PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: What is evil? Who is responsible for it? How different are evil people from the rest of us? How should we respond to them? This seminar will explore the nature of evil through philosophy, nonfiction, fiction and film. Readings will include Shakespeare's Othello, Hannah Arendt's Eichmann in Jerusalem: A Report on the Banality of Evil, and Mary Midgley's Wickedness. The seminar will involve short weekly writing assignments. In addition, students will select an independent project, presenting their findings to the class and leading a discussion on it. ABOUT THE INSTRUCTOR: Susan Wolf is the Edna J. Koury Distinguished Professor of Philosophy. Majoring in math and philosophy, she graduated from Yale in 1974. She did her graduate work at Princeton and taught at Harvard, the University of Maryland, and Johns Hopkins before coming to UNC in 2002. In 2003 she received the Mellon Foundation's award for Distinguished Achievement in the Humanities. Professor Wolf is the author of Freedom Within Reason, a book on free will and moral responsibility, and numerous articles ranging over topics in ethic. Her recent work has focused on the relations among happiness, morality, and

Reserve Capacity:		01-NOV-2015	RC CMB UG	FR FYS SO NOT JR SR	Reserve Enrl Cap: 24		Reserve Enrl Tot: 18	
This course is an Honors-level introduction to the elements of moral reasoning and deliberation. What sorts of factors should I consider in making a moral decision, and how and why do they matter? We will examine a few classic theories of moral right and wrong, such as John Stuart Mill's Utilitarianism and Immanuel Kant's Categorical Imperative. Then we shall investigate a number of controversial moral issues, applying the classic theories and also seeing what they overlook. The special topics will be chosen by the students collectively, but may well include abortion, capital punishment, or euthanasia. FIRST AND SECOND YEAR STUDENTS ONLY. Prof. Lycan works primarily in philosophy of mind and philosophy of language. His books include Knowing Who, Consciousness, Judgement and Justification, and Consciousness and Experience. He also regularly teaches ethics and moral philosophy, and occasionally publishes in those areas.								
The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Some seats reserved for PPE minors until 11/14/15. Some seats reserved for freshmen and sophomores (per your academic level stated in your ConnectCarolina Student Center) until 11/14/15. If you believe you are a freshman or sophomore and are getting an error message when trying to register, check your ConnectCarolina Student Center to see if you are being projected as a junior/senior for next term (60+ credit hours earned). If the class is appearing as open, and you are receiving an error message stating you do not meet the "requirements", that means one of the seat reservations is full, and you do not meet the other reservation's requirements. The seat reservations are separate, and do not communicate (so if the reserved seats for FR/SO are full and you are not a declared PPE minor, you will not be able to register at this time and vice versa). Please continue to check ConnectCarolina to see if an unrestricted seat opens, or check back once the reserve capacities are removed at the above mentioned date. The seat reservations are only in place for a short while, so there will still be plenty of opportunity to try to get a seat in the class.

In this course, we will explore the connections between law and justice. The central organizing idea is the notion of "the rule of law." This notion played a very large role in Western political thinking since the middle ages and in modern constitutional thought. Over the last century it has had a strong presence in thinking about the international legal order. The world-wide respect for the ideal is (in part) the legacy of the Nuremberg Trials in which Nazi war criminals were tried by an international tribunal. Yet, those trials themselves seemed to compromise the ideal. The trials and the notion of the

rule of law have remained controversial. Some believe that the ideal of the rule of law can be derived from a sound understanding of law itself, others argue that it has its roots in fundamental notions of liberty, others attack it as a piece of Western (or American) ideology. This course will explore the philosophical foundations and practical applications of the notion of the rule of law, and will focus on the importance of the rule of law in the international domain for protection of human rights. Gerald Postema has published extensively in legal and political philosophy and ethics. He has edited the Cambridge Studies in Philosophy and Law and (with Michael Corrado) Law & Philosophy. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This year we'll be focusing on love in all its forms, including erotic, filial, and so-called agapic love, as well as on friendship and associated feelings and emotions. Though we will discuss some films, which will be screened outside class time, or be available on Netflix, most of our time will be spent on philosophical texts, including Plato's Lysis, Symposium, and Phaedrus, Aristotle's Nicomachean Ethics (Books VII and VIII), and Berit Brogaard, On Romantic Love. Most of my books are on Plato and Aristotle, with frequent asides on film, and on love and sex.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.. -----

Human and animal experimentation are frequently discussed separately; each arena is governed by its own regulatory system and scientists typically focus their research either on humans or on particular animal species. However, both historically and in modern biomedical research, animals have served to model human diseases or processes with an eye to translating interventions to research using human subjects. Indeed, the history of animal and human experimentation is intertwined in multiple ways and the philosophical and ethical issues raised by each overlap significantly. This is a course about both the history and ethics of animal and human subject experimentation. Issues to be addressed include: the history of the animal model in science; contentions in sorting the balance of harms and benefits of research; changing conceptions of role obligations, virtues, and identity of the good researcher; the development of the vulnerable research subject; and contentions over human and animal moral standing and rights. \*Please note this course is listed by UNC's Philosophy Department and Duke's History Department. The course will meet on both campuses and students must be able to attend all class sessions. Rebecca Walker, PhD is Associate Professor in the Department of Social Medicine (Core Faculty in the Center for Bioethics) and Adjunct Professor in the Philosophy Department at UNC. Her work to date has focused on: practical virtue ethics, concepts of autonomy in bioethics, the ethics of ----- Honors Carolina students register online when their registration appointment begins. Other students register online beginning November 16. If the course is full, submit a request at [honorscarolina.unc.edu/waitlist](http://honorscarolina.unc.edu/waitlist). -----

This course is co-convened with Duke, and will meet half the semester at UNC and half the semester at Duke.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. ----- Topic: The History and Ethics of Human and Animal Experimentation. This course co-convenes on both UNC's and Duke's campuses, so commuting between campuses will be required.

