HIST 516H.001 | Historical Time
TR, 9:30 am - 10:45 am . Instructor(s): Jay Smith. Enrollment = 24.
This course explores some, though not all, of the many ways in which historians and other students of the past, particularly in the modern western world, have conceptualized historical time. The chief objective of the course is to increase awareness of, and enhance students¿ abilities to identify, the biases and hidden assumptions that underlie all historical narratives and accounts of change over time.

Most historians would agree that the underlying object of historical study is change¿when changes occurred, why they occurred (or failed to occur), how they occurred, the speed with which they occurred, and the implications of those changes for individuals, communities, nations, or the globe. Anyone who has constructed a timeline understands, however, that any narrative of historical change omits some facts and highlights others. What logic(s) determine where such timelines begin and end? Why are some timelines linear while others are jagged, circular, or even motionless? What counts as an event? Does historical

HNRS 330.001 | Is Dinner "Sustainable" - A Human Dilemma (The Honors Carolina Global Food Program Seminar)
TR, 3:30 pm - 6:00 pm. Instructor(s): James Ferguson / Samantha Buckner Terhune. Enrollment = 15.
"Take a cooking class in college and get credit? Sign me up!¿ This used to begin a 5 minute- to 2- hour conversation on Honors 330.001, but no more. As an example, we cite a paper topic from last semester, ¿Can growing seaweed kelp the world? A deep dive into the underwater world of macroalgae¿. The paper was lavishly illustrated by undersea images taken by the author. When we first offered the class in 1997, it was a slightly naïve and timid enquiry into food and culture. Since 9/11/2001, the economic meltdown in 2008 and recovery since, and the latest Farm Bill, developing and sustaining a vital interest in the sourcing, preparation, consumption, sharing, and preservation of our daily bread has become an urgent concern for us. If one cannot eat sustainably there is no point in worrying about finance. Malthus will be proven correct. Then came COVID 19 and the armed conflicts in Gaza and the Ukraine. The concerns they have fostered will nuance but not overshadow our course direction for fall 2024.
We begin our trajectory by introducing scientific method and health affairs through the complex food studies prism by considering nutrition, eating

HNRS 350.001 | Learning the Art of Medicine
T, 3:30 pm - 4:30 pm. Instructor(s): Rick Stouffer. Enrollment = 16.
This course is designed to supplement knowledge obtained through the traditional pre-medical curriculum in order to enhance students¿ development as health care providers. It has five objectives:
1) To introduce students to non-biological factors that affect the health of individuals and society. Understanding the social situation of your patient, including environmental, financial and familial factors, is important for the effective practice of medicine. Just to give one example of the importance of understanding these factors: studies have shown that patients do not take up to one third of medications that are prescribed and implement only a small portion of lifestyle changes (e.g. dietary changes or smoking cessation). Unfortunately, physicians tend to focus on what happens in their offices and on treating only the biological factors contributing to disease. A better understanding of a patient¿s social situation is necessary if the therapies that are discussed in the physician¿s office are to be implemented once the patient goes home.

HNRS 390.001 | Narrative and Medicine
W, 2:30 pm - 5:00 pm. Instructor(s): Terry Holt. Enrollment = 20.
This seminar explores the role of narrative in medicine from two sides: the patient¿s experience of illness, and the caregiver¿s experience of providing for the sick. As a writing workshop, this course offers students a supportive environment in which to explore their own experiences and refine their writing skills. Pandemic conditions permitting, it provides an opportunity for service work in a variety of clinical settings, in which students will have a chance to participate in medical care. (Please note that each student will be responsible for arranging to perform volunteer work at UNC Hospitals, and that these arrangements must be completed on line over the summer, usually in June; deadline will be communicated to registered students as soon as course registration

is set.) Taught by a clinician-writer with years of experience in medical care, professional publication, and workshop instruction, this course offers a rare opportunity to learn from a highly skilled professional engaged in the central concerns of his work.

TITLE: Relational Leadership

COREQUISITE: IDST 190L-401: Data Literacy Lab

COURSE DESCRIPTION
This course is designed to expose to students to the principles of relational leadership¿ a human-centered approach to working better together that prioritizes the quality of our relationships as a driving force that increases collaboration, equity, and impact across health systems and communities. Students will apply the relational leadership framework to develop tangible skills for advancing teamwork, communication, collaborative decision making, psychological safety, and trust. Students will have interactions with multiple leaders in healthcare, community, and academic spaces, building a network of community while also focusing on their individual growth in leadership. Both professors will share their application of relational leadership as they have

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for

MATH 231H.001 | Calculus of Functions of One Variable I
MWF, 11:15 am - 12:05 pm; Recitation: T, 3:30 pm - 4:20 pm. Instructor(s): Ivan Cherednik. Enrollment = 35.
Math 231 is designed to provide a detailed introduction to the fundamental ideas of calculus. It does not assume any prior calculus knowledge, but the student is expected to be proficient working with functions and their graphs as well as manipulating variable expressions and solving equations using algebra.
This is the Honors section of Math 231. It offers a more demanding and deeper treatment than the regular sections as well as more involved applications. There will be more emphasis on understanding theory than in other sections, and students will be expected to understand and reproduce proofs of theorems and formulas. In addition, this section will cover extra topics, including the epsilon-delta definition of limit. Applications will be more involved and will sometimes involve real data. Homework will be more challenging, with more emphasis on creative problem solving and less emphasis on drill. Students will be expected to complete a final project.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for

