This is a required course for first-year MTSC graduate students. Students gain knowledge and learn key skillsets outside of their technical course work needed for success in their PhD program and beyond. MTSC711 follows on the topics learned in MTSC710 to broaden the professional development of materials science PhD students. MTSC765 Electronic Materials and Devices - Organic and Inorganic

The course introduces the electronic and optical processes in organic molecules and polymers that govern the behavior of practical organic optoelectronic devices. The course begins with an overview of fundamental science of electronic materials and devices. We then discuss their optoelectronic properties of organic molecules, including topics from photophysics, charge transport and injection. Emphasis will be equally placed on the use of both inorganic and organic electronic materials in organic electronic devices.

 PHIL 155H.001 | Truth and Proof: Introduction to Mathematical Logic

Deductive logic, our subject, is the study of one type or species of good argument. We will use formal tools to more precisely characterize and investigate that species, in which the conclusion of an argument follows from certain premises simply in virtue of the form of the various statements involved. We will progressively uncover and study several distinct aspects of form that are relevant to such patterns, starting with what is called truth-functional logic and moving on to quantificational logic. One concern throughout the course will be whether and how we can rigorously prove that a conclusion follows (or doesn't follow) from a group of premises.

PHYS 118H.01F | Introductory Calculus-based Mechanics and Relativity
MWF, 9:05 am - 9:55 am. Instructor(s): Amy Oldenburg. Enrollment = 24.

PHYS118 is a calculus-based introduction to Classical Mechanics. The course covers motion and kinematics in one and two dimensions, forces and Newton's laws of motion, work-energy and conservation laws, frames of reference and Einstein's theory of special relativity, rigid-body rotations, rolling, static equilibrium, and oscillations and waves.

The honors version of this course is differentiated by requiring a final project and presentation. Early in the semester, each honors student will identify a project of interest and submit the idea to the instructor, who will evaluate and discuss changes or other details with the student to finalize the curriculum for the semester. Suitable project choices will integrate multiple topics covered in the course and will require a detailed description and

a brief literature review of relevant papers. A computational aspect is highly encouraged.

TITLE: Planning the Night

IDEAS IN ACTION GEN EDS: RESEARCH

COURSE DESCRIPTION

As societies have urbanized and globalized, daytime activities have increasingly encroached on the night. These changes hold significant ramifications for public health, social equity, and urban ecology, among other things. Yet many of the activities that take place overnight have long been essential to the functioning of daytime societies: truckers, cleaners, snow removers and sidewalk-salters work the nights to ensure our cities are stocked, cleaned, and greased by day. At the same time, urban night-life has incubated cultural transformations and localized `culture wars.¿ This course will introduce students to foundational urban planning concepts through the lens of `nightology,¿ examining the ways in which everything from environmental regulations and zoning

PLCY 061H.001 | Policy Entrepreneurship and Public/Private/Non-Profit Partnerships

MW, 1:25 pm - 2:40 pm. Instructor(s): Daniel Gitterman. Enrollment = 24.

This seminar will define a policy entrepreneur and examine strategies used by policy entrepreneurs to achieve policy change or innovation in the policy making process. This course also aims to explore ways that public, private, and non-profit sectors collaborate to address problems that cannot be solved by one sector alone. There is growing recognition that sustainable solutions to some of the most complex challenges confronting our communities can benefit from these collaborative or ¿intersector¿ approaches.

FIRST YEAR STUDENTS ONLY.

Daniel Gitterman is Duncan MacRae ¿09 and Rebecca Kyle MacRae Professor of Public Policy at UNC-Chapel Hill. He also serves as Director of the Honors

PLCY 210H.001 | Policy Innovation and Analysis

MW, 10:10 am - 11:40. Instructor(s): Fenaba Addo. Enrollment = 24.