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The nanoworld is a strange and captivating place. It is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and behaviors, some of which are amazing and unexpected. We are still uncovering these rules, and are only beginning to apply this new knowledge to technology. Can we build molecular machines that cure disease or clean up the environment? Can we make computers using single molecule transistors? How do viruses and other bio systems assemble themselves? In this seminar, we dive into the basic physics, chemistry and biology that describe the nanometer scale world. We will also try to distinguish the true promise of nanoscience from the hype. Students will engage in class discussions informed by their weekly reading of selected scientific literature. They will also participate in small group projects building physical models of nanoscale objects and phenomena, and perform calculations to gain a quantitative understanding of the physics underlying the nanoworld. No prerequisite is required

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: In this seminar, we will analyze physics concepts by watching scenes from popular movies. The overall goal is to disentangle the complicated interplay of physics ideas in real-life situations and thereby to improve significantly our problem-solving skills. Emphasis is placed on group work rather than on traditional teaching. We will be addressing questions such as: Which scenes from movies are unphysical and which are realistic? How are physicists portrayed in movies? How does physics research influence society? Ultimately, we will gain a more fundamental understanding for physical concepts and how these concepts shape our world view. No prerequisite is required. ABOUT THE INSTRUCTOR: Christian Iliadis is a Greek who was born and raised in Germany. He obtained his diploma in physics from the University of Muenster/Germany and then moved to Notre Dame where he received his Ph.D. He spent three years in Vancouver, working in Canada's largest nuclear physics laboratory. Since 1996, he has been Professor of Physics and Astronomy at UNC-CH, teaching a variety of undergraduate and graduate courses. His research specialty is nuclear astrophysics, which is the science of how stars

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1		10	

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: Rapid recent globalization raises important public policy issues concerning impacts on the environment, labor, and communities. The seminar provides an opportunity to explore the implications of living in an increasingly global economy and the public policy issues that these trends pose. Among the themes to be considered are: What is globalization? Is it inevitable, reversible, and manageable? What are the key drivers and who are the stakeholders? The class will research and engage in the discussion about the impacts of international trade, investment, and development on natural ecosystems and the human workplace. Students will learn how to understand, articulate and debate alternative perspectives on current and iconic public policy issues such as, for example, the Keystone Pipeline and the Trans-Pacific Partnership, among many other topics. We will learn how these dynamics operate on the global, national and local levels, including in North Carolina. ABOUT THE INSTRUCTOR: Harvey Himberg is Adjunct Professor of the Practice at UNC's Department of Public Policy and an Environmental, Labor and Social Policy Consultant to the World Bank and the Asian Development Bank

This seminar will examine the role of schools and other institutions play in determining life chances, which educational interventions work well for economically and academically disadvantaged students, and what to do when institutions cease to work well. Students will learn how to analyze complex educational public policy problems while exploring questions of effectiveness, inequality, resource management, and politics. FIRST YEAR STUDENTS ONLY. Dr. Lauen's work seeks to understand the effects of educational policies, school types, and school contextual factors on student outcomes. I focus on areas that policymakers can control and that have high relevance to current educational policy debates. To date my academic research covers four areas: 1) classroom poverty composition, 2) educational accountability, 3) performance incentives, and 4) school choice. Sociological and economic theory and policy relevance guide my work, which employs rigorous quantitative research designs. My work often examines the heterogeneity of effects across socially, economically, and educationally disadvantaged student subgroups because reducing educational inequality depends on whether policies and settings have differential effects on disadvantaged and minority students.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January

REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: Approximately 40 million immigrants (14% of the US population) live in the United States and nearly one quarter of all children (ages 0-18) in the US are children of immigrants. Although the majority of immigrants arrive to the US from Latin America, others immigrate from Asia, Africa, and Europe. With a focus on Latin American migration to the US, this course introduces students to critical topics in immigration. Students will gain an understanding of the theories of migration, theories of acculturation and assimilation, and the ways in which policies influence the health and educational attainment of immigrant youth. Students will have an opportunity to compare and contrast U.S. immigration policies with the immigration policies of other developed countries in North America, Europe, and Asian. Students will also have an opportunity to explore their own migration histories and the personal migration stories of others. ABOUT THE INSTRUCTOR: Krista Perreira is a health economist who studies disparities in health, education, and economic well-being and inter-relationships between family, health and social policy. Focusing on children in immigrant families, her most recent work

ABOUT THE SEMINAR: Global health policy impacts the health and well-being of individuals and peoples throughout the world. Many determinants of health operate at a global level, and many national policies, social practices, and individual health behaviors are structured by global forces. Concern for the spread of infectious diseases, increasing rates of chronic diseases and the effectiveness of health systems to provide quality care are among the daunting challenges to health policy makers. ABOUT THE INSTRUCTOR: Benjamin Mason Meier is an Associate Professor of Public Policy. Dr. Meier's interdisciplinary research at the intersection of global health, international law, and public policy examines rights-based approaches to health. Working collaboratively across UNC's Department of Public Policy and Gillings School of Global Public Health, Dr. Meier has written and presented extensively on the development, evolution, and application of human rights in global health. Dr. Meier received his Ph.D. in Sociomedical Sciences from Columbia University, his J.D. and LL.M. in International and Comparative Law from Cornell Law School, and his B.A. in Biochemistry from Cornell University.

This course addresses how global environmental policy is made, with specific attention to the roles of global environmental institutions, nations, commercial and non-profit entities. Topics include the evolution of environmental policy in the United States; China, India and other developing countries; impact on the global environment; global environmental institutions such as the United Nations Framework Convention on Climate Change; the role of environmental non-governmental organizations; risks to the environment through pollution of land and sea by waste; global energy and environmental implications of shale gas and fracking; and the Fukushima-Dai-ichi nuclear disaster and its global repercussions. You will also have the opportunity to interact with a range of professionals in environmental policy via guest lectures, Skype calls, and public policy research.

An overview of the nonprofit sector in the 21st century is presented in this course. Primary attention is placed on the interactions between the nonprofit sector and public policy. Detailed examination of current challenges and policy changes affecting the nonprofit sector allows students to gain tools and knowledge of available resources and strategies.

This course examines the role of organized interest groups in American politics. The course highlights the important approaches to understanding and explaining group behavior: how and why groups form, how they attract members, their role in campaigns and lobbying, and how they influence policy outcomes. An important theme of the class is the relationship between successful interest group mobilization and the types of interests these groups represent.

