The basics of data acquisition and hardware interfacing using LabVIEW graphical programming. This software is an excellent tool that enable your computer to communicate with the instruments in your lab. LabView can also further process and display the data from these instruments. This course is taught in an abbreviated 9-day session, 9AM to Noon daily. Students will be required to have a copy of LabView software on their laptops before the beginning of the course. This software is available for free through a UNC software license. More information about this will be provided to students before the course begins.

This course is graded on a pass/fail basis.

This year’s DRAM 260 maymester course will be conducted virtually and focus on technical theatre drawings. Students will use Vectorworks CAD software to generate theatrical drawings resulting in the creation of a 3D model for a chosen play. Students will learn skills that can not only be used for theatre but other drawing and layout projects including interior and landscape design. No drawing or theatre experience is necessary to explore this often overlooked piece of the theatrical production process.
