The basics of data acquisition and hardware interfacing using LabVIEW graphical programming. This software is an excellent tool that enable your computer to communicate with the instruments in your lab. LabView can also further process and display the data from these instruments. This course is taught in an abbreviated 8-day session, 1:00- 3:00 PM daily. Students will be required to have a copy of LabView software on their laptops before the beginning of the course. This software is available for free through a UNC software license. More information about this will be provided to students before the course begins.

This course is graded on a pass/fail basis.

Course examines theoretical perspectives and practical applications to democratic communication. Students reflect upon, participate in, and ultimately learn how to facilitate constructive deliberative models such as dialogue and debate. Central themes include democratic citizenship and productive disagreement. Students strive to become careful listeners, thoughtful arguers, and responsible democratic citizens.
