussion of contemporary research problems. PREREQUISITE: CHEM 261 OR 261H. INSTRUCTOR CONSENT REQUIRED. Simon Meek is Assistant Professor of Chemistry. Researchers in Dr. Meek's group are involved with the discovery, design, and development of new chiral catalysts and catalytic methods for chemical synthesis. They focus on developing practical and effective catalysts that enable the use of simple and abundant starting materials for useful carbon-carbon and carbon- heteroatom bond forming reactions. Researchers are interested in understanding reaction mechanisms (efficiency and selectivity) as well as demonstrating and challenging catalytic transformations (reliability) in efficient enantioselective total synthesis of complex biologically important molecules. Areas of interest in Dr. Meek's research program include catalysis, stereoselective organic synthesis, and organometallic chemistry.

This course is not for those who wish to sit back and passively absorb information. Here the dynamic is turned around. I am here to guide the ship, and the students are the ones driving. I have put together a series of Biochemical learning exercises that require students to develop critical thinking and data analysis skills. I have made available multiple biochemistry texts and given you my notes, now it's time to see what it feels like to say, out loud, "I don't know!" That's OK. My primary objective is to prepare you for higher level courses in the discipline, whether they be biochemistry, medicine, graduate school, etc. If we have all given our best effort, you will leave this class with a toolset of critical thinking skills that will serve you a lifetime. This course is uniquely designed to help students "uncover" the concepts of biochemistry rather than simply "covering" the material. We seek not perfection in the matter of education, but only progress towards greater understanding. DEPARTMENT OF CHEMISTRY CONSENT REQUIRED. CONTACT THE DEPARTMENT VIA EMAIL AT [chemus@unc.edu](mailto:chemus@unc.edu). PLEASE INCLUDE YOUR NAME, EMAIL, AND REQUEST FOR CHEM 430H ENROLLMENT IN THE MESSAGE. Assistant professor of chemistry. Field of research: Biochemistry, chemical education, teaching with new technology. Teaching philosophy: ¿`Tell me, and I will forget. Show me, and I may remember. Involve me, and I will understand.¿ I believe any successful learning experience has, at its core, three positive connections that must take

Ancient Pompeii, the city whose life was snuffed out by a volcanic eruption almost 2000 years ago, has captured the imagination of multitudes since its rediscovery in the late 18th century. In this seminar we will explore the history and archaeology of this ancient city with the goal of better understanding daily life in the early Roman empire. How did ancient Pompeians spend their days? What were their houses like? Who ran the city and how were they elected? How did Pompeians cope with the various challenges of city life, such as sanitation and traffic jams? The course proceeds topically, moving from an exploration of the city's public spaces to an analysis of more private domains; Pompeian houses, gardens and tombs. Although the city's material remains will be the primary focus of our study, we will also consider evidence from literature, epigraphy and 18th and 19th-century publications. The impact of the rediscovery of Pompeii in the 18th century on the development of archaeology as a discipline will be one of our final topics of discussion. We will also consider the reception of Pompeii in contemporary popular culture. FIRST YEAR STUDENTS ONLY. Hérica Valladares is an art historian who specializes in the study of imperial Rome and ancient Campania. She has traveled extensively and conducted research in Italy, Turkey and North Africa. Prof. Valladares is the author of numerous articles on Roman wall painting. She is currently working on a book on the representation of love scenes in Roman art and literature. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: In this course we will read, analyze, and discuss the first full-length autobiography written in the Greco-Roman world, The Confessions of Augustine. Born to a Christian mother and a pagan father in North Africa, Augustine was sent to Carthage as a teenager to study law. His interests quickly shifted to philosophy and religion, and he began the struggle which continued to the end of his life to understand the world, God, sin, free will, and evil. In his Confessions, he describes the development of his religious and philosophical ideas, his family, his friends, his travels to Rome and Milan, and his conversion. By close reading Augustine's work and a selection of the works that inspired him (Genesis, Athanasius's Life of Antony, Vergil's Aeneid), we will investigate the genre of autobiography. Why did Augustine write an autobiography? How did he write it? For whom did he write it? ABOUT THE INSTRUCTOR: Robert Babcock's primary field is Latin Literature of the Late Antique Period (roughly 200-600 CE) and the Middle Ages, particularly the manuscript culture of these periods as well as the transmission and reception of ancient authors in the Middle Ages. He was the curator of

Classical Greek tragedy ended well over two thousand years ago but still captivates audiences today. This course will explore why that is. What are the central questions of the genre? We will read twelve Greek tragedies; some familiar (Agamemnon, Antigone), others less so (Heracles, Euripides; Electra); followed by Aristophanes; Frogs, a no-holds-barred comedy in which a battle of wits & words is waged in the underworld between the ghosts of Aeschylus and Euripides. As well as paying close attention to the original performance context, we will examine the ways in which these tragedies tackle difficult and compelling questions about agency, responsibility, the relations between individuals and their families and societies, politics, gender, the divine, the nature of human fate, and responses to war. Emily Baragwanath's teaching and research interests lie in the areas of Greek literature and culture, with a focus on the ancient historians, particularly Herodotus (the subject of her 2008 book, Motivation and Narrative in Herodotus, Oxford UP). She is especially fascinated by the literary techniques these writers employ in constructing their historical narratives, and by questions relating to the frontier between

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This seminar is designed to introduce early-career students to the role that networks play in contemporary global societies. Over the course of the semester, we will examine key ways to think about network societies, by taking up the idea of the network in social, political, economic, cultural and technological terms. With help from popular and academic writing, we will ask: What does it mean to organize the world through networks? How do identity, commerce, science, and political life function according to network thinking? In formulating responses to such questions, the seminar will center on in-class discussion, taking theories about networks and applying them to everyday life both within and outside a North American context. ABOUT THE INSTRUCTOR: Dr. Neal Thomas; academic work draws out connections between digital media technologies, knowledge, power, and everyday social life. From a critical humanities perspective, his current research looks at some core computer programming techniques at work in social media, to see how the technology encodes philosophical ideas about what it means to be social, and even what it means to /mean/ in the first place. If you've been

ABOUT THE SEMINAR: This seminar takes a historical approach to the relationship between popular culture and technological change, focusing on how artists and other workers in the film, TV and especially music industries have incorporated new technology into the production, distribution and consumption of popular cultural products and experiences. From vinyl records to CDs to mp3s, we will track pivotal format 'upgrades; and analyze their aesthetic, economic, legal and political ramifications. Controversies such as sampling and piracy will be debated in class, and influential companies including Apple and Amazon will be subject to our collective research. Students; own expertise and investments in pop culture will inform discussions and, ideally, research projects culminating in individual terms papers and group presentations. ABOUT THE INSTRUCTOR: Michael Palm;s teaching interests include media history and cultural studies of technology. His research focuses on technologies introduced into people;s everyday lives, and their role in the emergence and interplay between new forms of work, commerce and consumption. He is finishing a book about the history of self-service technology, spanning

ABOUT THE SEMINAR: This course is an artistic laboratory introducing students to compositional strategies commonly used by modern and post-modern dance choreographers for creating and structuring movement. Students will work individually and in groups to fulfill movement assignments and foster their own artistic impulse. Geared toward dancers and non-dancers alike, this class only requires that students enter with a "beginner's mind": open, curious, and ready to explore. In addition to compositional assignments, students will view, discuss, and write about professional choreography as well as compositions created by the class. The combination of making dance compositions, discussing student work and analyzing professional choreographies will entail a physical, intellectual-critical, empathic, and curiosity-driven participation. The course will culminate with a public performance of student work. ABOUT THE INSTRUCTOR: Dr. Angeline Shaka earned her Ph.D in Culture and Performance from the University of California Los Angeles. Her publications include Theatre Journal and the encyclopedic definition of "Hula" to Dance Heritage Coalition's America's Irreplaceable Dance Treasures. Her current research

With the continuing growth in technologies, the increase in travel, and the movements of products and people across the borders of nation states, the concepts of family and community are increasingly changing. Foregrounded by these realities, this course combines theories of family and communication with documentations of lived experience, to interrogate family communication patterns in contemporary North American, as well as global, culture. PREREQUISITE: COMM/MNGT 120. Dr. Silva's research is at the various intersections of feminism, identity and Identification, post-colonial studies, and popular culture. Her most recent work has appeared in Social Identities, South Asian Popular Culture, and Cultural Studies. Silva is also the author of several book chapters on race, global media, and film.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is an artistic laboratory. While it introduces students to compositional strategies commonly used by dance choreographers for creating and structuring movement. Students will work individually and in groups to fulfill movement assignments and to foster artistic impulses. Geared toward dancers and non-dancers alike, this class only requires that students enter with a {beginner's mind:} open, curious, and ready to explore. Students will supplement compositional assignments by viewing and discussing live performances at Carolina Performing Arts. The course will culminate with a public performance of students' compositions.

Permission of instructor required for students lacking the prerequisite. Class meetings may also be held in the following alternative locations: Swain Hall 200A, Swain Hall 201A, and Swain Hall 106A. Detailed course description: Documentary filmmaking's currency is real life and its current popularity is in no small part a reflection of our desire to see that life represented accurately and honestly. In a frenetic media-saturated culture, to pay sustained attention to a person, a community, or a social phenomenon can feel like a radical act-- an act fueled by moral indignation, by a commitment to expose injustice or simply by a need to understand another human being's experience. That is what documentary filmmakers do and it's what you'll learn to do in this course. Situated somewhere between art and journalism, documentary films reflect a range of approaches from the strictly observational to the reflexive ethnography, from interview-driven expositions to more poetic treatments. In response to readings, screenings, and class discussions, students will make their own short documentaries that reflect some of these approaches. You will learn how to research with an eye to visual storytelling, write treatments, plan shoots, conduct interviews, and shoot and edit documentary material. Other topics will include earning the trust of your subjects, ethical challenges, and how to reach your audience. A significant portion of class time will be devoted to workshopping student films. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. This course has prerequisite requirements. Prerequisites, COMM 130 (grade of C or better) and COMM 230

Permission of the instructor for students lacking the prerequisites. Detailed course description: The stuff of media culture today - from rap to apps - circulates within commercial markets that are often trans- and inter-national (if seldom "global" in any literal sense); and the production, distribution and consumption of popular culture (e.g., rap) and media technology (i.e., apps) seldom occur anymore within one nation, or even region of the world. In this course we will study media forms, content and cultures, moving across borders both official and de facto. Our primary subjects will be popular culture, media technology and the people who produce and consume them. Our guiding questions will be organized around the relationships of each to commerce and social change. Critical-cultural and political-economic methods of analysis will be taught. Case studies will focus on the film, music, fashion, social media and consumer electronics industries. Animating concerns will range from the labor of cultural production - in mines and factories as well as on set and in the studio - to the environmental impact of digital technology. Students will write an original research paper on a(n approved) topic of your choice. This course is reserved for COMM majors for the first two weeks of registration. Nonmajors can enroll beginning November 17th. This course has prerequisite requirements.

Permission of the instructor for students lacking the prerequisites. Prerequisites, COMM 130 (grade of C or better) or COMM 150 (grade of C or better) Class meetings may also be held in the following alternative locations: Swain Hall 106A, Swain Hall 200A, and Swain Hall 108A. Detailed course description: In this course students will learn a wide range of post-production techniques for video projects, using primarily After Effects (and Photoshop, to a lesser extent). Topics explored include: Compositing, that is to say the integration and collage-ing of multiple video/film/still/text layers. Motion Graphics deals with the movement through 2D and 3D screen space of these layers, and Visual Effects will consider the myriad ways one can distort, color manipulate, and modify these layers, or create such phenomena as smoke, rain, etc. Besides creating projects using these techniques, we will also screen and analyze how this form of image manipulation is used in television and motion pictures.

Course topic: Decolonizing Methodologies Detailed course description: This class seeks to explore the fundamental connection between critical social theory and qualitative research through readings, discussion, and workshop techniques. The class is divided into three sections: 1. The Problems of Research: Why should research methodology be 'decolonized'? What lineages of critique shape the practice and underlying theory of participatory research today? 2. Methods in Practice: What approaches, from interviews to videos, can research employ to enable greater engagement? What practical issues arise when working with communities to generate knowledge? 3. Student Projects: How can participatory research be integrated into graduate-level research

projects? What resources and support, as well as challenges and barriers, do students face in doing participatory research currently? This course is a core course for the Graduate Certificate in Participatory Research.

This seminar will use pornography, and claims about it, to approach whole clusters of issues that are crucial for thinking not only about what sexuality is and how it operates, but also what media and technology are, what roles they play in our lives, and what roles we want them to play in our lives. This will include the consideration of LGBTQI representations and identities just as much as it will involve the consideration of heterosexual representations and identities. When the former are appropriately taken into account, the longstanding popularity of pornography (and its unpopularity) appears to involve significantly different issues than it does when LGBTQI representations and identities are excluded, marginalized, or ill-considered. So do questions about precisely what is at stake in scholarly attention to pornography. One of the overarching concerns of this class will be media pornography's complex status as historical evidence. In pornography and in discussions of it, human beings have created a remarkable archive of materials that almost obsessively document all manner of social, cultural, intellectual, political, aesthetic, moral, and even biological change and upheaval. Very important rifts about such shifts are also recorded there. In fact, certain aspects of these contestations are not really documented elsewhere, and some are not really documented elsewhere with equivalent accessibility. In part so that we can thoroughly explore some of the more specific complications that are wrapped up in that

Course topic: Buff and Polish Detailed course description: The objective of this seminar/practicum is to provide an orientation to the process of finding employment in an academic (or academic-like) setting and to provide opportunities to develop the materials necessary to assist in that effort. Course experiences include: - Deconstructing job announcements (including teaching and non-teaching positions) - Developing a curriculum vitae - Developing a teaching statement - Developing a research statement - Writing application letters - Participating in mock job interviews Course readings are primarily from the Chronicle of Higher Education and publications of the career centers of several universities, including UNC-CH.