MATH 233H.001 | Calculus of Functions of Several Variables
MWF, 12:20 pm - 1:10 pm; Recitation: R, 3:30 pm - 4:20 pm. Instructor(s): Emily Burkhead. Enrollment = 35.
Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

To register for this course, you should let Professor Sawon know your name and PID at the first class session. Note that registering for MATH294 is entirely optional: you don't have to register for MATH294 to participate in these sessions and/or the competitions. In particular, if you don't anticipate attending every week, it would be better not to register. Please let me know by email (sawon@email.unc.edu) if you want to participate and are unable to attend the first session.

Math 294 will be held in Phillips 330, the Math Lounge, Fall 2023.

MWF, 11:15 am - 12:05 pm. Instructor(s): Mark McCombs. Enrollment = 35.
Logic and proofs, Sets and Functions, Number theory, Induction, Counting, Discrete probability, and Relations (Chapters 1,2,4,5,6,7 and 9 from Rosen's Discrete Mathematics text).
This is the honors section of math 381. The usual course topics will be treated in a deeper and more demanding manner than in the regular sections. In particular, we will go through strategies for proofs very carefully (Sections 1.7 and 1.8, plus other material from the instructor).
PREREQUISITE: MATH 232 OR 283.

Mark McCombs is a Teaching Professor of Mathematics. He earned his B.S., M.S., and M.A.T. degrees from the University of North Carolina at Chapel Hill. He

The real numbers, continuity and differentiability of functions of one variable, infinite series, integration. This honors section will explore the topics listed above in greater detail, and additional topics, such as Fourier series and their application, are likely to be covered. Moreover, assignments of greater depth will be given.

PREREQUISITES: MATH 233 AND 381. A GRADE OF A- OR BETTER IN STOR 215 MAY SUBSTITUTE FOR MATH 381.
FIRST YEAR STUDENTS MAY REGISTER WITH INSTRUCTOR PERMISSION ONLY.

Algebraic Curves and Riemann Surfaces

Pre-requisites: Math 523 and Math 550
Recommended pre-requisites: Math 577 and Math 578

This is a topic course that will introduce theory of Algebraic curves and Riemann surfarces at undergraduate level. We will be primarily working with "Algebraic Curves and Riemann Surfaces" of Rick Miranda and "Algebraic Curves" of William Fulton. Fundamental notions of Complex Analysis and Topology are required and the theory of Linear algebra recommended. Algebraic curves are best encountered for the first time over the complex numbers, so we will introduce the theory of Riemann Surfaces centered around complex charts and meromorphic functions. Later we introduce the basic language of algebraic geometry ie rational functions, divisors, sheaves, cohomolohy, Zarisky topology. We will state main theorems for algebraic curves such as Riemann Roch for

This is a required course for first-year MTSC graduate students. Students gain knowledge and learn key skillsets outside of their technical course work needed for success in their PhD program and beyond. MTSC711 follows on the topics learned in MTSC710 to broaden the professional development of materials science PhD students. Students work to develop an Individual Development Plan, to understand the variety of career paths available for PhD-holders, and to practice research presentations.
Grading status: H/P/L/F.

This is a required course for all Materials Science students in fall and spring semesters of years 2-5 of their doctoral program. The course tracks attendance at the required APS departmental seminars. Attending departmental seminars is an important component of training for MTSC doctoral students. Engaging in the seminars will help students gain a working knowledge of a variety of research areas important to their doctoral research.

MTSC765 Electronic Materials and Devices - Organic and Inorganic

The course introduces the electronic and optical processes in organic molecules and polymers that govern the behavior of practical organic optoelectronic devices. The course begins with an overview of fundamental science of electronic materials and devices. We then discuss their optoelectronic properties of organic molecules, including topics from photophysics, charge transport and injection. Emphasis will be equally placed on the use of both inorganic and organic electronic materials in organic electronic devices.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

TITLE: Music and Women's Rights

IDEAS IN ACTION GEN EDS: FY-SEMINAR; FC-POWER; RESEARCH

COURSE DESCRIPTION
This seminar is about the protest songs and history of the First and Second Waves of American feminism, from the Seneca Falls Convention in 1848 ¿ where women declared their equality with men and called for women¿s right to vote ¿ to the passage of Roe v. Wade and the Equal Rights Amendment in the 1970s. Issues for discussion include the intersectionality of women¿s rights and civil rights movements.

