ECON 327H.005 | Sports Entrepreneurship
TR, 9:30 am - 10:45 am. Instructor(s): Chris Mumford. Enrollment = 24.

The newly-emerging field presents many opportunities. General sports are dominated by oligarchs -NFL, NBA, MLB, NCAA, NHL, MLS - where the cost of entry is hundreds of millions of dollars. In this course, we will explore Sports Verticals with high growth and lower barriers to entry. These include eSports, analytics, fantasy/betting, youth sports, fitness and health technology and enhanced fan experience. We also speak to league executives and team owners about emerging opportunities and current best practices. Students will be organized into teams and deep dive into opportunity recognition reports and design sprints which are delivered in presentation and website form.

**Prerequisite:** ECON 325

The course is designed to advance analytical skills in the field of applied labor economics. The course covers empirical models of labor supply, human capital, earnings, income inequality, informality, and the current COVID-19 crisis. Students will learn how researchers evaluate policies affecting labor markets, including tax and welfare reforms, education programs, minimum wage and labor regulation, and COVID-19-related policies. The course mostly focuses on the U.S. labor market. Students will improve programming skills in Stata and use real-world survey data in writing a research project.

Only first-year students (and transfer students who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC) can enroll in this class. If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

**ENROLLMENT PROCEDURES**
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

EMES 072H.001 | Field Geology of Eastern California
TR, 2:00 pm - 3:15 pm. Instructor(s): Drew Coleman. Enrollment = 20.

Have you ever wanted to stand on a volcano, see a glacier, trace out an earthquake fault, or see the Earth's oldest living things? This seminar is designed around a one-week field trip to eastern California, where students will study geologic features including active volcanoes, earthquake-producing faults, and evidence for recent glaciation and extreme climate change. Before the field trip (which will take place the week of Fall Break and be based at a research station near Bishop, California), the class will meet twice a week to learn basic geologic principles and to work on developing field research topics. During the field trip students will work on field exercises (e.g., mapping, measuring, and describing an active fault; observing and recording glacial features) and collect data for the research projects. After the field trip, students will obtain laboratory data from samples collected during the trip and test research hypotheses using field and laboratory data. Grading will be based on presentation of group research projects, and on a variety of small projects during the trip (notebook descriptions, mapping projects, etc.). Students may be required to pay some of the costs of the trip (a maximum of about

**TITLE:** The Environment in American History

**IDEAS IN ACTION GEN EDS:** FY-SEMINAR; FC-PAST or FC-VALUES

**COURSE DESCRIPTION**

In this course, students will analyze the ways in which Americans have both shaped and been shaped by their natural environment. Together, we will trace a selected history of interactions between humans and nature in America, focusing on the often-fraught intersection between political, economic, social, and religious understandings of nature. As we do so, we will examine the various answers that Americans have given to a set of slippery core questions: What responsibilities do humans have to the broader natural world? Are humans a part of nature, or outside of it? What, ultimately, is the nature of nature?

HIST 174H.001 | Honors Seminar in African, Asian, and Middle Eastern History  
TR, 3:30 pm - 6:00 pm. Instructor(s): Cemil Aydin. Enrollment = 24.  
This course will focus on imperial experience and decolonization of Asia and Africa from the 1870 to the 1970s. Course readings will explore the content of the anti-colonial critique of the international order and visions for a post-imperial new world in Asian and African intellectual history. Students will examine Pan-Africanism, Pan-Asianism and Pan-Islamism, as important trends in the process of decolonization. While focusing on intellectual and political decolonization, this course will revisit the debate on the politics of racial thinking from the perspective of international history. How did ideas and ideologies about difference and hierarchies among races, religious groups and continents shape the evolution of the modern world order? Topics will include the history of international law, multiple internationalisms, alternative humanisms in Asia and Africa, as well as debates on cosmopolitanism and nationalism.