Detailed course description: COMM 909 is intended to help you "learn the ropes" of the academic world, especially as they will affect you during your graduate program, although much of what we do will be useful beyond your graduate work. In 909, we will address-- among other topics--information about resources offered to you by professional associations; strategies for establishing a peer network; writing successful academic arguments; applying for fellowships and grants; ethical standards and practices in research; etc. This will function as a proseminar; that is, it will draw on the experience of a number of resource persons-- faculty and advanced graduate students who have a wealth of knowledge about particular subjects, as well as sometimes folks from outside the department. Some of the issues in professional development are contentious, and so it's important to have multiple points of view represented. Please don't forget to always ask your adviser and to follow her/his advice first!

COMP	185H	001	12541	SERIOUS GAMES	Lecture (Face to Face Instruction)	3	A
<b>Bldg:</b> Sitterson <b>Room:</b> 0011 <b>Days:</b> MW <b>Time:</b> 12:20 - 13:35							
<b>Rank:</b> INST <b>Load:</b> 100 <b>Instructor:</b> POZEFSKY,DIANE P							
<b>Class Enrl Cap:</b> 10		<b>Class Enrl Tot:</b> 9		<b>Class Wait Cap:</b> 0		<b>Class Wait Tot:</b> 0	
<b>Class Min Enrl:</b> 0		<b>Foot note:</b>					
<b>Special Grading:</b> GR1							

COMP 185H is taught in conjunction of COMP 585: that is, it is a single set of lectures and teams will include both COMP 585 and COMP 185H students. The difference between COMP 585 and COMP 185H is the expected game development activities. Students taking 185H will be focusing on game design aspects and learning the aspects of the game development software that do not require programming skills; COMP 585 students will be providing the more advanced programming skills. Serious Games are training, learning, or propaganda games used in schools, the military, companies, and the public service sector. The premise behind studying serious games is three-fold: -First, games are a legitimate artistic media and just as we teach and preach through other forms of art, we can do so through games as well. Because people learn through doing, it is a way for players to absorb concepts in an efficient and memorable manner. -Second, games are a natural way for "digital natives" to interact with concepts. If we want to engage this population, we should do so in a media that interests them. -Finally, if people are going to play games, perhaps we can give them some games with additional value beyond entertainment (think classics vs. romance novels). This course is intended as a broad introduction to the field of serious games. We will look at a number of examples of

existing serious games in order to learn through case studies. The focus will be on game design but we will also look at development issues. We will explore

Computers and Society explores some of the many cultural, social, and ethical issues that arise from individuals; groups; and societies; use of information and digital technologies, particularly the Internet. Likely topics include, but are not limited to, the history of the Internet; attention and distraction; virtual worlds, communities, selves, and relationships; and computing in science fiction. Research and creative projects and presentations will utilize no-code or code-light digital tools, and basic instruction in their use will be provided. No prior programming experience is necessary. Considerable reading, writing, and collaborative work. Tessa Joseph-Nicholas (<http://tessa.web.unc.edu>) is the Director of Digital Arts and Humanities Projects and a Senior Lecturer at the Department of Computer Science at the University of North Carolina at Chapel Hill. She holds an MFA in Creative Writing from Cornell University and a PhD in American literature and poetics from UNC-Chapel Hill. She is a co-recipient of a two-year Innovation Grant from UNC's Institute for the Arts and Humanities for the project "Reimagining Gaming: Program in Alternative Games and Digital Innovation" and was named one of two 2013 Digital Innovation Lab/Institute for the Arts and Humanities Faculty Fellows.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January

<p>This class offers a survey of British drama and theatre practice from the late 1890s to the present. We will analyze texts, screen videos, engage in critical writing and thinking, and explore performance, all of which are intended to enhance your understanding and appreciation of this foundational period in dramatic history. While our treatment is necessarily selective rather than comprehensive, we will attempt a reasonable amount of depth in the course of our journey. We will consider plays in terms of both text and performance: that is, as literature or cultural artifacts, but also as blueprints for action in the theatre. Each work we study is remarkably different, and will give you perspectives on the variety of English drama from the late nineteenth into early twenty-first century. Approach them all with an open mind and an open heart. And, Anglophile, welcome to the class. Gregory Kable is a Senior Lecturer in the Department of Dramatic Art, where he teaches dramatic literature, theatre history, and performance courses and serves as an Associate Dramaturg for PlayMakers Repertory Company. He also teaches seminars on American Drama and American Musicals for the Honors program. He has directed dozens of productions at UNC and throughout the local community, and is a graduate of the Yale School of Drama.</p> <p>The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.</p>

This class is all about living fully in the moment and learning to identify and follow impulse. It uses exercises and assorted Theatre games to explore, embrace and strengthen the powers of imagination, courage, spontaneity and presence as they relate to the actor. This is a 3.0 credit hour course, it is not variable.

The course considers traditional garments worn in Africa, Asia, and on the Arabian Peninsula. Specific peoples considered vary from semester to semester. Class format for 12:30-01:45 is mainly lecture accompanied by numerous illustrations. Students who participate in the Honors section will also meet on Thursday morning from 8-9 am and consider the ways in which ethnicity in dress is re-interpreted and/or mis-interpreted by Hollywood. Each week, a different film, such as Rock the Kasbah, Mulan, or Memoirs of a Geisha, will be the focus. PERMISSION OF INSTRUCTOR REQUIRED. CONTACT DR. OWEN AT OWENBOB@UNC.EDU. Costume design and costume history, based in Western and non-Western traditions, form the basis of my teaching, with a first-year seminar occasionally added to the mix. I write about theatrical designers with books including Costume Design on Broadway and Broadway Design Roster, the catalog for the United States entry in the 2007 Prague Quadrennial, Design USA ( with Jody Blake) and The Designs of Willa Kim. I edited Late and Great: American Designers from 1960-2010 (and contributed an essay about Raoul Pene du Bois), published in 2010 as part of USITT's 50th Anniversary celebration. I also have research interests in traditional dress around the world which is increasingly disappearing and therefore even more important to document. NowesArk is an electronic study collection that contains information about traditional garments and accessories in the Department of Dramatic Art including some I have

Dramatic Art Technical Production Graduate Major

---

This course will take you on a journey through the history of global cinema from its origins to the present. We will closely examine several of the most groundbreaking and influential movements in film history, including: German expressionism; Soviet montage; film noir in classical Hollywood; Italian neorealism; "new waves" in post-World War II Europe and beyond; politically militant cinema of Latin America and Sub-Saharan Africa; popular and art-house Indian cinema; transnational blockbusters; East Asian martial arts genres; emergent Middle Eastern cinemas; and more. We will undertake a comparative study of these cinematic traditions and contexts, with an eye to exploring their aesthetic, cultural, and political interrelations. \*This course meets both the Visual and Performing Arts (VP) and the Global Issues (GL) general education requirements. Students enrolling in CMPL 143 must also enroll in one

recitation section numbered CMPL 143-601 through 143-604.

This course takes an historical approach to literary theory, with a focus on the questions that define the field of aesthetics. What is a work of art? What social functions does it play? What are the sources of an art work and how does it influence its audiences? We will read works by Aristotle, Kant, Nietzsche, Foucault, Derrida, J. L. Austin, Judith Butler, Glotia Anzaldua, and Terry Eagleton as well as some literary texts against which to measure the theorists. Students will write multiple response papers, and four 5-6 page essays.

In this course we will look at three modes of film that are not generally discussed together: animation, documentary, and the avant-gardes. We will examine these modes individually and in the multiple ways they intersect with each other. Accordingly, we will focus on artists such as Walt Disney, Oskar Fischinger, Len Lye, the Quay Brothers, Fernand Léger, Ari Folman, Andy Warhol, Paul Strand, Dziga Vertov, René Clair, Joseph Cornell, and Alan Resnais, as well as the Warner Brothers cartoons and newsreel films that were such popular examples of these forms in movie theaters throughout the middle of the 20th-century. We will approach the films both historically and critically, discussing how the artists approached their medium(s) and their relation to genre boundaries in motion picture production and reception.

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics	Session
CMPL	489	001	12451	EMPIRE AND DIPLOMACY	Lecture (Face to Face Instruction)	3		A

Combined Section ID: 0491(pwad489/cmpl489.001) - PWAD 489(#7912)								
PWAD 489/CMPL 489 explores the dialectic between epic literature and the concept of imperium with the aim of understanding their roles in shaping historical and cultural inheritance. A special focus of the course will be the role of diplomacy in historical events and as a thematic element in epic literature. Works include the Epic of Gilgamesh, Homer's Iliad, Virgil's Aeneid, Tacitus's The Germania, Beowulf, Shakespeare's King Lear, selections from Gibbon's The History of the Decline and Fall of the Roman Empire, Derek Walcott's Omeros. Special guest lectures by noted author, journalist, and diplomat Sir Christopher Meyer, the former British ambassador to the United States and to Germany. For further course details, please contact: leinbaugh@unc.edu.

ABOUT THE SEMINAR: This seminar explores ways that technology reshapes the study of literature and the ways writers compose. It emphasizes lessons in how to read and write about literary works, exploring how definitions of literature change as we consider not only fiction, poetry, and drama, but also music, art, and film. We also look at what it means to compose in the twenty first century, exploring blogging, podcasts, playlists, collages, videos, as well as familiar written forms. Class activities will feature some lecture, more discussion, and lots of project-based work. ABOUT THE INSTRUCTOR: Daniel Anderson has been teaching computer-assisted composition courses for 16 years. His work occupies the intersections of technology, teaching, and publication. He has developed award winning Web-based software for writing instruction and has published multiple books devoted to teaching and studying writing and literature. He has taught First Year Seminar courses at UNC2CH since the inception of the FYS program. He directs the Studio for Instructional Technology and English Studies at Carolina. His interests include teaching writing through the use of emerging communication media such as the

ABOUT THE SEMINAR: Will humans go extinct? If so, how? What are the ethical questions involved in human disappearance? How do humans themselves contribute to the possibilities, and what can be done to postpone the inevitable? This seminar will tackle some sobering (and, quite frankly, exciting and interesting) questions by reading cultural and scientific works that address human disappearance. We will read both science and fiction to think about the core concerns of the class. Our texts will include works ranging from Alien to the classic 1950s tale A Canticle for Leibowitz, from Danny Boyle's 28 Days Later to Cormac McCarthy's The Road. We will ask some fundamental questions about what it means to be human, how we imagine our societies and cultures to work (and not work), and what these texts and questions might tell us about how we are to live now. Students will read novels and short stories, watch movies and TV shows, and read scientific and philosophical papers that deal with human extinction. Students will also be required to write a paper and complete an original research project at the end of term that they will share with the rest of the class. ABOUT THE INSTRUCTOR: Tyler Curtain is

ABOUT THE SEMINAR: This first year seminar will use literature, film, and popular culture to explore different expressions of masculinity and femininity in the African American and Black diasporic context. Students will evaluate how artists use gender and sexuality for social critique and artistic innovation. ABOUT THE INSTRUCTOR: GerShun Avilez received his Ph.D. in English from the University of Pennsylvania, where he also earned a Graduate Certificate in Africana Studies. He has taught at Yale University and held the Frederick Douglass Post-doctoral Fellowship at the University of Rochester. He is a cultural studies scholar who specializes in contemporary African American literature and visual culture and 20th century American literature in general. His teaching extends to the literature of the Black Diaspora. Much of his scholarship explores how questions of gender and sexuality inform artistic production. He also works in the fields of political radicalism, spatial theory, and legal studies. His book Radical Aesthetics & Modern Black Nationalism is forthcoming from the University of Illinois Press in 2016 as a part of "The New Black Studies" Series. The book investigates

This discussion course will examine the attempts to dismantle the Raza studies curriculum in Tucson, Arizona. Rather than analyze texts that have been subject to individual censorship attempts, we will devote our attention to a case study of texts that have been targeted as a group. We will begin the semester by contextualizing the controversy surrounding the Raza studies curriculum in the Tucson Unified School District. To this end, we will examine the relation between the passage of House Bill 2281 and Senate Bill 1070 in the year 2010. We will investigate the connection between House Bill 2281, which, among other things, prohibits schools from having classes that "are designed primarily for pupils of a particular ethnic group" and "advocate ethnic solidarity," and Senate Bill 1070, which states that "where reasonable suspicion exists that the person is an alien who is unlawfully present in the United States, a reasonable attempt shall be made, when practicable, to determine the immigration status of the person." We will read articles and watch a documentary about the efforts to rid Tucson of its ethnic studies classes--and particularly its Mexican American studies classes--and the efforts to keep these courses in schools. We will devote the bulk of the semester to reading texts from the Raza studies curriculum in question, and we will put these texts in conversation with the charges leveled against the program. FIRST YEAR STUDENTS ONLY. Laura Halperin is an Assistant Professor in the Department of The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.` -----

ABOUT THE SEMINAR: In this section of English 87, students will reflect on a startling feature of Jane Austen's career: her most popular novel, Pride and Prejudice (1813), was quickly followed by her least popular, the problematic Mansfield Park (1814). What happened? Our shared investigation will be founded on (1) careful reading of the novels; (2) exploration of real-life analogues to Austen's situations and characters; (3) discerning the Regency literary conventions that Austen uses and ignores; and (4) discovering what readers, then and now, have expected of heroines, as registered in these two novels' literary and cinematic afterlives. Print texts include: Jane Austen, Mansfield Park; Jane Austen, Pride and Prejudice; Jo Baker, Longbourn; Paula Byrne, Belle: The Slave Daughter and the Lord Chief Justice; and Elizabeth Inchbald, Lovers' Vows. Cinematic texts include: Mansfield Park, dir.