Focusing on the period following the 9/11 terrorist attacks, this course explores the U.S. government¿s use of hip hop as a form of people-to-people diplomacy, the interaction of citizens of different countries meant to establish dialogue, shape public opinion, and influence policy. At heart, this course is about the intersection of music and power. We will explore the power of music to bridge cultural divides, facilitate understanding, and build community. We will also seek to understand the fraught power relationships¿between art and the state and between the United States and the international community¿revealed in the practice of hip hop diplomacy.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

PHIL 155H.001 | Truth and Proof: Introduction to Mathematical Logic
TR, 3:30 pm - 4:45 pm. Instructor(s): Sarah Stroud. Enrollment = 24.
Deductive logic, our subject, is the study of one type or species of good argument. We will use formal tools to more precisely characterize and investigate that species, in which the conclusion of an argument follows from certain premises simply in virtue of the form of the various statements involved. We will progressively uncover and study several distinct aspects of form that are relevant to such patterns, starting with what is called truth-functional logic and moving on to quantificational logic. One concern throughout the course will be whether and how we can rigorously prove that a conclusion follows (or doesn¿t follow) from a group of premises.

Assessment will be via frequent problem sets, which we will prepare for by using significant class time to work together on sample problems. The required textbook is Deductive Logic by Warren Goldfarb (Hackett Publishing).

This course requires a recitation section.
ALL 200 seats are reserved for incoming first-year students, who'll be registering this summer, until 11:59pm on Sunday, August 4, 2024.

To provide a fair and equitable registration experience for all incoming first-year students, all seats are currently managed by the Registrar. On the morning of Monday, August 5th, any remaining reserved seats will be released to the general undergraduate student population. That means that, on Monday, August 5th (and beyond), any undergraduate student--incoming first-year or not--may enroll in any open seat without restriction.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

PHYS 118H.01F | Introductory Calculus-based Mechanics and Relativity
MWF, 9:05 am - 9:55 am. Instructor(s): Amy Oldenburg. Enrollment = 24.
PHYS118 is a calculus-based introduction to Classical Mechanics. The course covers motion and kinematics in one and two dimensions, forces and Newton¿s laws of motion, work-energy and conservation laws, frames of reference and Einstein¿s theory of special relativity, rigid-body rotations, rolling, static equilibrium, and oscillations and waves.
The honors version of this course is differentiated by requiring a final project and presentation. Early in the semester, each honors student will identify a project of interest and submit the idea to the instructor, who will evaluate and discuss changes or other details with the student to finalize the curriculum for the semester. Suitable project choices will integrate multiple topics covered in the course and will require a detailed description and

a brief literature review of relevant papers. A computational aspect is highly encouraged.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

TITLE: Planning the Night

IDEAS IN ACTION GEN EDS: RESEARCH

COURSE DESCRIPTION
As societies have urbanized and globalized, daytime activities have increasingly encroached on the night. These changes hold significant ramifications for public health, social equity, and urban ecology, among other things. Yet many of the activities that take place overnight have long been essential to the functioning of daytime societies: truckers, cleaners, snow removers and sidewalk-salters work the nights to ensure our cities are stocked, cleaned, and greased by day. At the same time, urban night-life has incubated cultural transformations and localized `culture wars.¿ This course will introduce students to foundational urban planning concepts through the lens of `nightology,¿ examining the ways in which everything from environmental regulations and zoning

PLCY 061H.001 | Policy Entrepreneurship and Public/Private/Non-Profit Partnerships
MW, 1:25 pm - 2:40 pm. Instructor(s): Daniel Gitterman. Enrollment = 24.
This seminar will define a policy entrepreneur and examine strategies used by policy entrepreneurs to achieve policy change or innovation in the policy making process. This course also aims to explore ways that public, private, and non-profit sectors collaborate to address problems that cannot be solved by one sector alone. There is growing recognition that sustainable solutions to some of the most complex challenges confronting our communities can benefit from these collaborative or ¿intersector¿ approaches.

FIRST YEAR STUDENTS ONLY.

Daniel Gitterman is Duncan MacRae ¿09 and Rebecca Kyle MacRae Professor of Public Policy at UNC-Chapel Hill. He also serves as Director of the Honors

PLCY 101H.001 | Making American Public Policy
MWF, 10:10 am - 11:00 am. Instructor(s): William Goldsmith. Enrollment = 22.
This course provides a general overview of the role of history in public policy, the policymaking process, and the substance of major domestic and global public policy challenges. It exposes students to the conceptual and analytical perspectives necessary for understanding and playing a direct role in policy making. This course will illuminate policy and political challenges in areas such as tax policy, social policy, education policy, health policy, foreign policy, and homeland security. We will explore the inherent tensions that emerge between good ¿politics¿ and good ¿policy¿ in a number of these substantive policy areas. Honors students will pay particular attention to the role of politicians (elected officials) and experts (policy researchers) in the making of public policy. Students will work to develop their skills in effective oral and written communication, including making oral arguments, presenting research findings, and writing for policy audiences.

Public Interest Technology refers to a set of practices to design, deploy and govern technology in ways that advance the public interest, is the definition chosen by the PIT-University Network website to describe an interdisciplinary approach that sees technology as a force for good whenever it is centered around a core of equity and individual dignity in its design, deployment, and monitoring. In doing so, the PIT movement gives us a vocabulary for thinking about how technology can erode essential rights via surveillance, hyper nudging, bias, etc. and explores some essential trade-offs for the use of technology in the public sector.