HIST 179H.001 | Slavery and the U.S. Civil War  
TR, 2:00 pm - 3:15 pm. Instructor(s): Antwain Hunter. Enrollment = 24.  
The United States' historic relationship with slavery, particularly during the Civil War Era, is often misunderstood in the present day. This loosely chronological course explores the country's ties to the institution during this important period in the American past. Course content features the institution's expansion into the United States' western territories, the political debates around slavery in the decades preceding the Civil War, the rise of the abolition movement and the proslavery response, slavery's role in the secession crisis, the wartime experiences of enslaved people on the Southern home front, the Lincoln administration's policies towards enslavers in the Confederacy and the slaveholding Union states, wartime emancipation and formerly
enslaved peoples’ military service, the struggle to pass the XIII Amendment, and freedpeople’s fight to fully realize their freedom during Reconstruction. Students in this course will read a number of important secondary texts on the subject but will also engage with a wide array of sources produced during the Civil War Era, which will allow them to draw their own conclusions about this complex period. These primary sources will include slave narratives, period

History 398-001: Seeing the Past

The value that we attach to seeing something for ourselves, and then being able to describe what we have seen to others, is central to our culture. Seeing is the privileged form of sensory perception and consequently a common metaphor for understanding itself: ¿I see what you mean,¿ we say, or ¿My view on this has changed.¿ In the criminal legal process, great weight is attached to eyewitness testimony, whereas convictions based only on hearsay are rightly considered unsound. Eyewitness is also a key criterion for how historians evaluate their primary sources and arrange them in hierarchies of importance: in the history books and articles that you have read, you will doubtless have come across numerous comments to the effect that such-and-such a source is reliable because its author was present at the events recorded in it, while another source is of lesser significance because it is second hand. This course seeks to unpick the idea of eyewitnessing in order, ultimately, to think about how historians go about their research, and how they evaluate their sources.

What is an eyewitness? What is an eyewitness source? And what exactly is an eyewitness source a source for? The examination of key theoretical issues will

History 398-002: Cultural Encounters in Early America

This seminar will consider the early interactions among Native Americans, Europeans, and Africans on the North American continent. Why did these peoples come together? How did they make sense of one another? How did they change one another¿s lives, religions, political and economic systems, social structures, and assumptions about themselves, others, and their places in the world? In this course, you will write a major research paper on one aspect of cultural interactions in colonial North America.

History 398-003: Leisure Time and the Making of Modern America, 1880-1945

Today Americans are deeply invested in leisure. It assumes an almost sacred significance in our personal lives and is widely acknowledged as an indicator of the economic health of the nation itself. Yet leisure has not always enjoyed such widespread consensus. In this course we will turn our attention to a moment when rancor about leisure permeated American communities, homes and especially the pages of newspapers and magazines.

This is a research seminar that uses leisure to explore American life between 1880 and 1945. It was precisely in this moment that working Americans began to enjoy increasing amounts of spare time. Leisure itself changed, too, in this period. Commercial forces overhauled the kinds of leisure activities that were available. By the early twentieth century new kinds of amusements such as movie theaters and dance halls enjoyed increasing appeal in towns and cities throughout the country. These spaces nurtured a set of outlooks, identities and modes of social interaction we have come to associate with modern life.
**HIST 398-004: Global Cities and Boom Towns**

"Global Cities and Boom Towns" is the capstone course for History majors, but it is open to other students, space permitting. The first part of the course entails a number of readings in modern urban history as well as methodological approaches to assessing primary sources. The remaining portion of the course is dedicated to guiding students toward the completion of a 20-25 page paper, of their own design, based on primary sources. At the end of the class, students will have the option of publishing their work on the class's website.

Past projects have focused on an American-American jazz club owner in Paris after World War I; the rise of an anti-Chinese political party in San Francisco in the mid-19th century; the cultural wonderings of a US diplomat in early 20th century Seoul; the racial politics of "slum" clearance that preceded the construction of New York's Central Park; and the local racial and class dynamics in Tuskegee, Alabama that informed white supremacist gerrymandering efforts.