Rozema (1999); Pride and Prejudice, dir. Leonard (1940); and Belle, dir. Asante (2013). Assignments: Your semester-long research project will be disseminated in several forms: 1) a fifteen-page paper (45% of your grade); 2) a ten-minute oral presentation for the class (25% of your grade); 3) an

ABOUT THE SEMINAR: This course focuses on reading and writing biography, emphasizing the relationship between a person and a place that is significant to his or her life. We will concentrate on persons and places in Chapel Hill, including UNC's campus and Carrboro. We will explore biographical forms, including books and film. You will create a final project around a person of your choosing from any time, past and present. For example, you might select someone like Pauli Murray, African-American lawyer and activist; Dean Smith, beloved coach; or the writer, Thomas Wolfe. You might choose a place, like the Old Chapel Hill Cemetery, and discover a person whose life connects to it. You'll learn the history and art of biography, including forms like video, photography, etc. along with traditional writing. In your role as biographer, you will conduct your own research, and assemble your own archive of materials to compose your biography. ABOUT THE INSTRUCTOR: Although she is an English professor, Jane Danielewicz is curious about most fields, from biology and architecture, to history and literature. She is a passionate reader, writer, and teacher. At Berkeley, her research explored linguistics,

This course focuses on reading and writing biography, but with a special emphasis on the relationship between a person and a place that is significant to his or her life story. We will concentrate on persons and places in Chapel Hill, including the UNC Campus and the town of Carrboro. We will be reading and viewing models of biographical forms, including books and film. You will be creating a final project around a person/place of your own choosing, from any field or profession. The person can be from any time in history, past and present (yes, you may decide to create a biography of a living person). For example, you might select someone like Pauli Murray, an African-American lawyer and activist, featured in the Special Collections at Wilson Library, or a celebrity like Dean Smith, beloved coach. You might choose someone associated with UNC, like the scientist Elisha Mitchell, or the writer, Thomas Wolfe. Or you might start with a place, like the Old Chapel Hill Cemetery or the debating room or "dialectic chamber" in New West on campus and discover a person whose life story is connected to it. The possibilities are vast and rich so that you can easily find someone linked to your own interests or major. You will learn about the history and art of composing biography, which in this contemporary moment, can be multimedia projects that include forms like video, photography, etc. along with traditional writing. In your role as biographer, you will be taught how to undertake research that will support your project. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is largely a study of perceptions and perspectives. It will examine first the well-documented European views of Native Americans presented in historical accounts and on artists' canvases, views which tell us as much about Europeans as they do about Natives. Then it will sample the explosion of perspectives presented by Native American novelists, poets, short story writers, and film makers whose voices, having been ignored for centuries, eloquently provide alternative views of themselves and of America. Because art is not produced in a vacuum, the course will also explore political, social, and cultural issues which have influenced each group's perception of the other. Texts: Erdrich, Tracks (ISBN: 0060972459) Alexie, The Lone Ranger and Tonto Fistfight in Heaven (ISBN: 0802141676) McNickle, The Surrounded (ISBN: 0826304699) Welch, Fool's Crow (ISBN: 0140089373) Rowlandson, The Narrative of the Captivity and Restoration of Mrs. Mary Rowlandson. (ISBN: 0939218208) Humphries, Nowhere Else in Earth (ISBN: 0141002069)

How does it feel to be a problem? Repression, resistance, and reparation This discussion-based class brings together a series of social texts -- literary, filmic, critical, historical -- that respond to, comment upon, and struggle with key events in 21st century "America." The exploration of race, ethnicity, class, gender, sexuality, and nationality and how they are structured by institutions and social relations and informed by cultural beliefs will enables us to understand how we participate in and interact with these structures, how we are defined by them, how we create them, and how we can critique and change them. Graded work: 3-4 papers, two exams, and group oral presentations. Texts include: Arab in America by Toufic El-Rassi; The Muslims are Coming; Michelle Alexander's The New Jim Crow: Mass Incarceration in the Age of Colorblindness; Harvest of Empire: A History of Latinos in America; and articles, poems, and music by June Jordan, Allan Johnson, Kamau Bell, Isabel Wilkerson, Bob Marley, Suheir Hammad, Rebel Diaz, & Ta-Nehisi Coates, among others.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. \_\_\_\_\_ This course is a collective, collaborative exploration of the processes and techniques of fiction, through close observation and discussion of about three dozen stories, and the writing of eight to ten short exercises dealing with the elements of fiction (setting, characterization, dialogue, point of view, etc.) and, later in the term, one short story (2,000-5,000 words). There is a midterm examination and a critical paper. The class is a seminar, a workshop with both written and oral critiques of student works required, and students can expect an atmosphere that is lively and encouraging as we investigate the imaginative craft of fiction. FIRST YEAR HONORS CAROLINA STUDENTS ONLY. RANDALL KENAN is the author of a novel, A Visitation of Spirits; two works of non-fiction, Walking on Water: Black American Lives at the Turn of the Twenty-First Century and The Fire This Time; and a collection of stories, Let the Dead Bury Their Dead. He edited and wrote the introduction for The Cross of Redemption: The Uncollected Writings of James Baldwin. Among his awards are a Guggenheim Fellowship, the North Carolina Award, and the American Academy of

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. ----- In this class we'll be thinking about every aspect of the poem. What inspires us to write them, how do we start? And, most importantly, how can a deep understanding of poetic craft help us to make rigorous and muscular poems from the raw material of our lives and vision? We will look at the work of established poets to help us increase the power of our own. We will think about traditional forms as an invitation to our own urgent, necessary and deeply contemporary work. More than anything poetry is a conversation that's been happening over millennia. We will endeavor to find where we fit in and where and how we are blazing our own path. This is an Honors class so students will be expected to be actively engaged in their own work and the work of their peers. As such, each student will be paired with another member of the class as a Primary Reader. Primary

Readers will write letters to each other throughout the term as means of thinking about how we talk (even at the beginning of our poetic lives) about the arc of another writer's poems and poetic pursuits. FIRST YEAR HONORS CAROLINA STUDENTS ONLY. Gabrielle Calvocoressi is the author of The Last Time I Saw

Restricted to Sophomores only. Put on your boots. In this class, we'll be roaming. We'll start with an exploration of our own world: our childhoods and our families; our fans and our enemies; our lovers and our friends. Our quirks, our fears, our desires. Next, we'll investigate other worlds. Like roller derbies. Bail bond agencies. Halfway houses, funeral homes, hockey games. Then we'll create new worlds by reinterpreting the ordinary as extraordinary--through graphics, lyricism, mosaics, and objects lost and found. Along the way, we'll read scintillating works that take risks both in content and in form, and then we'll strive, strive, strive to do the same. We'll write testimonios. Memoirs. Travelogues. Portraits. Essays galore. We'll be artists. Seekers of truth and justice. Arbiters of the dynamic Fourth Genre. We'll write words that matter.

The goal of this course is to enable each of you to think more critically and write more powerfully by learning to analyze and critique movies more deeply and effectively. The course is titled "Re(why)nd" for three reasons. One, to study movies more closely than normal, you must do things like rewinding tape or DVD continually. Two, it's not enough to simply review a particular scene or entire film repeatedly--you must constantly seek to answer questions that emerge from careful viewing: Why does "The Godfather" begin with a long wedding scene? Why does Peter Sellers play multiple roles in "Doctor Strangelove"? Why does the "Wizard of Oz" change to color film stock? Why did the cinematographer in "Amelie" digitally add blue highlights to red scenes? Why bowling Columbine? Three, since movies are such an enormously powerful contemporary media, we are each literally, culturally, historically, and ideologically rendered by the choices moviemakers make. Thus, it seems wiser to work to grasp movies rather than to allow them to grasp and work you. This course is discussion based, screening 28 films as well as making a short film of your own.

How does the present consume the past? How does film reshape our past, print-based culture for subsequent audiences? These related questions inform our inquiry into the culture of the British Romantic Period (1780-1840) and its cinematic representations. We will study two historical topics, the British navy and the campaign to abolish slavery, as well as signature authors Lord Byron, Jane Austen, Percy and Mary Shelley, and John Keats. Films include the multiple retellings of Frankenstein, Pride and Prejudice, and the mutiny on the H. M. S. Bounty. Assignments: Daily quizzes; two research projects, presented orally (15 minutes) and in writing (five pages); comprehensive final exam. Print Texts: The Norton Anthology of English Literature, volume D, "The Romantic Period." Jane Austen, Pride and Prejudice, ed. Johnson. Mary Shelley, Frankenstein, ed. Macdonald and Scherf.

"Film and Culture" examines the ways in which culture and history shape and are shaped by motion pictures. In this course, we will focus specifically on films that highlight race and racial issues. The course emphasizes discussion and a broad range of screenings, as opposed to canonical film studies topics and movies, and uses comparative methods that group related films as well as films and texts. The purpose of this strategy is for students to broaden their perspectives on film by appreciating connections between the past and the present, between established ideas and reinterpretations of those ideas, between

texts and their screen adaptations, and between films and filmmakers--all the while interrogating the role that race plays in American film's history, as well as in related global cinema. By playing the familiar against the unfamiliar, this course encourages students to reexamine what is "familiar" and "normal," as well to question how the movie screen both influences and reflects audiences' views about race.

This course examines the birth and development of science-fiction in the nineteenth and twentieth centuries, especially as science-fiction intersects with the utopian and dystopian traditions. Texts include Edward Bellamy's Looking Backward (1888), H.G. Wells' The Time Machine (1895), E.M. Forster's "The Machine Stops" (1909), Charlotte Perkins Gilman's Herland (1915), Yevgeny Zamyatin's We (1924), Kafka's The Trial (1925), Huxley's Brave New World (1933), Olaf Stapledon's Star Maker (1937), Ayn Rand's Anthem (1938), and Ursula Le Guin's The Dispossessed (1974). Films include 2001: A Space Odyssey (1968), A Clockwork Orange (1971), Solaris (1972), Koyaanisqatsi (1982), and The Lives of Others (2006).

ENGL 146.003: Medieval and Neo-Medieval Fantasies. In this course on speculative fiction, we'll be reading medieval texts as well as modern fantasy books that draw on the aesthetics and tropes of the Middle Ages. Combining works from two different eras will lead us to question what exactly makes a text "medieval," how modern we really are, and why we value such texts while also generally believing the period to be a brutal and/or ignorant one. Readings will include Chaucer, Tolkien, Beowulf, Ursula Le Guin, Lev Grossman, C.S. Lewis, Junot Diaz, and Alfred Tennyson, among others. There will be two exams, two papers (one short and one long), and hands-on work with actual rare books held in Wilson Library.

This course covers a selection of classic detective fiction. We start with the first detectives, C. Auguste Dupin and Sherlock Holmes, then meet two "hardboiled" sleuths, Sam Spade and Philip Marlowe, and end with today's detectives. We will consider detectives in several media: text, film, and television.

"Mystery Fiction" (ENGL 147) surveys the prose genre of modern mystery fiction. The course introduces students to significant literary works, movements, publishing trends, and debates that stimulated the development and popularity of 19th century mystery fiction and have carried the genre through its postmodern/contemporary iterations. Readings include works by Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Raymond Chandler, Dashiell Hammett, Thomas Pynchon, Paul Auster, Walter Mosley and Michael Chabon. Students will gain proficiency in the analysis and discussion of literary works, analysis of rare books, and related critical materials. The course also offers to students an opportunity to engage topics that have recently appeared at the interface between traditional print and emergent digital media cultures. Topic areas related to the latter include the history of mystery-specific periodicals and mass-market publishing, how the visual aesthetics of the digital book have re-shaped genre fiction, how literary works circulate in a digital marketplace, and how new media afford new opportunities for digital literary scholarship (digital curation, digital research methods and digital archives).

Seminar in literary studies considering literature in relation to film and film's visual and aural (sight and sound) components. Mexicans and Mexican Americans have figured prominently as types of criminality, victim victimizer, and evil in Anglo-American film noir culture even though some of those films complicate and question this characterization of Mexicans and Mexican Americans. One need only think of films such as Edwin L. Marin's Nocturne (1946), Fritz Lang's The Secret Beyond the Door (1948), John Farrow's Where Danger Lives (1950), Phil Karlson's Kansas City Confidential (1952), Orson Welles's A Touch of Evil (1958), Alfred Hitchcock's Vertigo (1958), or neo-noirs such as Ridley Scott's Blade Runner (1982), Curtis Hanson's L.A. Confidential (1997) based on a James Ellroy novel, and David Lynch's Mulholland Drive (2001). This course examines the way in which Chicana/o literature intervenes in and against U.S. film noir classic stereotypes of Mexican Americans and repurposes the conventions of U.S. film noir to its own ends. Required reading: María DeGuzmán's Buenas Noches, American Culture: Latina/o Aesthetics of Night, Américo Paredes's The Shadow (1950s/1998), Oscar "Zeta" Acosta's Autobiography of a Brown Buffalo (1972), Margarita Cota-Cárdenas's Puppet (1985, 2000), Cecile Pineda's Face (1985, republished in 2003), Lucha Corpi's Eulogy for a Brown Angel (1992), Michael Nava's The Burning Plain (2000), Carla Trujillo's What Night Brings (2003), and Manuel Muñoz's What You See in the Dark

Folklorists seek to understand how people interpret and make sense of the world. In this course we will look at diverse forms (or "genres") of folklore, including song, architecture, legend, and food. We will consider how vernacular expressive culture is learned, what it does for people, and why these processes and products persist through time and space. Students will be introduced to the discipline of Folklore's central research methodology, ethnography, and have an opportunity to practice that approach in individual and group research projects. Students enrolling in 202-001 are also required to enroll in one recitation section numbered 202-601 through 202-604. This course is cross-listed with FOLK 202-001 and ANTH 202-001.

This course covers a selection of William Shakespeare's comedies, histories, and tragedies. We will think about what these plays had to say to their original Elizabethan audiences on political, social, and philosophical questions. We will also consider how these plays can be interpreted in our own day, and how they speak to such questions now. Required Texts: The Norton Shakespeare: Essential Plays. Students enrolled in this section of ENGL 225 do NOT need to enroll in an associated recitation section.

A study of representative histories, comedies, tragedies, and romances. Our aim will be to develop strategies for close readings that pay attention to generic expectation, language, and the physical properties of the stage; at the same time, we will seek to read Shakespeare culturally, to recognize the ways these texts participate in their historical moment and in the debates over social ordering, gender, political authority, economic change, religious controversy, and encounters with foreign cultures and practices. We will praise Shakespeare without etherealizing him and explore his limitations without demeaning his achievement. Teaching methods: We will mix dialogue with soliloquy, meaning you will be encouraged to be garrulous and I will be discouraged from being too much so. Requirements: Frequent quizzes to keep you honest, a reading notebook to keep you thinking, two short papers to keep you writing, and a final examination to keep you guessing. Texts: The Riverside Shakespeare. Evans et al, ed. (Houghton Mifflin: 1997) ISBN: 0395754909 The Riverside Shakespeare is the text of choice, but you may substitute any other reputable anthology or single play editions Students enrolled in this section of ENGL 225 do NOT need to enroll in an associated recitation section.