We often think of technological development, and innovation in general, as the work of a lone genius¿the Leonardos or the Einsteins, the Steve Jobs or the Elon Musks. But innovation takes much more than that: an innovation ecosystem fueled by policies that reward, protect, and support new ideas.

This course provides a broad overview of theories of technological change, innovation, and knowledge. It examines the social and policy conditions for innovation to emerge and its social impact. In the first part of the course, we will lay the foundation of what technology and innovation are and review an evolutionary approach to technical change based on the notions of competencies, dynamic capabilities, and networks. In the second part of the course, we will analyze the rationale for policies that support innovation¿such as intellectual property rights, funding for basic science, or regional clusters. We will also overview policies that limit the use of new technologies¿such as GDPR or the EU AI Act¿and show how they can positively contribute to that innovation ecosystem. Finally, we will explore the geopolitical implications of science and technology policy in the form of international cooperation or competition for technological dominance.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

TITLE: Global Politics of Climate Change

IDEAS IN ACTION GEN EDS: FY-SEMINAR; FC-GLOBAL

DESCRIPTION
This course is designed to provide an introduction to the politics of climate change at multiple levels of policy making, from global efforts down to local communities. Throughout the course, climate policy is investigated as a result of the interplay of science and politics. At each level of politics, global, regional (EU), country (US), sub-national (US states), and local (regional and city), students will have the opportunity to review existing policy approaches, explore official inter-governmental and governmental policies, and read social science analyses. In addition, at each level, a scientific expert and/or activist will visit class to interact on climate issues. Student participation is required, with the format for class meetings combining a mixture of

POLI 100H.001 | Introduction to Government in the United States
TR, 2:00 pm - 3:15 pm. Instructor(s): Timothy Ryan. Enrollment = 24.
This course is an introduction to American political institutions, political behavior, and the policy process. In this course we will discuss the origins of the current governmental system in America, the structure of the U.S. government, and how theories of American government apply to current events and problems the government and citizens face today. At the end of the course students should have a greater understanding of government, political differences, and how to be an engaged citizen in our democracy.

POLI 238H.001 | Contemporary Latin American Politics
TR, 2:00 pm - 3:15 pm. Instructor(s): Evelyne Huber. Enrollment = 24.
This course provides an overview of major topics in the study of Latin American politics. It is aimed at students with a desire to understand how Latin American societies and governments are organized, what the major problems are that these societies are facing, and what accounts for different outcomes from the point of view of the welfare of citizens. We shall examine both common traits in the region¿s history, culture, and economic, political, and social structures, and important differences between countries in these dimensions. We shall gain an understanding of the diversity of national experiences and a somewhat deeper knowledge of a few select cases: Argentina, Brazil, Chile, Uruguay, and Costa Rica.

Evelyne Huber, Morehead Alumni Distinguished Professor in Political Science, works on problems of development, democratization, and welfare states in Latin America and Europe. Her most recent books, co-authored with John D. Stephens and published by the University of Chicago Press, are entitled Development and

POLI 255H.001 | International Migration and Citizenship
W, 2:30 pm - 5:00 pm. Instructor(s): Niklaus Steiner. Enrollment = 24.
While the global movement of products, services, ideas, and information is increasingly free, the movement of people across borders remains tightly controlled by governments. This control over international migration is a highly contested issue, and it is complicated by the fact that never before have so many people had the ability to move from one country to another while at the same time governments have never had so much power to control this movement. This class explores the moral, economic, political, and cultural dimensions of this movement across international borders. The class is based on discussions (as opposed to lectures) and tackles thorny questions like: do we have an obligation to let poor people into our rich country? what constitutes persecution? how do foreigners affect national identity? how should citizenship be allocated? We will pay particular attention to the distinction between migrants who move voluntarily (immigrants) and those who are forced to flee (refugees) - is this an important distinction to make, and does one group deserve admission more than the other? No prior knowledge or experience is needed; instead, students need to be ready to dig deep into all sides of migration issues through

POLI 435H.001 | Government and Politics of Latin America
TR, 9:30 am - 10:45 am . Instructor(s): Jonathan Hartlyn. Enrollment = 24.

This course explores several issues central to democracy and development in Latin America. With a wave of democratization that began in 1978 and peaked in the mid-1990s, Latin America is experiencing the most prolonged and extensive period of democratic politics in its history, though along with other world areas, it is currently also experiencing both democratic erosion and outright authoritarian regression. We will engage with topics such as analyzing the implications of different types of transitions to electoral democracy, the search for justice following human rights violations during previous military regimes or due to civil conflicts, why sustained reductions in poverty in one of the world¿s most unequal regions has been so difficult, and how problems with democratic representation and challenges of corruption, accountability and citizen insecurity have led to different types of populist regimes in the region. The course will combine theory and evidence from comparative studies as well as drawing on case studies of selected countries, examining their similarities and differences. It is aimed at students with some prior knowledge of the region or the study of comparative politics.