**HIST 398-005: South Africa's Freedom Struggle**

The end of apartheid in South Africa stands out as one of the most stunning events of the twentieth century. This class investigates how it happened. Potential research topics might include (but are not limited to) the experiences of South African liberation leaders in exile, the role of institutions such as the United Nations, the significance of international sports boycotts against South Africa, and the activism of US university students pushing for divestment from apartheid South Africa. A remarkable set of digital archives will make this research possible.

HIST 398-007: Travel Writing

Imagine you are a British gentleman of the 19th century. You have just settled into your comfy club chair at home with a pipe in hand, ready to digest the latest edition of travel reports from Borneo. Or perhaps you are a schoolchild in America in the 1950s. The latest National Geographic has just arrived in your mailbox, and you eagerly pore over its glossy pages. In either instance, you are probably reading travel writing in order to learn more about foreign lands and peoples, whether to be entertained, edified, informed, titillated or transported.

In this historical research seminar, we will be turning the tables on these scenarios. Instead of reading travel writing at its most obvious level to learn more about foreign lands and peoples, we will be analyzing these works to discover more about the concerns and preoccupations of their 19th and 20th century American and European authors and readers, by asking a series of questions: How, why and in what modes have Westerners written about foreign lands and

HIST 438H.001 | Medieval Masculinities, 500-1200
TR, 9:30 am - 10:45 am. Instructor(s): Marcus Bull. Enrollment = 24.

This course examines and assesses the multifaceted constructions of masculinity to be found in numerous sources for the history of western European society between the beginning of the Middle Ages and c.1200. Although ‘masculinity’ is a post-medieval coinage, it is an extremely useful tool for understanding fundamental aspects of medieval culture such as gender relations, male self-fashioning, homosocial bonding, family structures, and violence. The main emphasis will be on the aristocracy of medieval Europe because they dominate the surviving sources; but we will also be able to study other social groups such as monks, clerics, and the inhabitants of towns. The course will comprise a series of in-depth case-studies, mostly drawn from written sources of diverse types including chronicles, epic song, and romance. We will also consider aspects of the visual record, such as manuscript illumination and the Bayeux Tapestry. Students will be strongly encouraged to range across disciplinary boundaries and to be ambitious in the conceptual and methodological toolkit that they develop. Masculinity is an emerging important field in medieval studies; this course is therefore an opportunity to participate in and

This course is designed to supplement knowledge obtained through the traditional pre-medical curriculum in order to enhance students' development as health care providers. It has five objectives:

1. To introduce students to non-biological factors that affect the health of individuals and society. Understanding the social situation of your patient, including environmental, financial and familial factors, is important for the effective practice of medicine. Just to give one example of the importance of understanding these factors: studies have shown that patients do not take up to one third of medications that are prescribed and implement only a small portion of lifestyle changes (e.g. dietary changes or smoking cessation). Unfortunately, physicians tend to focus on what happens in their offices and on treating only the biological factors contributing to disease. A better understanding of a patient's social situation is necessary if the therapies that are discussed in the physician's office are to be implemented once the patient goes home.

2. To provide students with an overview of changes in the delivery of medical care. The traditional fee-based model in which physicians in private practice (generally either self-employed or part of a small group) get paid for performing specific services is being supplanted by systems in which

**HNRS 390.001 | Current Challenges in Criminal Justice**

M, 2:00 pm - 4:30 pm. Instructor(s): John Rubin. Enrollment = 20.

We will consider current challenges facing, and sometimes created, by the criminal justice system. We will look at criminal justice policies and practices in North Carolina and the U.S. generally and explore their effectiveness and impact, including their impact on people accused of a crime. Each class or sequence of classes will examine a different set of issues. Do poor people have equal access to justice? Is policing nondiscriminatory? How should we treat people who have mental health problems and commit crimes? How well can people resume their lives after their involvement with the criminal justice system? We will explore these topics through a combination of readings, class discussions, guest lectures, and extra credit opportunities. The course will culminate in student-led presentations on topics of the students' choosing.