This course will introduce students to public policy as a discipline and the policy analysis process. The process involves defining a public problem and understanding stakeholders and their perspectives; describing public problems with quantitative data; understanding market failures and other rationales for government involvement; selecting criteria relevant for decision-making; constructing policy alternatives; evaluating the different alternatives against the stated policy criteria; and making and communicating a recommendation. This is a research-based and communication-intensive course, which requires the completion of a policy brief in several, iterative steps. The course incorporates current events and relevant case studies to motivate and explain the policy analysis process.

POLI 435H.001 | Government and Politics of Latin America
TR, 9:30 am - 10:45 am . Instructor(s): Jonathan Hartlyn. Enrollment = 24.

This course explores several issues central to democracy and development in Latin America. With a wave of democratization that began in 1978 and peaked in the mid-1990s, Latin America is experiencing the most prolonged and extensive period of democratic politics in its history, though along with other world areas, it is currently also experiencing both democratic erosion and outright authoritarian regression. We will engage with topics such as analyzing the implications of different types of transitions to electoral democracy, the search for justice following human rights violations during previous military regimes or due to civil conflicts, why sustained reductions in poverty in one of the world's most unequal regions has been so difficult, and how problems with democratic representation and challenges of corruption, accountability and citizen insecurity have led to different types of populist regimes in the region. The course will combine theory and evidence from comparative studies as well as drawing on case studies of selected countries, examining their similarities and differences. It is aimed at students with some prior knowledge of the region or the study of comparative politics.

Transatlantic Politics of Climate Change

This course is reserved for TAM (Transatlantic Masters) students. TAM students please contact tam@unc.edu for enrollment. All other students require Instructor Consent.

The course focuses on comparative approaches to climate policy in the European Union (EU) and the United States (US). Initial attention is given to the

science underlying climate change and global climate change policies. The course then addresses the evolution of environmental, energy, and climate policy in the EU and US. EU member state and US state-level policies are also addressed. In addition to examining concrete policy outputs, analysis of the underlying political processes producing policies will be a key component.

POLI 890: Directed Readings in Political Science
Race, Geography, and Capital Punishment
1.5 credits per semester; Fall 2024 and Spring 2025
(Note: Enrollment in both semesters is required.)

This research seminar will focus on the generation of publishable research relating to the US death penalty system since 1972. The professor will supply two unique databases, one on homicides in the US from 1976 to 2021 and one on death sentences imposed from 1972 to present. The professor will also supply a template for a set of analyses relating to patterns of use of the death penalty per 100 homicides previously accomplished for certain states. The class will work together and in small groups to revise these analyses into chapters of a book for publication and into a series of reports for publication focused on individual states. We will begin with a review of the relevant literature and by getting familiar with the relevant data sources. We will then break into

NSCI 222H.001 | Learning

TR, 11:00 am - 12:15 pm. Instructor(s): . Enrollment = 24.

This course is designed to introduce the student to the topic of animal learning and behavior. We will consider Pavlovian or Classical learning, operant learning, and the role of learning in drug abuse and dependence. Students will acquire knowledge of the procedures used to study learning, the ways that learned behaviors are expressed, and theories that have been proposed to explain how learning is represented in memory. Because neuroscience has had such a tremendous impact on our understanding of learning, memory, and behavior, we will also consider new findings from neuroscience that have allowed an understanding of the underlying brain substrates.

PREREQUISITE: NSCI 175 or PSYC 101.

PSYC 058H.001 | The Psychology of Mental States and Language Use
TR, 2:00 pm - 3:15 pm. Instructor(s): Jennifer Arnold. Enrollment = 24.
As adults we constantly make judgments about other people's beliefs, desires, goals, knowledge, and intentions from evidence like eye gaze and inferences from their words and actions. These judgments together can be called mindreading, or theory of mind (where 'theory' refers to the theory someone might hold about another's mental state, not a scientific theory). This information is known to guide some aspects of language use -- for example, you wouldn't ask someone to hand you 'that book' if they don't know it exists. But sometimes you might ignore what someone else does or does not know -- for instance asking someone for 'the red book' when that person is sitting in front of two red books. This course examines how children, adults, and individuals with autism infer other people's mental states, and how they use it to guide decisions during speaking and understanding. This seminar will follow a discussion format.