Transatlantic Politics of Climate Change

This course is reserved for TAM (Transatlantic Masters) students. TAM students please contact tam@unc.edu for enrollment. All other students require Instructor Consent.

The course focuses on comparative approaches to climate policy in the European Union (EU) and the United States (US). Initial attention is given to the science underlying climate change and global climate change policies. The course then addresses the evolution of environmental, energy, and climate policy in the EU and US. EU member state and US state-level policies are also addressed. In addition to examining concrete policy outputs, analysis of the underlying political processes producing policies will be a key component.

POLI 890: Directed Readings in Political Science
Race, Geography, and Capital Punishment
1.5 credits per semester; Fall 2024 and Spring 2025
(Note: Enrollment in both semesters is required.)

This research seminar will focus on the generation of publishable research relating to the US death penalty system since 1972. The professor will supply two unique databases, one on homicides in the US from 1976 to 2021 and one on death sentences imposed from 1972 to present. The professor will also supply a template for a set of analyses relating to patterns of use of the death penalty per 100 homicides previously accomplished for certain states. The class will work together and in small groups to revise these analyses into chapters of a book for publication and into a series of reports for publication focused on individual states. We will begin with a review of the relevant literature and by getting familiar with the relevant data sources. We will then break into

NSCI 222H.001 | Learning
TR, 11:00 am - 12:15 pm. Instructor(s): . Enrollment = 24.
This course is designed to introduce the student to the topic of animal learning and behavior. We will consider Pavlovian or ¿Classical¿ learning, operant learning, and the role of learning in drug abuse and dependence. Students will acquire knowledge of the procedures used to study learning, the ways that learned behaviors are expressed, and theories that have been proposed to explain how learning is represented in memory. Because neuroscience has had such a tremendous impact on our understanding of learning, memory, and behavior, we will also consider new findings from neuroscience that have allowed an understanding of the underlying brain substrates.

PREREQUISITE: NSCI 175 or PSYC 101.

PSYC 058H.001 | The Psychology of Mental States and Language Use
TR, 2:00 pm - 3:15 pm. Instructor(s): Jennifer Arnold. Enrollment = 24.
As adults we constantly make judgments about other people¿s beliefs, desires, goals, knowledge, and intentions from evidence like eye gaze and inferences from their words and actions. These judgments together can be called mindreading, or theory of mind (where ¿theory¿ refers to the theory someone might hold about another¿s mental state, not a scientific theory). This information is known to guide some aspects of language use -- for example, you wouldn¿t ask someone to hand you ¿that book¿ if they don¿t know it exists. But sometimes you might ignore what someone else does or does not know ¿ for instance asking someone for ¿the red book¿ when that person is sitting in front of two red books. This course examines how children, adults, and individuals with autism infer other people¿s mental states, and how they use it to guide decisions during speaking and understanding. This seminar will follow a discussion format.

Title: Quantitative Methods for Making Causal Inferences

Instructor: Dr. Kenneth Bollen (001)

Prerequisites: Prior introduction to statistics, including multiple regression.

Description: Understanding cause-effect relationships is at the heart of all sciences including psychology. More broadly, we encounter causal claims in news stories, advertisements, and everyday conversations. However, numerous challenges face us when we attempt causal inferences and there are good reasons to carefully examine these claims. Confounding variables, sample selection bias, measurement error, and internal and external validity are among the issues. The goal of this course is to introduce the threats to causal inference as well as proposed solutions. Contemporary approaches to causal inferences such as

Title: Psychotherapy: Culture and Development

Instructor: Dr. M. Dalal Safa (002)

Prerequisites: PSYC 101, 210 or 215, and 250 or 260

Description: An examination of research and theory pertaining to the intersections of culture, ethnicity-race, and development. Specifically, this course focuses on identifying limitations and advances in psychological and developmental sciences toward our understanding of ethnic-racial minoritized and immigrant youth development in culturally bounded contexts (e.g., families, schools, and neighborhoods). The course is recommended for students interested in engaging in rich dialogue and self-reflection.

PSYC 518H. | Creating Digital Tools for Positive Youth Development
TR, 8:00 am - 9:15 am. Instructor(s): Andrea Hussong. Enrollment = 24.
In this upper-level course, students will learn about the interdisciplinary field of Positive Youth Development and create a digital tool to improve health, well-being, or developmental outcomes for youth through an intensive semester-long project. This course is designed so that by the end of the semester you will be able to: apply Positive Youth Development and Prevention Science frameworks to identifying points of intervention that promote youth thriving; understand design-based processes and universal design practices as key tools in creating technology-based interventions for youth; learn and apply technical skills in a single digital medium to support development of a program prototype; create a prototype tool that meets a clearly defined intervention goal for a given community-based collaborator; and present the science-based rationale behind the program created to community-based partners. This class is part of the IDEAs in Action curriculum and requires students to explore creative processes that underlie the creation of empirically-informed content and digital intervention platforms. Finally, this course aims to provide you will experiences and tools that are valued in the marketplace such as using

TITLE: September 11: Origins, Consequences, and Where Do We Go from Here

IDEAS IN ACTION GEN EDS: FY-SEMINAR

COURSE DESCRIPTION
This first-year seminar will reflect upon the September 11 terrorist attacks in the United States, exploring how the terrorist attacks occurred and why the U.S. intelligence community and policymakers failed to anticipate and prevent them as well as the subsequent effects on the United States, the Middle East, and the world. The instructor, a former intelligence analyst, will lead students in discussions and in-class exercises to encourage critical analysis of the implications of terrorism, particularly on United States national security. A variety of assignments will require students to assess the causes and results of American national security decisions and alternative decisions that might have been made, supported with research and evidence.