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1			19

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: From Facebook friends to BFFs, friendship is a crucial part of our lives; friendship has also been a crucial concern in the history of political thought. In this class, we will investigate what relationships have been designated ¿friendship¿ in the past, and investigate why are they of such concern to political and ethical philosophers. What is the work that ¿friendship¿ does in the political and ethical thought of ancient thinkers like Plato, Aristotle, Cicero? How ¿ and why ¿ do Montaigne and Emerson write about it? Where do we find the most provocative and insightful contemporary writing about friendship? Above all: what is friendship¿s relation to politics and to ethical life? ABOUT THE INSTRUCTOR: Susan Bickford grew up in rural Ohio, did her undergraduate work at Bryn Mawr College, and received her Ph.D. from the University of Minnesota. Her research and teaching focus on feminist political theory, the impact of conflict and inequality on democratic politics, and ancient Greek political thought. She is the author of The Dissonance of Democracy: Listening, Conflict, and Citizenship. In 2013, she made it to the regional tryouts for Jeopardy, but Alex Trebek has not yet invited her to be on

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS			1		13		

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This seminar focuses on explaining and understanding social movements and the collective political behaviors that they promote (e.g. demonstrations, riots, strikes, and eco-terrorism). Our theoretical focus will be interdisciplinary, drawing on research in political behavior, social psychology, sociology, political theory, and the law. We will discuss when and why collective action occurs, who participates, what forms it takes, and how governments respond. Substantively, we will study a variety of movements including: the Tea Party movement, the Environmental movement, the Animal Rights movement, the America Militia movement, the White Nationalist movement, and the Occupy Wall Street movement. We will use a variety of approaches and resources: class discussions, films, wiki writing, online discussions, novels, and texts. Grades will be based on class participation, a writing project, and several group wiki papers. ABOUT THE INSTRUCTOR: Pamela Conover, Burton Craige Professor of Political Science, was educated at Emory University, and received her Ph.D. at the University of Minnesota. Professor Conover teaches courses dealing with political psychology, and social movements

Humans and non-human animals have lived together since time immemorial, our relationships exhibiting a range of qualities, including interdependence, hostility, indifference, and care. Despite the fact that our form of life is always one lived in close proximity to the animal world, we tend to think of non-human animals as existing outside the boundaries of political life; indeed, animal life has been, at best, a marginal topic in the field of political science. But animals have always played a fundamental role in our political and ethical thought, even since ancient times. The ancients figured their encounters with animals in a much different way than we do to today. Talk of rights was nowhere to be found, nor was talk of suffering particularly present. The ancients did talk of animals; intellectual and affective capacities but had only a marginal role. What sorts of arguments, then, were made on their behalf, if any? How do those compare with the early moderns figuring of animals, and with ours today? Over time, a range of different arguments have come to be made on behalf of animals and we will look carefully at some of these in the course, as many of these claims play out on explicitly political grounds. Increasingly, political thinkers are challenging commonly held beliefs about the political and ethical standing of animals and attempting to illuminate the ways in which animal life actually animates much of political theory and politics today. In the spirit of these emerging debates, this The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

An introductory course designed to explain the basic processes and issues of the American political system. The course explores the nation's founding, the primary political institutions in the United States, the legislative, judicial, and executive branches, and concludes by examining mass political behavior. Here we focus on elections, campaigns, voting behavior, and public opinion. My primary teaching and research interests are American political institutions, the U.S. Congress, and elections. I am interested in the role institutional features play in decision making of individuals. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course introduces you to world politics from a logical, social scientific perspective. The substantive goal is to understand why and how political actors in the international arena make the decisions. Why do nations fight? Why do they cooperate, economically and politically? How can we understand the mechanisms that encourage cooperation over conflict in world politics? This course does not simply inform you of how others have studied problems in world politics. Rather, the intent is to demonstrate how theories of world politics can be constructed and applied, and, in turn, to have you engage in this process of application. There are several options of theoretical focus for such a course. In this course the basic perspective is rationalist, a powerful but imperfect set of assumptions about human behavior. As we learn about the mechanics of international relations, we will also examine the strengths and weaknesses of rational choice. The expectation is that you will master this approach even if you are critical of the core assumptions. I am a Bowman and Gordon Gray Term Professor of Political Science at the University of North Carolina, Chapel Hill. I earned my B.A. degree from the University of California at Irvine in 1993 and my Ph.D. from the University of Illinois at Urbana-Champaign in 2000. I teach undergraduate and graduate courses in International Relations, including Introductory International Relations, International Conflict Processes and Conflict Resolution. You can find links to syllabi for these The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course examines the politics of the American South. Scholars have long considered how politics operates differently in this region, and we will spend the first half of the course considering both historical and contemporary political trends in specific southern states. The second half of the course will involve reading two books that provide different explanations for changes in partisanship in the American South. No prerequisites are required, but it is encouraged that students be somewhat familiar with state politics before taking the course.

This course provides an overview of major topics in the study of Latin American politics. It is aimed at students with a desire to understand how Latin American societies and governments are organized, what the major problems are that these societies are facing, and what accounts for different outcomes from the point of view of the welfare of citizens. We shall examine both common traits in the region's history, culture, and economic, political, and social structures, and important differences between countries in these dimensions. We shall gain an understanding of the diversity of national experiences and a somewhat deeper knowledge of a few select cases: Argentina, Brazil, Chile, Uruguay, and Costa Rica. Evelyne Huber, Morehead Alumni Distinguished Professor and Chair of the Department of Political Science, works on problems of development, democratization, and welfare states in Latin America and Europe. Her most recent books, co-authored with John D. Stephens and published by the University of Chicago Press, are entitled Development and Crisis of the Welfare State: Parties and Policies in Global Markets (2001) and Democracy and the Left: Social Policy and Inequality in Latin America (2012).