Instructor: Dr. Kenneth Bollen (001)

Prerequisites: Prior introduction to statistics, including multiple regression.

TITLE: September 11: Origins, Consequences, and Where Do We Go from Here

IDEAS IN ACTION GEN EDS: FY-SEMINAR

COURSE DESCRIPTION
This first-year seminar will reflect upon the September 11 terrorist attacks in the United States, exploring how the terrorist attacks occurred and why the U.S. intelligence community and policymakers failed to anticipate and prevent them as well as the subsequent effects on the United States, the Middle East, and the world. The instructor, a former intelligence analyst, will lead students in discussions and in-class exercises to encourage critical analysis of the implications of terrorism, particularly on United States national security. A variety of assignments will require students to assess the causes and results of American national security decisions and alternative decisions that might have been made, supported with research and evidence.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2024 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 22, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS

This course provides a general overview of the role of history in public policy, the policymaking process, and the substance of major domestic and global public policy challenges. It exposes students to the conceptual and analytical perspectives necessary for understanding and playing a direct role in policy making. This course will illuminate policy and political challenges in areas such as tax policy, social policy, education policy, health policy, foreign policy, and homeland security. We will explore the inherent tensions that emerge between good {politics} and good {policy} in a number of these substantive policy areas. Honors students will pay particular attention to the role of politicians (elected officials) and experts (policy researchers) in the making of public policy. Students will work to develop their skills in effective oral and written communication, including making oral arguments, presenting research findings, and writing for policy audiences.

Course Title: Development and governance in Fragile and Conflict Affected Countries (FCAS). With focus on West African Sahel.

Background

¿ According to the World Bank, about two billion people now live in conditions of extreme fragility, conflict and violence (FCV), also known as fragile and conflict-affected states (FCAS). By 2030, the Bank projects that about 59% of the world's extremely poor people will live in FCAS such as the West African Sahelian countries. Most countries in Sahel have experienced international military interventions, within United Nations or other frameworks. None of Sahelian countries attained most of the MDGs by 2015 but all aspire to attain the SDGs by 2030. The FCAS have generated intense policy and scholarly debates in recent years.

¿ What are the historical roots of fragility, conflict and violence in Sahel? How changing international approaches to aid and peacebuilding have helped in Sahel? How do democratic governance, socioeconomic inclusion, justice and security have evolved in the region? What insights do current social and economic

This is a course about American policies and actions in Asia from the beginning of the country through the present. In order to help students understand the American role, the course will cover major developments in Asia itself during the period. The first third of the course will cover the period from roughly 1800 through the Second World War, ending in 1945. The middle third of the course will cover the Cold War period from 1945 through about 1990, and

the final third will cover the past 30 years. Professor Blair is a former senior leader in the U.S. intelligence community and armed forces with extensive experience in Asia. Classes will include lectures, presentations by students, class discussions and guest speakers. The objective of the course is for students to understand the aspects of American policies in Asia that have endured over the decades, and the aspects that have changed; successes in American policies and actions and mistakes; the roles of national interests, domestic imperatives, and individual leaders in the formation and execution of policy.

RELI 073H.001 | From Dragons to Pokemon: Animals in Japanese Myth, Folklore and Religion
TR, 2:00 pm - 3:15 pm. Instructor(s): Barbara Ambros. Enrollment = 24.
This seminar examines the cultural construction of animals in Japanese myth, folklore, and religion. We will discuss various kinds of animals: those that occur in the natural world, those that are found in myths and folklore, and those that have appeared in popular media such as animation. We will explore how images of various animals were culturally constructed as tricksters, gods, monsters, or anthropomorphic companions; how animals were ritualized as divine, demonic, or sentient beings in Buddhism, Shinto, and folk religion; and how animals could serve as metaphors that embodied collective ideals or anxieties. Most of our readings will focus on primary and secondary texts from the Japanese tradition (in English), but we will also read theoretical texts on human-animal relationships and historical studies on animals in the larger Asian context. We will also view and analyze Japanese films, both anime and documentaries, that deal with animals and environmental issues.