PWAD 101H.001 | Making American Public Policy
MWF, 10:10 am - 11:00 am. Instructor(s): William Goldsmith. Enrollment = 2.
This course provides a general overview of the role of history in public policy, the policymaking process, and the substance of major domestic and global public policy challenges. It exposes students to the conceptual and analytical perspectives necessary for understanding and playing a direct role in policy making. This course will illuminate policy and political challenges in areas such as tax policy, social policy, education policy, health policy, foreign policy, and homeland security. We will explore the inherent tensions that emerge between good ¿politics¿ and good ¿policy¿ in a number of these substantive policy areas. Honors students will pay particular attention to the role of politicians (elected officials) and experts (policy researchers) in the making of public policy. Students will work to develop their skills in effective oral and written communication, including making oral arguments, presenting research findings, and writing for policy audiences.

Course Title: Navigating State Fragility: Development and Governance in the West African Sahel.

Background
According to the World Bank, about two billion people now live in conditions of extreme fragility, conflict and violence (FCV), also known as fragile and conflict-affected states (FCAS). By 2030, the Bank projects that about 59% of the world¿s extremely poor people will live in FCAS such as the West African Sahelian countries. Most countries in Sahel have experienced international military interventions, within United Nations or other frameworks. None of Sahelian countries attained most of the MDGs by 2015 but all aspire to attain the SDGs by 2030. The FCAS have generated intense policy and scholarly debates in recent years.
¿ What are the historical roots of fragility, conflict and violence in Sahel? How changing international approaches to aid and peacebuilding have helped in Sahel? How do democratic governance, socioeconomic inclusion, justice and security have evolved in the region? What insights do current social and economic

This is a course about American policies and actions in Asia from the beginning of the country through the present. In order to help students understand the American role, the course will cover major developments in Asia itself during the period. The first third of the course will cover the period from roughly 1800 through the Second World War, ending in 1945. The middle third of the course will cover the Cold War period from 1945 through about 1990, and the final third will cover the past 30 years. Professor Blair is a former senior leader in the U.S. intelligence community and armed forces with extensive experience in Asia. Classes will include lectures, presentations by students, class discussions and guest speakers. The objective of the course is for students to understand the aspects of American policies in Asia that have endured over the decades, and the aspects that have changed; successes in American policies and actions and mistakes; the roles of national interests, domestic imperatives, and individual leaders in the formation and execution of policy.

RELI 073H.001 | From Dragons to Pokemon: Animals in Japanese Myth, Folklore and Religion
TR, 2:00 pm - 3:15 pm. Instructor(s): Barbara Ambros. Enrollment = 24.
This seminar examines the cultural construction of animals in Japanese myth, folklore, and religion. We will discuss various kinds of animals: those that occur in the natural world, those that are found in myths and folklore, and those that have appeared in popular media such as animation. We will explore how images of various animals were culturally constructed as tricksters, gods, monsters, or anthropomorphic companions; how animals were ritualized as divine, demonic, or sentient beings in Buddhism, Shinto, and folk religion; and how animals could serve as metaphors that embodied collective ideals or anxieties. Most of our readings will focus on primary and secondary texts from the Japanese tradition (in English), but we will also read theoretical texts on human-animal relationships and historical studies on animals in the larger Asian context. We will also view and analyze Japanese films, both anime and documentaries, that deal with animals and environmental issues.

RELI 185H.001 | Women/Gender/Islam
TR, 2:00 pm - 3:15 pm. Instructor(s): Juliane Hammer. Enrollment = 24.
This course explores norms, discourses and practices related to gender and sexuality in Muslim societies and communities in their historical dimensions and contemporary expressions. We focus on the link between religion and gender through exploration and analysis of foundational religious texts, legal interpretations, and religious practices in diverse Muslim contexts and consider the definitions of and challenges to gender and sexual norms. The course emphasizes the interplay of historical developments and contemporary expressions and foregrounds the agency of Muslim women in assessing, challenging, changing and/or preserving their roles in Muslim societies. It relates the study of women and gender in Islam to the larger fields of women in religion(s) and women and gender studies.