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course will closely examine classical political thought, focusing mostly on Ancient Greek thinkers, but we also look at Christian thinkers as well. We will read plays, dialogues, history, and more traditional prose writing. We will ask the questions that ancient thinkers asked, and examine their answers: What is the best human life? Can politics help one live the best life? If so, how? If not, why? What is justice? As we examine these questions and look at their possible answers, we will ask look at the difference between how ancient thinkers viewed political life and how people do so today; and we will also see what modern day political thinkers can learn from the political ideas of these earlier times. I teach political theory in the Department of Political Science at the University of North Carolina at Chapel Hill, where I am the Kenan Eminent Professor of Political Ethics. I received my B.A. from the University of Michigan. After graduating I had no plan for my life, and so I went to New Zealand and Australia for several months. I then made my way to Washington, DC, where I got hired by a small public interest group in Washington, D.C. called Citizens for Tax Justice. I worked for CTJ for about two years, and then returned to Ann Arbor for my graduate work. In 1992, I joined the Department of Political Science at the University of Nebraska, where I eventually became the Schlesinger Professor of Social Justice. I joined Carolina in 2005. My research focuses on the tensions that arise within The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

<p>Poli 276 (Major Issues in Political Theory): Latin American Political Thought This course will serve as an introduction to the history of political thought in both Spanish-America and Brazil. Latin American political thought constitutes a growing subject focus within political theory. This course will survey a selection of major works that have been produced over the last five centuries;from the earliest days of colonization, through the wars of independence, and up to the present day. Some of the themes and topics we will cover in this course are: evolving conceptions of race and ethnicity; the construction of gender roles; the relationship between violence and authority; the role of the state; political and civil rights; nationalism; and the historical influence of the United States. While some background knowledge of Latin America can be beneficial for engaging with these texts, there are no perquisites for this course. Further, since we will only be reading English translations of these major works, knowledge of Spanish and Portuguese is also not required.</p>

This course is an in-depth study of the dynamics of American presidential and congressional elections. The first half of the course will focus on presidential campaigns and elections. We will explore historical patterns in presidential elections and consider how they have or have not changed over the past two election cycles. The second half of the course will focus on topic related to congressional elections. Topics will include the incumbency advantage, the role of strategic politicians, the impact of money in congressional elections, the effects of national and local tides on congressional races, and differences between House and Senate races. Jason Roberts is an Associate Professor of Political Science. He received his Ph.D from Washington University in St Louis (2005). His research centers on American Political Institutions with a focus of legislative voting, parliamentary procedure, and congressional elections.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

Examines the politics of the United States Congress. Emphasis on representation, elections, and policy making. Students will explore how redistricting, elites, geographic sorting, and institutions influence polarization. We will also spend time studying the ongoing congressional primaries. My primary teaching and research interests are American political institutions, the U.S. Congress, and elections. I am interested in the role institutional features play in decision making of individuals.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is designed to introduce students to a variety of topics in African politics, with a focus on political economy and economic development. Over the course of the semester we will cover the major developments and issues in African politics from the pre-colonial period through the current day. Topics covered will include the long-term effects of the slave trade and colonialism; the independence period and patronage politics; the causes of instability and civil war; the politics of foreign aid; democracy and democratization; and the challenges modern African countries face in building strong, stable governments and economies. There are no prerequisites for this course.

Representation and Rights: LGBTQ, Gender and Ethnicity Political representation rests on a combination of geography, ideology and descriptive presence. To what extent does having elected officials who 'look' like you, come from your community or 'group' and who share you history and interests, effect the quality of representation and governance? We will look at descriptive representation through the lens of LGBTQ, gender, and ethnicity. Students will be encouraged to focus on a special interest area after learning the foundations of research. POLI 400-level courses are reserved for POLI majors Nov. 3-6, 2015. Available seats will be available to both Poli majors and non-majors after Nov. 6.

When Countries Go Broke: Political Responses to Economic Crises In this course, we begin by discussing how political leaders have responded to needs for financing the state historically, then investigate the political origins and ramifications of more recent financial crises, including the Great Recession. POLI 400-level courses are reserved for POLI majors Nov. 3-6, 2015. Available seats will be available to both Poli majors and non-majors after Nov. 6.

This graduate-level seminar is designed to examine the various controversies that surround the role of race and ethnicity in the United States. Such issues affect public opinion, political institutions, political behavior, and public policy debates. This course will assess the contemporary and historical influence of race and ethnicity in these domains.

Notes: This course is open to TransAtlantic Masters students, upper-level European Studies majors, and upper-level Political Science majors. POLI 891.200 (The EU Today: People, Policy, Politics) is a one-credit capstone course designed specifically for upper-level EURO majors and TransAtlantic Masters students. The course is team-taught by UNC-CH faculty members, our DAAD Professor and the Jean Monnet Visiting EU Scholar and serves to enhance students' understanding of EU-specific topics and current events through lectures from and discussion with experts in the field. Topics will focus on matters such as EU integration, fiscal policy in the Eurozone, the work of the European External Action Service, Immigration within the EU, and Comparative Social Policy. Students will also meet with practitioners and learn about careers relevant to the field of EU Studies. Finally, students will be given opportunities to talk about and receive feedback on their on-going research projects, such as an MA Thesis or undergraduate Honors Thesis. Student assessment will take the form of participation, class presentation, speaker introduction, and a 5-page research paper.

Critical Thinking in Psychology and Beyond: How to use Your Brain. Critical thinking is the ability (and willingness) to assess claims and make objective judgments on the basis of well-supported reasons. It is the ability to look for flaws in arguments and resist claims that have weak supporting evidence (or none at all). Critical thinking is not simply negative thinking; it fosters the ability to be creative and constructive, generate solutions, think of implications, and apply knowledge to a broad range of social and personal problems. Critical thinking skills are essential to success as a student, in your career, as a consumer of goods and services, and in many other areas of your life. This course focuses on the development of critical thinking skills, especially as they relate to psychological science. The field of mental health is loaded with theories and interventions; some of them scientifically and logically valid, and others not. Critical thinking is a must if one is to successfully learn about how psychological knowledge is created, evaluated, and applied. In addition to learning basic skills of logic, students in this Honors First Year Seminar will learn about the logic of the scientific method and the common errors of human cognition that impede critical thinking. We will emphasize the application of critical thinking skills to psychological phenomena and claims about abnormal behavior and its treatment. Students will learn by discussing and writing effective arguments, analyzing the writings of others. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