For centuries, artists have been performing and rewriting the plays of William Shakespeare. Of late the big screen has become a preeminent site for such adaptation. From low budget parodies like Billy Morrisette's campy 2002 comic portrayal of Macbeth, Scotland, PA, to more "faithful" productions like Branagh's BBC supported and Royal Shakespeare Company-cast Henry V, popular film has embraced Shakespearean theater as its own. This course will engage that passion to the fullest, examining nine Shakespeare plays and their modern cinematic equivalents. Students will be asked to attend several night viewings of the films. Format: Lecture and recitation. Requirements: three papers (4-6 pages); weekly quizzes; final exam. Texts: David Bevington, ed., The Complete Works of Shakespeare, 5th edition. Students enrolling in this section of ENGL 225 must also enroll in one recitation section numbered ENGL 225-601 through ENGL 225-606.

Women and Literature in the Eighteenth Century This course will examine the relationship between women and literature in the long eighteenth century, a period in which the status and roles of women were hotly debated. We will read novels, poetry, drama, and autobiographical writing by and about women who lived in Britain and the empire. We will discuss these texts in relation to some of the key issues that shaped women's lives and writing, including the cultural construction of gender roles, education, marriage and domesticity, the law, class, and race. Texts will include Aphra Behn's The Rover, Daniel Defoe's Moll Flanders, Mary Wollstonecraft's A Vindication of the Rights of Woman, Frances Burney's Evelina, and Jane Austen's Pride and Prejudice. This course is cross-listed with WMST 263.

Under a shroud of secrecy, a young genius builds a machine that has the potential to forever change the way people communicate. Seeing a business opportunity, his friend, a money-savvy visionary, finances the project. Together, they introduce the world to this revolutionary new technology. The partnership goes sour, though, as the inventor finds himself marginalized within his own company. He leaves the industry. Continuing to exploit his idea, his businessman friend thrives, eventually becoming a divisive icon of the cultural changes that this machine catalyzed. No, this isn't the story of Steve Wozniak and Steve Jobs. It's the story of Johannes Gutenberg and his financier Johann Fust. Together, Gutenberg and Fust sparked an information revolution by bringing to fifteenth-century Europe the printing press, a brand new communications technology that enabled for the first time the rapid reproduction and mass dissemination of ideas. As with the digital revolution of our own time, the information revolution of the Renaissance (1500-1700) radically transformed how people read, write, and related to each other. In this class, we will immerse ourselves within this dramatic, transitional moment in history. We will visit a letterpress shop, where movable type is still used to print texts, and make our own woodcuts; we will embroider prints, write with quill pens, and perform hands-on research with rare, 500-year-old books. As we work directly with Renaissance-era writing technologies, we will also read a variety of

Come along on the journey! Pilgrimage has many definitions, including a long journey, life considered as a journey, or a journey to a sacred place as an act of religious devotion, and so forth. What the diverse definitions seem to share is the concept of a transformative journey, whether that journey is literal or figurative, undertaken by choice, which involves dramatic change of self and community, and is usually tied to a profound spiritual experience of some sort. We will explore transformative journeys in works from different times, places, and cultures, including Apuleius' Golden Ass, Cervantes' Persiles, Basho's Journey to the Far North, and Woolf's Orlando, as well as the movies The Way and Like Water for Chocolate.

EE Research Class: "Popular Forms of Children's Literature" Laurie Langbauer, Department of English and Comparative Literature Emily Kader and Rachel Reynolds, Wilson Library ENGL 295 is an EE course that foregrounds students' original research. We will explore the ways that literature generally encountered by children reflects their eras' understandings of childhood. With the support of your professor and special collections librarians, you will choose among popular children's texts held in our own world-class UNC Libraries' Special Collections. You will decide what details, contexts, and meanings

of your texts to research and analyze. Our work will culminate in a bricks-and-mortar exhibition in the Saltarelli Room of Wilson Library at the end of the term. Our expectation is that you will encourage your family, friends, and teachers to attend its opening (the opening reception of the last exhibition growing out of an English department course drew over two hundred people). We will take our texts from the following categories (richly represented in Wilson Special Collections): Jack tales, chapbooks, comic books, illustrated religious texts, Aesop's fables and myths, fairy tales, nursery rhymes, educational books, text books, copybooks, gift or commonplace books, game books, children's magazines, and dime novels. Our research will engage questions such as: What do popular texts tell us about social history? literary form and convention? changing assumptions about childhood? How might we work to

English 304 provides advanced practice with business and profession communication, including both written and oral discourse. The course will focus on rhetorical strategies, style, genre, format, research, citation, and presentations. In addition, it will help students to explore and apply current best practices in business communication.

English 314 explores internal language change and variation in relation to changing cultural and social contexts and historic events that influenced the English language, particularly in its vocabulary. Included also are the two most important systematic changes in sound (Grimm's Law from the second millennium BCE and the Great Vowel Shift from the late Medieval period) as well as change in major grammatical structures like inflections, the auxiliary verb system, and the formation of negatives and questions. Another important consideration is the rise and fall in the power and prestige of dialects and how a dialect becomes the basis of the standard language. One of the aims of the course is to give students a comfortable familiarity with using dictionaries to extract and interpret several different kinds of information about English. Students learn how to use The American Heritage Dictionary of

the English Language for the purpose of tracing current vocabulary to its Proto-Indo-European roots and for understanding when, how, and why English has incorporated cognate forms from other Indo-European languages like Norse, French, and Italian. For the development of English vocabulary since the Old English period, students learn to use the Oxford English Dictionary. The course proceeds chronologically, beginning with the Proto-Indo-European mother tongue and a survey of the major branches that have developed from it. It then examines the linguistic features that all Germanic

English 315 is an introductory course addressing sociolinguistic topics. In Spring 2016, the course will focus on four broad topics: American Dictionaries and Notions of Correctness; Regional and Social Dialects; American Slang; and American English on the Internet. Reading assignments will be two textbooks (Talking Tar Heel by Walt Wolfram and Jeffrey Reaser and The Life of Slang by Julie Coleman) and short readings posted on Sakai. Although English 315 overlaps slightly with English 313 and English 314, the course emphasizes much less the mastery of details of the language itself in favor of understanding and discussing the social dimensions of language use. Daily preparation for class throughout the semester will be assessed by a combination of short quizzes and one-page essays, about once a week. In addition to one mid-term test and a final examination, students will submit two 1,000-word essays, corresponding to two of the four units. One of the essays will require original primary research. Students will also be responsible for leading class discussion either singly or in groups (depending on enrollment). Attendance and participation in class discussion are required. English 315 is a "research exposure course" and may possibly be used to meet a requirement of the Carolina Research Scholars Program. This course also fulfills the US Diversity requirement.

This course surveys British literature from the Restoration period (beginning in 1660) to the end of the 18th century. The focus is primarily on works of poetry and non-fiction prose; authors include Dryden, Behn, Addison, Shaftesbury, Mandeville, Pope, Swift, Hume, Gray, Collins, Johnson, Goldsmith, and Cowper. The course defines different literary phases in this period--in particular, the Restoration era, the neo-classical era at the beginning of the 18th century, and the mid-century's age of sentimentalism--and defines leading characteristics of each of these phases. Along the way, the course surveys important philosophical debates, historical events, and social conflicts of the time.

This course offers an introduction to the origins and development of the English novel in the eighteenth century. We will read a range of novels representative of the period, including criminal, domestic, comic, sentimental, and Gothic novels. By doing so, we will be able to explore the characteristic forms, themes, and plots of the eighteenth-century novel, as well as the cultural and historical contexts out of which this popular new genre emerged. Texts will include Daniel Defoe's Moll Flanders, Samuel Richardson's Pamela, Henry Fielding's Shamela, Frances Burney's Evelina, Horace Walpole's The Castle of Otranto, and Jane Austen's Northanger Abbey.

This interdisciplinary course examines the technical and aesthetic revolutions in the fine arts of the English Romantic Period. It will discuss productions, experiments, and aesthetic theories of William Wordsworth, S. T. Coleridge, J. M. W. Turner, and William Blake, focusing on the developments of lyrical poetry, landscape painting, and original printmaking. We will pay special attention to the period's new ideas about nature, the sublime, picturesque travel, genius, originality, and social role of the artist. There will be a studio workshop in drawing landscapes in pen and ink according to 18th-century techniques and formulae and a workshop in printing facsimile plates from Blake's Songs of Innocence and of Experience. Knowledge of printmaking and painting is not required. Joseph Viscomi, the James G. Kenan Distinguished Professor of English Literature at the University of North Carolina at Chapel Hill, is a co-editor with Morris Eaves and Robert Essick of the William Blake Archive <blakearchive.org>, with whom he also co-edited volumes 3 and 5 of The William Blake Trust's William Blake's Illuminated Books. His special interests are British Romantic literature, art, and printmaking. He is the author of Prints by Blake and his Followers, Blake and the Idea of the Book, and numerous essays on Blake's illuminated printing, color printing, and reputation throughout the 19th century. He has received fellowships from the Guggenheim Foundation, National Endowment for the Humanities, Rockefeller Foundation, Getty Foundation, The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain

written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.

In Studies in Jane Austen this semester we will read her 6 novels from Sense and Sensibility (1811) through Pride and Prejudice (1814) up to Persuasion (1819). We will also explore the novels' afterlife through the recent and endless array of films, video, and textual continuations and adaptations. For a final project you may elect to write an analysis of one of the novels or films, compose a new chapter for one of her novels, or make a film in imitation of one of her scenes.

A wide-ranging introduction to the literature, broadly defined, of pre-Civil War America. In addition to such well-known authors as Emerson, Hawthorne, and Melville, we will hear many other voices from the period of settlement through 1860 that helped to shape American discourse. While we will concern ourselves primarily with why certain authors and works are representative of different points in American history, we will not lose sight of the fact that some texts seem to rise above the historical moment to be considered masterpieces of the written language. An important course for the well-rounded English major as well as for those who think that they might specialize in American literature. Requirements: Two in-class exams and a final. One 10-12 page paper on an assigned topic (students will have choice of several possibilities). Regular attendance is expected.

"Remixing Modern American Identity": Over the course of the semester, we will consider some of the major works of 20th century American literary tradition in a variety of poetic and narrative forms and in diverse historical contexts. Students will gain an understanding of the different motivations and goals

of creative artists in the U.S. and will track how certain ideas get "remixed" and reconsidered in American art and literature over time. An important goal of the course will be to consider how different kinds of texts "talk" to each other; accordingly, we will read novels, plays, and poetry while also examining films, visual art, and popular culture. Importantly, we will see how artists from different ethnic backgrounds and with contrasting artistic sensibilities come together to constitute the world of "American" literature. This multi-media course will emphasize analytical reading, critical writing, and interdisciplinary thinking. Artists under consideration will include: Toni Morrison, Flannery O'Connor, Junot Diaz, Sherman Alexie, William Faulkner, Cherrie Moraga, David Henry Hwang, and Jhumpa Lahiri.

Selected topics or authors in American literature in the twentieth century. In this case "topics" are the large twentieth century literary and theoretical movements called modernism and postmodernism. The course examines an interesting variety of canonical American writers representing modernism and postmodernism from the post-World War II period to the end of the twentieth century. Among the writers are modernist writers William Faulkner and Robert Frost, and among the postmodernists are Toni Morrison and Maxine Hong Kingston.

From Humbert Humbert's quest for the aesthetic in Lolita to Oedipa Mass's obsessive literary study in The Crying of Lot 49, postwar authors frequently employ the allegory of the road trip. The Federal Aid Highway Act of 1956 provided 25 billion dollars to create 41,000 miles of interstate highways over the next twenty years. With Jack Kerouac's On the Road as our template, we will discuss the contemporary problem it famously encapsulated when it was published in 1957: what happens to literary meaning in an age of unprecedented mobility? In the early 1960s the cultural critic Marshall McLuhan argued that highways and technology were shrinking space by decreasing the amount of time between points on the globe. In such an environment, postwar critics suggested, both poetry and the novel were becoming outmoded as film and popular music came to dominate. This course examines the contemporary American novel in this context. Should we understand the postwar American novel as comprising a "literature of exhaustion," to use John Barth's term? Do Flannery O'Connor's novel-like short stories exhibit a need for brevity in the postwar world that novels cannot fit? Does the contemporary novel's obsession with rock and roll--in writing by John Jeremiah Sullivan, Jonathan Lethem, and Jennifer Egan, to name a few--indicate that the novel has at last caved in, has become a zombie form? A central question focusing our discussions will be the prevalent assumption emerging in these years that both author and novel are

In this course we will be reading the fiction, memoirs, and poetry of contemporary women writers from the U.S. South, especially from North Carolina. We will consider how space and place are configured and experienced in their works and how these texts shape and reshape questions of history, identity, and location. Our readings will link these larger questions to more specific ones about southern women's writings, especially concerning the relations of "home" and region, place and displacement, social relations and historical interventions, identity and imagination. In terms of genre, we will focus particularly on the craft of the short story.

ENGL	380	001	12507	FILM HISTORY	Lecture (Face to Face Instruction)	3	A

This course will focus on "New Hollywood" cinema of the 1970s. We will investigate one of the most adventurous and important decades in American film history, when formal experimentation went hand in hand with an intensity of political consciousness not equaled before or since. We will explore how films of this period reflect and respond to the social unrest surrounding the Watergate scandal; political assassinations; the diverted revolutionary hopes of the '60s; and the war in Vietnam. We will consider the ways in which these films critique and reshape traditional genres, from the Western and war film to the musical and detective film. We will look at the rise of the new blockbuster as it drastically changed Hollywood's production environment. And we will study the extraordinary innovations of several major filmmakers including Scorsese, Kubrick, Spielberg, Coppola, Malick, Altman, Nichols, and Cassavetes among others. Films likely to be screened include: *The Graduate*, *Days of Heaven*, *The Parallax View*, *Chinatown*, *Killer of Sheep*, *Five Easy Pieces*, *The Long Goodbye*, *Taxi Driver*, *Network*, *Woman Under the Influence*, *Apocalypse Now*, *McCabe & Mrs. Miller*, *The Conversation*, and *The Shining*. \*This course satisfies the Visual and Performing Arts (VP) general education requirement.