**HNRS 390.002 | Slavery and the University**

T, 2:00 pm - 4:30 pm. Instructor(s): James Leloudis. Enrollment = 18.

Across the country, colleges and universities are wrestling with the legacies of slavery on their campuses. This is painful history that we must acknowledge and come to terms with, particularly if we are to fulfill the promise of a public university. I serve as a co-chair of the task force appointed by Chancellor Folt to research, document, and teach a full and inclusive account of Carolina's past. This course is designed to contribute to that work.
This course will be somewhat unconventional, in that we will spend most of our class sessions in the University Archives, the North Carolina Collection, and the Southern Historical Collection (all located in Wilson Library) working on research. University historian Cecelia Moore, History doctoral student Brian Fennessy, and I will be on hand to coach and assist you in developing fruitful lines of inquiry, identifying sources, discerning patterns of evidentiary significance, and framing historical insights.

HNRS 390.003 | Narrative and Medicine
M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 20.
This seminar explores the role of narrative in medicine from two sides: the patient’s experience of illness, and the experience of caring for the sick. As a writing workshop, this course offers students a supportive environment in which to explore their own experiences and refine their writing skills. Pandemic conditions permitting, it provides an opportunity for service work in a variety of clinical settings, in which students will have a chance to participate in medical care. Taught by a clinician-writer with years of experience in medical care, professional publication, and workshop instruction, this course offers a rare opportunity to learn from a highly skilled professional engaged in the central concerns of his work.

Calculus of Functions of One Variable I

---

**MATH 231H.01F | Calculus of Functions of One Variable I**
Math 231 is designed to provide a detailed introduction to the fundamental ideas of calculus. It does not assume any prior calculus knowledge, but the student is expected to be proficient working with functions and their graphs as well as manipulating variable expressions and solving equations using algebra.

This is the Honors section of Math 231. It offers a more demanding and deeper treatment than the regular sections as well as more involved applications. There will be more emphasis on understanding theory than in other sections, and students will be expected to understand and reproduce proofs of theorems and formulas. In addition, this section will cover extra topics, including the epsilon-delta definition of limit. Applications will be more involved and will sometimes involve real data. Homework will be more challenging, with more emphasis on creative problem solving and less emphasis on drill. Students will be expected to complete a final project.

To register for this course, you should let Professor Sawon know your name and PID at the first class session. Note that registering for MATH294 is entirely optional: you don’t have to register for MATH294 to participate in these sessions and/or the competitions. In particular, if you don’t anticipate attending every week, it would be better not to register. Please let me know by email (sawon@email.unc.edu) if you want to participate and are unable to attend the first session.

Math 294 will be held in Phillips 330, the Math Lounge, Fall 2023.

MATH 381H.001 | Discrete Math
MW, 1:25 pm - 2:15 pm. Instructor(s): Mark McCombs. Enrollment = 35.
Logic and proofs, Sets and Functions, Number theory, Induction, Counting, Discrete probability, and Relations (Chapters 1, 2, 4, 5, 6, 7 and 9 from Rosen's Discrete Mathematics text).
This is the honors section of math 381. The usual course topics will be treated in a deeper and more demanding manner than in the regular sections. In particular, we will go through strategies for proofs very carefully (Sections 1.7 and 1.8, plus other material from the instructor).
PREREQUISITE: MATH 232 OR 283.

Mark McCombs is a Teaching Professor of Mathematics. He earned his B.S., M.S., and M.A.T. degrees from the University of North Carolina at Chapel Hill. He

MATH 383H.001 First Course Differential Equations

MW, 1:25 pm - 2:15 pm. Instructor(s): Mark Williams. Enrollment = 35.

The main topic of this course is ordinary differential equations (ODEs), and we will study a number of techniques for solving these. However, we will for the most part avoid an ad hoc approach, where students are taught one solution technique after another. Rather, our emphasis will be on developing systematic methods for understanding ODEs. We will also study some (mostly physical) applications.