TR, 2:00 pm - 3:15 pm. Instructor(s): Julianne Hammer. Enrollment = 24.

This course explores norms, discourses and practices related to gender and sexuality in Muslim societies and communities in their historical dimensions and contemporary expressions. We focus on the link between religion and gender through exploration and analysis of foundational religious texts, legal interpretations, and religious practices in diverse Muslim contexts and consider the definitions of and challenges to gender and sexual norms. The course emphasizes the interplay of historical developments and contemporary expressions and foregrounds the agency of Muslim women in assessing, challenging, changing and/or preserving their roles in Muslim societies. It relates the study of women and gender in Islam to the larger fields of women in religion(s) and women and gender studies.

Dr. Julianne Hammer is a professor in the Department of Religious Studies at UNC. Hammer previously taught at Elon University, the University of North

<p>In this seminar, we will examine a range of literature related to the history of the self, from more theoretical works to specific texts in the history of Judaism and Christianity that shed light on changing conceptions of the individual, agency, emotion, and cognition. The goal will be to move beyond common dichotomies between flesh and spirit, body and mind, to arrive at more embodied, situated, and interactive modes of describing the functioning of the self in ancient literature. The focus will be on biblical and ancient Jewish texts, but students from a variety of different fields are welcome to join, bring their expertise to bear on the topic, and focus on research in their respective areas.</p>

TITLE: What Language Do Forests Speak?

IDEAS IN ACTION GEN EDS: FY-SEMINAR; FC-AESTH or FC-KNOING

COURSE DESCRIPTION
You may already have read that trees communicate with each other, or that forests are complex networks of resource exchange. But have you ever considered the place of language in plant life? While forests may not exactly think in a language like English (or Portuguese), in this course, we will ask how different cultures have tried to relate to forests through language. By focusing specifically on forests in Portugal, Brazil, and Angola, we will study how poets, novelists, filmmakers, and activists in the Portuguese-speaking world have created different (but interrelated) literatures of the forest, and what we can learn about their cultures, their history, and their entanglements with vegetable worlds through these texts and images. Each week a short essay on

TITLE: French Coastal Ecologies

IDEAS IN ACTION GEN EDS: FY-SEMINAR; RESEARCH

COURSE DESCRIPTION

In this course, we will examine how French topography, in particular coastal topography, has had an impact on French cultural production. A central feature of France, the coastline extends for 5834 kilometers and faces four marine basins, each with their distinctive coastal and offshore characteristics: the Southern edge of the North Sea, the English Chanel, The Atlantic, and the Mediterranean. I propose that we approach the French coast using various lenses: mapping the coastline will be our first focus. From there, we will study selected historical events such as invasions and conquests, as well as contemporary migrations. This will lead us into examining how the coast is represented in French visual culture, mainly paintings and films, as well as in literature. A

SPAN 261H.001 | Advanced Spanish in Context

MWF, 11:15 am - 12:05 pm. Instructor(s): Helene M de Fays. Enrollment = 10.

Spanish 261H is a fifth semester course that uses a variety of texts (literature, movies, newspaper articles, speeches, and essays) as a basis for reviewing grammatical concepts, developing writing competency, refining analytical skills, and improving overall communication abilities in Spanish. Through work on authentic and original texts, this course continues to focus on refining the students' language skills, as well as further their developing critical analytical capacities. With the readings and films, students will explore their socio-historical context and analyze the application of different linguistic structures as tools employed to create meaning and convey a message. Students will be expected to do a significant amount of reading and writing in Spanish 261H.