Comprising the countries of India, Nepal, Sri Lanka, Bangladesh, Afghanistan, Pakistan, Bhutan, and Maldives, the region known as South Asia has a long history of global migration that has transformed the histories and cultures of four continents. Focusing on films, music, and literature representing people of South Asian descent living outside of the region, we will examine how conceptions regarding family, women's roles, homosexuality, dress, consumer practices, and forms of intimacy are central to the construction of South Asian diasporic identities. We will also consider how gender and sexuality are connected to questions of religion, race, caste, violence, and nationalism in the diaspora. While we will discuss South Asian communities around the world, we will focus mainly on the U.S., the Caribbean, East and South Africa, and Britain. We will also consider how Indian popular culture has represented South Asians living abroad in recent years, as well as the effects of the post-9/11 wars on the region and the diaspora.

The first North American novel (published in 1769) came from Canada and has been followed by much fine writing, including by the winner of the Nobel Prize for Literature in 2013, Alice Munro. Canada is a mature democracy that made a significant part in winning both World Wars and subsequently serving in United Nations Peace-keeping missions; its 2015 election campaign (for the prescribed 11 weeks) saw the Liberal Party end a decade of the Conservatives in office. The Canadian poetry and prose in English to be studied will include an anthology or CoursePack; Lives of Girls and Women by Alice Munro; The Stone Angel by Margaret Laurence; Fifth Business by Robertson Davies; Lady Oracle by Margaret Atwood. Informed discussion in class is expected; there will be quizzes on assigned readings ; two papers; a midterm exam and a cumulative final exam.

In our Honors course on Poetry and Ecology, we will turn our attention not so much to "nature poetry," but to the ways in which poetic language is infused with matter from the natural, organic, phenomenal world--in its images and metaphors, in its sounds and pulsing rhythms. In turn, we will attend to how the phenomenal world emerges in poetic language--and to what ends. In some poetry, landscape is a deep resource for memory; in other poems, rivers become diasporic pathways and conduits of thought, a buzzing fly informs and transforms the experience of death, a mosquito's buzz sounds like the undercurrent of the world. Can poetry, so infused with such natural forms and living things, help us come to terms with their exploitation and loss in our own moment of planetary crisis and species extinction? In turn, might our exploitive economies intensify our encounter with poetry, ignite and enliven its work in an age of global warming? We will read a wide selection of poems from anthologies and single-authored books, and will aim to generate our own conceptual maps of poetry that show its rich material groundings, and what they portend. My current teaching and writing are broadly based in poetry, feminist theory, and the literature and history of the 18th-century Atlantic world. My most recent book, *Hearing Sappho in New Orleans*, follows poetic migrations along the path of

the African slave trade and tracks them through ancient fragments set in a flooded city. Currently I'm involved in uncovering and studying song and poetry  
The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain  
written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January  
11. -----

ENGL	660	001	12827	WAR IN SHAKESPEARE	Lecture (Face to Face Instruction)	3	A
<b>Bldg:</b> Greenlaw		<b>Room:</b> 0301	<b>Days:</b> TuTh	<b>Time:</b> 09:30 - 10:45			
					<b>Rank:</b> INST	<b>Load:</b> 100	<b>Instructor:</b> ARMITAGE,CHRISTOPHER
<b>Class Enrl Cap:</b> 25		<b>Class Enrl Tot:</b> 9	<b>Class Wait Cap:</b> 5	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0	<b>Foot note:</b>	
							<b>Special Grading:</b> GR1
<b>Combined Section ID:</b> 0473(engl660/pwad660.001) - PWAD 660(#12114)							

This course examines the causes, conduct, and results of wars as depicted in about 18 of Shakespeare's plays. They include all his Roman histories, most of his English histories, all his major tragedies, even some of his comedies, e.g. All's Well That Ends Well. My methodology will differ from the traditional one used in courses about Shakespeare, e.g. for Hamlet, my focus will not be his problems with his father's ghost, his uncle, his mother, his girlfriend, but the pending invasion of Denmark by Fortinbras of Norway, its getting diverted to attack the Poles instead, Hamlet's great soliloquy on the madness of slaughter to win a worthless bit of land--events which are the macrocosmic frame of the play. Another feature will be the relating of such aspects of the plays to their historical context, e.g. what Henry V's victory at Agincourt meant in human terms. Requirements: Quizzes on assigned readings, several short papers for undergrads, longer for graduate students. Midterm and final exams. The textbook is The Complete Works of Shakespeare edited by David Bevington, now in its 7th edition. You may be able to economize by using an earlier edition, or a different Complete Works, or separate editions of individual plays, including from the library, or some electronic device . NOTE: This course is cross-listed with PWAD 660-001.

This course explores novels and short stories by Latina/o writers that focus in one way or another on photographs & photography that simultaneously question (or "queer") certain cultural givens about gender, sexuality, race/ethnicity/nationality, class, and other coordinates of identity and subjectivity. We will inquire into the connections between this double focus. At the same time we will examine actual photo-based visual work by Latina/o artists. Textual and visual works considered include those by Alma López, Laura Aguilar, Axel Damian Reyes, Gerardo Suter, Franc Franca, Roberto Rincón, John Rechy, Achy Obejas, Helena María Viramontes, Emma Pérez, Elias Miguel Muñoz, Félix González-Torres, Graciela Limón, and Carla Trujillo. This course is cross-listed with WMST 666.

A study of rhetorical theories with an emphasis on translating theories into teaching practices used in college writing courses, including the UNC Writing Program. The course examines strategies for planning, drafting, and revising; for developing writing assignments; and for evaluating writing. Emphasis is placed on theories of genre and writing in the disciplines. Major assignments will include a course design portfolio, including assignments, course policies, lesson plans, and assessment materials.

The Devil's Dominion in Early Modern England This course will examine the status of the Devil in early modern England. What did people believe about the Devil? When and why did they discern demons and spirits? How did they interpret or encounter them? How did beliefs about the Devil change with the emergence of Protestantism? We will begin with some discussion of depictions of the Devil in medieval Catholic drama, art, and theological discourses, before considering representations of Satan and demons in later English religious, political, and literary culture. We will draw on both scholarly treatments of demonology and popular conceptions of the Devil in our analysis of primarily English depictions of spirits, demons, and Satan. Our questions may include: How and when did the Devil or demons appear in accounts of English witchcraft? What was the perceived relationship between demonic spirits and witch's familiars? What was a demonic pact? When did English witches make demonic pacts? When and why does the Devil appear in the period's accounts of crime? What role did the Devil play in the domestic sphere, particularly in people's understanding of marriage? Under what circumstances did people claim sexual encounters with demons? How did people understand possession? What was the status of exorcism in England, versus on the continent? Where does demonology intersect with medical discourse? What are the cultural functions of comic devils? What role did demonology play in seventeenth-century

In this seminar we will study literary expression (oral and written) circulating within and around the 18th-century early Atlantic world, framing our inquiry around the historical contact of three cultures that shaped circum-Atlantic exchange during this time--Africa, the Americas, and the major English-European imperial powers. While this material is historical, its articulation also extends through at least three centuries and into our own times, producing an "echo effect" within the longue durée of modernity. Our materials here are obviously extensive, so we will follow the lead of several recent anthologies that emphasize texts which provide historical anchors for more recent writings that generate from such fields as African American, Caribbean, Latina/o, Native American, Creole, and Postcolonial literatures. We will enter the 18th-century Anglophone world through Defoe's Crusoe and Aphra Behn's Oroonoko, and then move to pivotal Atlantic narratives that unfold throughout early contact--including Richard Ligon's True and Exact History of the Island of Barbados, the narratives of George Lisle, Venture Smith, the testimony of "Belinda," Equiano's Interesting Narrative, and Mary Prince's History of Mary Prince. We will then turn our attention to the poetics of the early Atlantic as it historically takes shape in Slave Songs of the United States (collected and published 1867 but dating back at least two centuries earlier), in the works of New England poet Phillis Wheatley, in the anonymous African-Creole poems

ENGL	838	001	12838	19TH C BRITISH NOVEL	Lecture (Face to Face Instruction)	3	A

Our course is a workshop, shaped by the interests and contributions of its members. It focuses on the long nineteenth-century British novel, considering texts defined as significant by the shared needs of our group. Past participants in a similar class selected More, Edgeworth, Austen, Bronte, Dickens, Gaskell, and Eliot, among others, to construct our canon. Each member will choose an important novel on which to present, as well as a key essay that helps to place that novel within a literary critical heritage (or you may pair that novel with original material, discovered through research in UNC Library archives, to supplement or contextualize it). The class as a whole will choose several additional novels together, in order to fill out our survey of nineteenth-century narrative. Your final project may take the standard form of an interpretive paper--one we hope might lead to conference presentation or publication--but participants working in areas such as digital humanities have suggested interest in exploring other formats. After participants register for the class, we will hold a planning meeting (at the end of Fall term) to set our readings. I encourage you to be thinking in advance about which novel you will choose for us to read: how will it shape our survey as well as your scholarly or archival research? How might it provide a springboard for work in your future career?

**Special Grading:** GR3

Slavery and the Civil War crucially impacted nineteenth-century American literature. This course will treat literature across the Civil War to explore the transformations--often characterized as a shift from romanticism to realism--across the "bellum" period. The class will be divided into three parts: the slavery debates of the fifties, the literature of the war from the early 1860s, and the literary response to these earlier periods in the 1890s. We will study canonical works alongside lesser-known writings that are nevertheless relevant to today's critical field. A number of writers represented by rich holdings in the Wilson Library will be included, so students will have an opportunity to conduct original archival research. Taken together, the components

of the course are designed to introduce students to the state of the field in nineteenth-century American literature and to provide them with an opportunity to make an original contribution to that field. Writers will include William Wells Brown, George Moses Horton, Harriet Beecher Stowe, Caroline Lee Hentz, Harriet Prescott Spofford, Emily Dickinson, Herman Melville, Paul Laurence Dunbar, Charles Chesnutt, and Stephen Crane. Alongside the primary texts we'll read relevant critical works from the last ten years to get a sense of the current field of study. Assignments will include a research paper, an oral presentation on archival research (broadly construed), and short writing assignments throughout the semester.

This course will survey the shifts in American literature and literary studies from the 1930s, in the beginning stages of a formalized American studies, to its height in the 1950s. Following the careers of several major authors from young radicals to elder statesmen, we will consider the changing political and critical landscape to which they react as well as their own stylistic and topical shifts. Authors may include William Faulkner, Ernest Hemingway, Eugene O'Neill, John Steinbeck, Pearl Buck, and Richard Wright.

"Race in Contemporary American Culture: a Critical Race Theory and Cultural Studies Seminar" The subject of race continues to be one of the most enduringly divisive and controversial subjects in the United States. And even at the turn into the 21st century, despite the historic election of our first mixed-race African American president, as a nation we have not developed an adequate and comfortable common ground or common language to discuss, honestly and openly, our concerns, mis-conceptions, questions, interests, and hopes in terms of race. This seminar will rely on works of critical race theory and cultural studies to provide a theoretical, historical, and social knowledge on race in its many different contemporary cultural forms: literature, film, music, and art. We will explore various modes of cultural production that reflect the way that Americans represent race in the U.S., especially the concept of racial hybridity, intersectionality, and multiracial identities. Additionally, this seminar will provide practical experience for graduate students in terms of creating lesson plans/discussions about teaching and pedagogy and writing a final research paper for a journal (and hence for potential publication).

Caste and Class in African American Literature, 1825-1900 Course Description The seminar will focus on the development of autobiography and fiction in African American literature of the 19th century. We will examine how texts construct caste and class as markers of identity and both self- and social awareness. Please be aware that adding or dropping a class after Day 10 of the start of the semester may result in financial penalties. We advise that you confirm your course schedule for the semester as soon as possible but no later than Day 10 of the start of the semester. Requirements Regular attendance, preparation of all readings, and participation in discussions A critical and analytic research paper, 20-25 pages, with endnotes and bibliography A final exam essay on the relevance of the course to each student's plans for future research and teaching Texts--See North American Slave Narratives <http://docsouth.unc.edu/neh/index.html> Life of William Grimes, the Runaway Slave Narrative of Lunsford Lane William Wells Brown, Clotel Frederick Douglass, My Bondage and My Freedom Harriet E. Wilson, Our Nig Harriet Jacobs, Incidents in the Life of a Slave Girl Elizabeth Keckley, Behind the Scenes Frances Ellen Watkins Harper, Iola Leroy Charles W. Chesnutt, Mandy Oxendine Charles W. PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The basic question examined in this seminar will be the costs and benefits of the U.S policy of drug prohibition. Does drug prohibition decrease drug abuse? Affect violence in our society? Aid terrorism? Diminish our civil liberties? Affect the public's health? Corrupt public officials? Should drugs be decriminalized or legalized and if so, how? Should different illicit drugs be treated differently? What is the evidence in the United States and in other countries on decriminalization or legalization? Students will write a paper and present it in class, and prepare an interview with individuals who are on the frontline of the drug war, such as police or attorneys. As a seminar, classroom activity will consist of discussions and debates. ABOUT THE INSTRUCTOR: Arthur Benavie received his Ph.D. in economics from the University of Michigan. He has been at UNC since 1967. His specialty is macroeconomic theory and policy. His book, Deficit Hysteria: A Common Sense Look at America's Rush to Balance the Budget, was written for the general public. His most recent book is Social Security under the Gun. In his former life he was a concert violinist, and playing violin is now his main avocation.

Build-Measure-Learn: Constructing Your Own Start-Up. This class will combine some basic principles of entrepreneurship with the newly emerging lean startup methodology. Students will be given background on entrepreneurial thinking and a hands-on workshop involving the latest thinking in executing a successful new venture. They will then be provided with a small grant to execute their idea over the course of the semester. They will interact intensively with the instructor, outside advisors, and guest speakers, and it is hoped that some or all of the projects will become viable by the end of the course. FIRST YEAR STUDENTS ONLY. CONTACT DR. GOLDSTEIN AT BUCK\_GOLDSTEIN@UNC.EDU FOR PERMISSION TO ENROLL. Buck Goldstein is the University Entrepreneur in Residence and a Senior Lecturer in the Department of Economics. Prior to returning to the University, Goldstein co-founded Information America, an online information company which was publicly traded and subsequently acquired by the Thomson Corporation. Subsequently, he was a partner in Mellon Ventures, the venture capital arm of Mellon Bank. He is the author, with Holden Thorp, of Engines of Innovation--The Entrepreneurial University in the 21st Century.