From widespread concern about neurological diseases, such as Alzheimer's and Autism, to controversies about the definition of brain death, the nervous system looms large in our popular consciousness. This course is designed to help students arrive at informed answers to questions about how the nervous system is put together, how the brain generates behaviors, and how the nervous system can malfunction. Students will learn how we study the nervous system, how the substances that we put into our bodies can alter our brain and affect our behavior, and the current state of our ability to repair damage to the nervous system. The course will also identify behavioral neuroscience mysteries that scientists are still working to solve. The course will provide an excellent foundation for further study in the field. PREREQUISITE: PSYC 101 Dr. Boettiger's research focuses on improving our understanding of the neurobiology of substance use disorders (SUDs) by identifying and characterizing neurocognitive markers and intermediate phenotypes. We approach this issue from two directions. First, we are carefully dissecting probable intermediate phenotypes, including: immediate reward selection bias, enhanced habit learning, and attentional bias toward reward-related cues. Secondly, we are identifying objective neurocognitive measures of addiction severity and therapeutic response. Through these approaches, we hope to realize more effective treatment and prevention strategies for SUDs, which are the leading cause. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is designed to introduce the student to the topic of animal learning and behavior. We will consider Pavlovian or ¿Classical¿ learning, operant learning, and the role of learning in drug abuse and dependence. Students will acquire knowledge of the procedures used to study learning, the ways that learned behaviors are expressed, and theories that have been proposed to explain how learning is represented in memory. Because neuroscience has had such a tremendous impact on our understanding of learning, memory, and behavior, we will also consider new findings from neuroscience that have allowed an understanding of the underlying brain substrates. PREREQUISITE: PSYC 101. Dr. Penner earned a B.A. in Psychology at the University of Winnipeg, an M.S. Pharmacology and Neuroscience at Dalhousie University, and a Ph.D. in Neuroscience from the University of Arizona. Prior to joining the Psychology Department at UNC in July of 2013, Dr. Penner was a research scientist and lecturer at the University of Washington. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

This course is an introduction to the science of experimental cognitive psychology - the investigation of how people perceive, learn, remember, and think. Specific topics include: attention, memory, perception, language, decision-making, and cognitive control. This Honors course includes group discussions of experiments and research articles investigating cognitive phenomena, as well as an introduction to cognitive neuroscience techniques that are used to investigate the brain mechanisms of cognition. PREREQUISITE: PSYC 101 Dr. Jessica Cohen is an Assistant Professor in the Department of Psychology and Neuroscience. She earned her B.A. from Harvard University and her Ph.D. from UCLA. Dr. Cohen investigates how functional brain networks interact and reconfigure when confronted with changing cognitive demands, when experiencing transformations across development, and when facing disruptions in healthy functioning due to disease. She uses behavioral, neuroimaging, and clinical approaches taken from neuroscience, psychology, and mathematics to address her research questions.

This course provides an introduction to the study of maladaptive or abnormal behavior of adults. The emphasis will be on the description of various symptom patterns of maladjustment, theory and research on the causes of such behavior, and the prevention and treatment of maladaptive behavior patterns. The course provides you with an opportunity to observe videotapes of individuals who experience these disorders, and the chance to develop your own conceptualization of how a given individual developed a specific disorder, along with creating a treatment plan for this person. My hope is that you will not only learn specific information about the various disorders, but in addition you will learn to think about adaptive and maladaptive behaviors in a thoughtful, realistic manner from a psychological perspective. PREREQUISITE: PSYC 101 Areas of Research: Marital distress, cognitive-behavior therapy, gender differences.

The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

<p>PSYC 490: Neural Connections: Hands-on Neuroscience Prerequisites: PSYC 101, 250, and 220 or 315 This class will explore the links between the brain and behavior. Our focus will be on neuroscience outreach activities that we bring out into the community. Through the planning and sponsorship of hands-on neuroscience activities at the North Carolina Museum of Life and Science, and the Morehead Planetarium and Science Center, we will gain a deeper understanding of comparative neuroanatomy, human neuropathological diseases and brain injury, electrical properties of neurons, and sensory and motor system function. Students will put together and deliver their own activities and reflect on the meaning of community engagement. Over the course of the semester each student MUST complete a minimum of 30 hours of service.</p>

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1			6

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This seminar will examine how historians have reconstructed the life, teachings, and death of the historical Jesus. We will look at the Gospels of the New Testament, as well as references to Jesus in other writings (Roman and Jewish sources, as well as Gospels that did not make it into the New Testament). In addition, we will explore how Jesus has been portrayed in modern film, including such Biblical {epics} as The Greatest Story Ever Told, such {period pieces} as Jesus Christ Superstar, such brilliant retellings as Jesus of Montreal, and such controversial films as The Last Temptation of Christ, and The Passion of the Christ. The ultimate goals of the seminar are to see what we can say about the historical man Jesus himself and how Jesus came to be portrayed in both ancient sources and modern imagination. ABOUT THE INSTRUCTOR: Bart Ehrman is the James A. Gray Distinguished Professor of Religious Studies. He has taught at Carolina since 1988. He is author or editor of fourteen books, and is widely regarded as a leading expert on the New Testament and the history of the early Christian church. He is also a well-known teacher on campus, having won the Undergraduate Students

ABOUT THE SEMINAR: An introduction to the interpretation of the Hebrew Bible/Old Testament. We will look at the biblical text as modern interpreters and through the eyes of the Bible's earliest Jewish and Christian interpreters with special attention to changing assumptions about how to read the Bible and the nature of Scripture itself. ABOUT THE INSTRUCTOR: David Lambert is interested in the Hebrew Bible as a textual object whose interpretation stands to tell us as much about its readers and their communities as it does about ancient Israelite origins. In that vein, he looks to bring historical critical approaches to the Hebrew Bible into closer conversation with the history of biblical interpretation. This theme comes to the fore in his forthcoming book, How Repentance Became Biblical: Judaism, Christianity, and the Interpretation of Scripture. It considers the development of repentance as a concept around the turn of the Common Era and how it came to be naturalized as an essential component of religion through a series of reading practices that allowed nascent Jewish and Christian communities to locate repentance in Scripture. He works with a wide range of literature, and this project involves

ABOUT THE SEMINAR: This course investigates the figure of the human animal in religion and philosophy. What kind of animal is the human, and what separates humans from animals? We will consider how attending to distinctions between humans and animals can highlight varying ideological and religious viewpoints. ABOUT THE INSTRUCTOR: In her work, Andrea Dara Cooper emphasizes the medieval basis of modern Jewish thought, its interactions with contemporary theoretical interventions, and the intersection of religious studies and critical theory. Her current book project, based on her dissertation, focuses on representations of family and kinship in major figures of modern Jewish thought. By using family as a frame of analysis, she examines how tropes of maternity, paternity, filiation, and fraternity particularly inform the works of Franz Rosenzweig and Emmanuel Levinas. She considers how their philosophical approaches are shaped by the transcendence of erotic love and the effacement of gender difference. Her next research project examines the nexus of sacrifice, embodiment and animality in post-Shoah ethics. She addresses the horizon of animality in testimony and Jewish literature, illustrating