Dr. Juliane Hammer is a professor in the Department of Religious Studies at UNC. Hammer previously taught at Elon University, the University of North

In this seminar, we will examine a range of literature related to the history of the self, from more theoretical works to specific texts in the history of Judaism and Christianity that shed light on changing conceptions of the individual, agency, emotion, and cognition. The goal will be to move beyond common dichotomies between flesh and spirit, body and mind, to arrive at more embodied, situated, and interactive modes of describing the functioning of the self in ancient literature. The focus will be on biblical and ancient Jewish texts, but students from a variety of different fields are welcome to join, bring their expertise to bear on the topic, and focus on research in their respective areas.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

TITLE: What Language Do Forests Speak?

IDEAS IN ACTION GEN EDS: FY-SEMINAR; FC-AESTH or FC-KNOING

COURSE DESCRIPTION
You may already have read that trees communicate with each other, or that forests are complex networks of resource exchange. But have you ever considered the place of language in plant life? While forests may not exactly think in a language like English (or Portuguese), in this course, we will ask how different cultures have tried to relate to forests through language. By focusing specifically on forests in Portugal, Brazil, and Angola, we will study how poets, novelists, filmmakers, and activists in the Portuguese-speaking world have created different (but interrelated) literatures of the forest, and what we can learn about their cultures, their history, and their entanglements with vegetable worlds through these texts and images. Each week a short essay on

TITLE: French Coastal Ecologies

IDEAS IN ACTION GEN EDS: FY-SEMINAR; RESEARCH

COURSE DESCRIPTION
In this course, we will examine how French topography, in particular coastal topography, has had an impact on French cultural production. A central feature of France, the coastline extends for 5834 kilometers and faces four marine basins, each with their distinctive coastal and offshore characteristics: the Southern edge of the North Sea, the English Chanel, The Atlantic, and the Mediterranean. I propose that we approach the French coast using various lenses: mapping the coastline will be our first focus. From there, we will study selected historical events such as invasions and conquests, as well as contemporary migrations. This will lead us into examining how the coast is represented in French visual culture, mainly paintings and films, as well as in literature. A

SPAN 261H.001 | Advanced Spanish in Context

MWF, 11:15 am - 12:05 pm. Instructor(s): Helene M de Fays. Enrollment = 10.
Spanish 261H is a fifth semester course that uses a variety of texts (literature, movies, newspaper articles, speeches, and essays) as a basis for reviewing grammatical concepts, developing writing competency, refining analytical skills, and improving overall communication abilities in Spanish. Through work on authentic and original texts, this course continues to focus on refining the students' language skills, as well as further their developing critical analytical capacities. With the readings and films, students will explore their socio-historical context and analyze the application of different linguistic structures as tools employed to create meaning and convey a message. Students will be expected to do a significant amount of reading and writing in Spanish 261H.

Note: This course is the prerequisite for all the Spanish minors and majors at UNC. Students may not receive credit for both SPAN 261 and SPAN 267. This

SCLL 100H.001 | Foundations of Civic Life & Leadership
, . Instructor(s): Jason Roberts. Enrollment = 24.
This course serves as a gateway to the SCiLL minor. This interdisciplinary course provides a foundation for understanding the origins of and the big questions surrounding civic life and leadership. Part I of the course uses classic texts in politics, philosophy, and literature to examine the role of the state in society and the tensions that exist between individual freedom and the power of the state to keep order. Part II focuses on the founding of the United States of America, including primary documents, in order to understand the unique elements of the United States experiment in democracy. Part III applies the lessons of Parts I and II to a set of controversies and tensions in modern civic life such as reproductive rights, free speech, religious freedom, and crime and punishment. The assignments in this course include weekly responses to the readings in advance of classroom meetings, scheduled in-class debates, and a variety of writing assignments. Participation in class discussion and debates, including the ability to provide evidence for opinions that students both agree and disagree with, are all crucial to this course, as indeed they are crucial to civic life in a democracy. Students are

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Most seats in this section are reserved for incoming first-year students. The remaining seats are made available during Waves 1 and 2 and new first-year student registration sessions beginning in July.

SOCI 089H.001 | Gender Equity in STEM
TR, 12:30 pm - 1:45 pm. Instructor(s): Lauren Valentino. Enrollment = 24.
Although women now attend and graduate from college at a higher rate than men in the US, they remain underrepresented in science, technology, engineering, and mathematics (STEM). This course explores the causes and consequences of why women ¿ and other gender minority individuals ¿ are less likely to pursue education and careers in the STEM fields. To do so, we will draw on sociological insights from the study of gender, education, work and occupations, and science and technology studies. Throughout the course, students will engage with social science research as well as contemporary news articles, films, and podcasts on these topics. They will also have the opportunity to meet experts who actively work on promoting diversity in STEM as well as established women and other gender minority individuals who have pursued STEM careers. This course is open to students of all backgrounds, majors, and genders.

FIRST-YEAR LAUNCH SECTION
This class will use Python. It is suitable for those with no Python experience.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

TOPIC: History, Myth and Modern Leadership

NOTE: THIS COURSE WILL BE CANCELLED AND CONVERTED INTO AN HONORS OFFERING.

