ENEC 490H.01S | The Rise of Clean Technology in China and South Korea and Clean Technology as a Lens to Study Innovation Ecosystems
 TBA, TBA. Instructor(s): Greg Gangi. Enrollment = 24.
 Program Title: THE RISE OF CLEAN TECHNOLOGY IN CHINA AND SOUTH KOREA
 Dates: May 17 - June 10, 2019

his class will explore clean technology innovation but will mostly focus on energy from two perspectives. The first will be a focus on the global energy transition and the role that China and South Korea are playing in this transition. The current global energy transition is one of the most significant events taking place in our world. The second perspective will be to use clean technology and renewable energy as a lens to gain insights into the nature of innovation in these two countries and to gain a broader appreciation of the strengths and weaknesses of their economic models

The basics of data acquisition and hardware interfacing using LabVIEW graphical programming. This software is an excellent tool that enable your computer to communicate with the instruments in your lab. LabView can also further process and display the data from these instruments. This course is taught in an abbreviated 9-day session (May 28 through June 7) 9AM to Noon daily. Students will be required to have a copy of LabView software on their laptops before the beginning of the course. This software is available for free through a UNC software license. More information about this will be provided to students before the course begins.

ELIGIBILITY

First-year students in fall 2018 and spring 2019 are eligible to enroll in this class. Students entering UNC-CH in fall 2019 are also eligible to enroll in this class.

ABOUT THE COURSE

Over the last few decades a large number of bamboo manuscripts of hitherto unknown texts dating to the fourth to the first century BCE have been excavated from various sites in China. This wealth of new materials has led many scholars to rethink longstanding assumptions about early Chinese thought. In order to enable students to engage directly with the recently discovered texts and cutting-edge research on them, this course will briefly introduce students to the received classics of the pre-Qin period, such as the Analects, the Mozi, the Mencius, and the Daodejing. Rather than merely providing an introduction to

This course explores the history, social critique, and the political background of three of Austen's novels. It covers some adaptation theory and at least two major Austen adaptations. Students will choose a Pride and Prejudice adaptation early in the course, write a conference proposal about it, and make a conference poster to present at the four-day Jane Austen Summer Program (JASP) that they will attend as part of the course. JASP includes talks by authors of major adaptations, context corners with short but detailed overviews of subjects that have ranged in the past from the history of pugs in England to an analysis of the Gothic, and small discussion groups to consider these weighty topics. Including dance lessons, a regency ball, and an amateur theatrical, JASP is an event that brings together everyday people, teachers, doctors, lawyers, and professors. Information about registering for the conference can be found at JaneAustenSummer.org

Eligibility and Pre-requisites

Course is open to PhD and Masters-level students intending to prepare a research- focused dissertation or technical report on an aspect of water and sanitation. Undergraduate students are admissible at discretion of instructors (for first course in junior or senior year as appropriate).

The course is intensive and demanding upon both students and faculty, so enrollment is capped. Priority will be given to (a) students advised by collaborating faculty; (b) students with collaborating faculty on their committee; (c) other UNC-CH students engaged in water-related research

Contact Prof. Pete Kolsky for permission: pkolsky@unc.edu

Be sure to select 3.0 hours on the credit tab when enrolling.

HNRS 353.01M | Silicon Revolution

MTWRF, 9:00am-12:15pm. Instructor(s): James Leloudis. Enrollment = 16.

Silicon Valley is celebrated as a global capital of high-tech innovation and transformative economic development. Business leaders and politicians in other regions have attempted to reproduce that accomplishment, almost always with limited success. Why has the task been so difficult? What magic combination of institutions, public policy, people, and geography transformed the lettuce fields of Santa Clara County into the epicenter of a new knowledge economy? And what lessons can Silicon Valley teach us about the roles that government, universities, and private capital might play in inventing the future? These are the questions this course sets out to explore. We'll use the first week of class to immerse ourselves in the history of Silicon Valley. Then we'll spend a week in San Francisco and Palo Alto, where we'll visit with UNC alumni working in small start-ups, technology giants such as Google and Apple, and a number of venture capital and private equity firms. When we return to Chapel Hill, we'll use our last week to take the measure of what we've learned and to connect lessons from Silicon Valley to the challenges of economic development in North Carolina. Students enrolled in this course will pay a program fee of

PLCY 330. Negotiation and Mediation: The Practice of Conflict Management. 3 Credits.

Cross-listed with PWAD - if PLCY seats are full, check PWAD 330 for open seats.

Students will learn about meeting their interests when in conflict with another individual, organization, or government, redefining the meanings of "winning" and "power," and coping with stress, discomfort, and emotions when in conflict. Students will learn new negotiation and mediation skills, build upon existing ones, and challenge assumptions regarding conflict.