This multidisciplinary course offers a comprehensive survey of ancient Christian `Gnosticism, one of the earliest and most long-lived branches of early Christianity, notorious for its promise of personal salvation through a firsthand knowledge (gnosis) of the divine. Principal readings are drawn from the famous `Nag Hammadi Library, a manuscript hoard buried at the time of official suppression of `heretical sects around A.D. 350 and discovered in 1945 by two Egyptian locals. In this course, students are expected to develop expertise, in textual analysis and broad interpretation, of ancient Gnostic myth and to acquaint themselves with various denominations within Gnostic Christianity, their doctrines, and their ritual practices. We will situate the ancient Gnostics in a complex network of early Christian groups and their conflicting ideas about orthodoxy, authority, and canon, as well as identify religious, philosophical, and literary traditions that helped to inform the basic tenets of ancient Gnosis. The course concludes by focusing on modern uses and misuses of the term `gnosticism, a broad category including the poetry of William Blake, the fiction of Kafka and Melville, psychoanalysis, and the New Age Movement. No previous knowledge of the subject is required. Although there will be some informal lecturing to provide historical and religious background for the course subject, most of our time will be dedicated to an in-depth group discussion of the assigned weekly readings. A special emphasis will be The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain

written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

The purpose of this course is to explore the role of philosophy in modern Judaism. This course examines how contemporary thinkers have considered philosophy, ethics and theology from a Jewish perspective. Methodological points to be addressed include: the role of interpretation in Judaism, revelation and redemption, authority and tradition, pluralism and inclusion, suffering and evil, twentieth-century approaches to God, and Jewish philosophy in conversation with feminism. Students in the course will gain a general overview of major topics and thinkers in modern Jewish thought while becoming acquainted with philosophical modes of writing and argumentation. In class, we will read texts critically and closely, analyzing them to outline questions and problems for discussion. Students will gain a sense of the wide variety of discourses within the field of modern Jewish thought and the transnational dimensions of the discipline. Questions to be addressed include: Are faith and reason compatible? In what ways have contemporary thinkers understood theology, the study of God, from a Jewish perspective? Should a Jewish thinker be read within an exclusively Judaic framework? This course will consider these methodological questions as starting points for inquiry. ABOUT THE INSTRUCTOR: In my work, I emphasize the medieval basis of modern Jewish thought, its interactions with contemporary theoretical interventions, and the intersection of religious studies and critical theory. My current book project, based The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

ABOUT THE SEMINAR: This seminar explores the concept of harmony in selected Italian writers, from Dante to contemporary writers. In the 14th century, Dante dreamed of a universal empire that would assure peace on earth, thus allowing mankind to pursue knowledge and wisdom and to achieve the ultimate harmony in the next world: the natural reunion of creature and creator. Dante himself directs his readers to interpret the journey of the pilgrim in the Divine Comedy as Everyman's quest for transcendental harmony with God. This quest for harmony is characteristic of many Italian writers, from Petrarch to Leopardi, to many contemporary poets, novelists, and film directors. Students will be reading and discussing works by Dante, Petrarch, Leopardi, Pirandello, Vittorini and Moravia, and will view films by Antonioni and Bertolucci. They will also be divided into groups and invited to produce an original work (theatrical, cinematic, literary, artistic, etc.) that illustrates the concept of harmony. ABOUT THE INSTRUCTOR: Ennio Rao is Professor of Italian and Director of Graduate Studies in the Department of Romance Languages. He earned his Ph.D. at Columbia University, concentrating in the Classics and Italian

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: As Allied soldiers invaded Sicily in 1943, they landed in the same country that was one of the most sought-after destinations for Northern European and American travelers. This first-year-seminar will ask the question: what does it mean to go to war with Italy, a nation associated with art and beauty? And after victory, how do Allies and Italians represent that war ¿first fought as enemies, then ¿co-belligerents¿, then friends¿in visual, literary and cinematic terms? We will read military guidebooks, memoirs and short stories, watch films and examine wartime cartoons to explore how the fantasy of ¿destination Italy¿ is transformed by the devastation of war. Students will perform close readings of these texts, placing them in an array of cultural and disciplinary contexts. ABOUT THE INSTRUCTOR: A former Fulbright scholar who has studied in Rome and Bologna, Marisa Escobar's current research interests are the interactions between US and Italian culture, as represented in literature and film in the twentieth century. In addition to her book project centered around the Allied occupation of Italy in WWII, she also works on translation, censorship and gender studies.

Have you ever stayed up all night to finish a really good book? Do you love to talk about a well-written book and any important issue it raises for you? If you said yes to either question, this is the class for you. The course has a twofold purpose: (1) to help students gain greater confidence in reading, understanding, and discussing literary texts; and (2) to introduce the essential vocabulary, terms, and approaches used in analyzing Hispanic literature.

Using Carmelo Virgillo, et. al., *Aproximaciones al estudio de la literatura hispánica*, students will read and discuss selected short stories, plays, poems, and a novel from major Spanish and Spanish-American authors. The course also focuses on the cultural, social and historical context of these works. Designed to advance the student's mastery of the Spanish language, provide him/her with the tools necessary for further literary studies, and to provide him/her with different views of the world through the filter of literature. This honors section will put quite a bit of emphasis on active, oral participation. The course also requires the writing of 2-3 short papers to prepare students for longer assignments in more advanced courses. Two final questions: Are you a dedicated blogger? Have you wanted to blog but haven't found the time? The class blog will give you the opportunity to talk about your knowledge of music, art, movies and their relationship to the class readings. **PREREQUISITE:** OUTSTANDING PERFORMANCE IN SPAN 204 OR EQUIVALENT. STUDENTS WHO The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. Non-honors students should deliver a recommendation form from their current language instructor to the Honors Carolina office.