The History, Myth and Modern Leadership course is an immersive seminar designed to deepen students' understanding of leadership and increase their leadership skills. The course will use leadership examples from mythology, history, and the latest news to analyze leaders¿ actions and character. The analysis will be performed based on insightful leadership theory while providing students practical skills that will make them better leaders.

Covering a range of topics from ancient leadership philosophies and leaders to modern-day leadership theory and challenges from around the world, the course blends theoretical learning with practical application. Interactive elements such as case studies, simulations, and group discussions will enrich the

BUSI 500H.001 | Entrepreneurship and Business Planning
MW, 9:30 am - 10: 45 am. Instructor(s): Jim Kitchen. Enrollment = 50.
The goals of this course are to give the students a broad understanding of the field of entrepreneurship and to introduce the important tools and skills necessary to create and grow a successful new venture. The course is designed to simulate the real life activities of entrepreneurs in the start-up stage

of a new venture. Students, in teams, will develop a new venture concept and determine if a demand exists for their product or service. Importantly, the course facilitates networking with entrepreneurs and other students who are considering becoming entrepreneurs.

As an undergraduate at UNC, Jim learned how to create and grow companies. After successfully selling his tour operation business that he started in college he built a successful commercial real estate investment firm and is an active consultant and investor in numerous early startup ventures. Jim has an MBA

BUSI 507H.001 | Sustainable Business and Social Enterprise

Students will learn how to apply full triple bottom line sustainability in business to drive simultaneous improvement of impacts on people, the environment and our economy. They will explore how business fits into the greater sustainability landscape and the importance of cross-sector collaboration and

partnership. This course concentrates on sustainability in established businesses of all sizes (multinational, regional, local, family, etc.), rather than starting new entrepreneurial ventures. Students will learn how to evaluate existing businesses and industries using ESG metrics (environment, social and governance), the triple bottom line framework (TBL = simultaneously improving impact on people, planet, and profit), lifecycle assessment, stakeholder understanding and other timely standards/frameworks. Work will compare how established businesses address sustainability incrementally versus using it to innovate, and how those companies market sustainability and are viewed within existing indices and rating systems. Learning will emphasize driving profitability through addressing current global social and environmental challenges highlighted by the United Nations Sustainable Development goals;

BUSI 533H.001 | Supply Chain Management
TR, 9:30 am - 10: 45 am. Instructor(s): Michael Beeler. Enrollment = 30.
A supply chain is comprised of all the parties involved in fulfilling a customer request. The integrated management of this network is a critical determinant of success in today¿s competitive environment. Companies like Amazon, Zara, and Dell are proof that excellence in supply chain management is a must for financial strength and industry leadership. With increasing competition around the globe, supply chain management is both a challenge and an opportunity for companies. Hence a strong understanding of supply-chain management concepts and the ability to recommend improvements should be in the toolbox of all managers.
This course is designed to be of interest not only to students wishing to pursue careers in operations and supply chain management but also to those interested in careers in marketing (especially brand and channel management) and consulting. The course is also useful to those students who would like to pursue careers where they will be providing external evaluations of supply chains (e.g. in investment, financial analysis) and those with entrepreneurial

BUSI 583H.001 | Applied Investment Management
W, 3:30 pm - 6:20 pm. Instructor(s): . Enrollment = 15.
Application/Permission Required for this Course (see below)*
Prerequisites: 408, core-requisite: 407

This is a UBP/MBA cross-listed course that follows the second year MBA calendar. It is a course with minimal instruction, where students apply what they have learned to manage a real money portfolio, with feedback on their work from instructors.
Two consecutive terms, earning 6 credit hours OR one term, earning 3 credit hours.
Eligibility:
· Prereqs: BUSI 407 (financial accounting) and 408 (corporate finance)
W: 3:30 PM - 6:20 PM (McColl 2550)

This is a year-long course that begins in the Fall semester. The emphasis of this course will be on the decisions that must be made by, and/or for, the ultimate investor, and the analytic tools and empirical evidence that can help inform such decisions. The objective of this course is two-fold: first, to provide financial analysts with the analytical skills needed to aid such investors; and second, to help individual investors utilize and evaluate the

services offered by analysts. Students will apply the principles and techniques of Investment Management by operating as financial planners (analysts) for the Kenan-Flagler Financial Planners. This course will engage students in managing a real portfolio student managed fund.

ENROLLMENT REQUIRES APPLICATION AND PERMISSION OF KFBS.

Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met¿ error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in early August. If you are not waitlisted, you will not be allowed to enroll.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

This course explores the critical role of governance for effective nonprofit organizations. In a 21st century context of rapid social and economic change, nonprofit organizations require leaders that can adapt quickly and be accountable to multiple stakeholder groups. Board roles and responsibilities, governance structure, relationships between the board and CEO and board effectiveness are topics that will be explored. The course will include readings, lectures, case studies, discussions, individual and group projects and guest presentations. By the conclusion of the course, students will have a thorough understanding of the challenges and responsibilities of nonprofit board leaders and their unique role as boundary spanners in contemporary American life.

Course Format: Hyflex Oncampus (both formats eligible to enroll, instructor and all participant in person)