Introduction to fundamental issues in economics including competition, scarcity, opportunity cost, resource allocation, unemployment, inflation, and the determination of prices. Prior to joining the Department of Economics as a lecturer in 2006, Rita Balaban taught at the College of Charleston and Samfo University. She has directed over 20 undergraduate research projects in various areas of economics that include the music and radio industries, international trade, and the economics of sports. She also enjoys doing volunteer work with students in the community.								
The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Comprehensive introduction to statistics, including descriptive statistics and statistical graphics, probability theory, distributions, parameter estimation, hypothesis testing, simple and multiple regression, and use of powerful statistical estimation software. PREREQUISITE: ECON 101 Professor Turchi teaches introductory economics, statistics, population economics and economics of the family. His research interests involve the application of economic and statistical analysis to the study of family issues in the United States and abroad. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

The course will provide an introduction to Game Theory methods. While most of the course will be devoted to the mathematical foundations of the theory (where calculus and probability are the main "tools of the trade"), applications of Game Theory to: Economics, Political Science, Biology and Finance (in that order of relevance) shall be considered as well. PREREQUISITES: ECON 101 AND ECON 410 AND MATH 233. NO FIRST-YEAR STUDENTS. Sergio O. Parreiras earned his PhD in Economics in 2001 from The University of Pennsylvania and shortly joined the Economics Department of UNC at Chapel Hill. His area of research is Game Theory with focus on auctions, mechanism design and tournaments. In his spare time he enjoys rock climbing.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured,

even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth's population? This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water use in the future. Each of you will also have the opportunity to investigate solutions to a particular water conflict of your choice. Dr. Amy Cooke has been teaching and working on African and environmental issues for over 2 decades. These interests began as a Peace Corps volunteer in the 1990s and are currently focused on the ecology of food production and the health of water systems. She received her doctorate in ecology from the University of North Carolina-Chapel Hill in 2007, after completing research on land use change. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course addresses how global environmental policy is made, with specific attention to the roles of global environmental institutions, nations, commercial and non-profit entities. Topics include current environmental policy in the United States; China and India's impact on the global environment; global environmental institutions such as the United Nations Framework Convention on Climate Change; the role of environmental non-governmental organizations; risks to the environment through pollution of land and sea by waste; global energy and environmental implications of shale gas and fracking;

and the Fukushima-Dai-ichi nuclear disaster and its global repercussions. You will also have the opportunity to interact with a range of professionals in environmental policy via guest lectures, Skype calls, and public policy research.

Today, cities all over the world want to be smart, flexible and resilient. They are in need of smart city knowledge, expertise, consulting and support. This is a swiftly developing field, combining different sciences in a holistic fashion. This course follows on a course given spring 2015 and will focus after thorough introduction on what the current status is on smart (sustainable) technologies, social impact and economical opportunities worldwide. We will work on integrated concepts for Smart Cities and ways to apply and scale them up.

Renewable energy and energy-efficiency technologies are evolving at a rapid rate, and Americans have never been more curious about them. The prices for energy sources like solar and wind have fallen precipitously over the past thirty years and now compete with conventional fuels like coal and nuclear in many markets. Experts also expect the price of energy-storage technologies to scale up during the next decade and become an affordable option for utilities, residential consumers and industry. Meanwhile, advances in information and communication technologies are giving consumers the power to manage their own consumption in a manner that was unfathomable even a decade ago, electric cars and self-driven cars promise revolution in the way we get around, and a growing number of credible experts talk of a coming ¿death spiral¿ for electric utilities. Hence, it is not an exaggeration to state the Joseph Schumpeter¿s idea of ¿creative destruction¿ is about to play itself out in dramatic fashion around the issues of electricity. In this class, students will take a deep dive into studying today¿s electricity issues. In a one-hour weekly communication lab, they will also learn to communicate effectively about emerging energy issues with the public. As part of the class, students will attend the Clean Tech Summit in Chapel Hill on February 18 and 19. There, they will interview experts and develop stories about advances in clean technology. Students interested in summer internships and jobs are also expected to bring resumes to the The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.

This capstone will work with the US Office of Surface Mining and two nonprofits (Green Forests Work, and the American Chestnut Foundation) to help with their reforestation efforts in Eastern Kentucky. This group conducts research that aids in restoring native hardwood forests on lands that were mined for coal with mountain top removal techniques. The group will design a research project to examine how various planting techniques affect the productivity of restored forests and will assist with the planting of native hardwoods, including the endangered American chestnut. This project includes a mandatory week-long trip to Kentucky over spring break to set the experiment up, collect data, and plant tree saplings. All travel and lodging expenses will be covered by the Institute for the Environment.

In this class, students will have the opportunity to have a meaningful effect on how the Triangle region prepares for climate change. According to the 20 National Climate Assessment, climate change is already affecting communities across the United States and, even with dramatic cuts in greenhouse gas emissions, will become more costly and disruptive in the future. What are the potential impacts of climate change in the Triangle region of NC? How can								

cities and counties in the Triangle address these impacts? In this class, students will work with the Orange County Emergency Services to provide recommendations for how climate change can be better incorporated into the County's multi-jurisdictional hazard mitigation plan, adopted in June 2015. Students will be responsible for identifying potential climate change impacts and evaluating adaptation strategies, in doing so students will enhance their analytical, writing, and presenting skills.

Climate change has been called both the {greatest hoax; ever perpetuated and the {most urgent threat; facing the world. While scientists produce volume after volume of consensus documents on climate change, the popular debate rages on, fueled by print and TV news, blogs, movies, and fiction. Experts, pseudo-experts, and casual observers debate causes, consequences, and remedies in every form of media. In this class, we will explore the popular debate on climate change through an examination of its presentation in the media. We will cover the scientific basis of climate change, focusing on how the science is presented, distorted, and debated in the public sphere by alarmists, denialists, and everyone in between. Through reading and writing exercises, class viewings, discussions, and presentations, students will encounter many points of view, explore a variety of media sources, and develop informed perspectives on one of the defining issues of our time. FIRST YEAR STUDENTS ONLY. Dr. Erika Wise leads the Climate & Tree Ring Environmental Science (C-TR&S) research group based in the Department of Geography at the University of North Carolina at Chapel Hill. The group's research revolves around questions concerning synoptic climatology, dendrochronology, ocean-atmosphere oscillations, and water resources.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS	1			14	
PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The seminar first describes today's fundamental sources of energy: oil, natural gas and coal, how and where to find them and the latest statistics on how long the present reserves will last. We will then explore alternative energy resources and why it is so important for society to understand that fossil fuel reserves are finite, and will be depleted in 40 years (cheap oil) or in 200 years (coal). The course stimulates student participation through class debates (e.g., Can nuclear energy become a viable and safe substitute for coal?, Is the current US energy policy a threat to national security?). ABOUT THE INSTRUCTOR: José Rial has a Ph.D. in Geophysics from Cal Tech and a MSc. in Geology from the University of Michigan. Rial's expertise includes mathematical modeling of natural systems, seismic wave propagation and climatology. In recent years Rial's academic interests include the role of science and scientific discovery on global environmental issues, such as global warming, climate change and policy.

This course examines how politics and economics condition different countries; path towards and experience with foreign aid, foreign investment, and corruption. In doing so, we will examine the effect of political conditions on economic outcomes and the effect of economic conditions on political outcomes. Through the exploration of the academic literature, popular (including non-Western) media, and policy briefs, students are encouraged to critically examine the prevailing views on these topics and to build the analytical and communication skills necessary to contribute to some of the most salient policy arenas facing our world today. FIRST YEAR STUDENTS ONLY. Dr. Brigitte Zimmerman is a scholar of comparative politics, focusing on the political economy of development. Her research agenda examines the relationship between citizens and political officials, with a particular emphasis on accountability in consolidating democracies. She obtained her PhD in Political Science from the University of California, San Diego in August of 2014. For the 2014-2015 academic year, she was a Post-Doctoral Research Fellow with the Varieties of Democracy (V-Dem) Project and joined the faculty of the University of North Carolina, Chapel Hill as an Assistant Professor in the Department of Public Policy and Peter Thacher Grauer Fellow in 2015. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1	16			
PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The intersection of performance in a theater space and in everyday life will serve as our springboard to investigate the diversity of contemporary America. We will draw on theoretical texts on performance, performativity, and critical theories to investigate how race, class, religion, gender, sexuality, sexual orientation, history, as well as life and death are performed in America today. We will also attend performances and part of the course will also be a short theater performance for a general audience. ABOUT THE INSTRUCTOR: Tin Wegel is a senior lecturer in the Department of Germanic and Slavic Languages and Literatures. Her academic interests lie in drama and theater performances, as well as foreign language pedagogy. Since 2003, she has staged many plays in German with students at various colleges and universities. Her last performance of Karl Kraus' play "The last Days of Mankind" was part of this World War I Centenary Project at UNC.

Though scholars have long disagreed about the causes of the Cold War, no one disputes that the German question played a central role in the break-up of the wartime alliance and the political division of western and eastern Europe that lasted for almost half a century. But was this division of Germany inevitable, and if so, why? If not, how did it happen? Was the Cold War inevitable? If yes, why? If not, why not? The course will explore these questions in two main chronological contexts: 1945 to 1949 and 1989 to the present. Against the backdrop of the division of Germany, having put ourselves in a position to ask probing questions about patterns of Soviet conduct in the early cold war then, we will fast-forward to the present: the daily impressions of unfolding events involving Russia today, right up to and including Russian intervention in Georgia, the Russian public rationale for the invasion, and the broad scope of Putin's efforts in the Ukraine. We will then undertake to place aspects of early cold war issues in the context of emerging Russian conduct now. We will talk about the nature of this behavior in relation to patterns of western outlooks and actions then and now; looking at how historians are assessing and reassessing Soviet policy to this day; considering interpretations of Russia's path in the twenty-first century; and pondering the possibility of a new, perhaps inevitable conflict with a new: or perhaps, after all, old? - Russia. This course was funded by the Honors Course. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.

This is a temporary section. If you wish to do an honors thesis in German, you may temporarily enroll in this section until you work out the details with your professor and receive written approval from the Director of Undergraduate Studies for GSLL, Dr Jonathan Hess. Once the approval form has been properly signed, your registration will be changed and you will be enrolled in a section of this course that is associated with the name of the professor you are working with. You will not be fully enrolled in Honors Thesis work in GSLL until this process is complete.

PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: In this seminar, we will consider a puzzling question: Why is it that we cry at the movies? And why do we willingly, and lustfully, expose ourselves to such an experience? Crying, just like laughing or screaming, is one of the extreme responses a movie can elicit from its audience. We will focus on the tear-inducing genre par excellence, the melodrama or weepie, to venture a few preliminary answers. Additionally, we will make excursions into other genres and their emotional responses to think further about the physical and psychological aspects of film spectatorship. Over the course of this seminar, students will learn the basics of film analysis and gain an overview over the history of international film drama production, and they will also consider various definitions of, and approaches to, emotion, affect, and the body. Questions that will guide our investigation include: What is an emotion? What formal elements of a film can we identify that guide emotional response? What distinguishes crying from laughing and other emotional utterances? How do we account for the social role of laughing and crying in the movie theater, its communicative and contagious aspects? What is

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS	1		13		
PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: Course explores the concept of cultural landscapes as a way of studying history and its legacies. Through a combination of field work, historical research, and analysis, students use maps, photographs, GIS resources, and archival documents to understand how--and why--people in the past shaped our surroundings today. ABOUT THE INSTRUCTOR: Within the general field of Early American history, John Sweet's research focuses on the dynamics of colonialism and on the interplay of religious cultures. His first book explored the encounters of Indians, Africans, and Europeans in New England and argued that the racial legacy of colonialism shaped the emergence of the American North as well as the South. He has also worked with other historians and literary scholars on the Jamestown colony and its broader cultural and international contexts. His current project is The Captive's Tale: Venture Smith and the Roots of the American Republic.

ABOUT THE SEMINAR: The focus of this seminar is to examine popular music as a way of understanding African history from the 1930s to the present. We will read background materials on African historical developments and musical styles, do a lot of listening, and try to learn what African musicians tell us about their societies. We'll focus in particular on what popular music can reveal about urbanism in Nigeria, politics in the Congo, and apartheid and its aftermath in South Africa. Students will be asked to research, write about, and present songs in their historical contexts; we'll also attend some live performances as a class. ABOUT THE INSTRUCTOR: Lisa Lindsay has a Ph.D. from the University of Michigan. She teaches broadly in African history, but her research focuses primarily on the social history of West Africa, particularly Nigeria. Her first book explored changes in household arrangements and ideas about gender associated with the expansion of wage labor, particularly on the government railway, during the colonial period. She is also interested in the history of slavery, and she is writing a biography of a South Carolina ex-slave who in the 1850s migrated to his father's place of

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: In ghettos and hiding places during the Holocaust, European Jews and other victims of Nazism recorded their experiences in diaries and other chronicles. Efforts to preserve individual histories continued after the war as survivors wrote memoirs and gave oral testimonies beginning in the earliest postwar years. In this course, students will read diaries, memoirs and literature as well as listen to oral histories to understand the history of the Holocaust through life narratives and to explore tensions between history and memory. ABOUT THE INSTRUCTOR: Professor Karen Auerbach is assistant professor of history and Stuart E. Eizenstat Fellow in the Carolina Center for Jewish Studies. She is the author of The House at Ujazdowskie 16: Jewish Families in Warsaw after the Holocaust (2013) and editor of Aftermath: Genocide, Memory and History (2015). Prior to arriving at UNC, she taught at universities in Australia and England as well as at Virginia Tech and Brown University. She has lived for extended periods in Poland, where she was based at the Jewish Historical Institute in Warsaw.