The honors section will place greater emphasis than other sections on understanding the underlying theory of ODEs. For example, we will give a careful proof of the fundamental existence and uniqueness theorem for ODEs. In order to do this we will have to develop some tools from analysis. This will consist mainly in deepening the students’ understanding of concepts like convergence of sequences that are already familiar from calculus courses.

Linear algebra is an essential tool for the systematic study of ODEs, especially linear ODEs. The honors section will devote more time than
most sections to a study of the basic concepts of linear algebra: vector spaces, linear transformations, linear independence, basis, dimension, eigenvalues,

Instructor: Hurd, Daniel Ernest
This is a required course for first-year MTSC graduate students. Students gain knowledge and learn key skillsets outside of their technical course work needed for success in their PhD program and beyond. MTSC711 follows on the topics learned in MTSC710 to broaden the professional development of materials science PhD students. Students work to develop an Individual Development Plan, to understand the variety of career paths available for PhD-holders, and to practice research presentations.

Grading status: H/P/L/F.

MTSC710 seminar series meets in the APS conference room, Murray Hall #1127

This is a required course for all Materials Science students in fall and spring semesters of years 2-5 of their doctoral program. The course tracks attendance at the required APS departmental seminars. Attending departmental seminars is an important component of training for MTSC doctoral students. Engaging in the seminars will help students gain a working knowledge of a variety of research areas important to their doctoral research.

Grading status: Pass/Fail.

This course covers the physical fundamentals of material science with an in-depth discussion of structure formation in soft and hard materials and how structure determines material mechanical, electrical, thermal, and optical properties. Topics include amorphous and crystal structures, defects, dislocation theory, thermodynamics and phase diagrams, diffusion, interfaces and microstructures, solidification, and theory of phase transformation.

**WHO CAN ENROLL IN THIS CLASS?**

Only first-year students (and transfer students who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC) can enroll in this class. If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudenttext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

**ENROLLMENT PROCEDURES**

Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

In this course we consider the relationship between two concepts, music and politics, broadly, in search of ways in which they elucidate each other as well as resist pairing. The class provides an overview of the major theoretical issues the pairing raises as well as diverse case studies that underscore the range of historical and geographical contexts in which professional musicians, activists, politicians, and civilians have engaged these concerns.

PHIL 101H.001 | Introduction to Main Problems in Philosophy
This course will be an introduction to philosophy in the analytic tradition, by focusing on a few representative issues:
1. How can we tell whether animals and future computers have "minds" — that is, their own thoughts, experiences, ambitions, self-awareness, and so on — or whether they're instead just mindless automata?

2. Relations between minds, brains, and machines: Are your mind and body made of different stuffs? If a machine duplicates the neural structure of your brain, would it have the same thoughts and other mental states that you have?

PHIL 220H.001 | 17th and 18th Century Western Philosophy

TR, 11:00 am - 12:15 pm. Instructor(s): Markus Kohl. Enrollment = 24.

This course is an introduction to major themes and figures in early modern (17th and 18th century) Western philosophy. At the same time, it is an introduction to topics and debates that have proved to be of lasting interests, which still pose central challenges for our attempts to understand who we are, what the external (corporeal) world is, and what connection there is between the human mind and the outside world.

We will study the doctrines of five or (time permitting) six philosophers whose thought has had a great lasting impact on subsequent philosophy and on subsequent intellectual developments more generally: Descartes, Locke, Berkeley, Hume, Kant, and (time permitting) Spinoza. We will focus our attention mostly on the answers that these philosophers gave to crucial questions in theoretical philosophy (metaphysics and epistemology) such as the following: Can we prove that there is a real world outside the mind, or could we always be dreaming (or be living in the Matrix) for all that we can tell? Is the mind identical to the brain, or are mind and body two different substances? Can we prove that God exists? How can we know mathematical truths about numbers or...