Note: This course is the prerequisite for all the Spanish minors and majors at UNC. Students may not receive credit for both SPAN 261 and SPAN 267. This

SCLL 100H.001 Foundations of Civic Life & Leadership							
, . Instructor(s): Jason Roberts. Enrollment = 24.							
This course serves as a gateway to the SCiLL minor. This interdisciplinary course provides a foundation for understanding the origins of and the big questions surrounding civic life and leadership. Part I of the course uses classic texts in politics, philosophy, and literature to examine the role of the state in society and the tensions that exist between individual freedom and the power of the state to keep order. Part II focuses on the founding of the United States of America, including primary documents, in order to understand the unique elements of the United States experiment in democracy. Part III applies the lessons of Parts I and II to a set of controversies and tensions in modern civic life such as reproductive rights, free speech, religious freedom, and crime and punishment. The assignments in this course include weekly responses to the readings in advance of classroom meetings, scheduled in-class debates, and a variety of writing assignments. Participation in class discussion and debates, including the ability to provide evidence for opinions that students both agree and disagree with, are all crucial to this course, as indeed they are crucial to civic life in a democracy. SOCI 089H.001 | Gender Equity in STEM

TR, 12:30 pm - 1:45 pm. Instructor(s): Lauren Valentino. Enrollment = 24.

Although women now attend and graduate from college at a higher rate than men in the US, they remain underrepresented in science, technology, engineering, and mathematics (STEM). This course explores the causes and consequences of why women & other gender minority individuals & are less likely to pursue education and careers in the STEM fields. To do so, we will draw on sociological insights from the study of gender, education, work and occupations, and science and technology studies. Throughout the course, students will engage with social science research as well as contemporary news articles, films, and podcasts on these topics. They will also have the opportunity to meet experts who actively work on promoting diversity in STEM as well as established women and other gender minority individuals who have pursued STEM careers. This course is open to students of all backgrounds, majors, and genders.

MW, 9:30 am - 10: 45 am. Instructor(s): Jim Kitchen. Enrollment = 50.

The goals of this course are to give the students a broad understanding of the field of entrepreneurship and to introduce the important tools and skills necessary to create and grow a successful new venture. As an undergraduate at UNC, Jim learned how to create and grow companies. After successfully selling his tour operation business that he started in college he built a successful commercial real estate investment firm and is an active consultant and investor in numerous early startup ventures. Jim has an MBA 35 seats reserved for Business Students; 15 Seats for Non-Business Students (course not available for First year students). This course WILL NOT be available for request via the Non-Business Student Request form in August. BUSI 507H.001 | Sustainable Business and Social Enterprise

Students will learn how to apply full triple bottom line sustainability in business to drive simultaneous improvement of impacts on people, the environment and our economy. They will explore how business fits into the greater sustainability landscape and the importance of cross-sector collaboration and

partnership. This course concentrates on sustainability in established businesses of all sizes (multinational, regional, local, family, etc.), rather than starting new entrepreneurial ventures. Students will learn how to evaluate existing businesses and industries using ESG metrics (environment, social and governance), the triple bottom line framework (TBL = simultaneously improving impact on people, planet, and profit), lifecycle assessment, stakeholder understanding and other timely standards/frameworks. Work will compare how established businesses address sustainability incrementally versus using it to innovate, and how those companies market sustainability and are viewed within existing indices and rating systems. Learning will emphasize driving profitability through addressing current global social and environmental challenges highlighted by the United Nations Sustainable Development goals;

BUSI 533H.001 | Supply Chain Management

TR, 9:30 am - 10: 45 am. Instructor(s): Michael Beeler. Enrollment = 30.

A supply chain is comprised of all the parties involved in fulfilling a customer request. The integrated management of this network is a critical determinant of success in today's competitive environment. Companies like Amazon, Zara, and Dell are proof that excellence in supply chain management is a must for financial strength and industry leadership. With increasing competition around the globe, supply chain management is both a challenge and an opportunity for companies. Hence a strong understanding of supply-chain management concepts and the ability to recommend improvements should be in the toolbox of all managers.

This course is designed to be of interest not only to students wishing to pursue careers in operations and supply chain management but also to those interested in careers in marketing (especially brand and channel management) and consulting. The course is also useful to those students who would like to pursue careers where they will be providing external evaluations of supply chains (e.g. in investment, financial analysis) and those with entrepreneurial Upper-level BUSI courses are not available for FYS.

Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met, error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in early August. If you are not waitlisted, you will not be allowed to enroll.

This course explores the critical role of governance for effective nonprofit organizations. In a 21st century context of rapid social and economic change, nonprofit organizations require leaders that can adapt quickly and be accountable to multiple stakeholder groups. Board roles and responsibilities, governance structure, relationships between the board and CEO and board effectiveness are topics that will be explored. The course will include readings, lectures, case studies, discussions, individual and group projects and guest presentations. By the conclusion of the course, students will have a thorough understanding of the challenges and responsibilities of nonprofit board leaders and their unique role as boundary spanners in contemporary American life.

Our online course is hosted through Canvas. All required coursework is completed online, asynchronously (pre-recorded lectures). During the semester office hours will be announced, with the option to meet weekly with Dr. Pittman either in-person (Genetic Medicine Building) or online. I will teach 3 sections this semester: Section 001 ; Lecture (Online): everyone taking the course must be enrolled. Sections 401 and 402 ; Lab (online) you must enroll in 1 lab section. For all class sections: exams, quizzes and assignments remain online. I will teach 2 lab sections this semester. Register for either lab section, they are equivalent. Both lab sections will be taught online, asynchronous. The lab is required; you will receive 1 combined grade for lab + lecture (same as this semester).

Bios 500H is an introductory course in probability and statistical inference designed for the background and needs of BSPH Biostatistics students.

Topics include survey sampling, descriptive statistics, design of experiments, correlation, probability, confidence intervals, tests of hypotheses, 2-way tables, chi-square distribution, power, ANOVA, non-parametric tests, and linear regression. A small class size will allow opportunity for more in-depth treatment of biostatistics topics.

In addition to traditional introductory statistical concepts, students explore current controversies, ethical questions, and common errors in the medical literature through a variety of readings and a project. Students will be able to produce straight-forward statistical graphs and conduct commonly used analyses using SAS software. Emphasis will be placed on understanding the underlying mathematical concepts in biostatistics, developing SAS programming skills and interpreting results clearly for a non-statistical audience in writing.

During early registration, only BIOS students will be allowed to register. If you are a NON-BIOS student interested in this course, please add yourself to the waitlist in Connect Carolina - you do not need to contact the instructor. Because this is a required course for some incoming biostatistics students who register in the summer, we will not have any information about the availability of seats until just before classes start. We may not be able to take students off this waitlist until mid-August, even though there appear to be open seats in Connect Carolina. We enroll students with this priority: biostatistics students, students in the SPH, students outside the SPH, so the waitlist priority may not reflect the order that students are removed off the waitlist. While we do our best to accommodate interested students, in past semesters, students with lower priority were not able to enroll in the course. *Undergraduates can only be on one waitlist at a time.

During early registration, only BIOS students will be allowed to register. If you are a NON-BIOS student interested in this course, please add yourself to the waitlist in Connect Carolina & you do not need to contact the instructor. We will not have information about the availability of seats until just before classes start. We may not be able to take students off this waitlist until mid-August, even though there appear to be open seats in Connect Carolina. We enroll students with this priority: biostatistics students, students in the SPH, students outside the SPH, so the waitlist priority may not reflect the order that students are removed off the waitlist.

Course Description: This course provides an introduction to the field of computational toxicology and exposure science. Students will be equipped to understand databases and tools that can more efficiently evaluate chemical-biological and chemical-disease relationships. Students will be expected to use excel and R/Rstudio, and run script as either a gentle `welcome; to the coding environment, or advanced script to further their baseline knowledge. The course is designed for students in public health, toxicology, exposure science, chemistry, epidemiology, and related disciplines.

Prerequisites: Basic knowledge of environmental science, chemistry, and biology is required, familiarity with excel and basic data software, and students are required to have some level of experience with R/Rstudio. Students must be willing to run R/Rstudio and other example coding packages, with start-up script provided for, and build upon their baseline skillset in computational analyses. We are welcoming to both wet and dry lab students, and will accommodate varying levels of familiarity with coding.