ABOUT THE SEMINAR: The American occupation of Afghanistan after 9/11/2011, the longest war in U.S. history, continues a long pattern of great empires attempting to control the country, usually unsuccessfully. This course asks why it has been so challenging for Afghanistan's rulers, both foreign and domestic, to build a centralized state in a historically decentralized society. ABOUT THE INSTRUCTOR: Eren Tasar is interested in religion and politics in the modern Islamic world. His focus is on Islam in Central Asia during Soviet rule.

Students interested in enrolling in recitations 600 and 601 scheduled for Friday at 9:05am, will need to contact Diana Devereaux (dmchase@email.unc.edu) in the History Department. Please include your name, PID number and the class information. Please note that when Friday lecture is held, all recitations will be canceled that week. Students will never miss lecture or recitation for the other component.

This course will focus on Pan-National movements in Asia and Africa from the 1870s to the present. Why were there very influential Pan-national political and intellectual currents in a period associated with empires, imperialism and nationalism? What are the legacies of Pan-African, Pan-Asian and Pan-Islamic thought and ideas in contemporary politics of the world? Cemil Aydin grew up in Turkey and studied at Boğaziçi University, İstanbul University, and the University of Tokyo before receiving his Ph.D. degree in History and Middle Eastern Studies at Harvard University in 2002. He is currently teaching courses on modern world history, Middle Eastern history and global/international history at University of North Carolina-Chapel Hill. Cemil Aydin's publications include his book on the Politics of Anti-Westernism in Asia: Visions of World Order in Pan-Islamic and Pan-Asian Thought (Columbia University Press, 2007)), a co-edited special volume on ¿Critiques of the `West¿ in Iran, Turkey and Japan¿ in Comparative Studies of South Asia, Africa and the Middle East 26:3 (Fall 2006), and ¿Globalizing the Intellectual History of the Idea of the `Muslim World,¿¿ in Global Intellectual History, ed. Samuel Moyn and Andrew Sartori) (Columbia University Press, 2013), pp: 159-186. He recently completed a book chapter on ¿Regions in Political History of the World, 1750-1924,¿ forthcoming in A History of the World, Book 4 (Harvard Press and Beck, Spring 2016) He is currently working on a book manuscript on the global intellectual The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

History teachers often assign novels that capture the essence of the era. When they show movies, however, they tend to prefer filmic recreations on an historical event. These movies illustrate the age in which they were produced better than they do the event in question, so class discussion centers around accuracy and objectivity. This course takes a different approach, and treats films as primary sources for studying the historical context in which they were made. Beginning with the development of narrative film in 1908, it will trace change by looking sequentially at those nationally specific genres that had repercussions beyond national borders. The primary historical themes will be the repercussions of two world wars in the United States and its European allies and enemies. Both wars played a pivotal role in the rise of communism as an alternative to the liberal democracies that consistently proved unable to fulfill their utopian aspirations. But nor could communism meet its ideological expectations, and this course ends in 1991, when Frances Fukuyama's ballyhooed end of history! with the collapse of the Union of Soviet Socialist Republics. A course such as this is especially important in this age of mass media, when people must be familiar with film as well as literature to be considered culturally literate. One cannot become literate, however, by simply viewing these films. Critics and audiences alike have been influenced by these movies for a wide variety of reasons, and this course will integrate a The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January

Injury, disease, and bodily decay predate modern medicine and have interested individuals other than medical doctors for centuries. This course deals with how knowledge about disease has been produced, and how it has evolved and changed us as it circulates worldwide. We will discuss the origins and evolution of major medical theories (e.g. humors, germs) and forms of intervention (e.g. vaccination, birth control) in relation to their socio-historical context (e.g. colonialism, the Cold War). Along the way, students will be exposed to the wide array of groups and individuals who have played a role in our contemporary knowledge of illness, including unlicensed practitioners, the military, priests and nuns, device manufacturers, and the sick themselves. Our two main goals will be to understand (1) the ways in which Western medicine has become a global political and cultural phenomenon; and (2) how different social actors have parsed the distinction between sickness and health over time. Focusing on the sick and the ways they have confronted disease, bodily decay, and physical discomfort enriches our understanding of the specificity of modern medicine, and helps explain why modern medicine co-exists with other forms of behaviors to care for oneself and others, including diet, alternative medicine, and prayer. At the same time, it is undeniable that modern Western medicine has become a singularly powerful way to view and act on illness. The distinctive strengths and weaknesses of Western medicine have not emerged in a The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course will examine the unprecedented surge of feminist thought and activism in the postwar United States. Course materials and discussions will trace feminists' varied conceptions of empowered womanhood and their expectations of the state, society at large, and each other. CROSSLISTED WITH WMST 476H. Katherine Turk is Assistant Professor of History. She teaches courses on women, gender and sexuality; law, labor and social movements; and the twentieth century United States. Her first book, Equality on Trial: Gender and Rights in the Modern American Workplace, will be published in 2016. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain

written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Mapping and Modeling Historical Environments. In this course, students will explore the use of digital methodologies for the spatial modeling of historical places and events. Critical issues pertaining to the reconstruction of the past will be covered, as well as technical skills in digital mapping and modeling with tools such as Google Earth, SketchUp, and Unity game engine. Students will gain knowledge in the theory and practicum of digital humanities as well as an understanding of spatial approaches to historical material.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. \_\_\_\_\_ This course examines the pressing migration trends across the world and urges students to question where and why migration is happening. There are 191 million migrants and 21 million refugees across the world. What combination of political and economic factors are driving people to undertake dangerous journeys in pursuit of better lives? While migration is relevant to almost every academic discipline, there are few "migration" scholars. This course will attempt to create a space for discussing the topic through the lens of many disciplines including law, economics, history, public policy, and global politics. HONORS CAROLINA STUDENTS WITH 60+ CREDIT HOURS ONLY. WORTH 3.0 HOURS OF HONORS PROGRAM CREDIT, BUT ONLY 1.0 HOUR OF ACADEMIC CREDIT (PASS/FAIL). COLLOQUIUM MAY BE TAKEN NO MORE THAN TWICE FOR PROGRAM CREDIT. Associate Professor of English and Comparative Literature, Ritchie Kendall joined the UNC faculty in 1980. He holds a BA in English from Yale University (1973) and an MA and PhD in English from Harvard University (1980). His specialty is in English Renaissance drama with an emphasis on the socio-economic dimensions of early modern theater.

¿Take a cooking class in college and get credit? Sign me up!¿ Thus often begins a 5 minute- to 2 hour conversation on Honors 352-001, When we first offered the class in 1997, it was a slightly naïve and timid enquiry into food and culture. Since 9/11/2001, the economic meltdown in 2008 and recovery since, and the new Farm Bill, developing and sustaining a vital interest in the sourcing, preparation, consumption, and preservation of our daily bread has become an urgent concern for us. If one cannot eat sustainably there is no point in worrying about finance. Malthus will be proven correct. Spring 2016 continues our recent trajectory of an introduction to scientific method and health affairs through a sweep through nutrition, eating disorders, epidemiology, biochemistry, and evolutionary biology. We examine such topics as the ethics of raising food crops for fuel, slow vs. industrial food, organic, and local food sourcing as well as the grim reapers of climate driven crop and water shortages and rampant obesity with its implication for escalating mortality from Type II diabetes and other diseases. Although the course has always emphasized the importance of historical context and the need to analyze change over time, in recent years its geographical and spatial scope have become considerably broader, with more and more of the readings and discussions focused around global concerns. American Catch, American Wasteland, Fair Food, Just Food, and The American Way of Eating highlight food entitlement and its consequences.

People the world over encounter Chinese culture for the first time through its food. Whether your memories are comforting or exotic&tasting dumplings while held in your grandmother&s lap, or trying egg drop soup for the first time in your neighborhood restaurant&it can be difficult to think about Chinese food as anything other than an experience to be savored. A historical approach, however, allows us to get a sense of how human relationships to food in China have changed dramatically over time, even as certain ideas about food continue to resonate. In this course we will address the history of food in China as more than just the production of inanimate foodstuffs. Adopting a thematic approach, we will ask some of the following questions: How has food been used by humans in Chinese history, beyond basic sustenance and nutrition? What has been its role in traditional rites and medicine? How have people celebrated food and drink, through poetry or nostalgic imagination? What about its excess and its lack, at imperial banquets or during periods of famine? How has food followed Chinese migrants around the world and how has it been adapted to local contexts? What would we consider to be the state of Chinese food today, in

China and in transnational Chinese diasporas? The course will be grouped into four units, exploring the following large themes: 1) Authenticity and Nostalgia; 2) Cultivation and Consumption; 3) Feast and Famine; 4) Transnational Diasporas. This course has no prerequisites, though some prior exposure to The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course deals with the theme of the transition from ancient to modern understanding of the essence of politics and will concentrate on selected plays of Shakespeare that profoundly dramatize that transformation (among them, Henry IV-Part I, Julius Caesar, King Lear, The Tempest). As the primary representatives of ancient thought, we shall read large portions of Aristotle's Nicomachean Ethics and Poetics. As the signal work in initiating modern thought, we shall read Machiavelli's Prince. This seminar will be conducted solely through conversation. Several essays, of varying length, will be required. There will also be an oral final examination. Students at all levels are welcome, and there are no prerequisites other than a willingness to read carefully and diligently. INSTRUCTOR CONSENT REQUIRED. EMAIL DR. GOLDBERG AT legoldbe@email.unc.edu). 3.0 CREDIT HOUR COURSE; FULFILLS PH-PHILOSOPHICAL & MORAL REASONING REQUIREMENT. My first loves are Shakespeare and Plato (my advanced degrees are in Classical Greek, Literary Criticism and English Literature). For the last twenty years, however, I have primarily taught a sequence entitled 'Elements of Politics' in which we discuss classics of political thought from all genres; philosophy, literature, history, essay, economics and science--, ranging from the ancients through the twentieth century. This has been the main focus of my care and attention. In their proper place, Plato and Shakespeare come in for a considerable amount

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. \_\_\_\_\_ This course introduces students to the diverse beliefs, practices, cosmologies, societies, and above all, religious cultures, associated with the Himalayan regions of Nepal and Tibet; and to the equally diverse approaches that scholars have brought to studying it. The class begins with a brief introduction to Buddhist history and teachings and a taste of current scholarly debate on the character of Buddhism in ancient India. Following this, we turn to ethnographic case studies of contemporary Buddhist societies, drawing on these examples to explore Buddhism's spread into the Himalayas, the cultural dynamics of Buddhist societies there, and the roles of ritual, the Sangha, monastic education, shamanism, folk religion, gender norms and the state in shaping Buddhist practice and belief. The class concludes by exploring recent revivals and political struggles in India, Nepal and Tibet, and the transformative impact of globalization and tourism. 3.0 CREDIT HOUR COURSE; FULFILLS PH-PHILOSOPHICAL & MORAL REASONING & BN-BEYOND THE NORTH ATLANTIC GENERAL EDUCATION REQUIREMENTS. About the Instructor: Field of specialization: Religions of Asia; Religion and Culture.

This Honors course will explore the rise of landscape painting in the sixteenth and seventeenth centuries. Landscape would become one of the most prized and beloved of all artistic genres; we will study its origins, its relationship to maps, and its roots in national identity. The course is timed to correspond with a major series of lectures in the Art department, the Betty Allison Rand Lectures, given in Spring 2016 by the foremost expert on landscape painting, Professor Andrew Hemingway of University College London. In addition to discussions with Professor Hemingway, and class discussions of his lectures, we will also have privileged access to works of art in the Ackland Art Museum that will form the basis of much of our primary research. We will also organize a visit to the North Carolina Museum of Art to view their holdings of landscape paintings from the early modern period. 3.0 CREDIT HOUR COURSE. FULFILLS VP-VISUAL & PERFORMING ARTS APPROACH AND WB-WORLD BEFORE 1750 CONNECTION. Dr Tania String is an art historian specializing in the art of the Tudor period in England, and the Renaissance more broadly. She is the author of numerous books and articles on the portraits of Henry VIII. Before coming to UNC in 2010 she taught in England at the University of Bristol.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Student Instructors: Aisha Anwar & Anisha Padma    Course Description: This course will largely examine the divergent realities and worth of South Asian identity in the United States by exploring how whiteness or {non-Blackness} works as a metric for economic, political and cultural power. We hope to conduct a relational analysis of South Asians to constructions of sexuality, race, and class. We will challenge normative ideas about gender roles and racial difference, set in place by colonialism, and how they manifest in South Asian communities in the United States. From the prison-industrial complex to the academic-industrial complex, we aim to raise critical questions about complicity of and activism from South Asian communities in American imperial projects. Finally, we seek to challenge the narrative of 21st century post-racial American society by exposing the difficulties of living in Post-9/11 America. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructors: Yasemin Cole    Course Description: Since the mid-1900s the progress of scientific research and medicine has had an astonishing impact on our health and daily lives. The Past, Present, and Future of Medicine seek to explore the emergence, state of, and direction in which research and its applications in medicine are heading. This class will enable students to learn about the history of medicine, the importance of clinical/basic research in the development of modern medicine, as well as the future state of medicine (personalized medicine). Students will read articles about some of the most historic scientific feats and important discoveries in medicine: From antibiotics to human genome sequencing to chemotherapy. Some topics include: penicillin and antibiotic resistance, blood banking and transfusion medicine, transplantation and stem cell regeneration therapy, cardiac pacemaker and TAVR, direct to consumer testing, personalized medicine, and alternative methods to medical training (simulation dummies). One topic will be covered each week. Generally, the first part of class will be lecture-based to cover the background and discovery of a specific topic. The second part of class will be used to apply these topics to modern day medicine- through in-class discussions on modern advancement of the topic, guest speakers (including doctors), field trips , and group activities (such as case studies and ethics). An important theme developed in this class is how progression of research over time