Happiness remains a fundamental goal in most societies, despite being elusive for many people. In recent years, social scientists have become increasingly interested in the subject of happiness and its causes and consequences. Sociologists, economists, political scientists, geographers and psychologists have joined with philosophers in studying the nature of happiness and subjective well-being and its relationship to social life. This course will examine the interplay between individual and social happiness by considering the nature and meaning of happiness in the contemporary United States as well as in other countries. We will seek to answer questions such as: What is happiness? Can we measure happiness, and if so, how? What is the relationship between biology and happiness? Between psychology and happiness? Does money buy happiness? Does happiness vary among diverse groups (racial, ethnic, religious, gender, age, and social class groups)? How does happiness differ among cultures and nations? What is (and should be) the role of happiness in formulating public policies? We will address these and other questions by: reading books and articles; class discussions and debates; viewing films; interviewing people; and collecting information using the Internet and other sources. FIRST-YEAR STUDENTS ONLY. Dr. Kalleberg is a Kenan Distinguished Professor of Sociology at the University of North Carolina at Chapel Hill, and has Adjunct Professorships in the Kenan-Flagler Business School, the Department of Public Policy, and The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: This First Year Seminar examines issues of poverty, social and economic inequality and health in America. Course content will focus particularly on health disparities according to patterns of poverty and inequality and according to socioeconomic disadvantage associated with single-mother families, teenage and nonmarital childbearing, child poverty, immigration, and race and ethnicity. This seminar is coupled with an Experiential Education (EE) requirement that will give students firsthand experiences with how poverty and inequality is experienced in the lives of American men, women, children, and families. Students will carry out a research project on how the poverty and inequality they observe in their community service work is related to health outcomes or health disparities. The research project thus combines the experiential education on poverty and inequality students gain in the community with the academic scholarship on health disparities from course materials and other health-related research materials

specific to their research project topic. ABOUT THE INSTRUCTOR: Kathleen Mullan Harris is the James Haar Distinguished Professor of Sociology and Adjunct

ABOUT THE SEMINAR: It is impossible to understand the structure of American society, or the lived experiences of its people, without understanding both the meaning and consequences of race and ethnicity. Yet, while examples of what race does are well known to students interested in questions of social justice and inequality, the question of what race is receives considerably less attention. Any student familiar with U.S. society can identify myriad, often striking examples of racial inequality, from highly disproportionate rates of poverty, unemployment, and disease to racially disparate treatment at the hands of police, teachers, and neighbors. But what, exactly, is race? The geographic origins of our ancestors? The social categories that others perceive from our appearance? The identities we claim based on a sense of belonging or attachment to a particular culture or community? Or can race be any and all of these things, depending on the context in which individuals perceive and react to one another? These are just some of pressing questions with which students will grapple in this seminar, as we delve into the meaning and measurement of race in society, how it changes over time and space, and

Introduction to sociology as a discipline that includes study of differences and equality, social structure and institutions, culture, social change, individuals and populations, and social psychology. Dr. Shanahan's interests include life course theory and methods, genetics and the life course (with a emphasis on status, stress, social capital, and health), and the transition to adulthood. His recent research focuses on gene-environment processes associated with education and health, especially as these processes implicate social capital.								
The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11.

WORKSHOP DESCRIPTION The UNC Race Workshop provides a forum for graduate students, post doctoral fellows and faculty to engage with one another at the cutting edge of social science research on race and ethnicity. Although the workshop is housed in the Department of Sociology at UNC, it is interdisciplinary in nature and is open to colleagues not affiliated with UNC. The workshop has two principle goals: improve the quality of social science research on race and ethnicity that is currently underway and to remain informed on the most recent, state-of-the-art social science research on race and ethnicity. In order to accomplish these goals, the workshop meets twice a month to provide feedback on a manuscript that is currently in progress and to discuss one recent article published in a leading social science journal (e.g., American Sociological Review, American Economic Review, American Political Science Review, Psychological Science, Journal of Human Evolution, et cetera). Each meeting will have two principle discussants; one charged with providing rigorous in-depth feedback on a developing manuscript, the other with reviewing a recent journal article. After the discussants provide their questions and insights, the meeting will open for conversation and debate. Postdoctoral fellows and faculty may attend meetings at will, graduate students are encouraged to attend regularly. UNC graduate students that plan to attend one or more meetings are required to register. In addition to enrolling in this course,

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1		19	

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The aim of this seminar is to show that contrary to the common belief, statistics can be exciting and fun. We will focus on the big picture ideas. Instead of memorizing confusing formulas, many of the technical ideas will be demonstrated by computer experiments. We will view some recent movies and discuss the role statistics plays in sports, gambling, medicine, politics, finance, etc. Then we will study randomness and discover why casino always wins. Finally we will discuss the basic principle of statistical reasoning (if it is unlikely do not believe it), get to understand why a relatively small sample can carry a big punch and learn how to lift ourselves by our bootstraps. This seminar is not a replacement for an introductory statistics course. ABOUT THE INSTRUCTOR: Jan Hannig is a Professor in the Department of Statistics and Operations Research. His current research interests are in foundations of statistics. He and his co-authors can be partially credited with resurrection of fiducial statistics. Fiducial statistics was created in the 1930s and since inception was wrought with controversy. By mid 1960s the topic was largely dormant and stayed ignored until mid-2000s. Since it is

		16-NOV-2015	RC CLAS UGRD FIRST YR STDTS		1		16	

PREREQUISITES: \*First-year students only. REGISTRATION PROCEDURES: \*First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. \*First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: The ups and downs of many stocks, bonds, and mutual funds in the past few years have made a significant impact on our society. Accordingly, a good understanding of financial markets becomes a necessary part of our education. This seminar is intended to provide students with a multimedia platform on which they can learn some basic concepts in finance and economics, useful tools for collecting and summarizing financial data, and simple probability models for quantification of the market uncertainty. Students will actively participate in the seminar's organization. A number of small projects will be assigned to students, supervised by the instructor. The projects include data analysis using Excel, experimentation of simple investment strategies and portfolios through virtual trading, discussions on the performance of those portfolios and related probability calculation. Students will present what they conduct in the assigned projects. Grades will be based on students' performance in their homework, projects, and presentations. ABOUT THE INSTRUCTOR: Chuanshu Ji joined the Department of Statistics and Operations Research after getting his Ph.D. in 1988 from Columbia University. Ji's research