Student Instructor: Hannah Collier    Course Description: Shrimp and grits, collard sandwiches, roasted sweet potatoes, red drum, cornbread, biscuits, and fig

cake. Is your mouth watering yet? Many of us know these staple southern foods as beloved dishes served at our grandmothers' tables. In 'Feast and Famine' we will take an interdisciplinary approach to locate these and other foods that characterize the global American South into an academic context. Together as a class we will explore a wide variety of texts from Marcie Ferris' 'The Edible South: The Power of Food and the Making of an American Region' (UNC Press, 2014) to 'Island Born and Bred: A Collection of Harker's Island Food' (1987), essays from 'Southern Cultures', and podcasts from the Southern Foodways Alliance. Other forms of media including the Peabody Award-winning PBS series, 'A Chef's Life' featuring Chef Vivian Howard of Kinston, North Carolina, will allow further regional analysis. Together we will challenge the conversations surrounding North Carolina foodways. Where do these staple dishes come from? Whose stories are being told through the food that we consume, and whose voices are not being heard? What are the bitter and sour stories that are often silenced in conversations about sweet and savory southern food memories? By gathering around a classroom table, we hope to engage with these and many other issues related to coastal and eastern North Carolina's vibrant and complex food cultures. Join us for both a theoretical and literal taste of all this

Online registration for this course has been suspended. If interested in enrolling, please contact Lori Harris, Department Manager of Asian Studies, at lori@unc.edu. ----- Student Instructor: Matt Coss Course Description: Develop strong fundamentals in Mandarin Chinese with a completely new perspective! Supplement your years of Chinese study by looking at the language through the lens of an American second-language learner! In short, this course will guide advanced-level students back through the basics of pronunciation, reading and character writing to strengthen and supplement areas of weakness and difficulty. In addition, this course will include readings, debates and discussions (in Chinese) about a myriad of relevant historical and current issues relating to Chinese language and culture. Through this unconventional multi-faceted approach to the basics, advanced-level students will solidify their language foundations and lay a framework to continue pursuing higher proficiency in Chinese, whether in the academic world or the workforce beyond. Note: This course will be taught 100% in Chinese. Recommended prerequisite: CHIN305 or higher. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructor: Derrick Flakoll Course Description: American and European governments make it their policy to support democratic governance and economic development around the world. These broad political commitments reflect deeply-held Enlightenment values proscribing ethically ¿proper¿ relationships between government and governed. But implementing these benign principles abroad is fraught with difficulty. Political interests, global cultural differences, and competing moral imperatives ¿peace vs. justice, prosperity vs. freedom, etc. ¿ mean that democratization and development work abroad will inevitably be ethically tricky at best. This course will help students unpack the moral complexities of democratization and development in practice. In interactive seminar-style discussions, students will use philosophical frameworks and political economy scholarship to evaluate real-world case studies of democratization and development efforts. We will first lay a theoretical foundation for these topics by studying political philosophers like Aristotle, Rawls, Sen, Rousseau, Kant, and Nussbaum, as well as modern literature on democracy and development in general. Then, using these frameworks, we will evaluate cases such as authoritarian development in Singapore and China, popular dictatorship in Russia and Venezuela, ethnically divided elections in Nigeria and Kenya, post-conflict reconstruction in Bosnia and Iraq, and more. The course will emphasize a number of common themes that

Student Instructor: Hailey Gosnell Course Description: The US News and World Report describes the University of North Carolina at Chapel Hill as ¿one of the best universities in the world¿ with a ¿unique school spirit that has been forged through more than two centuries of academic excellence, public service, and athletic, professional, and personal achievement.¿ However, the UNC portrayed in recent articles by the Daily Tar Heel and Sports Illustrated titled ¿Evidence of Institutional Racism at UNC¿ and ¿Searching for Answer to Key Question In UNC Scandal: Why Did it Start?¿ diverges greatly from the USNWR¿s illustrious account. How do we rationalize these two very different views of our alma mater? How can we, as a community, utilize our strengths and learn from our mistakes to continue the university¿s mission of improving the world in the Carolina way? This course will equip students with the knowledge necessary to evaluate the University¿s current status and propose answers to these questions any many more! THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. Student Instructors: Blake Hauser & Larry Han Course Description: In recent years, outbreaks of SARS, MERS-CoV, H7N9 avian influenza, and the Ebola virus have shown that infectious diseases are far from under control. As Bill Gates penned in The New York Times, ¿Of all the things that could kill more than 10 million people around the world...by far the most likely is an epidemic.¿ This seminar-style, discussion-based course aims to give students a better understanding of the field of infectious disease through a variety of perspectives, including epidemiology, policy, and biostatistics. This course will also dispel commonly-held misnomers through readings of primary literature, including landmark studies such as HPTN 052, led by Dr. Myron Cohen at UNC. We will also highlight shortcomings seen in papers that have later been retracted by the publisher, with the intent of giving students the tools that they need to begin independently evaluating the quality of scientific literature. Many students come to UNC with a strong interest in healthcare but a lack of appreciation for the global nature of public health. Our course aims to place modern healthcare practices in the context of the global landscape in the fight against infectious disease. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

Student Instructors: Mia Lei & Katie Wiley Course Description: When engaging in research with vulnerable populations, we must also consider the potential implications for the people we are interacting with; take Tuskegee and the Stanford Prison Experiment as examples. The first module will focus on negotiating differences in our own biographies; such as race, criminalization, and educational backgrounds - using our own positions in society as a platform to see how biases and power dynamics affect researchers. The second module will use health and well-being as a lens to examine the intersection of research with faith, service, and media. By using a multi-disciplinary and intersectional approach to examine both researchers and research methods, we seek to acknowledge the multiplicity of influences impacting a person's well-being. The course will be centered around an oral history project that will allow students to experience and engage alongside their class discussions. Oral history workshops offered throughout the course will guide students in methodology, address barriers, and create a community of practice through shared reflection. The goal of this class is to facilitate conversations and practices that enable students to develop their own beliefs on what makes a particular research approach ethical and/or empowering. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL

Student Instructors: Shannon Powers Course Description: Since the turn of the century, a period of time The Wall Street Journal calls "The Golden Age of Neuroscience," neuroscience has rapidly expanded our understanding of the complexity of the brain and supplemental neural anatomy. For example, a paraplegic patient was able to kickoff the 2014 World Cup thanks to a robotic exoskeleton controlled by the patient's thoughts, designed at Duke University. Through

the use of academic contemporary writings and research, this course will explore the exciting new discoveries that propel neuroscience forward. We will discuss a variety of topics in this course, such as: concussion research, adult neurogenesis, implantation of memories into animals, research behind an Alzheimer's brain pacemaker, schizophrenia research, and an unusual patient who lacks fear. These exciting topics will be discussed in a seminar style course allowing opportunities for students to broaden their knowledge on current topics in neuroscience, while presenting new findings to the class. This course provides students with the knowledge of contemporary neuroscience allowing them to apply the field to their own studies. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. Student Instructor: Catherine Swift Course Description: Dying is a part of life, and death can be found in some form all around us, but it's one of society's most stigmatized discussion topics. Through stories, people can break out of this bind and express ideas about death and dying. In this course, we will explore some of these stories in poems, novels, plays, films, and more, discussing death in everything from Harry Potter to hospice care. We will ask how humor can help people cope, what our funeral practices say about our society, and why there are so many zombie movies. Exploring death and dying through both traditional and non-traditional narrative will help us move closer to grasping the broad and dynamic range of perspectives on one of life's only universal experiences. As we move through the course, we will develop tools for approaching the topic of death in professional and personal life. THIS COURSE IS TENTATIVE, PENDING C-START COMMITTEE APPROVAL, AND DOES NOT COUNT AS ONE OF THE TWO HONORS COURSES REQUIRED ANNUALLY FOR MEMBERS OF HONORS CAROLINA. ALL STUDENTS ARE ELIGIBLE TO ENROLL FOR ONE (1) HOUR OF PASS/FAIL CREDIT.

ABOUT THE SEMINAR: From an animal past to visions of a cyborg future, the question of what it means to be human has long spurred reflection and ignited controversy. This seminar is designed to be an interdisciplinary investigation into the various, and sometimes contradictory, ways human identity is explained. By focusing on the questions Who am I? and Why am I this way?, students will conduct an inquiry into the biological, personal, and social aspects of identity. Over the course of the semester, we will study popular and scholarly articles, films, visual arts, oral histories, media artifacts, and material culture to engage with both historical and contemporary perspectives on aspects of identity such as the human animal, gender, race, sexuality, cultural diversity, and the ethical and moral implications of identity formation. Through class discussions, writing assignments, group presentations, and student-designed creative projects, first-year students will have an opportunity to hone the active inquiry, critical thinking, and communication skills necessary for future academic endeavors. ABOUT THE SEMINAR: LTAM 89 will explore multiple facets of the Cuban revolution and its impact in Latin America and the United States. Under the auspices of la revolución, Cubans embarked upon one of the most ambitious revolutionary projects of the twentieth century. Virtually all previously existing national institutions were abolished, modified, or otherwise adjusted in the service of an egalitarian project inscribed into the claim of national sovereignty and self-determination. But the impact of the Cuban revolution reached far beyond the island. The experience of a Third World country seeking to transform a social system, which required at the same time the need to eliminate the privileged presence of the United States, resonated in Latin America. Cuban policies, the very model of Cuba, posed a direct challenge to U.S. interests in the Western Hemisphere, a challenge that assumed particular urgency at the height of the Cold War, when the Cuban leadership proclaimed the Marxist-Leninist nature of the revolution and allied itself with the Soviet Union. The example of Cuba and the romance of revolution as a means of social change resonated in Latin America. The Cuban revolution also posed a

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This seminar is designed to engage students in an exploration of the relevance of mathematical ideas to fields typically perceived as "non-mathematical" (e.g., art, music, film, literature). Equally important will be an exploration of how these "non-mathematical" fields influence mathematical thought. Course activities and assignments have been designed to illuminate the fact that even the most complex mathematical concepts grow out of real people's attempts to understand their world. By the end of the seminar, students should be able to

- Identify and assess how mathematical ideas influence and are influenced by ideas expressed through art, music, literature, religion, etc
- Compare and contrast different philosophies concerning the nature of mathematics
- Articulate their own well-reasoned ideas concerning the nature of mathematics
- Discuss the evolution of fundamental mathematical concepts in a historical as well as a cultural context
- Discuss the work and lives of important mathematicians in relation to the
- non-mathematical work of their contemporaries
- Identify and assess how their own understanding of mathematical ideas influences the way they interact with the world

Solution methods for first- and second-order differential equations, including the first-order system  $X' = AX$ , where  $A$  is a  $2 \times 2$  matrix; linearization of nonlinear equations at a critical point; and examples and applications. Differential equations are essential for describing the dynamics of systems and are used in all scientific and engineering disciplines. PREREQUISITE: AT LEAST A B+ IN MATH 233 OR 233H AT UNC. Boyce Griffith is an Assistant Professor of Mathematics and an Adjunct Assistant Professor of Biomedical Engineering at UNC. His research and teaching interests are centered on developing dynamic mathematical models of physiological systems, developing computational methods for simulating such models, and applying these methods and models to understand cardiovascular function in health and disease. He has a PhD in mathematics from the Courant Institute of Mathematical Sciences at New York University and undergraduate degrees in mathematics, computational and applied mathematics, and computer science from Rice University. He has been a member of the UNC faculty since July 2014.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

The course will begin with a review of basic neurobiology and muscular biology. We will then discuss traditional mathematical models in neuromechanics, including the Hodgkin Huxley equations, Hill muscle model, and integrate and fire models. We will then develop integrative models for connecting motor neurons, neuromuscular junctions, muscle activation, muscle contraction, resulting limb movement, and sensory feedback. The results of these models will be compared to experimental data. Class meets in Chapman 435.								

MATH	891	003	17061	SPECIAL TOPICS	Lecture (Face to Face Instruction)	1 - 3	A	
Bldg: TBA		Room: TBA		Days: TBA	Time: TBA	Rank: INST Load: 100	Instructor: FOREST,M GREGORY

The history, culture, and musical sound and practice of bluegrass music, with an intensive focus on listening. The course covers significant performer musical styles, and fans' reception, considering how bluegrass intersects with major themes of cultural identity across different eras and in different locations around the world.

<p>Hip Hop Diplomacy and Social Justice is offered through the UNC Chapel Hill Music Department in conjunction with Next Level, a State Department sponsored project of global hip hop diplomacy. The course is about the ways the US State Department and global audiences consume and produce hip hop music and culture and also about the history and ethics of musical diplomacy. In this course students will grapple with critical issues about hip hop culture such as race, ethnicity, gender, and socio-political dynamics; students will also become familiar with the historical and contemporary musical practices of two Next Level partner countries, Senegal and Zimbabwe. Through interactive exchange with peers from Senegal and Zimbabwe, students will create original songs (music and lyrics) and, in so doing, investigate both the theoretical and practical aspects of hip hop production.</p>

<p>An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1860. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class will involve a performance component.</p>

This course is an introduction to music cognition, or the study of how the brain processes and makes meaning from music. The course will survey foundational and current experimental literature pertaining to musical pitch and melody, harmony, rhythm, meter, form, timbre, emotion, memory, metaphor and cross-modal correspondences, consumer bias, embodiment, temporality, narrative, multimedia, language, performance, and personality.

Music majors. Prerequisites MUSC 251, 252 and 253.

This course has prerequisite requirements.

This course has major restrictions.

		16-NOV-2015	RC PLAN UGRD HONORS	0		3	

Medieval and Renaissance vernacular poetry abounds with references to music, so much so that writers from the fourteenth century to the present day have described the relationship between the two disciplines as one of marriage. This seminar traces intersections between song and literature in medieval and early modern Europe. Focusing especially on settings of love poetry, we will consider how song might function as a kind of reading, how we might view music as a composer's way of expressing his or her interpretation of a poetic text. Along the way we will cover a broad range of topics including gender, femininity, and the role of women in medieval and early modern Europe; the influence of theology on secular art; the transmission of music and poetry in manuscripts and early printed books; and the role of music in medieval society. In this discussion-based class, students will engage with medieval and Renaissance love song through their own in-depth analysis of poetic and musical works; through reading relevant modern scholarship from a variety of disciplines including musicology, French and Italian literature, and history; and through hands-on work with medieval manuscripts (both originals and reproductions) in the Wilson Special Collections Library and the Music Library. No prior musical knowledge or abilities required. Dr. Lauren Jennings studies music, poetry, and manuscript culture in late-medieval Italy. Her research has been supported by grants from the U.S.-Italy Fulbright Committee. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----