						Special Grading:GR3		
Combined Section ID: 0482(stor894/math892/001) - MATH 892(#13375)								
Course meets at SAMSI. This statistics course will cover the fundamentals of statistical, mathematical, computational, and algorithmic aspects of pattern-matching and digital evidence, and inferences derived from such evidence. Also human factors aspects of forensic science will be discussed.								
STOR	894	002	13067	SPECIAL TOPICS AT SAMSI	Lecture (Face to Face Instruction)	3		A

This course will examine the unprecedented surge of feminist thought and activism in the postwar United States. Course materials and discussions will trace feminists' varied conceptions of empowered womanhood and their expectations of the state, society at large, and each other. CROSSLISTED WITH HIST 475H. Katherine Turk is Assistant Professor of History. She teaches courses on women, gender and sexuality; law, labor and social movements; and the twentieth century United States. Her first book, Equality on Trial: Gender and Rights in the Modern American Workplace, will be published in 2016. The Spring 2016 wait list period has ended. To enroll in an honors course, you will need to contact the course instructor after Friday, January 8 to obtain written permission and deliver the permission note to Ms. Amber Duntley in the Honors Carolina office (225 Graham Memorial) beginning Monday, January 11. -----

		16-NOV-2014	RC CLAS UG FFYS	STDTS	0			0

Prerequisites: \*First-year students only. Registration Procedures: \*Students who are not enrolled in a fall 2014 FYS register online when their registration appointment begins. \*Other students register online beginning Nov 17. ABOUT THE SEMINAR: Who is your most influential social acquaintance? Which airports are most crucial to air travel? Which genes are most likely to be successful drug targets? And finally, what do these questions have in common? They all aim at finding important {nodes} in a network of interactions. Networks are remarkably frequent in nature, making their study an interdisciplinary pursuit. Interestingly, generic network properties, even those as simple as the number of connections a node has, can yield surprisingly powerful insights into the system of interest. We will survey research fields relying on network theory and explore introductory mathematics. Besides participating in discussions based on popular networks literature, students will be required to develop a research proposal on a networks topic of their choice. ABOUT THE INSTRUCTOR: Dane Taylor is currently a postdoctoral researcher with joint positions at the Statistical and Applied Mathematical Sciences Institute (SAMSI) and the Department of Mathematics at the University of North Carolina. Prior to coming to North Carolina, he obtained MS and PhD degrees in Applied Mathematics from the University of Colorado through funding from the ARCS Foundation and Lockheed Martin. His undergraduate education led to BS

PREREQUISITES: *First-year students only. REGISTRATION PROCEDURES: *First-year students who are not enrolled in a fall 2015 FYS will register online when their registration appointment begins. *First-year students who enrolled in a Fall 2015 FYS will be able to enroll in a spring 2016 FYS beginning Monday, November 16. ABOUT THE SEMINAR: A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban networks, smart city urban planning, energy as a catalyst of sustainable development, smart city infrastructure, sustainable transportation, flow of information and communications, smart grids, digital infrastructure and the role of data and information technology. We will discuss criteria for measuring the smartness of a city, including quality of life, citizen governance, and discuss issues that go towards the making of a future smart city. Several case studies will be presented with guest lecturers invited to present on critical thinking and practices in smart city development. ABOUT THE INSTRUCTOR: Arcot Rajasekar is a Professor in the School of Library and Information Sciences, a Chief Scientist at the Renaissance Computing Institute (RENCI) and co-Director of Data Intensive Cyber Environments (DICE) Center at the University of North Carolina at Chapel Hill. A lead

This is a BME elective course. Students should enroll for 3 credit hours. Introduction to biomedical applications of electromagnetics from low to high frequency. Students will understand the interaction between electromagnetic fields and biological tissues, be familiar with numerical skills for Bio-EM device design, and be familiar with hardware design issues.

ENVR/PHNU 423, Industrial Medicine and Toxicology (3 credits) is considered a graduate level course and is required for most students in the Occupational Safety and Health Education and Research Center (occupational medicine, occupational health nursing, occupational exposure science, safety and ergonomics, and occupational epidemiology). Other students interested in this course should have some background knowledge in one of these disciplines. This knowledge is essential during discussion of the case studies. Permission of the instructor is required for non-OSHERC students. To verify your preparation for this class or other questions please contact Susan Randolph at susan.randolph@unc.edu.

Enrollment is limited to graduate students and upper level undergraduates who have core knowledge in chemistry, biology, epidemiology and statistics. The core knowledge would be satisfied by undergraduate or entry level graduate courses in chemistry though organic chemistry, biochemistry, microbiology or cell biology and epidemiology. Core knowledge in risk assessment is also recommended. Undergrads should request faculty approval for admission to class. Contact Dr. Bartram. His email: jbartram@email.unc.edu

Enrollment is limited to graduate students and upper level undergraduates who have core knowledge in chemistry, biology, epidemiology and statistics. The core knowledge would be satisfied by undergraduate or entry level graduate courses in chemistry though organic chemistry, biochemistry, microbiology or cell biology and epidemiology. Core knowledge in risk assessment is also recommended. Undergrads should request faculty approval for admission to class.

This special topics seminar examines the impact and potential of mobile health interventions and apps for health behavior change. The overall course objective is to understand state of the science and future potential to leverage mobile phones and wearable technologies in innovative and powerful behavior change interventions to improve health. The course considers adaptation of eHealth interventions for mobile delivery, unique opportunities with mHealth, data collection via mobile devices and sensors, and using the data collected to deliver precise, health messages and behavior change techniques. We will consider the growing evidence for mHealth in public health across a range of behaviors and health problems. The course is a mixture of lecture and discussion, with guest lecturers bringing real world expertise and experience in mHealth interventions.

Analytic skills seminar on the theory and practice of program impact evaluation. Topics: key issues to consider when evaluating program impact; selectivity and other problems; research designs; estimation strategies including instrumental variables, difference-in-differences, fixed and random effects models, regression discontinuity methods, matching methods, and selection models. Prerequisites: Knowledge of Stata or a similar statistical package is required. It is assumed that students are familiar with descriptive and inferential statistics as well as multiple regression analysis. Instructor permission required for non-second year MCH doctoral students.
